		Voluntary and community sector (VCS)/Small and medium enterprises (SME) Procurement spend with SME (£) Procurement spend with VCS (£) Grants to VCS (£)	As defined in the Common Areas of Spend Procurement Standards - www.cabinetoffice.gov.uk/resource-library/common-areas-spend-data-definitions	Quarter	Current = Q3 2011-12 (Oct-Dec) Previous = Q2 2011-12 (Jul-Sept)	Full	Finance Function	Management information					Q3 2011/12 figure for procurement spend with SME includes data from some of our ALB's who provide information as part of a sperate procurement key metrics exercise.	The data for SME's covers the core DCMS and some ALB's who have provided data for the SME metric.		Grants to VCS in quarter were inflated by one off grants of £2million to Cutty Sark Trust and £4.05 million to li foundation for delivery of International Inspiration programme. The SME data has increased due to the addition of some ALB data that is provided as part of a separate procurement key metrics exercise. This figure is currently only estimated and is likely to change as some organisations currently only have the facility to capture this data on a yearly basis.

		Workforce Dynamics	The number of recruitment exceptions that have been approved during the quarter.	Quarter	Current = Q3 2011-12 (Oct-Dec) Previous = Q2 2011-12 (Jul-Sep)		Organisations internal monitoring	Management information				
		Recruitment Exceptions	Where appropriate, organisations should ensure that figures align with those supplied to Cabinet Office for their quarterly exceptions reporting collection in 2010/11. For 2011/12, organisations need only report their exceptions on their QDS - at this stage they do not need to also report separately each quarter to the Cabinet Office. Organisations should report the number of exceptions for each discrete quarter rather than a cumulative annual position.									
		Annual Turnover Rate	Annual turnover rate (Headcount basis). The number of staff exiting the organisation during the year ending the reference period, divided by the average staff in post over the year ending the reference period (where the average staff in post is calculated as the number of staff in post at the start and end of the relevant period divided by 2, and leavers are ALL leavers exiting the organisation during the period). Each quarter's figure will show an annual turnover rate for the year ending that quarter. The definition used here is one of many interpretations of 'turnover'. Whilst we appreciate that organisations may use different measures for their own internal monitoring, we have opted for the described measure to ensure consistency across departments. Where organisations wish to make other measures available, they are free to do so in accompanying commentary or their meta-data sheet as appropriate. Figures used in the calculation of the denominator should be consistent with those used elsewhere.	Quarter	Current = year ending 31st December 2011 Previous = year ending 30th September 2011			Management information			The reason for the increase in turnover is due to further exits through last year's Voluntary Redundancy Scheme and a number of Games related temporary roles ending, added to the already high turnover rate for us being a smaller Department that relies on loans / secondments from Other Government Departments.
