The Environment Agency (Environmental
Permitting) (England) Charging Scheme**

**Consolidated version including
amendments up to and including April
2019**

2019 Version 1.0

We are the Environment Agency. We protect and improve the environment.

Acting to reduce the impacts of a changing climate on people and wildlife is at the heart of everything we do.

We reduce the risks to people, properties and businesses from flooding and coastal erosion.

We protect and improve the quality of water, making sure there is enough for people, businesses, agriculture and the environment. Our work helps to ensure people can enjoy the water environment through angling and navigation.

We look after land quality, promote sustainable land management and help protect and enhance wildlife habitats. And we work closely with businesses to help them comply with environmental regulations.

We can't do this alone. We work with government, local councils, businesses, civil society groups and communities to make our environment a better place for people and wildlife.

How to use the tables of charges

The tables of charges are divided into 4 Parts. The first Part contains definitions of words and terms used in the tables. The second Part is the Application Charge Table. The third Part is the Subsistence Charge Table. The fourth Part contains some ancillary tables.

The Application and Subsistence Charge Tables are divided into sub-tables for different types of activity (for example flood risk activities, water discharge activities).

The second column throughout both Tables contains the activity descriptions. Each description starting on a new line and ending with a full stop, is a separate activity and will incur its own charges as set out in the columns to the right of it.

Activities which incur the same charges are grouped together under a single "reference" in the first column, but are still separate activities.

Sometimes an application or a permit may cover a number of separate activities falling in the same or different descriptions across the Tables. Normally the charges for all these activities will be added up to make the total charge due, but there are some special rules which may apply in these cases.

SCHEDULE

Tables of Charges

PART 1

General

Interpretation

1. (1) In this Schedule –

“ammonia modelling assessment”, “dust and bio-aerosol management plan”, “emissions management plan”, “fire prevention plan”, “noise and vibration management plan”, “odour management plan” and “pests management plan” mean the assessments and plans with those titles described in guidance published by the Agency on Gov.UK;

“aquaculture discharge” means a discharge from sites for the cultivation of fish or plants (such as fish or cress farms), not containing sewage effluent;

“BAT reference document” and “emission levels associated with the best available techniques” have the meanings given in the Industrial Emissions Directive;

“category 5 sealed source” has the meaning given in “How to apply for an environmental permit (Part RSR-B1) – standard facility”, version 1, April 2010;

“charitable purposes” has the meaning given in section 2 of the Charities Act 2011;

“closed landfill” means a landfill which –

- (a) ceased accepting waste for disposal before the implementation of the Landfill Directive on 16th July 2001;
- (b) was granted a permit under the Landfill Directive and is now definitely closed; or
- (c) was not granted a permit under the Landfill Directive and is definitely closed or working towards definite closure in accordance with the transitional arrangements in article 14 of the Landfill Directive;

“combined sewer overflows” includes any overflows related to rainfall events from a sewerage network or system and any overflows from storm tank effluent discharges;

“component” means –

- (a) in relation to an activity falling within Section 6.8, a component described in the Food and Drink Component Table in Part 4 of this Schedule, or
- (b) in relation to an activity falling within Section 6.1, a component described in the Paper and Pulp Component Table in Part 4 of this Schedule;

“cooling water” means discharges of water used directly and indirectly for temperature reduction purposes that does not come into contact with any other process or effluent so as to change its content or polluting nature, and does not contain specific substances;

“domestic household” means any premises which is defined as a domestic property under section 66 of the Local Government Finance Act 1988 or any premises which is exempt from non-domestic rates under Schedule 5 to that Act;

“emergency overflow” means any authorised discharges in an emergency of sewage or trade effluent;

“existing”, in relation to an activity falling within Table 2.6 of the Table of Subsistence Charges, means an activity which has been operating for at least 2 years since the date the Agency agreed that commissioning had been successfully concluded; and “new” in relation to such an activity means one which is not “existing”;

“flood defence” means a structure built or used for flood defence purposes;

“habitats assessment” means an assessment of the risks to one or more of the following sites –

- (a) a European Site within the meaning of the Conservation of Habitats and Species Regulations 2017;
- (b) a site referred to in the National Planning Policy Framework 2018 as requiring the same assessment as a European Site;
- (c) a site of special scientific interest within the meaning of the Wildlife and Countryside Act 1981;
- (d) a marine conservation zone within the meaning of the Marine and Coastal Access Act 2009;

“high complexity” has the meaning given in Annex 1 of “How to apply for an environmental permit (Radioactive Substances Activity) Part RSR F – Charges and Declarations”, version 3, April 2018;

“inert mining waste operation” means a mining waste operation which involves the management of only inert extractive waste;

“integrated or multi product mill” means a mill producing more than one product and where a mixing calculation is required to determine the emission levels associated with the best available techniques for the installation;

“land spreading of pesticides” means all non-point source liquid discharges or disposals of pesticide washings onto land;

“land spreading of sheep dip” means all non-point source liquid discharges or disposals of sheep dip onto land;

“line” in Table 2.6 of the Subsistence Charge Table means an incineration line;

“local authority activity” means a Part A (2) activity, a Part B activity or a small waste incineration plant, in relation to which the Agency is the regulator, including by virtue of a direction made under regulation 33;

“low impact installation” means a Part A(1) installation which, in the opinion of the Agency, cannot result in emissions or there is no likelihood that it will result in emissions except in a quantity which is so trivial that it is incapable of causing pollution or its capacity to cause pollution is insignificant;

“minor variation” means an application to vary a permit which the Agency considers is of a minor technical nature;

“MWth” means the net rated thermal input of an appliance which is the rate at which fuel can be burned at the maximum continuous rating of an appliance multiplied by the net calorific value of the fuel and then expressed in MW;

“non-inert mining waste operation” means a mining waste operation which involves the management of non-hazardous non-inert or hazardous extractive waste (as well as any inert waste), but a mining waste operation which includes a Category A mining waste facility or a mining waste facility involving the management of hazardous waste is not an inert mining waste operation or a non-inert mining waste operation;

“non-sewage effluent” means, where used in Table 1.3 of the Application Charge Table or Table 2.3 of Subsistence Charge Table, an effluent which does not fall within the description of any other effluent in those Tables;

“normal variation” means an application to vary a permit which is not a minor variation or a substantial variation;

“numeric permit condition” means, in relation to Table 2.3 of the Subsistence Charge Table, any permit condition which prescribes a maximum or minimum concentration of any substance or parameter in a permitted discharge, excluding flow;

“OSM” means operator self-monitoring, whereby the operator rather than the Agency carries out routine effluent quality compliance monitoring to standards specified in permits;

“population equivalent” has the meaning given in the Urban Waste Water Treatment (England and Wales) Regulations 1994;

“rainfall related” means discharges of site drainage, groundwater and storm water, not containing sewage effluent nor pollutants containing specific substances other than iron;

“specific substances assessment” means an assessment of an application for a permit or variation of a permit, where discharges contain or are likely to contain specific substances;

“specific substances” means -

(a) in relation to Table 1.3 of the Application Charge Table –

(i) for a groundwater activity, hazardous substances (as defined by paragraph 4 of Schedule 22 to the Regulations) and / or non-hazardous pollutants (as defined by paragraph 5 of Schedule 22 to the Regulations), with the exception of discharges that only contain or are only likely to contain as their primary pollutants, ammoniacal nitrogen or ammonium and suspended solids;

- (ii) for a water discharge activity, priority hazardous substances, priority substances or other pollutants as defined by the Environmental Quality Standards Directive (EQSD) (2008/105/EC, as amended by 2013/39/EU), specific pollutants as defined by the Water Framework Directive (Standards and Classification) Directions (England and Wales) 2015 or other substances which were listed in Part 6 of the River Basin Districts Typology, Standards and Groundwater threshold values (Water Framework Directive) (England and Wales) Directions 2010;

- (b) in relation to Table 2.3 of the Subsistence Charge Table – all those substances described in paragraph (a), together with pesticides including organotins, fungicides, herbicides, polyhalogenated biphenyls, polynuclear aromatic hydrocarbons, aliphatic hydrocarbons, aromatic hydrocarbons, halogenated hydrocarbons including haloforms, alcohols, aromatic nitrogen compounds, phenolic compounds, heterocyclic hydrocarbons, esters, ethers, ketones, aldehydes, metals and metalloids, cyanides, sulphides, glycols (including total and poly), carboxylic acids, organic nitrogen compounds (other than those above and with the exception of urea and quaternary ammonium salts), and viruses;

“specified discharge” means a discharge in relation to which no volume is specified in the permit, or taken to be in the permit for the purposes of this Scheme;

“SR” means standard rules, and “(Superseded) SR” means standard rules which became unavailable to new applicants before 1st April 2018;

“stand-alone directly associated activity” means an activity which is not described in Part 2 of Schedule 1 to the Regulations and is authorised by a different permit to the remainder of the installation;

“substantial variation” means an application to vary a permit which the Agency considers is likely to involve significant assessment;

“surface water” means any inland freshwaters, coastal waters or relevant territorial waters as defined in section 104 Water Resources Act 1991;

“thermal discharge” means discharges from heat pumps and heat exchangers;

“type” in relation to a water discharge and groundwater activity, means an activity which falls within one of the following groups of activities, identified by the reference numbers in the Subsistence Charge Table –

- (a) references 2.3.1 to 2.3.20;

- (b) references 2.3.21 to 2.3.59;
- (c) references 2.3.60 to 2.3.62;
- (d) references 2.3.63 to 2.3.65;
- (e) references 2.3.66 to 2.3.67;
- (f) references 2.3.68 to 2.3.71;
- (g) references 2.3.72 to 2.3.74;
- (h) references 2.3.75 to 2.3.78;

“volume” in the context of water discharge and groundwater activities means the maximum daily volume where this is specified in the permit, or otherwise is taken to be –

- (a) in the case of effluents containing sewage -
 - (i) the flow to full treatment as specified in the permit,
 - (ii) where no flow to full treatment is specified but an average daily flow is specified, 2.4 times the average daily flow,
 - (iii) where neither flow to full treatment nor an average daily flow are specified, but dry weather flow is specified, 3 times that dry weather flow;
- (b) in the case of other effluents, where an average daily flow is specified in the permit, that flow, except where the discharge may contain rainfall in which case the volume shall be taken to be 3 times the dry weather flow,

and where a permit authorises a water discharge activity or groundwater activity and the volume in permit conditions is expressed as “population equivalent”, the volume will be calculated based on 150 litres per population equivalent per day.

“waste recovery plan” means a plan submitted to the Agency in order to demonstrate that a proposed activity is a waste recovery operation within the meaning of the Waste Framework Directive.

(2) In this Schedule –

- (a) references in column 2 of a Table in this Schedule to a Section number, mean a Section number in Part 2 of Schedule 1 of the Regulations, and an activity description preceded by a Section number means an activity falling within that Section;

- (b) activities described in Table 1.11 of the Application Charge Table or 2.11 of the Subsistence Charge Table, do not include any activities connected with exploring for, or the production of, on shore oil and gas;
- (c) activities described in Table 2.16 of the Subsistence Charge Table as a “waste operation” mean a waste operation which is not an installation, and activities described without reference to whether they are an installation or a waste operation, may be either an installation or a waste operation which is not an installation;
- (d) activities described in Table 2.6 of the Subsistence Charge Table do not include any treatment of incinerator bottom ash or the operation of an effluent treatment plant.

PART 2

Application Charge Table

1. This is the Application Charge Table referred to in this Scheme –

Table 1.1 Flood risk activities		
Ref	Activity	Permit application
1.1.1	SR 2015 No.26 - temporary dewatering affecting up to 20 metres of a main river. SR 2015 No.27 - constructing an outfall pipe of 300 millimetres to 500 millimetres diameter. SR 2015 No.28 - installing a clear span bridge on a main river. SR 2015 No.29 - temporary storage within the flood plain of a main river. SR 2015 No.30 - temporary diversion of a main river. SR 2015 No.31 - channel habitat structure made of natural materials. SR 2015 No.32 - installing an access culvert of no more than 5 metres length. SR 2015 No.33 - repairing and protecting up to 20 metres of the bank of a main river. SR 2015 No.34 - temporary scaffolding affecting up to 20 metres length of a main river. SR 2015 No.35 - excavating a wetland or pond in a main river floodplain.	£170

Table 1.1 Flood risk activities

Interpretation.

1. In this Part–

“NECD substance” means oxides of nitrogen, sulphur dioxide, fine particulates (PM10s used as an indicator for PM2.5s), ammonia, and non-methane volatile organic compounds;

“NMP” means noise and vibration management plan;

“OMP” means odour management plan;

“Pollution Inventory reporting thresholds” means the thresholds with that title published on Gov.UK.

Default Standard Facility Charge Table.

2. This is the Default Standard Facility Charge Table referred to in paragraph 2(1) of this Scheme.

Table A - Charge bands available for a Waste or Installation default standard facility									
Charge Band	Application charge	Charge Band	Transfer charge	Charge Band	Surrender charge	Charge Band	Deployment charge	Charge Band	Subsistence charge
S030A (W)	£400	S035T (W)	£720	S040S (W)	£540	S045C (W)	£410	S030C (W)	£156

Food and Drink Component Table

3. This is the Food and Drink Component Table referred to in paragraph 1(1) of Part 1 of this Schedule –

Component reference	Description	Number of components
Multiple food and drink activities	Where the authorised activities include more than one different activity falling within Part A of Section 6.8.	1 for each different additional activity
Anaerobic digestion	Where the authorised activities include anaerobic digestion, including where used in effluent treatment.	1
Bioethanol plant	Where the authorised activities include bioethanol plant.	1
Section 1.1. - non-large combustion plant	Where the authorised activities include combustion plant falling in Part A of Section 1.1, other than large combustion plant.	3
Section 1.1. - large combustion plant	Where the authorised activities include combustion plant falling in Part A of Section 1.1 which are large combustion plant.	4
Other activities	Where the authorised activities include activities falling in Chapters 2, 3 or 4 of Part 2 to Schedule 1 of the Regulations.	1 per Chapter (3 maximum)
Solvent Emission activity	Where the authorised activities include a solvent emission activity.	1
Waste Incineration	Where the authorised activities include waste incineration plant falling within Part A of Section 5.1.	3
Abatement (air)	Where the principal process emission points require specific abatement for particulates and/or volatile organic compounds, excluding minor emission points such as silo vents.	1 (not additive)

Component reference	Description	Number of components
Abatement (effluent)	Where there is on-site treatment of process effluent, excluding untreated effluent, cooling water, boiler blowdown and incidental discharges such as surface water.	1 - if disposal to sewer or off-site transfer 2 - if disposal to watercourse or soakaway
Odour	Where the authorised activities fall within these sub-sectors - <ul style="list-style-type: none"> • Slaughterhouses; • Rendering and animal by-product processing; • Pet food manufacture; • Sugar beet pulp drying; or where there is an approved OMP or ongoing control is reliant on an OMP.	1
Noise/vibration	Where there is an approved NMP or ongoing control is reliant on an NMP.	1
Air emissions	Where annual mass emissions of an NECD substance from the authorised activities exceeds the Pollution Inventory reporting threshold.	1 per substance (5 maximum)
Resource efficiency	Where any IED BAT reference document that applies to the authorised activities includes an emission level associated with the best available techniques for water consumption.	1

Paper and pulp component table.

4. This is the paper and pulp component table referred to in paragraph 1(1) of Part 1 of this Schedule -

Component reference	Component description	Component
Waste paper and / or card	Where the authorised activities include processing waste paper and/or card.	1
De-inking	Where the authorised activities include de-inking.	1
Section 1.1. - non-large combustion plant	Where the authorised activities include combustion plant falling in Part A of Section 1.1, other than large combustion plant.	1
Section 1.1 - large combustion plant	Where the authorised activities include combustion plant falling in Part A of Section 1.1 which are Large Combustion Plant.	2
Waste incineration plant	Where the authorised activities include waste incineration plant falling within Part A of Section 5.1.	1
Anaerobic digestion	Where the authorised activities include on-site anaerobic digestion plant (where used as a stage in effluent treatment).	1
