Technical Information

Description
View looking west towards site of Ashby railhead which is obscured behind the vegetation in the foreground, which will not be affected by the scheme.

Assessment
Assessments are required to be carried out in this environment. A number of verified photomontages will be produced to support the assessment, the supporting environment description will report details of the visual assessment of the scheme, including assessment of the proposal at its current state and the proposal in its matured state. Photomontages are relied upon to illustrate how a proposal may look and are subject to consultation at key milestones. The proposal is subject to change through ongoing design development and in response to consultation.

Key Plan
This key plan provides an overall view of the site, showing the area of interest and the surrounding environment. It also includes key features and elements that are important for the assessment, such as roads, rails, and structures.
