Appendix 2: cervical screening colposcopy management recommendations

*excludes borderline change in endocervical cells
Implementation guide: primary HPV screening

Colposcopy Examination

Abnormal

- CIN1 on biopsy or colposcopic impression
  - Recall in 12 months
    - hrHPV negative
      - Recall in 36 months
        - hrHPV negative
          - Recall in 36 months
        - hrHPV positive
          - Cytology negative or inadequate
            - Refer to colposcopy
  - hrHPV positive
    - Cytology negative or inadequate
      - Refer to colposcopy
- ≥CIN2
  - Recall in 6 months
    - hrHPV negative
      - Cytology negative or inadequate
        - Refer to colposcopy
      - Recall in 12 months
        - Cytology negative
          - Recall in 36 months
        - hrHPV positive
          - Recall in 6 months
  - hrHPV positive
    - Cytology negative or inadequate
      - Refer to colposcopy
    - Recall in 12 months
      - Cytology normal
        - hrHPV negative
          - Recall in 36 months
        - hrHPV positive
          - Cytology abnormal or inadequate
            - Refer to colposcopy
- CGIN*
  - Recall in 6 months
    - hrHPV negative
      - Cytology negative or inadequate
        - Refer to colposcopy
      - If normal colposcopy - Complete 10 year follow up
    - hrHPV positive
      - Cytology negative or inadequate
        - Refer to colposcopy
      - If normal colposcopy - Complete 10 year follow up

*Women who have been adequately treated (complete excision margins) for CGIN or SMILE
