

# **Science Advisory Group (SAG) for the review of potential environmental contamination in Grenfell and North Kensington**

## **Meeting #1**

**21 November 2018, 15:00-17:00  
GCSA office, 1 Victoria Street SW1H 0ET**

### *Agenda and key questions for discussion*

1. Welcome and introductions
2. Terms of reference
3. Declaration of personal or financial interests
4. Situation update and work to date
5. Review of Strategy for Investigation into Potential Land Contamination and associated Outline Specification for procurement (Paper 4) and Outline Specification (Paper 5)
  - Are the proposed objectives and scope correct?
  - Is the proposed risk assessment framework appropriate and fit for purpose?
  - Should changes be proposed to the approach set out for desk research and subsequent sampling/analysis methodology?
  - What are the risks and limitations associated with the proposed approach?
  - Is there any other detail on tasks, outputs or approach that should be included in the consultant outline specification?
6. Scope of SAG work
  - Are there other environmental and/or public health issues requiring scientific investigation?
  - Does the SAG need to seek further expert input or question particular individuals or bodies?
7. Engagement with Grenfell and North Kensington community groups; other communications
  - What are the key elements of good scientific communication around public risk?
  - What should be the SAG's approach to public messaging and engagement regarding its work?
8. Summary and next steps
9. AOB
