1. Introduction

1.1 About the survey

Ofqual is the independent qualifications regulator for England, responsible for regulating around 150 awarding organisations who provide over 16,000 live qualifications for learners. Ofqual regulates general qualifications such as GCSEs, A levels and AS levels, but also a wide range of other qualifications – and it is these other qualifications that were asked about in this research. This includes Functional Skills Qualifications (FSQs) and apprenticeship End Point Assessments (EPA) which were asked about specifically, but also a wide range of other vocational and technical qualifications (VTQs). This report presents the findings from the survey and should be read alongside the technical annex.

This project was commissioned by Ofqual and conducted by Pye Tait Consulting. A pilot survey took place in 2017 and focused on employers only. The first full survey wave – wave 1 – was undertaken in 2018 and gathered feedback from employers, training providers and learners. Due to the changes to the employer survey between the baseline and wave 1, comparisons have not been made. Learners and training providers were included in waves 1 and 2 to ensure a balance of opinion and to understand how views are reflected through the entire system of education and training. It should be noted that some questions were not asked of all three respondent groups where only relevant to one or two groups. For example, only employers were asked questions about their use of qualifications for recruitment and training. This annex and accompanying report outline the findings from wave 2. Broadly, most questions have remained the same. However, in some instances wording has been altered slightly, or new questions were added in wave 2 – this is noted where applicable. Comparisons between findings in waves 1 and 2 are made wherever possible.

This survey of employer perceptions is intended to provide a snapshot of behaviours and attitudes to provide Ofqual with an indication of stakeholder confidence in the qualifications and assessments they regulate. There is a need to understand stakeholder perceptions of Functional Skills Qualifications in English and mathematics, other Vocational and Technical Qualifications, and End-Point Assessments. The aim of this project was to understand how stakeholders (employers, colleges and training providers) view and use these qualifications.

1.2 About this annex

This annex presents the methods used and detailed data tables including cross-tabulations of data (for example by employer size, region etc.). The main report should be read in conjunction with this annex, which presents the key messages and conclusions drawn from these data.
2. Methods

2.1 Summary of approach

2.1.1 Overview

The survey followed a telephone and/or online method dependent on the respondent group and availability. Three separate surveys with the three respondent groups were conducted. 2145 employers, 577 training providers and 599 learners were surveyed. The fieldwork with employers was conducted between November 2018 and February 2019. The survey sought to interview individuals with insight into and/or responsibility for training and qualifications, such as HR or Recruitment Managers, Operations Managers and (in smaller businesses) Managing Directors. Nearly half the respondents had an HR, training or recruitment role, and the remainder were senior business directors, managers or owners. Respondents in smaller organisations tended to be senior staff with a broad oversight of all aspects of the business (e.g. Managing Director, Owner or Director), whereas respondents from larger organisations had a more specific focus of knowledge or department (e.g. Training Manager/Director or HR Manager/Director).

Fieldwork with training providers and learners was conducted between December 2018 and February 2019. The final achieved samples were structured to be representative of employers and training providers whereas the learner sample was an opportunity sample.

2.1.2 Questionnaire design

Three questionnaires were designed by Pye Tait Consulting and Ofqual, which were piloted prior to finalisation and launch of the survey. Each of the three surveys were for each respondent group (employers, training providers, learners) which is why some questions were not applicable across all respondent groups. The survey covered perceptions of Functional Skills Qualifications (FSQs), end point assessments of apprenticeships (EPAs) and other Vocational and Technical Qualifications (VTQs). Respondents were routed through the questionnaire to ensure that they were answering questions that were applicable to them (for example, if a respondent had no understanding of FSQs then they were not asked further questions about this type of qualification). A copy of all the questions for each survey are available in Appendix A.

2.1.3 Sample coverage

Three respondent groups were the focus of this survey, with the sampling approach taken for each group highlighted below.

The base number of responses per question varies, and these are shown at the top of the data tables in Appendix B and within the main body of the report.

The survey was conducted using a mix of online and telephone approaches, which differed depending on the respondent group and are explained in more detail in sections 2.1.3 to 2.1.5. Respondents were assured of confidentiality when taking part in the survey.

2.1.3 Sample selection and fieldwork – employers

The sample was selected to ensure representativeness of organisations in England in line with Business Population Estimates 2018, accounting for employer size, region and industry sector. Contact details were sourced from a commercial business database operated by Bureau Van Dyke, available by subscription, and containing details of over 3.5 million businesses.

Tables 2-4 set out the interlocking quotas of population, actual and adjusted targets for employers by organisation size, region and industry sector. Representative targets were then adjusted – the number of micro employers was reduced, while targets for all other organisation sizes were increased. This was because larger businesses are typically more likely to use qualifications than smaller (and especially micro) businesses, so it was important to ensure sufficient representation of respondents able to answer all the survey questions. These adjustments are unlikely to affect the overall robustness of survey data as, whilst it is possible to identify a representative sample of employers by organisation size, it is not clear what a representative sample of employers using qualifications and apprenticeship assessments would be. Whilst the aim was to achieve a representative sample, it should be noted that the findings
Perceptions of Vocational and Technical Qualifications

in the main report can only be inferred from respondents who took part.

Targets were adjusted by region and industry sector to ensure that each had sufficient numbers for statistical robustness. For example, sectors with lower numbers of employers (Transportation & Storage, Financial & Insurance Activities, Real Estate Activities, Education and Arts, Entertainment and Recreation) were oversampled to increase reliability of the data.

The employer survey was conducted by telephone, as this is an effective means of engaging employers on this topic. An online version of the survey was made available as an option for employers who preferred to complete it in their own time – which can be better in customer-facing industries such as retail. 2,116 were completed by telephone and 29 responses were received online. Fieldwork took place between November 2018 and February 2019. The survey sought to interview individuals with insight into and/or responsibility for training and qualifications, such as HR or Recruitment Managers, Operations Managers and (in smaller businesses) Managing Directors. Nearly half the respondents had a HR, training or recruitment role, and the remainder were senior business directors, managers or owners.

### 2.1.4 Sample selection and fieldwork – training providers

The sample for training providers was drawn using information in the Education and Skills Funding Agency (ESFA) course directory. The directory contains information on courses offered by learning providers who are contracted with the ESFA. The courses include adult further education, adult community learning, Apprenticeships, courses that are funded by the European Social Fund, and courses aimed at people aged 16 to 18.

The November 2018 course directory contains 4,807 unique provider entries. For the purpose of this sample, the ‘DfE 16-19 category’ (1,810 entries) was excluded as this is composed of schools and academies. Excluding this category, the total sample frame is 2,997.

Perceptions of Vocational and Technical Qualifications

The survey was hosted online using SNAP survey software to enable training provider staff to complete it at a time convenient to them. To boost response rates, follow up telephone calls were undertaken. 286 responses were completed online, and 297 by telephone. Fieldwork took place between November 2018 and February 2019. The survey sought responses from: Senior Managers, Heads and Managers of Department/Curriculum/School/Faculty and Advanced/Lead Practitioners.

2.1.5 Sample selection and fieldwork – learners

An online version of the survey was hosted for learners, to enable them to complete it in their own time. Fieldwork took place between November 2018 and February 2019. Opportunity sampling was used, with training providers participating in the survey asked to circulate a link to the survey among their learners. The learner survey was also circulated by Awarding Organisations.

2.2 Data analysis

Survey data were analysed in SNAP and SPSS. Using SPSS, where an ordinal scaled variable was analysed together with a nominal scaled variable, pair-wise Mann-Whitney U tests were performed. Where there were more than two groups of independent variables, a Kruskal-Wallis test was carried out initially to investigate if there were any statistical differences between the variables. Further Mann Whitney U tests were then carried out if the Kruskal-Wallis highlighted a significance, in order to establish further details concerning the significance. Where multiple Mann Whitney U tests have been performed, the p value has been adjusted using the Bonferroni correction (p value 0.05/number of comparisons) to protect against type 1 error (i.e. incorrect rejection of a null hypothesis).

The significance ($p$) level, was set to .05 for all tests. Results are described as significant where the $p$ value is less than .05. Therefore, wherever a difference has been reported in the main report, this refers to a statistically significant difference. Responses to open questions were analysed using TextStat software to identify concordance and frequency. Content analysis was undertaken manually.

- Functional Skills qualification in English, maths or ICT
- GCSE in English or maths
- Other English or maths qualification
- Vocational or technical qualification
- End point assessment of an apprenticeship
- Other

If 'Other' please specify:

___________________________________________________________________________________________________

Q46  Can you please say why your organisation hasn’t arranged or funded training that led to a vocational or technical qualification?

- No need for them
- Not aware of them
- Don’t know which ones are relevant for us
- Too expensive
Perceptions of Vocational and Technical Qualifications

- Too time consuming
- Takes employees away from the day job
- Not of a high quality standard
- Too easy
- Too difficult
- Not enough Government funding to pay for them
- Can no longer afford to fund them, but funded them in the past
- Do not have any apprentices in our organisation
- Other

If 'Other' please specify:

________________________________________________________________________
________________________________________________________________________

Q47 You said that your organisation has no need to arrange or fund vocational or technical qualifications, can you please say why?
- Our employees don’t need these qualifications
- We recruit people with these qualifications
- We test applicants e.g. competency tests so no need for qualifications
- Other

If 'Other' please specify:

________________________________________________________________________
________________________________________________________________________

Q48 Can you please say which of the following factors are taken into account when you decide which qualifications to offer your employees:

- Reputation of the awarding organisation (exam board)
- Sector recognised (valued) qualification
- Relevance for our organisation
- Size of the qualification (the amount of time it takes to complete e.g. hours/days/months/years depending on the type of qualification and level)
- Level of qualification
- Flexible assessment
Perceptions of Vocational and Technical Qualifications

- Organisation culture i.e. always offered these qualifications
- None of these factors are taken into account
- Other

If 'Other' please specify:
