Introduction
Commitment 1: Transparency in Government Contracting
Commitment 2: Access to Government Land and Property Data – making available data relating to Government Land and Property assets
Commitment 3: Open Data – Increase the number and quality of open datasets released
Commitment 4: Improved Transparency and Public Accountability
Commitment 5: Citizen Participation and Open Policy Making
Commitment 6: Open Government Skills across the Public Sector
Commitment 7: Public Sector Innovation
Commitment 8: Social Innovation
Introduction

Government and the public sector is data rich, holding huge amounts of data with more being generated every day.

When government makes effective use of data, we make better policy and deliver better, more tailored services for citizens.

Since the Open Data NI portal was launched over 453 datasets have been published. Great strides forward have been made but there is still much more to do.

This Action Plan is ambitious and challenging and sets out our commitment to improving the way people can understand, influence and participate in government’s work. The level of engagement this year has been hugely successful, across departments and the NI Open Government Network, with all participants fully adopting the Open Government principles and values.

Our eight commitments focus on the Open Government Partnership values of Access to Information, Public Accountability, Public Participation and Technology and Innovation.

In this National Action Plan we have committed to delivering 36 milestones activities under eight themes:

- **Transparency in Government Contracting**
- **Access to Government Land and Property Data** – making available data relating to Government Land and Property assets
- **Open Data** – increase the number and quality of open datasets released
- **Improved Transparency and Public Accountability**
- Greater **Citizen Participation and Open Policy Making**
- Increasing **Open Government Skills across the Public Sector**
- Greater **Public Sector Innovation**
- Greater **Social Innovation**

The Northern Ireland Civil Service is committed to Open Government. This Action Plan is about harnessing the potential of open data further and continuing on our journey towards an ‘Open by Default’ approach.

</tbody>
</table>
Commitment 1: Transparency in Government Contracting

Objective
To improve the publication of data on public procurement activity and contract spend managed by CPD. CPD will develop the current data set on contracts awarded to include the cumulative spend on contracts after they are awarded and explore the potential to include data on KPI performance and achievement against contract milestones.

What is the problem that the commitment will address?
Publishing and using open, accessible and timely information on government contracting to engage citizens and businesses will help improve the transparency of public spending and enhance supplier interest and competitiveness in the public procurement market.

How will the commitment contribute to solve the public problem?
Citizens and businesses will be able to track spend with third party suppliers.

Lead implementing organisation
• Department of Finance - Policy and Performance Division, Construction & Procurement Delivery (CPD)
• Strategic Investment Board (SIB)

Timeline
January 2019 – September 2019

OGP Values
This commitment is relevant to OGP value of transparency and public accountability. Citizens and businesses will be able to assess the value for money in public spending decisions and challenge poor contract performance.

Other actors involved – government
• None

Other actors involved – CSO’s private sector, working groups, multilaterals etc.
• Department of Finance - Enterprise Shared Services, Account NI
• Department of Finance - Enterprise Shared Services, OpenDataNI
• Strategic Investment Board

<table>

<td>30 June 2019</td>
</tr>
<tr>
<td>Develop process and publish Invite To Tender</td>
<td>New</td>
<td>January</td>
<td>30 June 2020</td>
</tr>
</tbody>
</table>

Objective
The commitment is to make comprehensive data on government land and property assets publicly available and create a channel to encourage collaboration and innovation on how assets could be optimally utilised. This includes increased free access to LPS OSNI location data.

What is the problem that the commitment will address?
Comprehensive data relating to land and property assets owned by the public sector is not easily accessible to the public, elected representatives, the private/voluntary/community sectors and public bodies. As a result, work within government departments and arm’s length bodies on the management of their land and property assets is less efficient than it could be, opportunities for synergies in the use of land and property may be missed and third party organisations which may wish to acquire or make use of surplus or unused land and property held by the public bodies have to work through time consuming search exercises to gather the information.

How will the commitment contribute to solve the public problem?
Providing an increased level of no cost access will remove the perceived barrier to using accurate complete authoritative OSNI mapping data by developers and SMEs. It is expected that this will result in increased economic activity in the NI small business sector.

The Public Land for Housing Project led by Department for Communities is already underway to map government assets in order to assess suitability for housing development. Where robust datasets are available, these will be considered for release first.

Department of Finance has commenced a discovery exercise to identify how existing datasets and systems can be used to build a comprehensive register of government assets. Subject to access permission, a comprehensive list will be used as a foundation from which layers of data can be added. This will start with addressing, mapping and applying unique (GUID) referencing before publication.

<table>

<td>New</td>
<td>January 2019</td>
<td>30 June 2020</td>
</tr>
</tbody>
</table>
The GUID referencing can then be more widely applied and/or linked to other systems to capture other information such as value, management and operating costs, condition, age and occupancy etc.

A commitment to making data relating to Government Land and Property assets publicly available and thus subject to scrutiny, will help to create the conditions necessary to ensure the data is robust and accurate and that public assets are being or planned to be fully utilised. It will also provide a channel to encourage collaboration and innovation on how assets could be optimised. It will also hold departments to account on how they are managing their assets.

**Lead implementing organisation**
- Department of Finance - Land & Property Service

**Timeline**
Ongoing – March 2021

**OGP Values**
The direct costs associated with delivery of increasing free access to LPS OSNI location data could potentially reach, in extremis, circa £11m per annum. Indirect costs associated with the consequent degradation of authoritative state mapping data are difficult to quantify.

OSNI is developing options to deliver on this commitment. The optimal option will be aligned, where possible, to the outcome of consultations and implementation of the UK strategy on geospatial data currently being developed by the UK Geospatial Commission.

The additional cost of resources required to implement the mapping of land and property assets, collating and releasing data related to those assets and registering the title on unregistered land might be in order of £500k per year for 3 years. Some of the work might be covered within existing mapping agreements with departments which will be subject to further discussion.

This commitment aligns positively with other government initiatives such as: Public land for Housing, Executive’s Asset Management Strategy and departmental estate strategies, Local Authority Community Planning, Community Asset Transfer.

**Other actors involved – government**
- None

**Other actors involved – CSO’s private sector, working groups, multilaterals etc.**

Commitment 3: Open Data – Increase the number and quality of open datasets released.

Objective
Increase the number and quality of open datasets released. We are committed to base-lining and significantly increasing Open Data publication by using the updated NICS Information Asset Registers as a metric.

We will continue to improve the quality of data in open data formats including moving where feasible and appropriate towards 5 star data sets.

What is the problem that the commitment will address?
Increase accessibility and availability of open and statistical data to support innovation. To increase the awareness of data held in NI public sector that can be released under Open Government Licence.

How will the commitment contribute to solve the public problem?
It will increase the variety of data available for further reuse. NISRA already makes data available through gov.uk, its own website and the open data portal.

Lead implementing organisation
- Department of Finance – Northern Ireland Statistics & Research Agency
- Department of Finance - Enterprise Shared Services

Timeline
January 2019 – December 2019

OGP Values
This commitment is relevant to OGP value of transparency, increasing data being disclosed and improving accessibility by making more data will be available in machine readable formats.

NISRA already makes large quantities of statistical data available in open data formats, predominantly at 3*, and are committed to continuing to make regular data available and to push toward more machine readable outputs in 4 and 5* formats.

Other actors involved – government
• Department of Finance - Land & Property Services (LPS), (to make LPS data identified available for publication)

Other actors involved – CSO’s private sector, working groups, multilaterals etc.
• None

<table>

</tbody>
</table>
| Increase publication of LPS datasets over and above those already available via OpenDataNI portal including:  
  • Customer complaints and correspondence  
  • Customer information Centre Transaction Activity  
  • Call handling- Channel Shift/Web Statistics  
  • Registration cases in support of conveyancing  
  • Registration of online transactions in support of conveyancing  
  • Revenues and Benefits – annual rate collection and end of year debt position to include domestic and non-domestic profile  
  • Valuation cases – number of rating cases to include New Builds, altered Domestic properties, Challenges and Appeals by council area. | New | January 2019 | 30 September 2019 |
Commitment 4: Improved Transparency and Public Accountability.

Objective
To identify, develop and implement sustainable and ambitious open government actions to drive the open government agenda across the NI departments, in the areas of transparency and public accountability.

To work with Community Planning Partnerships to identify innovative and original approaches that will encourage partners and the public to engage in a process that will give local people a direct say in how public funds are used to address local needs.

What is the problem that the commitment will address?
To promote transparency, integrity and accountability in all aspects of governance, by publishing information and data in an open, accessible and timely way that will engage with Citizens and improve trust in government services.

How will the commitment contribute to solve the public problem?
Adopting the ‘Open by Default’ approach to publishing of all information, will increase government transparency, build public confidence and awareness, allowing them to make informed decisions and help them engage with government moving forward.

Additionally mapping the Sustainable Development Goal's (SDG's) to the draft Programme for Government (PfG) will help focus government policy/actions in relation to ending poverty and hunger, promoting health and wellbeing and equality for all, achieving better.

Reporting and explaining budget decisions in an open and simplistic format will improve the public’s knowledge and understanding of how much funding is received in Northern Ireland, how this is allocated and how it is spent.

Lead implementing organisation
- Department of Finance - Strategic Policy and Reform Division
- Department of Finance - Public Spending Directorate
- Department of Agriculture, Environment and Rural Affairs
- Department For Communities - Local Government Policy

Timeline
January 2019 – June 2020

OGP Values
This commitment is relevant to transparency, public accountability and citizen participation.

Other actors involved – government
- All NICS Departments

Other actors involved – CSO’s private sector, working groups, multilaterals etc.
- None

<td>New</td>
<td>February 2019</td>
<td>30 June 2020</td>
</tr>
</tbody>
</table>

**Commitment 5: Citizen Participation and Open Policy Making.**

**Objective**
Develop and trial effective open policy-making and public engagement methods. HSC organisations and the Department must publish their own consultation scheme setting out what arrangements they have in place to ensure that the Patient and Client Council and the general public, are involved in, and consulted on, matters relating to the planning and delivery of health and social care services.
DoF will showcase best practice in relation to user centred service design across the NICS

**What is the problem that the commitment will address?**
This commitment is aimed at improving citizen participation in service design and policy making particularly in health.

Personal and Public Involvement (PPI) is a process whereby service users, carers and the public are empowered and enabled to inform and influence the commissioning, planning, delivery and evaluation of services in ways that are meaningful to them.

PPI is a statutory duty as detailed in the Health and Social Care (Reform) Act 2009. Each HSC organisation is required to involve and consult service users, carers and the public in the planning and delivery of HSC services and in decisions that affect the provision of care.
How will the commitment contribute to solve the public problem?
Through full implementation of PPI and *Delivering Together* to make public participation in government policy making more effective and meaningful.

**Lead implementing organisation**
- Department of Health - Chief Nursing Officer,
- Department of Finance - Strategic Policy and Reform Division

**Timeline**
January 2019 – December 2019

**OGP Values**
This commitment is relevant to OGP value of citizen participation. PPI is about “putting the patient first”, enhancing patient choice, meeting demands and expectations, and ensuring views are heard and listened to. Effective PPI can really change things for people who use our health and social care services, both in their experience of the service they receive and in the quality and safety of their care.

**Participation** – support for a strong and independent civil society, the involvement of citizens and other stakeholders in decision making processes

**Other actors involved – government**
- Department of Health, Public Health Agency and HSC Trusts

**Other actors involved – CSO’s private sector, working groups, multilaterals etc.**
- HSC Service users and carers, voluntary and community sectors

<td>December 2019</td>
</tr>
</tbody>
</table>
Commitment 6: Open Government Skills across the Public Sector.

Objective
Develop Open Government Skills across the Public Sector to enable staff to deliver the Open Government Agenda. Integrate an openness mind-set into day-to-day business activities.

What is the problem that the commitment will address?
Public sector staff must change how they design and deliver programs and services to support the Northern Ireland Executive’s commitments to transparency and public engagement.

How will the commitment contribute to solve the public problem?
Individuals working in departments across government will have access to learning material to build their skills and capabilities for using open data, open information, and open dialogue to support better operational and policy decisions. Furthermore, to boost the value of available open data to citizens, public sector can be guided to understand how to set priorities for data or information publication, based on its potential value to users both inside and outside of government.

Lead implementing organisation
Department of Finance - Enterprise Shared Service
Department of Finance - Strategic Policy and Reform Division

Timeline
January 2019 – June 2020

OGP Values
This commitment is relevant to OGP value of transparency, public accountability and citizen participation.

Open data is useful not only to those who regularly evaluate and use data to support financial, statistical, and socio-economic analysis, but also to non-data specialists working in policy, operational, and service delivery areas. Sharing and leveraging data, information, and technology across the government can help innovation flourish.

Other actors involved – government
• None

Other actors involved – CSO’s private sector, working groups, multilaterals etc.
• Open Government Interdepartmental Action Group
Commitment 7: Public Sector Innovation.

Objective
To significantly improve the adoption and use of open innovation approaches within the public sector. Encouraging greater use of the Small Business Research Initiative (SBRI) by NI public sector bodies as a way of encouraging greater public sector innovation and also innovation in the economy.

What is the problem that the commitment will address?
To increase the use of innovative approaches such as machine learning and natural language processing that can improve the accountability of government and better engage with citizens.

How will the commitment contribute to solve the public problem?
Encouraging greater use of innovative procurement.

Lead implementing organisation
- Department for Economy - Innovation and Specialisation Branch

Timeline
January 2019 – October 2019

OGP Values
Promoting new technologies that offer opportunities for information sharing, public participation, and collaboration. SBRI is designed to encourage new products and services to address public sector needs. In addition we have encouraged more use of open data as a resource for contractors and encouraged public bodies to make more of their data open as part of the process.

Supporting the ability of governments and citizens to use tech for openness and accountability; -for example the NI Audit Office are exploring use of Machine Learning to improve audit processes while NISRA are exploring the use of natural language processing to improve the analysis of qualitative and textual information.

Other actors involved – government
- All NI Departments, with scope for collaboration with other UK and ROI public sector bodies
Other actors involved – CSO’s private sector, working groups, multilaterals etc.

- Private Sector
- Academia

<table>
<thead>
<tr>

<td>New</td>
<td>January 2019</td>
<td>31 October 2019</td>
</tr>
</tbody>
</table>

Commitment 8:  Social Innovation.

Objective
Promote and encourage the use of social innovation by the local public sector, in collaboration with other sectors, to help address social challenges whilst delivering on economic impact.

What is the problem that the commitment will address?

In a public sector environment which faces ongoing downward pressure on financial resources, it is vital that we consider new and innovative ways to solve the problems being faced by our society.

Within the Executive’s Innovation Strategy ‘InnovateNI’ – DfC leads on a key action, chairing a social innovation working group to identify and report on future opportunities and promote the concept of social innovation.

The Strategy recognises that whilst there has been a growing and focused interest in social innovation, it is distinct from work in the social economy and third sector. In that social innovations are new solutions that simultaneously meet a social need (more effectively than existing solutions) and lead to new or improved capabilities and relationships and better use of assets and resources. There is real potential to engage all sectors of the economy to bring about positive change, applying expertise and resources to resolving social problems, whilst delivering on economic impact.

How will the commitment contribute to solve the public problem?
To increase awareness of social innovation and subsequently the use of innovative solutions to social challenges, within the public sector in collaboration with other sectors.

**Lead implementing organisation**
- Department for Communities - Policy and Innovation Branch, Voluntary and Community Division

**Timeline**
January 2019 – June 2020

**OGP Values**
Open engagement between the wider public sector, third sector and private sector around the concept of Social Innovation, leading to potential collaborations, will further advance the following OGP values:
- Access to information
- Civic participation

**Other actors involved – government**
- Department for Communities
- Other NI Government Departments
- Wider public sector

**Other actors involved – CSO’s private sector, working groups, multilaterals etc.**
- Voluntary and Community Sector
- Private Sector
- Academia
