Based in Ulverston on the edge of the Lake District, FETL has built its reputation on providing quality engineering support to its clients and plays an active role in promoting technical and commercial developments within the local community.

FETL has a strong client base, including both private and public sector organizations. Many of its clients are based in the Cumbrian region, providing an opportunity to serve the local business community.

FETL is a highly motivated, successful engineering consultancy with parallel reputations for providing quality support to our clients and an excellent track record for delivering successful projects.

The company has been involved in a number of significant projects, including the construction of a nuclear reactor and the development of a new engineering laboratory. These projects have contributed to the growth of the company and its reputation in the engineering industry.

FETL’s approach to its projects is customer-focused. The company seeks to understand its clients’ needs and expectations, and then works collaboratively to deliver the most suitable and effective solution.

In addition to its core engineering services, FETL also offers a range of other support services, including project management, feasibility studies, and training.

With over 30 years of experience in design, manufacture, test, installation and commissioning of specialist equipment, FETL is well-placed to meet the needs of its clients in the nuclear and other high technology industries.

PacTec are the industry leader in the design and manufacturing of safe and tested flexible packaging for LSA-II / SCO-II LLW.

Mercury Stone is a specialist consultancy focussed on business performance improvement and complex problem resolution for the nuclear sector.

TSP Engineering Ltd is located in Workington, Cumbria and employs 220 people providing a range of engineering services to industry. It is a key supplier to the nuclear sector, providing mechanical, electronic, and bespoke engineering services along with anode systems to the major, oil & gas, offshore wind and other renewable energy companies.

TSP Engineering Ltd is a privately owned Norwegian EPC contractor to global Maritime sector transferring product and technical experience into the Nuclear sector.

RWS offer bespoke installation to a complete high specification Building refurbishment solutions. Dilapidations and Security projects for commercial and Government clients.

RWS, a video production company, is the industry leader in the design and manufacturing of made-to-measure high specification packaging and the development of advanced high specification solutions.

RWS offer bespoke installation to a complete high specification Building refurbishment solutions. Dilapidations and Security projects for commercial and Government clients.

REACT Engineering is a leader in developing innovative and robust engineering and management solutions to address the specific challenges unique to decommissioning, waste management, infrastructure and asset care challenges faced by the civil infrastructure sector.

"We have successfully delivered projects in the primary focus for the civil infrastructure sector today. Our team of highly experienced and qualified staff continues to innovate and improve the delivery of our services to ensure we meet our clients' needs.

This year, REACT has undertaken several significant projects, including the decommissioning of nuclear facilities and the management of waste materials. Our team has successfully completed these projects on time and within budget, ensuring that our clients are satisfied with the outcomes.

We pride ourselves on delivering high-quality services that meet our clients' needs. Our team is dedicated to providing exceptional service and delivering results that exceed our clients' expectations.

"Phil Redfern, Managing Director, REACT Engineering"

"KCP is a progressive material transfer business delivering a diverse range of solutions to the UK and international market. We are committed to providing reliable and cost-effective services to our clients.

We offer a wide range of services including suction, jetting, investigative works, and maintenance. Our services are tailored to meet the specific requirements of our clients, and we work closely with them to ensure that we deliver the best possible outcomes.

"Linda Myers-Bennett, David Parr, 01925 814 084 info@kcpltd.net www.kcpltd.net Category 1"

PSS is a safety systems life-cycle management specialist supporting the oil, gas, power, and renewables industries.

"We have a strong track record of delivering comprehensive safety systems life-cycle management solutions to our clients. Our team of experts is dedicated to providing quality services and ensuring that our clients' needs are met.

We work closely with our clients to understand their specific requirements and deliver solutions that meet their needs. Our services are tailored to meet the needs of the industry, and we are committed to providing reliable and cost-effective solutions.

**D1-025 NSG Environmental**

NSG provides pragmatic solutions to decommissioning and waste management challenges across the UK’s nuclear industry.

- **Performance standards for safety and environmental critical elements**: Development of and review of performance standards to ensure that means of assurance, verification tasks and basis references are correct and valid.
- **Verification Schemes**: QRA to quantify the risk to personnel from all of the identified major accident hazards; Fire and Explosion Risk Analysis; Nuclear Criticality Safety Analysis (NCSA); Human Factors Analysis (HFEA); Containment Vessel Breakage Analysis (CVBA); Emergency Systems Availability and Survivability Analysis (ESASA).
- **Quantitative risk assessments**: HAZOPs (Hazard and Operability Studies) HAZIDs (Hazard Identification Studies); Bowtie workshops conducted using Bowtie Software; Failure Mode and Effects Analyses (FMEA); Failure Mode and Effects Criticality Analysis (FMCA); Human Factors Analyses; Safety Case Development and Assessment.

**D1-024 REI Nuclear**

REI Nuclear offers staffing support, consulting (D&D expertise), and the design, fabrication, testing, and deployment of specialty segmentation systems.

- **Staffing support, consulting (D&D expertise)**: Provides engineering and project management support to clients in the UK civil nuclear sector, helping them to ensure that their operations remain safe; their assets are efficiently and effectively maintained; and their capital projects are delivered on time and within budget.

**D1-026 Highland Drones**

Highland Drones can provide a Safe, Efficient and Professional service to a range of services and clients by using Unmanned Aerial System’s (UAS).

- **UAS services**: Provides engineering and project management support to clients in the UK civil nuclear sector, helping them to ensure that their operations remain safe; their assets are efficiently and effectively maintained; and their capital projects are delivered on time and within budget.

**D1-027 Radwise Limited**

Radwise is a UK based Support Services company which has been providing radiation protection services to UK industry since 2001.

- **Provision of technical and regulatory compliance consultancy advice to the nuclear, oil/gas and other high hazard industries**: Materials Radiation Protection (MRP), Regulatory and nuclear (dis)assembly, decommissioning, storage and transportation; Radiation Protection (RP), Research and development, Radiation Safety, Training, Radiological accidents, Nuclear Safety;

**D1-028 DAS Limited**

DAS are an independent engineering and management consultancy specializing in the design, manufacture, and delivery of nuclear security and containment services.

- **Engineering and management consultancy**: Provides engineering and project management support to clients in the UK civil nuclear sector, helping them to ensure that their operations remain safe; their assets are efficiently and effectively maintained; and their capital projects are delivered on time and within budget.

**D1-029 IKM Consulting Ltd**

IKM have a 20-year legacy of innovation in Scotland and the UK. Our service portfolio sets us apart, providing a unique blend to our expert skillset. Our roots can be traced back to industrial and commercial projects in Oil & Gas and Petrochemicals. Since then, we have diversified our portfolio of services into other sectors, focusing on high integrity process systems within industrial environments.

- **Obtain permission**: Proven knowledge, experience, safety standards, and accreditations to provide an exceptional service to each of our clients.

---

Fabrication, welding and inspection is carried out in Cumbria from our multi-bay facility which keeps carbon and stainless steel production separate. Each is fully equipped with a full range of tooling.

JGC provide exceptional service, quality products and have the detailed knowledge required to make your engineering projects successful.

JGC is one of the UK’s leading engineering companies. We have the breadth and depth of technical expertise to respond to the complex challenges of major engineering projects. We have the skills, knowledge and proven experience to plan, design, manufacture and implement the solutions to complete the project. We have the resource and the capability to achieve ambitious goals for tomorrow. JGC offer innovative engineering solutions and high quality delivery to a wide variety of market sectors.

XL Group of companies collectively specialise in the supply of integrated solutions encompassing safety and process systems, data management, telecommunications, IT, lift, valves, measurement & sensor systems on a global scale.

Prima Uno is a specialist consultancy that provides services in project controls, risk management, dispute resolution, programme & project management.

Verflux provides a whole range of products to cater for all types of remote monitoring applications taking data from any type of sensor and providing this information on their Omniflex UK’s Real Time Remote Monitoring system to the client’s data management centre or to any recipient of data.

Safetrade 24 7 is an established experienced company specialising in sourcing and distributing manual handling, storage, safety and environmental equipment.
As specialists in the investigation, interpretation, design and remediation of contaminated soils, waters, and sludges we offer economically viable remedial solutions tailored to meet the specific needs of our clients. We offer tried and tested remediation techniques alongside the latest proven techniques, using our extensive network of academic and industrial links and benefit from being able to offer the most up to date and innovative technology for our clients.

For the core of our company we founded on sound environmental, quality and safety management principles and practices. Our core of business is based around our reputation for excellence in operational excellence, strategic leadership, technical innovation and design. We have based these values and principles and our team of engineers want to provide high quality solutions to our clients' engineering needs.

Our extensive client base includes but is not limited to the Nuclear, Defence and Industrial sectors, our work range from feasibility studies, conceptual designs, detailed designs and detailed fabrication engineering. We have completed projects in the UK, Europe and the Middle East.

We have successfully completed many projects within the nuclear industry including:

- The Safety Case for the New Nuclear Power Station in a Nuclear Environment: demonstrating the safety and therefore the performance of the design during operation. This also included ensuring the capability to contain the risk.

- Design of the Safety Case for a Nuclear Power Station in a Nuclear Environment: demonstrating the robustness of the design and the performance of the design during operation. This also included ensuring the capability to contain the risk.

- Design of the Safety Case for a Nuclear Power Station in a Nuclear Environment: demonstrating the robustness of the design and the performance of the design during operation. This also included ensuring the capability to contain the risk.

- Design of the Safety Case for a Nuclear Power Station in a Nuclear Environment: demonstrating the robustness of the design and the performance of the design during operation. This also included ensuring the capability to contain the risk.

Through these relationships our expertise and new techniques are used in the nuclear industry. Technology is used to deliver the appropriate remedial solutions.

We deliver a wide range of specialists and technical expertise. We are able to bring these specialists and technical expertise together to deliver the appropriate remedial solutions.
D1-086 FIRMA Engineering Ltd

Using experience taken from the aerospace/R&D and other sectors we design working certified mechanical solutions for global nuclear decommissioning industries.

---

D1-087 Westlakes Engineering Ltd

We are an engineering design consultancy providing Civil, Structural and Architectural services from offices in Whitehaven, Manchester and Preston.

Westlakes Engineering provides professional Civil, Structural and Architectural services to a range of clients in the Nuclear, Commercial and Attraction Safety Sectors. The company aims to provide a high quality, safety conscious, responsive service. Key to these services is the leadership and skill of the dedicated team.

In 2017, we were ranked overall number ten on New Civil Engineer NCE100 List 2017 and additionally named SME of the Year.

---

D1-088 RED Engineering

Responsive SME developing, delivering and testing intelligent engineering solutions for installation, maintenance and decommissioning projects.

RED Engineering (RED) is a company of professional engineers with a mission to help clients reduce risk, save money, shorten schedules and work safely.

Our core expertise relates to the concept development and delivery of intelligent engineering solutions for challenging installation, maintenance and decommissioning projects with services ranging from engineering surveys, the fast track design and build of bespoke equipment to quality assurance.

---

D1-089 Galson Sciences Limited

GSL provides nuclear decommissioning and radioactive waste management and disposal safety case consultancy and research services to an international clientele.

Environmental risk and impact assessment: development of Environmental Safety Cases to support decommissioning and the safe transportation and disposal of radioactive waste.

Environmental risk and impact assessment: development of Environmental Safety Cases to support decommissioning and the safe transportation and disposal of radioactive waste.

D1-090 Doig and Smith

Doig and Smith are one of the UK's longest established surveying firms providing Cost Management, Project Management and Building Surveying Services.

Founded in 1936 in Glasgow, Doig and Smith are now one of the UK's longest established surveying firms. We are recognised as one of the leading providers of Cost Management, Project Management and Building Surveying. With offices in Glasgow, Edinburgh, Aberdeen and London we cover the whole of the UK utilising our directly employed staff.

---

D1-091 GARTON LTD T/As THOMAS SMITH FASTENERS

British SME distributor of non-standard and standard special bolts and industrial fastenings. Technical advice is provided by an experienced technician.

Distributor of the complete range of industrial fasteners (bolts, nuts, washers, rivets etc) in all grades with mechanical and surface treatments required. All grades from 4.8, 8.8, 10.9, and 12.9 materials including stainless and exotics. Our sister company manufactures small to medium volume of special and non-standard bolting.

---

D1-092 NIASS Ltd

NIASS helps companies to identify position & team for nuclear opportunities. We are a Professional Business Development & Bid services.

NIASS provides Business Development support to companies with aspirations to either break into the nuclear sector or further expand their services to the nuclear industry. NIASS has a wealth of experience in the Nuclear sector, including process, civil, mechanical, electrical, instrumentation.

---

D1-093 Proeon Systems Limited

Proeon Systems is a specialist systems solutions provider that supplies control and safety solutions for complex and critical applications.

Specialist knowledge of and IP around:
- Gas Turbine Control Systems
- Fire & Gas Systems
- Hazardous Area Systems
- Automation Control, Safety Systems
- High Availability Systems

We provide technology, software, control and functional safety engineering services together with our own innovation and R&D. We have a team of highly experienced engineers and our concept team, experienced at working with our customers to develop effective solutions.

---

D1-094 Power Systems Limited

Power Systems is a specialist systems solutions provider that supplies control and safety solutions for complex and critical applications.

Piggott and Whitfield Ltd

Established over 125 years ago, Piggott and Whitfield are one of the UK’s longest established building services companies. We enjoy a reputation for innovation, technical excellence and project management.

Our machining facilities are equipped with a full range of CNC machine tools, including 5 axis multi-tasking machines from 3mm diameter up to 3.4m 5-axis capability. This is supported by a dedicated team of industry professionals in all aspects of project management, engineering and quality control. Our engineering team is backed by robust 5 axis simulation software, project management, contract administration, subcontractor coordination, test and inspection infrastructure.

We manufacture to AS9100 Rev D, ISO9001, ISO4001 and OHSAS18001 accreditations. We also possess the following approvals and accreditations including EN3834 exc class 4 and EN1090.

Cleanroom Supplies Ltd

D1-111

Based on a 20 acre site, we offer a totally integrated capability for the precision machining, fabrication, testing and assembly of complex components for the civil and naval nuclear, marine power generation, sub-sea and defence industries as well military aerospace contracts.

The facility is 22,000 square feet with a crane height of 10.5m and a lifting capability of 100 tonnes.

The LCM website is very much a dynamic resource in terms of the products we use for inspection and survey methods. Completely evaluating any human interaction during the initial inspection phase is of course of paramount importance. We take great care to ensure that this is incorporated into our inspection and survey methods.

LCM offers a range of specialist services for any organisation that has involvement with the dispensing and/or storage of fuels and oils. LCM has Nationwide capabilities to deliver the following business propositions and services:

- Fuel Tank and Pipework Maintenance (Pre-planned and reactive work)
- Integrity Testing
- LCM Proprietary Cleaning
- Emergency Spill Response (Pump and Water Containment System)
- Valve Testing
- In-Situ Surveys
- Fuel Testing
- Fuel Quality Assurance
- Fuel Reconditioning
- Fuel Meters
- Fuel Dispensers
- Fuel Computers

We design and undertake extensive in-house and third party testing of our products to ensure compliance of the product to the specification requested. This is allied to our philosophy of having the best people to deliver the project, advanced through extensive training and accredited by BSI, ensuring the product, project and environment are fully vetted.

We design and manufacture high integrity gas, fire, blast, shut off, balancing & complete isolation damper with moisture eliminators for the world’s nuclear and power generation markets.
### Oldham Engineering Ltd

**Profile:** Broad knowledge of the UK nuclear industry derived from 10 years of experience as a business consultant and 20 year career with BAE Systems, programme management, bidding and supply chain skills which have been applied at Government, Eon and Business Groups level.

**Services:**
- Coded Fabrication 287/9606 - 3.1 CSWIP
- Robot welding
- Medium-Heavy CNC machine capacity (10M Bed - 30te)
- Project Management to NEC3
- Assembly, Fitting, Testing

**Characteristics:**
- 12 Newmarket Green, Eltham, SE9 5ER
- 0161 627 5822
- martin.mcgeever@oldham-eng.com

### Blueprint 4 Growth Ltd

**Profile:** Characteristic subject matter expertise covering all of the above.

**Services:**
- Organisational design, employee relations, and organisational development.
- Internal recruitment and selection processes.
- Internal and external training.
- Change management for organisations.
- Professional development - personal and team development.

**Characteristics:**
- 12 Trident Park, Trident Way, Blackburn, BB1 3NU
- 01524 782507
- almather@alma-ltd.co.uk

### PatSnap (UK) Ltd

**Profile:** PatSnap is a cloud-based platform which aggregates patent and non-patent literature enabling R&D and Innovation departments to discover new ideas, monitor competition and innovate faster.

**Services:**
- Patent Search & IP Analytics Software. Search patents to identify opportunities, monitor competition and innovate faster.

**Characteristics:**
- 2nd & 3rd Floors Building 11 Chiswick Park 566 Chiswick High Road London W4 5YS
- 0203 790 7374
- lbaghdadi@patsnap.com

### JAG Training Ltd

**Profile:** JAG Training Ltd is a work base training provider specialising in apprenticeships, short courses, and bespoke training.

**Services:**
- All aspects of primary and secondary research; research design - both qualitative and quantitative, survey design, depth interviews, focus groups, market analysis, data analysis, research and management consultancy and support.
- Strategic development, leadership, and organisational change programme design, delivery.
- Change management - personal and team development, cultural change.
- Project Management, Team Building, and Leadership.

**Characteristics:**
- 13 Oakwood Drive, Fulwood, Preston, PR2 3LX
- 01772 450192
- gjulius@jag.training

### Proxima

**Profile:** Proxima is a specialist procurement provider with the collective insights and experience that come from managing billions on behalf of our clients in the private and public sectors.

**Services:**
- Procurement & Commercial Consultancy with services delivering:
  - Improving business profitability:
    - 1. Creating strategic alignment between business and procurement strategy;
    - 2. Driving greater effectiveness into the procurement process;
    - 3. Developing people;
  - Business transformation;
  - Smarter working;
  - Developing people.

**Characteristics:**
- 107 Cheapside, London, EC2V 6DN
- 0203 465 4689
- phil.greasley@proximagroup.com

### Biosite Systems Ltd

**Profile:** Biosite Systems Ltd is a preferred supplier to the Defence and Nuclear industries, offering specialisation in knowledge management, data management, and quality assurance, with over 10 years of experience in the nuclear industry.

**Services:**
- Improving business profitability:
  - 1. Creating strategic alignment between business and procurement strategy;
  - 2. Driving greater effectiveness into the procurement process;
  - 3. Developing people;
  - Business transformation;
  - Smarter working;
  - Developing people.

**Characteristics:**
- D1-133
- 12 Trident Park, Trident Way, Blackburn, BB1 3NU
- 01524 782507
- almather@alma-ltd.co.uk

---

### Tim Jones 07715 495720

**Profile:** Ryecroft, Aviary Road, Worsley, Manchester, M28 2WF

**Services:**
- 12 Newmarket Green, Eltham, SE9 5ER
- 0161 627 5822
- martin.mcgeever@oldham-eng.com

**Turner Harris Consult Ltd**

We joined a group of five leading privately owned UK-headquartered management consultancy practices in the energy, infrastructure, technology and related sectors. We provide strategic, operational, and financial advisory and implementation services across the energy, infrastructure, technology and related sectors. We operate at the advisory and execution levels; helping clients through business critical transformations, turnaround performance, navigating complex legal and regulatory challenges, and accelerating

**Penny Nuclear**

Penny Nuclear specialise in the design, manufacture, inspection and testing of lifting and mechanical handling solutions for all nuclear applications. We bring 40+ years experience of carrying out a wide variety of Civil Engineering Projects and also specialise in carrying out water main renewals, sewer replacement works. We are the only Caithness contractors who are experienced in Pipe Bursting. We are Framework contractors for DSRL for Building and Civils - Bridges, Site Clearance Works, Extensive Water Mains Renewals and Sewer & Storm Water Replacement Works to name a few.

**LED Scotland Ltd**

LED Scotland ltd specialise in Industrial, Electrical, Tool/Plant Hire & Industrial gas wholesale supplies. Our specialists can provide solutions in our areas of expertise:

- Vacuum tribology
- Industrial tribology
- Nuclear tribology
- Materials engineering
- Instrumentation (laboratory and on-site)
- Engineering assessment (bearing, gearboxes and bolts)
- Failure analysis
- Non-Destructive Testing good practice
- Safety and risk management

**Squibb Group Ltd**

The Squibb Group has a successful track record of managing confined developments, integrating interfaces to other complex systems and resolving potentially sensitive problems when operating in close proximity to live environments in healthcare residential, city Centre, commercial, Industrial, petro chemical/oil & gas industries. Our services include:

- Demolition & De-Construction
- Waste Management & Recycling
- Specialist Design and Structural Engineering

**ESR Technology Ltd**

ESR Technology provides clients with independent and specialist technical consultancy and support services in the Oil & Gas, Heavy Industrial and Power generation industries. We provide technology to the mining, oil & gas exploration and production, and petrochemical industries. Our specialists can provide solutions in our areas of expertise:

- Water treatment
- Environmental management
- Energy management
- Process safety
- Occupational health & safety
- Hazardous areas
- Integrity management

**M5tec Limited**

M5tec are a multidiscipline engineering design company offering Mechanical, Electrical, Hydraulic, structural engineering and draughting services to high assurance industries. From our well established 10,000 sqft stores with showrooms and trade counters in the local town of Thurso we supply all our clients with all they require. We supply all materials required to meet the demands of our customers. Our specialist expertise include:

- Vacuum tribology
- Industrial tribology
- Nuclear tribology
- Materials engineering
- Instrumentation (laboratory and on-site)
- Engineering assessment (bearing, gearboxes and bolts)
- Failure analysis
- Non-Destructive Testing good practice
- Safety and risk management

Squibb Group Ltd
We help teams and organisations find ways and means to work together through better communication, behaviour and technology.

Simpler technology use, better collaboration with ICT, greater observation and feedback of what actually happens, and identifying gaps in the theoretical models and research on collaboration. So how do we help organisations and teams improve? We have identified the following key areas, with a focus on:

1. **Communication and collaboration**
   - Tools and technologies for communication
   - Training and development

2. **Behavioural and psychological interventions**
   - Understanding and changing human behaviour
   - Designing and implementing interventions

3. **Technology and digital solutions**
   - Integrating technology into interventions
   - Evaluating impact and outcomes

We utilise our in-house capability and experience to plan and deliver robust proposals and solutions. We also make full use of our comprehensive and varied network of strategic ‘like-minded’ partners and suppliers for multi-discipline and specialist works. We have a proven track record of undertaking work on fully regulated construction projects and are equally as capable of supplying our services to non-regulated construction projects. We are able to complete projects with a full understanding of the regulatory environment in which our clients operate.

**Key Services**

- **Communication and collaboration**:
  - Training and development
  - Tools and technologies for communication

- **Behavioural and psychological interventions**:
  - Understanding and changing human behaviour
  - Designing and implementing interventions

- **Technology and digital solutions**:
  - Integrating technology into interventions
  - Evaluating impact and outcomes

Canberra provides nuclear measurement consultancy, engineering design, and maintenance to the nuclear industry. Canberra is a member of the Navig8 Group and has a strong track record in delivering innovative solutions and services.

PaR Systems Ltd has been serving the nuclear industry for over five decades. The company is the leading provider of remote and autonomous technologies for energy, renewables, mining, telecoms, and defence. PaR Systems provides innovative solutions for remote and autonomous technologies, including offshore wind, oil and gas, and nuclear power. PaR Systems is a member of the Navig8 Group and has a strong track record in delivering innovative solutions and services.

D2-006 Universal Pegasus

Universal Pegasus is a specialist manufacturer with extensive experience in fabrication, welding, and bespoke manufacture, assembly and testing of Specialised Products. Universal Pegasus is a member of the Navig8 Group and has a strong track record in delivering innovative solutions and services.

Modus  is a specialist provider of integrated project services, remote and autonomous technologies for energy, renewables, mining, telecoms, and defence. Modus provides innovative solutions for remote and autonomous technologies, including offshore wind, oil and gas, and nuclear power. Modus is a member of the Navig8 Group and has a strong track record in delivering innovative solutions and services.

Canberra UK provides nuclear measurement consultancy, engineering design and maintenance to the nuclear industry. Canberra is a member of the Navig8 Group and has a strong track record in delivering innovative solutions and services.

PaR Systems design, manufacture, trial, deploy and service all types of remote and material handling equipment for Nuclear applications. PaR Systems is a member of the Navig8 Group and has a strong track record in delivering innovative solutions and services.

D2-025 NUKEM Technologies Engineering Services GmbH
We are globally active in the areas of radioactive waste management, the decommissioning of nuclear facilities and engineering. Our main business areas include management of radioactive waste, decommissioning of nuclear facilities as well as engineering and consultancy services.

D2-024 BEL Engineering
BEL Engineering offer turnkey solutions to various sectors including Civil Nuclear, Nuclear Defence, Oil & Gas, Power Generation, Chemical, Defence, Oil & Gas, Nuclear and Medical. We have a strong collaboration approach and are able to work with other supply chain companies to deliver consistent results. Ribble House, Meany Gate, Bamber Bridge, Preston, PR5 6UP 07976 226 507

D2-023 John Bell Pipeline Equipment Ltd
Critical Oil & Gas Pipeline Equipment for the Process and Energy Industries, including pipeline valves, flow components, control valves, isolation, and shut off valves. We manufacture general purpose and high pressure valves, and can provide the complete control panel, computer interface, and testing services. We supply through our sales offices in Inverurie and Grangemouth.

D2-022 Studsvik Limited
Studsvik Limited Studsvik provide leading expert services within the Radioactive industry; specialising in Decommissioning, Radioactive Waste Management, Characterisation, Strategy & Policy, and Radiation Protection.

D2-021 BEL Engineering
BEL Engineering are major suppliers into the Process and Energy Industries. Providing solutions to the nuclear industry, including valves, nuclear safety systems, safety valves, monitoring and valve actuation systems. We manufacture general purpose and high pressure valves, and can provide the complete control panel, computer interface, and testing services. 0191 204 3680 dsidebotham@belengineering.co.uk www.belengineering.co.uk Category 2

D2-020 Idom Merebrook is the UK engineering branch of the IDOM Group. IDOM is a multidisciplinary consultancy group offering services in engineering, architecture and environment to clients in the industry, transport, energy and business sectors.

D2-019 John Bell Pipeline Equipment are major suppliers into the Process and Energy Industries, including pipeline valves, flow components, control valves, isolation, and shut off valves. We manufacture general purpose and high pressure valves, and can provide the complete control panel, computer interface, and testing services. We supply through our sales offices in Inverurie and Grangemouth.

**Notes:**
- All companies are involved in the Nuclear Industry.
- Soil Engineering is a major provider of site investigation services, specialist drilling services, ground stabilisation and geotechnical testing.
- Tradebe Inutec has been providing management, treatment and disposal of radioactive wastes from the Nuclear Industry for more than 30 years; increasing flexibility for all major nuclear customers with decommissioning and operational wastes.
- Pöyry Energy Ltd is a leader in enterprise VR and AR business solutions, with a central hub to create, consume, distribute and host applications.
- Booth Welsh is an innovative integrated engineering company with a reputation for delivering high-quality solutions and technology. They are known for their highly collaborative and competitive service providers. We deliver multi-disciplinary projects, including Primary & Process Safety Engineering, Electrical, Control & Instrumentation and related services. We have extensive experience in project management, security & program management for capital projects, including infrastructure, power, chemical, and petrochemical projects. Our specialists are recognized as leaders in their fields of expertise. Economics: Our team offer the following services: programme and policy evaluation; economic intelligence and forecasting; qualitative and quantitative research; and feasibility studies, option appraisals and business cases. Forth is an advanced engineering solutions provider for harsh environments. Specializing in innovation R&D and visual inspection, they have developed a unique range of ROV’s and remote tooling which are used across many sectors for inspection and manipulation. They offer Mechanical and Remote Handling Systems - Manipulators and Long Reach Tooling - Remote Operated Vehicle (ROV) - Aerial, Ground & Water - Rapid Prototyping - Design - 3D modelling with 3D Printing - Mechanical & Electrical Engineering - Project Management - CE&I Control Systems - Trials, Training and Simulation - UK's only autonomous UK Responder. EON Reality Ltd is one of the UK's leading demolition companies. We have worked in the nuclear sector at Sellafield. One of our most recent projects was a 2,000 tonne Nuclear Waste Store Demolition. One of our most recent projects was a 2,000 tonne Nuclear Waste Store Demolition. They provide solutions for maintenance, repair and operations. Clients can benefit from using their software by gaining the biggest benefit and can provide preparatory training paired with LMS data capture for decommissioning activity.
TÜV UK Ltd is a UKAS accredited Type A Third Party Inspection Organisation (UKAS Accreditation Number 033), Certification Body (UKAS Accreditation Number 0014) and Technical Body (0014) for services according to the European Pressure Equipment Directive and the Construction Products Regulations.

TÜV UK Ltd also offers the following further services:

- BVCI qualified & approved MIMI Support
- Pressure equipment and systems: PED, PPR & 93/7/EC
- Management of factory production
- Third party inspection
- Authorised Body (AB) Certified, Part 2, Decommissioning & asset management
- For site companies offers & Delivered Extension Build On-Demand Regulatory support in Germany & Extension ECV's holder, operator & supply chain support to branches.

Our core team of inspection professionals is supplemented by the provision of staffs on a consultancy basis from TÜV UK's Technical Advisors, members of whose have held the senior positions in the UK Government, regulatory system, and the nuclear industry.

TÜV UK Ltd has a team of Design and project delivery, nuclear and nuclear safety, nuclear reactor licencing and nuclear technology projects, Government advisory support, process engineering design and research, plant maintenance management, and nuclear project management.
