

Pest Free Areas, and plants which must have passports in Pest Free Areas.

These additional requirements apply to movements of specified plants which can carry pests into and within Pest Free Areas (PFAs). Please check other appendices for details of ordinary plant passports that may be needed for other movements.

Everyone who moves specified plants has a responsibility to ensure that the named organisms are not moved into the PFAs whether passports are required or not. All entries are for plants intended for planting (excluding fruit and seeds) unless otherwise specified.

Areas in the UK recognised as pest free areas, in respect of harmful organism(s) listed against their names
