Assessment stages of design and Environmental Impact defined and developed as part of the next local mitigation measures. These will be verifiable photomontage does not include the railway alignment displayed in the original scheme and should be understood to be subject to change in response to consultation. The proposed scheme may be subject to change through ongoing design development and in response to consultation.

This verifiable photomontage provides an illustration of how the proposed scheme may look in the opening years and/or 15 years after opening to help inform the visual impact assessment.

Where new planting is proposed, it will be shown as immature plants which would mature over time to further integrate the Proposed Scheme into the landscape. At this scale the images do not lend themselves to direct comparison out in the field. For the Hybrid Bill submission, the supporting Environmental Statement will include full details of the visual impact assessment at the select viewpoints in Volume 5 of the Hybrid Bill Information Pack. This visualisation is provided for illustration purposes only to help inform the DRC events.

A number of verified photomontages will be produced to provide an illustration of how the Proposed Scheme may look in the opening years. These are produced as a snapshot of the current work in progress as the Proposed Scheme is developed in response to consultation.
