

DPIA –

Kirklees Council and HMRC Digital Economy Act Data Sharing Pilot.

Step 1: Identify the need for a DPIA

Explain broadly what project aims to achieve and what type of processing it involves. You may find it helpful to refer or link to other documents, such as a project proposal. Summarise why you identified the need for a DPIA.

Kirklees Council has a strategic objective each year to improve the Council Tax collection rate.

For 2017/18, the Council issued approx. 185,000 bills to resident households demanding £188.2m Council Tax, with an average collection rate of 96.0% (national average is 97.1%), leaving a shortfall of Liability Order debt of £7.53m

The Council obtained 22,614 Liability Orders at the Magistrates Court, of which over 50% of these liability orders were eventually passed to Enforcement Agents, with only approx. 18% resulting in Attachment of Earnings (AOE) - a process where direct deductions are made from salary at a percentage set by Local Government Finance Act 1992 (LGFA 1992).

The Council have identified that sharing Council Tax debt data with Her Majesty's Revenues and Customs (HMRC) to obtain PAYE and self-assessment information could support:-

- managing overall Council Tax arrears and further developing its recovery procedures, by analysing the employment and income information of individuals provided by HMRC to:-
 - identify customers whose circumstances make them vulnerable and providing appropriate support;
 - contact customers identified as having a propensity to pay and offering them the opportunity to pay, and support when needed ;
 - For those that still do not engage and are in employment, recovering individual Council Tax debts by Attachment to Earnings Orders
 - overall reducing use of Enforcement Agents and associated costs to customers of approx. £310 (£75 compliance, £235 enforcement) per customer p.a. On average savings will be approx. £187 per customer.

Kirklees Council and Her Majesty's Revenues and Customs are both joint data controllers.

The purpose of the pilot is to gather evidence that the data shared from HMRC will increase the Council's Council Tax recovery rate and reduce costs associated with recovery.

The DPIA is needed as we will be collecting new information from HMRC to enable Council Tax recovery which may have a significant impact on the individuals concerned, for example:-

- Financially vulnerable individuals may be identified and offered debt support
- AoE's may be implemented where the individual will have no choice regarding payment of the debt.
- Individuals may be contacted to discuss the new information provided by the HMRC

This may also raise privacy concerns as this data was originally collected for the purposes of calculating income tax liability.

Step 2: Describe the processing

Describe the nature of the processing: how will you collect, use, store and delete data? What is the source of the data? Will you be sharing data with anyone? You might find it useful to refer to a flow diagram or other way of describing data flows. What types of processing identified as likely high risk are involved?

Kirklees Council will supply to HMRC customer names and addresses for a sample of up to 4,000 Council customers, who are subject to Liability Orders. HMRC will match against HMRC data and matching cases will be supplied to the Council with PAYE and self-assessment data.

The data will be used to enable management and recovery of Council Tax debt, via:-

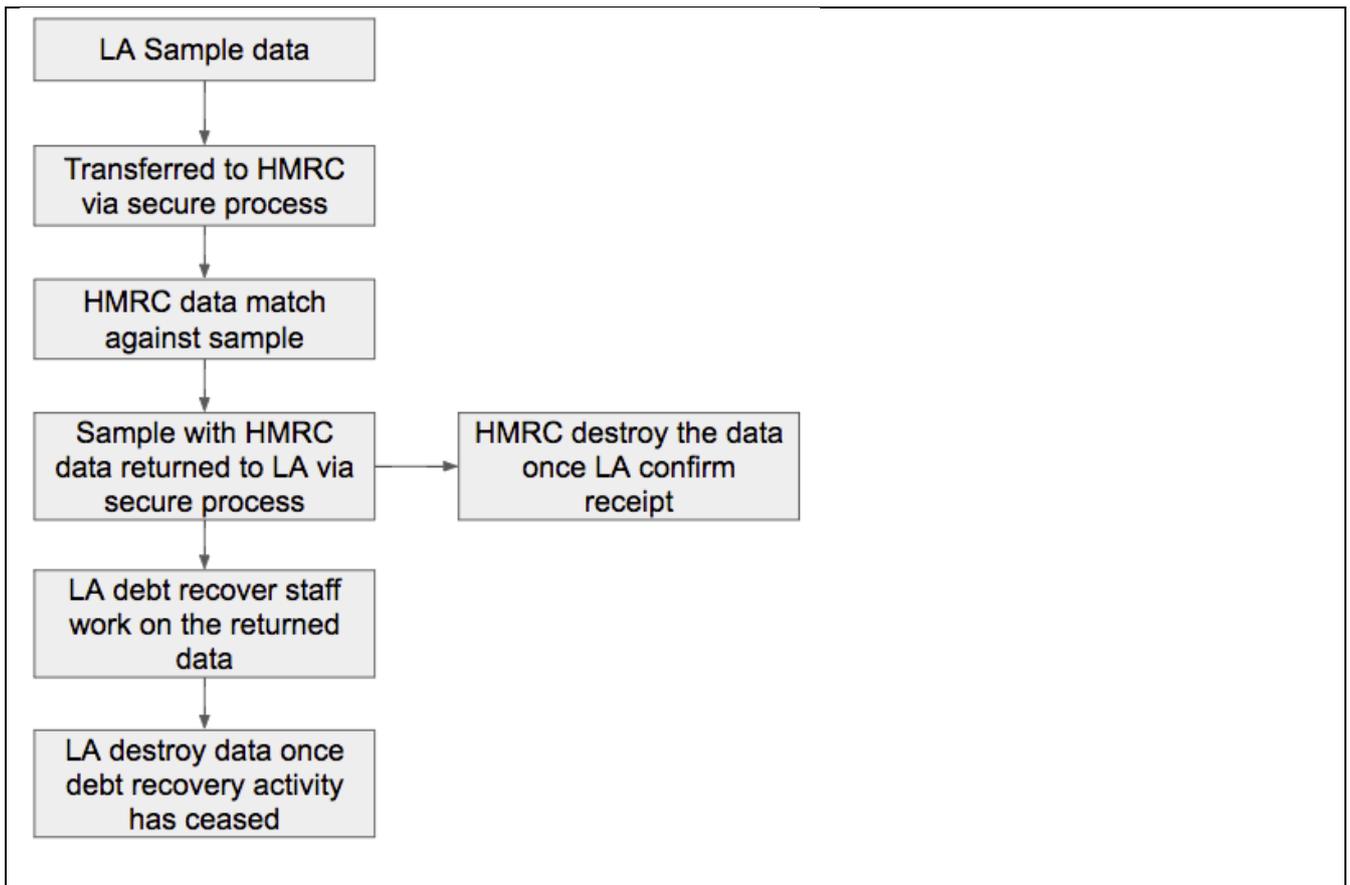

- Where financial vulnerability is identified, discussions around the use of debt support
- AOE where employment information has been provided
- Further discussion with the individual where self-assessment information has been provided

The data will be stored in a secure folder within the Councils It system.

HMRC will destroy their data once the Council has confirmed receipt.

The relevant data will only be kept for the period it is needed for the pilot.

The data will not be shared with anyone else. Example below (will be same as Brighton &Hove)

Describe the scope of the processing: what is the nature of the data, and does it include special category or criminal offence data? How much data will you be collecting and using? How often? How long will you keep it? How many individuals are affected? What geographical area does it cover?

The nature of the data is customer name, address and liability order date from Kirklees Council and for matching records and if applicable, PAYE and self-assessment information will include DOB and NINO from HMRC.

There are no special categories or criminal offence data.

A sample of up to 4,000 records will be collected and used. This will be a mix of years, some multiple years, these will be selected from our caseload of recovery cases at different stages of recovery or enforcement, attachment, arrangements, GNA etc.

Data sent will include:

This is a one off pilot to inform the next phase

HMRC will destroy the records supplied by the Council after processing, return to the Council and receive confirmation of receipt from the Council.

The Council will keep the data for duration of pilot. The standard data retention period for the pilot is one year. However, data that is being used operationally to recover debt, e.g. via an Attachment of Earnings, bankruptcy action or supporting identified vulnerable customers will be retained in line with local Council Tax data retention policies for each pilot authority and

deleted in accordance with said policies.

Up to 4,000 individuals may be affected

The geographical area covers the Kirklees boundary.

Describe the context of the processing: what is the nature of your relationship with the individuals? How much control will they have? Would they expect you to use their data in this way? Do they include children or other vulnerable groups? Are there prior concerns over this type of processing or security flaws? Is it novel in any way? What is the current state of technology in this area? Are there any current issues of public concern that you should factor in? Are you signed up to any approved code of conduct or certification scheme (once any have been approved)?

The individuals reside or have resided within the Kirklees Council boundary, are liable to pay Council Tax to the Council and have not paid.

The individuals will have no control.

Council Tax is covered by the Local Government Finance Act 1992 and individuals are required to pay their Council Tax and would expect Kirklees Council to pursue recovery of their debt.

Children and other vulnerable groups ie SMI are not included.

There are no prior concerns over this type of processing and security flaws.

It is novel in that this is the first piloted use of data in this manner; however, the use of data sharing to manage and reduce debt is well established throughout the debt industry.

There is no new technology in this area for this type of pilot.

There are no issues of public concern to be factored in.

The Council and HMRC are required to adhere to the DEA Code of Practice, DPA 2018 and LGFA 1992 (as amended).

Describe the purposes of the processing: what do you want to achieve? What is the intended effect on individuals? What are the benefits of the processing – for you, and more broadly?

The pilot is aimed at:-

Increasing recovery of Council Tax debt from individuals who have not paid and debt support for those individuals identified as financially vulnerable.

The intended effect on individuals will be to, for those who are able to pay and choose not to pay, manage and recover their debt. For those who are identified as vulnerable, the effect will be to help them via debt support. It will also be fairer for those who do pay their Council Tax.

The benefits of the processing are:-

- Identified financially vulnerable debtors can be signposted for assistance within or outside of the Council.
- Increase in Council Tax debt recovered
- Increase take up of reliable Attachment of Earnings,
- Increase in debt recovery due to knowledge of customers self-assessment information
- Reduce failure rate of Attachment of Earnings,
- Reduce need for using Enforcement Agents as a first port of call and increasing debt with fees. Thus reducing the costs for individuals especially vulnerable customers
- A fairer approach to reducing debt with ability to pay over a regular period.
- Improve our effectiveness in debt recovery, reducing pressure on budgets
- Those in regular employment will avoid expensive and stressful Enforcement Agent visits.
- Customers, knowing that we have access to HMRC data, will be encouraged in earlier take up to contact and make arrangements to pay.
- Efficiency savings by reducing time/court hearings on committal or insolvency cases.
- Efficiency savings on not transferring cases to Enforcement Agents.
- Earlier repayment of debt to the Council

Step 3: Consultation process

Consider how to consult with relevant stakeholders: describe when and how you will seek individuals' views – or justify why it's not appropriate to do so. Who else do you need to involve within your organisation? Do you need to ask your processors to assist? Do you plan to consult information security experts, or any other experts?

Individuals' views will not be sought for this pilot, the Council already has the power to request employment details from individuals when a liability order has been obtained under Regulation 36 of the Council Tax (Administration & Enforcement) Regulations 1992 and employment details are already held in many cases where an attachment of earnings order has been served. Consultation is not therefore necessary on this occasion.

Additionally the Digital Economy Act 2017 has undergone a public consultation process.

Within Kirklees Council, the DPO, SIRO, senior decision makers, analysts and debt agents need to be involved.

Processors will be asked to assist.

Security, data protection and analyst experts will be involved and consulted.

Step 4: Assess necessity and proportionality

Describe compliance and proportionality measures, in particular: what is your lawful basis for processing? Does the processing actually achieve your purpose? Is there another way to achieve the same outcome? How will you prevent function creep? How will you ensure data quality and data minimisation? What information will you give individuals? How will you help to support their rights? What measures do you take to ensure processors comply? How do you safeguard any international transfers?

The statutory gateway is:-

- Local Government Finance Act 1992
- Digital Economy Act 2017, part 5, Chapter 3.

The lawful basis for processing is the:-

Performance of a task carried out in the public interest or in the execution of official authority vested in the controller

The processing will achieve the purpose and there is no other way of obtaining the same outcome.

The pilot will adhere to the DEA Code of Practice, DPA 2018 and LGFA 1992 and the project aim and processing will prevent function creep.

Data minimisation is achieved by adhering to the LGFA 1992, in that only the information supplied by the individual can be supplied to HMRC.

Data quality will be achieved by in-house processing by HMRC to ensure only matched individual data is returned to the Council that reaches HMRC matching criteria.

Information given to the individual will take the form of a Privacy Notice outlining the potential uses that may be made of their data for the purposes of Council Tax collection and in the event of non-payment. The Privacy Notice will also include details or reference to details of how to exercise data subject rights under the legislation.

Information given to individuals as a consequence of the matching activity will depend on the match data returned by HMRC, and for those with:-

- PAYE data supplied, they will be informed that an AOE will commence
- Self-assessment data, they will be informed by letter or phone conversation.
- For those identified as financially vulnerable they will be helped by signposting for debt support

The Council will apply its fairness principles to the pilot.

All staff involved in the pilot have been suitably trained and have signed relevant data security policies.

Data will not be sent outside the UK.

<p>can lead to sanctions, fines and reputational damage</p> <ul style="list-style-type: none"> • Public distrust about how information is used can damage the Council’s reputation • Data losses which damage individuals could lead to claims for compensation 	Remote	Significant	Low
<hr/> <p>Risk – Data held may be out of date Impact – If a retention period is not established information might be held for longer than necessary Compliance and corporate risk -</p> <ul style="list-style-type: none"> • Non-compliance with the DPA • Non-compliance with sector specific legislation or standards • Non-compliance with human rights legislation • Non-compliance with the DPA or other legislation can lead to sanctions, fines and reputational damage • Public distrust about how information is used can damage the Council’s reputation 	Possible	Significant	Medium

Step 6: Identify measures to reduce risk

Identify additional measures you could take to reduce or eliminate risks identified as medium or high risk in step 5				
Risk	Options to reduce or eliminate risk	Effect on risk	Residual risk	Measure approved
Data is shared with other sections or organisations for which there is no authorisation or legal justification	<ul style="list-style-type: none"> • A legal gateway for sharing this information has been established • Restrict access to data through system usernames/ passwords • GDPR training delivered to all existing staff and incorporated in induction procedures for new staff provided 	Eliminated reduced accepted	Low medium high	Yes/no
The data being collected may be considered sensitive as it shows employment details including levels of earnings, self-employment and income details	<ul style="list-style-type: none"> • Data only used by staff responsible for administering attachment of earnings • legislation prescribes deduction percentages depending on income (section 6 of CT (admin and enforcement) regulations 1992 	Reduced	Low	Yes
Data concerning vulnerable customers may be divulged without authorisation putting individuals at risk	<ul style="list-style-type: none"> • Restrict access to data through system usernames/ passwords • GDPR training delivered to all existing staff and incorporated in induction procedures for new staff provided 	Reduced	Low	Yes
Data held may be out of date	<ul style="list-style-type: none"> • Compliance with data retention periods that apply to service 	Reduced	Low	Yes

Step 7: Sign off and record outcomes

Item	Name/date	Notes
Measures approved by:	██████████	Integrate actions back into project plan, with date and responsibility for completion
Residual risks approved by:	██████████	If accepting any residual high risk, consult the ICO before going ahead
DPO advice provided:	A legal gateway exists in the Digital Economy Act 2017 and the Local Government Finance Act 1992 (LGFA 1992) to obtain and use this data without public consultation	DPO should advise on compliance, step 6 measures and whether processing can proceed
Summary of DPO advice:		
DPO advice accepted or overruled by:	██████████	If overruled, you must explain your reasons
Comments:		
Consultation responses reviewed by:	N/A	If your decision departs from individuals' views, you must explain your reasons
Comments:		
This DPIA will kept under review by:	████████████████████	The DPO should also review ongoing compliance with DPIA
