**Strategic Export Controls: Country
Pivot Report**

**1st October 2010 - 31st December
2010**

OCTOBER 2019

Countries: All countries

Case Types: All case types

All Cases / Incorporation Cases Only: All cases

Ultimate Destinations: All countries

Licence Statuses: All licence statuses

Reasons for Refusal: All reasons for refusal

Case Summaries: All case summaries

Ratings: All control entries

Introduction

This report covers **export licensing decisions made by Her Majesty's Government (HMG)** between 1st October 2010 and 31st December 2010. Licence applications are submitted to and processed by the Export Control Organisation (ECO), part of the Department for International Trade, through a purpose-built online licensing system called Spire. The ECO issues licences for controlling the export of strategic goods.

Whether or not an export licence is required is determined by four factors, the:

- nature of the goods due to be exported
- destination concerned
- ultimate end use of the goods
- licensability of trade activities of the goods due to be exported

Broadly there are two types of licence, individual and general. Licences can be *standard* or *open*.

Each licence names the goods that can be exported and specifies the destinations to which they can be exported, along with other details and restrictions. *General* licences are pre-published and can be used by all eligible exporters whereas *individual* licences are issued following a successful application and allow only those named on the application to export certain goods. Those exporting under *general* licences must adhere to the terms and conditions of the licence under which they wish to export. Exporters must register with the ECO to use a *general* licence and are subject to regular audits to ensure the licence terms and conditions are being adhered to. Those requiring an *individual* licence must submit an application to the ECO where they wish to make exports not covered by the terms and conditions of a *general* licence.

Generally, *open* licences can be used with fewer restrictions than *standard* licences. *Standard* licences tend to name a specific quantity of specific goods that can be exported to a specific destination whereas *open* licences may include a wider range of goods or destinations and generally do not limit the quantity of goods that can be exported.

A glossary of key terms follows this introduction which explains the various licence types and subtypes that can be used or applied for and how information relating to each licence type and subtype is available within this report.

This report and other sources of information

Each of these quarterly reports (from 2015Q1 published in July 2015) is supplemented by a set of *data tables* in spreadsheet format (plus CSV format) and a *statistical commentary* document in addition to this report. The *data tables* provide the same information as presented in this report but in a different format and for **periods back to 1 January 2008**. CSV spreadsheets use a non-proprietary format that facilitates the manipulation of the data by a variety of software (not just Microsoft Excel) and provide the same information as available from the *data tables*. These outputs can be found alongside this report under the 'Quarterly reports' heading here:

<https://www.gov.uk/government/collections/strategic-export-controls-licensing-data>

The 'New Report' tool on the "Strategic Export Controls: Reports and Statistics" web page can also be used to download data. The tool offers a variety of filters that can be applied to allow users to download data of specific interest, such as licences which name a certain destination or licences for the shipment of goods with a certain rating. The tool is available here (registration required):

<https://www.exportcontroldb.trade.gov.uk/sdb/fox/sdb/SDBHOME>

Key terminology and data available in this report

Licences types exist for each combination of *open/standard* and *general/individual* , except for *standard general* . The following table summarises the licence types under each of these headings. Each of these licence type has subtypes (more information available under 'Licence types and subtypes').

	Open	Standard
General	OGELs	Not applicable
Individual	OIELs, OITCLs,	SIELs, SITCLs

Key terms

Strategic goods include military goods and a wide range 'dual-use' goods; civilian goods with a military purpose. Goods are assessed against a **consolidated list of goods that require export authorisation**, available here:

<https://www.gov.uk/government/publications/uk-strategic-export-control-lists-the-consolidated-list-of-strategic-military-and-dual-use-items-that-require-export-authorisation>

It is possible for a licence to be for both military and dual-use goods.

Control Entries are the codes assigned to each good on the **consolidated list of goods that require export authorisation (herein 'consolidated list')**. For example, all control entries beginning 'ML' (such as ML1, ML8 etc) are control entries for military goods. The process of assigning control entries to goods is called **Rating**.

In some cases goods can be made subject to control if they do not appear on the **consolidated list**. Goods that the exporter has been told, knows or suspects are, or may be, intended for "WMD Purposes" are given the rating "End-Use". Goods that the exporter has been told, knows or suspects are, or may be, intended for use as components in, or production or test equipment for, military equipment in an embargoed destination; or may be intended for use as parts of military goods illegally obtained from the UK, irrespective of destination, are given the rating "MEND". Both of these "end-use" ratings are also sometimes referred to as "catch all" ratings.

Case summaries are text descriptions used to classify goods on licences. They are standardised descriptions to explain what the goods are without giving away commercially sensitive details about the goods (such as design or intellectual property). Using standardised descriptions also facilitates comparison and analysis. Often extra detail is communicated by using prefixes. For example, a replacement part for a sporting shotgun may be described as "components for sporting shotguns" rather than just "sporting shotgun".

One or more Control Entry can be used to rate more than one good on a licence. Also, one or more Case Summaries can be used to describe a single Control Entry.

Goods are rated as **Military** (ie, they are assigned a Control Entry from the **UK Military List** within the **consolidated list**) or they are rated as being **Non-military**. Non-military goods:

- appear on other lists within the **consolidated list** , such as the **UK Dual-Use List** .
- also include goods refused to destinations that are placed under **sanctions**, such as trade sanctions or an arms embargo. Licences relating to the goods affected by the sanction do not get approved but also do not get rated against the **consolidated list**. They are instead rated with a **sanction code**, such as 'RUS' for Russia and 'IRN' for Iran.

SIELs for Goods covered by Council Regulation 1236/2005 (see 'Licence types and subtypes') concern trade in certain equipment and products which could be used for capital punishment, torture or other cruel, inhuman or degrading treatment or punishment. These are classed as non-military goods but appear separately to the statistics on licences for non-military goods. SIELs for Goods covered by Council Regulation 1236/2005 are

therefore not included in the count of non-military goods for other SIEL subtypes. More information on the Regulation is available here: <https://www.gov.uk/controls-on-torture-goods>

As noted, goods can also be rated even if they don't appear on the **consolidated list**.

Licence applications can be **Refused** (for standard individual licences) or **Rejected** (for open individual licences). Licences are refused/rejected for one or more pre-specified reasons. All applications for licences are assessed on a case-by-case basis against the **Consolidated EU and National Arms Export Licensing Criteria** and a decision made on either approval or refusal. Depending on the nature of the goods, other policy aspects might also be considered. For example, if the exported goods are due to be incorporated into another system, equipment or plant, then the items are also assessed against the UK's incorporation factors policy.

Applications for licences can be refused if it is deemed to fail one or more of the Consolidated EU and National Arms Export Licensing Criteria. These 8 criteria include, for example, *Preservation of regional peace, security and stability (criterion 4)* or *Respect for the UK's international obligations and commitments, in particular sanctions adopted by the UN Security Council or the European Union, agreements on non-proliferation and other subjects, as well as other international obligation (criterion 1)*. More information about the criteria is available here:

<https://www.gov.uk/government/publications/consolidated-eu-and-national-arms-export-licensing-criteria>

Licences can also be **Revoked** at any time after being Issued.

Case & goods footnotes are added to certain cases to provide explanation on the end use and/or end user.

Country footnotes are added to destinations with the aim to help the user understand why certain goods may have been approved, refused/rejected or revoked in the period.

Licence types and subtypes

Export Licences

General Licences

Before data are presented per destination, a table summarises the use of **Open General Export Licences (OGELs)** on page 14. OGELs are pre-published licences allowing the export of certain goods to certain destinations. If exporters are eligible to trade under an OGEL then they should register to use that OGEL. Once registered, there is no need for an exporter to submit further applications to trade under the licence they have registered to use.

Some Open General Transshipment licences exist for the **transshipment** of certain goods through the UK en-route from one country to another, providing in all cases that the relevant conditions are met.

There are no Open General licences for the **incorporation** of goods into another product or higher level systems.

Individual Licences

The vast majority of this report presents information (where available) per destination relating to *standard individual* licences and open individual licences (SIELs, OIELs, SITLs, SITCLs and OITCLs). All destinations are presented in this report, and if information regarding certain licence types is not presented for a destination then this is because no decisions have been made on such licences in this period.

Exporters should check to see whether they are eligible to use an *open general* licence before applying for either a *standard individual* licence (eg SIEL, SITCL) or *open individual* licence (eg OIEL, OITCL), whichever is most appropriate.

Open Individual Licences

Open Individual Export Licences (OIELs) are *specific to an individual exporter and cover multiple shipments of specified items to specified destinations and/or, in some cases, specified consignees.* Licences permitting permanent export are generally valid for up to 5 years from the date of issue. However, OIELs covering the export to EU Member States of goods entered on the Military List and Dealer to Dealer OIELs (an OIEL subtype) are generally valid for 3 years.

Other OIELs:

There are several subtypes of OIELs including **Global Project Licences**, as well as **Dealer-to-dealer, Cryptographic, Media and Continental Shelf OIELs.**

Dealer-to-dealer OIELs (or simply Dealer OIELs) authorise UK registered firearms dealers to export certain categories of firearms and ammunition solely to other registered firearms dealers on the European Union only, provided that copies of valid documentation are forwarded to the Home Office at least 2 working days before each shipment.

Cryptographic OIELs authorise the export of specified cryptography hardware or software and the transfer of specified cryptography technology. These licences do not cover hardware, software or technology which includes certain types of cryptanalytic functions.

Media OIELs authorise the export of military helmets, body armour, non-military 4WD civilian vehicles with

ballistic protection and specially designed components for any of these items, mainly for the protection of aid agency workers and journalists in areas of conflict. The licence permits these goods to be exported to all destinations on a temporary basis only, i.e. the goods must be returned to the United Kingdom when no longer required.

Continental Shelf OIELs authorise the export of controlled goods to the UK sector of the Continental Shelf for the use only on, or in connection with, offshore installation and associated vessels.

Global Project Licences (GPL) are a form of export licence that were introduced by Framework Agreement partners (UK, France, Italy, Sweden, Spain and Germany) to streamline the arrangements for licensing military goods and technologies between them, where these transfers relate to their participation in specific collaborative defence projects. In relation to the collaborative project, each Partner state will, as appropriate, issue their own GPLs to permit transfers of specified goods and technology where these are required for that programme. The GPLs operate on a similar basis to UK Open Individual Export Licences. In the UK, applications for GPLs are assessed against the Consolidated Criteria.

Standard Individual Licences

Standard Individual Export Licences (SIELs) are specific to an individual exporter and generally allow shipments of specified items to a specified consignee up to the quantity specified by the licence.

There are 5 main subtypes; permanent, temporary, incorporation, transshipment and SIELs for Goods covered by Council Regulation 1236/2005.

- **Permanent SIELs** are for items that are for permanent export to a destination. They are generally valid for 2 years from date of issue.
- **Temporary SIELs** are for where the export is temporary, for example for the purposes of demonstration, trial or evaluation, and the licence is generally valid for one year only. The goods must be returned before the licence expires. Temporary SIELs can cover more than one destination and in such cases the licence will be counted once per destination. Therefore users should express caution when summing licence details together across countries.
- **Incorporation SIELs** are for goods that are due to be incorporated ie, installing them into another product or higher level system. For incorporation cases there are two end user types. The 'end user' is the person/organisation incorporating the goods. The 'ultimate end user' is defined as the entity that uses the product or the higher level system into which the exported goods are installed or incorporated.
- **Transshipment SIELs** are needed for the transshipment of certain goods through the UK en-route from one country to another, providing certain conditions are met. This subtype of SIEL is also called a Standard Individual Transshipment Licence (SITL). Most other transshipments (of certain goods through the UK en-route from one country to another) can be made under one of the Open General Transshipment Licences, provided in all cases that the relevant conditions are met. There are no Open Individual licences for transshipments.
- **SIELs for Goods covered by Council Regulation 1236/2005** concern trade in certain equipment and products which could be used for capital punishment, torture or other cruel, inhuman or degrading treatment or punishment. These are classed as non-military goods but appear separately to the statistics on licences for non-military goods. SIELs for Goods covered by Council Regulation 1236/2005 are therefore not included in the count of non-military goods for other SIEL subtypes.

It should be noted that the refusal of an application for an OIEL, amendment to exclude a particular destination(s) and/or item(s), or the revocation of an OIEL, does not prevent a company from applying for a SIEL covering some or all of the items concerned to specified consignees in the relevant destinations. Clearly, however, the factors that led to the original decision would be taken into account in the decision on any such application.

Other Individual Licences

Information on Other Individual licences is not included as part of this report, or as part of the Excel or CSV spread sheets released alongside this report. Please see separate documentation entitled 'Data for Other Licences' published alongside this, or previous, reports.

Trade Control Licences

Trade Control licences are required for those brokering the export of strategic goods. Brokering means buying or selling, or arranging or negotiating transactions for the purchase, sale, or supply, of goods located in one third country for transfer to another. There are Open and Standard Trade Control licences

An **Open Individual Trade Control Licence (OITCL)** is *specific to a named trader and covers involvement in trading of a generally unlimited supply of specific goods between specific source and destination countries and/or specified consignors, consignees and end-users*. OITCLs are generally valid for 5 years.

A **Standard Individual Trade Control Licence (SITCL)** is specific to a named trader and covers involvement in trading of a set quantity of specific goods between a specific source and destination country with a specified consignor, consignee and end-user. SITCLs will normally be valid for 2 years. Upon expiry either by time or because the activity has taken place, the licence ceases to be valid and must be returned to the Export Control Organisation. Once the licence expires, a new application must be applied for if further trades are required. Like Individual Export licences, exporters should check to see whether they are eligible to use an OITCL before applying for a SITCL.

Reporting

Summary Tables

Before more detailed information is presented by destination on SIELs, OIELs, SITCLs and OITCLs, data summarising the number of licences Issued, Refused/Rejected and Revoked for each licence type within the period are presented.

Following this is some detailed information on Dealer OIELs, Cryptographic OIELs, Media OIELs, Continental Shelf OIELs and Global Project Licences - as generally there are not many of these per quarter so the information is best summarised for all destinations together in one table. Processing statistics are reported, similar to those presented per destination (see below). A table showing registrations, suspensions and de-registrations for the use of OGELs immediately precedes detailed information per destination.

Information Per Destination

Information for each destination follows the same pattern. The minimum information provided for each destination is processing statistics. Where no such licences decisions were made in the period, there is simply no information presented for such cases.

Processing statistics

The time calculated is the initial processing time, ie, the time elapsed from when the application is first received to when it is closed. All closed cases are counted, including those where the licence is issued or refused/rejected, or where the application is stopped or withdrawn, or where there was No Licence Required (NLR) decision made on the licence. Revocations apply to existing licences only, so are not counted. Time spent by the ECO waiting for documents from applicants or any time where the ECO are waiting for the applicant to respond to a request for further information is excluded. Time taken to make any amendments post-decision is not counted. For more information on how processing time is calculated, please consult the Quality and Methodology Report on the Strategic Export Controls licensing statistics web page:

<https://www.gov.uk/government/collections/strategic-export-controls-licensing-data>.

Separately for SIELs, SITCLs, OIELs and OITCLs the following processing statistics are presented per destination:

- Median processing time
- % and number of licences completed in 20 and 60 working days. For SIELs there are government targets to process 70% of applications within 20 working days and 99% within 60 working days. For OIELs and OITCLs there are government targets to process 60% of applications within 60 working days.

Licensing statistics

The information within the report covers those licences Issued, Refused/Rejected or Revoked within the period. It does not include information where applications were not fully processed, eg stopped or withdrawn, information on goods where there was No Licence Required (NLR), or certain changes to an existing licence - such as re-opening an application to make changes such as extensions to licences, removing good/s (although this is not done for OIELs), removing country/countries, or amending applicant errors.

If goods / countries are added to an application and subsequently end up on a licence they will be reported as a new issue for that period. The existing items will not be re-reported. The same applies for items removed from an application on an amendment, except in this case it will be reported as revoked.

In a small number of cases there may be a subsequent change of status during the same period. There are two

main reasons for such changes: a licence issued during the period may have been issued then subsequently revoked in the same period, for example because of the imposition of trade sanctions or an arms embargo; or a decision during the period to refuse a licence might be overturned because the applicant later appealed successfully and the licence was issued in a later period. These cases are flagged in this report as Rv and A respectively.

For each destination and for each of Issued, Refused and Revoked the following is data is presented in this report, where available, for each **SIEL** subtype (note: information on SITLs can be found under the heading 'SIELs - Transshipment'):

- A count of the number of licences on which goods were Issued, Refused or Revoked categorised by the type of goods; Military, Non-military or Both Military and Non-military (see 'Key Terms'). Examples of when a licence may be for both military and non-military goods could be where the goods are military body armour and civilian body armour, or where bomb detection goods are being sold for use by the military and for civilian use such as at airports. However, the military and non-military goods will not necessarily be of the same type.
- A count of the number of licences on which goods were Issued, Refused or Revoked per Control Entry. Control Entries are presented per category (Military, Non-military or Both Military and Non-military) based on the licence they relate to. The number given is the number of licences on which a Control Entry was used. Please note that more than one Control Entry can apply to goods on an individual licence and each Control Entry is counted only once per individual licence (regardless of the number of goods that have been rated with that Control Entry).
- Data for Issued SIELs includes the value of the goods in each category. However, note that goods covered by issued SITLs merely pass through the UK and it would therefore be misleading to compare the 'value' for these licences in the report with the value of items originating in the UK.
- Case summaries for each of Issued, Refused and Revoked broken down by category (Mil/Non-mil/Both), listed below the appropriate Control Entry table in which they feature. Case summaries for small arms covered by SIELs issued in the period give the number of units in parentheses. If the number of licences using the case summary in the period is more than one then this is also detailed in parentheses (eg "2 licences"). Items that were allowed for Temporary export are indicated by a "T" preceding the description. Items that were originally allowed for Temporary export but then converted to allow Permanent export are indicated by a "T(P)". Note that more than one Case Summary can apply to a single Control Entry. Note that more than one Case Summary can apply to a single Control Entry.
- The ultimate destination/s for goods that are being incorporated.
- For refusals, the number of times each of the 8 Consolidated EU and National Arms Export Licensing Criteria are used to refuse licence applications for the destination is provided.

The Control Entries supplied are less detailed than those listed in the **consolidated list of goods that require export authorisation**. For example, we report ML1 but there are more specific codes such as ML1a, ML1b, ML1c and ML1d. Here is an example to explain how we would count the number of licences containing goods rated ML1:

Issued licences for a given destination	Control Entries applied to goods on licence
Licence 1	ML1a, ML1a, ML1b, ML1c
Licence 2	ML1a, ML2a
Licence 3	ML1a
Licence 4	ML1c
Licence 5	ML2a
<i>Total number of licences containing goods rated ML1</i>	4

In the example the number of licences containing goods rated ML1 is 4 because the more detailed codes (eg ML1a, ML1b etc) are treated as though they are the broader code ML1. Also, each Control Entry is counted a maximum of once per licence, so licence 1, 2, 3 and 4 each have a count of 1 for ML1.

The data on refused SIEL applications does not include those refused during this period following an appeal against an earlier refusal. The SIELs data also does not cover goods that were removed from an application before a licence was issued, applications that were withdrawn or stopped before a decision was reached, or applications where it was determined that no licence was required or that the goods could be exported to the

destination concerned under an Open General Export Licence (OGEL).

In the case of SIELs refused or revoked, only the rating of the goods is provided.

Values are shown to the nearest pound. It should be noted that the actual value of exports made under the licences is likely to be less than shown because some of these licences will not be used to make all of the exports authorised and others will not be used at all. In addition, some items are exported only temporarily and are later returned to the UK.

In some cases SIELs may be issued identifying more than one destination. This normally arises where a licence is issued for the temporary export of items for exhibition or demonstration in more than one destination. Details of these licences are included in the information for each relevant destination. This means that the total number of SIELs issued is lower than the sum of all SIELs issued shown across all the destination pages.

For each destination and for each of Issued, Refused and Revoked the following data is presented in this report, where available, for each OIEL subtype:

- A case summary description of the goods covered by each OIEL, with the items that were allowed for temporary export indicated by a "T" preceding the description, for Issued, Rejected and Revoked licences.

Case summaries are provided for all licences issued in the period or where the coverage of an existing licence was amended during the period by the inclusion or reinstatement of this destination or by the addition of goods. Case summaries are provided for licences fully revoked, refused in full or whose coverage was amended during the period by the removal of items and/or destinations. The destination coverage of an OIEL may be amended for a variety of reasons, but mainly in the light of recommendations received from advisory government departments. Sometimes amendments follow the imposition of an arms embargo, but they may also reflect general concerns about the destination or a relevant change in circumstances there. A decision to exclude a particular country from the coverage of an OIEL does not mean that country is permanently excluded. Where the concerns that led to the original decision are no longer relevant, it might be decided to reinstate that destination.

The OIELs data does not cover applications from which specific goods or destinations were removed before an OIEL was issued, or applications withdrawn before a decision was reached, it was determined that no licence was required or that the items could be exported to the destination concerned under an OGEL.

The information does not cover OIELs whose period of validity was extended temporarily during the period pending a decision on an application for a new OIEL. Such cases amount to a temporary extension of an OIEL granted in an earlier period. The decision on the new application will be covered in this or a future report, depending on the timing of the decision. As OIELs cover multiple shipments of specified goods to specified destinations or specified consignees, exporters holding OIELs are not asked to provide details of the value of goods they propose to ship under an OIEL and it is therefore not possible to provide information on the total value of OIELs issued.

As well as the data presented on SIELs and OIELS, data is presented on **SITCLs and OITCLs**:

- The number of SITCLs or OITCLs (presented separately) Issued, Refused (for SITCLs)/Rejected (for OITCLs) and Revoked in the period

Overall Processing Statistics

	All licence applications	Issued	Refused/ Rejected	Revoked	Applications completed in 20 working days	% applications completed in 20 working days	Applications completed in 60 working days	% applications completed in 60 working days	Median processing time
SIELs	3267	3156	111	0	2576	61	4004	96	17 days
- Permanent Standard	2797	2690	107	0	2219	61	3457	95	17 days
- Temporary Standard	237	235	2	0	192	62	303	97	17 days
- Transhipment	3	3	0	0	3	60	5	100	19 days
- Incorporation	227	225	2	0	161	67	236	98	15 days
- For goods covered by EC Reg 1236/2005 (Permanent or Temporary)	3	3	0	0	1	33	3	100	22 days
SITCLs	19	19	0	0	18	49	32	86	22 days
OIELs	74	68	6	0	20	20	41	41	80 days
- Standard	67	62	5	0	18	20	35	38	99 days
- Dealer-to-dealer	2	2	0	0	2	50	3	75	16 days
- Cryptographic	5	4	1	0	0	0	3	75	40 days
- Media	0	0	0	0	n/a	n/a	n/a	n/a	n/a
- Continental Shelf	0	0	0	0	n/a	n/a	n/a	n/a	n/a
Global Project Licences	0	0	0	0	n/a	n/a	n/a	n/a	n/a
OITCLs	5	4	1	0	2	29	2	29	71 days

Table notes:

SIEL and OIEL sub-types are mutually exclusive. SIEL Transhipments and Incorporations are permanent, but counted separately to Standard Permanent and Standard Temporary licences.

Data in the first four columns are not based on the same licences as the rest of the columns in the table.

In the first four columns, counts of licence applications Issued, Refused/Rejected and Revoked count the decisions made during the period on the licence, whenever the case has been closed or re-opened then re-closed.

The processing statistics (in the other columns) are calculated based on all licences closed during the period. All closed cases are counted, including those where the licence is issued or refused/rejected, or where the application is stopped or withdrawn, or where there was No Licence Required (NLR) decision made on the licence. Revocations apply to existing licences only, so are not counted. Time spent by the ECO waiting for documents from applicants or any time where the ECO are waiting for the applicant to respond to a request for further information is excluded. Time taken to make any amendments post-decision is not counted. For more information on how processing time is calculated, please consult the Quality and Methodology Report on the Strategic Export Controls licensing statistics web page: <https://www.gov.uk/government/collections/strategic-export-controls-licensing-data>.

Open General Export Licences (OGLs)

OGLs can be used to export certain goods to certain destinations providing the terms and conditions of the OGL are met. See further information on military goods OGLs (<https://www.gov.uk/military-goods-ogels>) and dual-use goods OGLs (<https://www.gov.uk/dual-use-open-general-export-licences-explained>).

OGL Name	Registrations in this period	Suspensions in this period	Deregistrations in this period
EU GEA 001 (EU001)	28	0	1
EU GEA 002 (EU002) - exports of certain dual-use items to certain destinations	0	0	0
EU GEA 003 (EU003) - export after repair/replacement	0	0	0

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	8	£1,674,186
Non-military	3	£25,401
Both Military and Non-military	1	£139,050
Total	12	£1,838,637

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	1	£15,901
ML3	2	£9,655
ML6	1	£364,000
ML13	3	£1,223,850
ML22	1	£60,000
PL5035	1	£780

all-wheel drive vehicles with ballistic protection.
 assault rifles (18).
 body armour (3 licences).
 components for all-wheel drive vehicles with ballistic protection.

components for assault rifles.
 components for body armour (2 licences).
 components for semi-automatic pistols.
 military helmets (3 licences).
 semi-automatic pistols (15).
 small arms ammunition (2 licences).
 technology for the use of unmanned air vehicles.

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
5A001	1	£16,676
5A002	1	£2,025
6A003	1	£6,700

components for radio controlled improvised explosive device jamming equipment.
 equipment employing cryptography.
 imaging cameras.

Both Military and Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1A005	1	£42,000
ML13	1	£97,050

body armour.
 civil body armour.
 military helmets.

% [as a % of all SIEL cases processed] and number of SIELs refused	0% (0)

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	1	£8,170
Non-military	1	£5,639
Total	2	£13,809

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML4	1	£8,170

components for military equipment for initiating explosives.
military equipment for initiating explosives.

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
8A002	1	£5,639

submersible equipment.

Benin

Processing Statistics

Median processing time SIELs	14 days
% and number of SIELs completed in 20 working days	100% (4)
% and number of SIELs completed in 60 working days	100% (4)

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	20	£66,214
Non-military	1	£25,250
Total	21	£91,464

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	12	£53,151
ML3	7	£9,888
ML4	1	£3,176

gun silencers (2 licences).
hand grenades.

pistols (1).
 pistols (4).
 shotguns (1).
 small arms ammunition (7 licences).
 sporting guns (1) (5 licences).
 sporting guns (2).
 sporting guns (5).
 weapon sights.

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1A004	1	£25,250

civil explosive detection/identification equipment.

SIELs for goods covered by EC Reg 1236/2005

Issued

Types of goods on licence	No. of licences	Value
Goods covered by EC Reg 1236/2005	1	£3,457
Goods covered by EC Reg 1236/2005 and Military	0	£0
Goods covered by EC Reg 1236/2005 and Non-military	0	£0
Goods covered by EC Reg 1236/2005 and Both Military and Non-military	0	£0
Total	1	£3,457

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Goods covered by EC Reg 1236/2005

Control Entry	No. of licences with goods rated using Control Entry	Value
HR AIII	1	£3,457

tear gas for self protection.

Country Footnotes

1. A declaration by the Madrid European Council on 27 June 1989 established an arms embargo on China. The UK interpretation of this embargo applies to: lethal weapons such as machine guns, large calibre weapons, bombs, torpedoes, rockets and missiles; specially designed components of these items and ammunition; military aircraft and helicopters, vessels of war, armoured fighting vehicles and other such weapons platforms; any equipment which might be used for internal repression. All exports for this destination were approved in accordance with the sanctions in place.

Issued

all-wheel drive vehicles with ballistic protection.
components for all-wheel drive vehicles with ballistic protection.

Country Footnotes

- Arms sanctions against DRC are currently in place under UN Security Council resolution 1807 (amended by UNSCR 1857, 1896 and 1952 (2010)). The embargo prohibits the supply, sale or transfer of arms and related materiel (and the provision of assistance) to all non-governmental entities and individuals operating in the DRC (subject to strict exemptions for UN/humanitarian end-use).

All exports for this destination were approved in accordance with the sanctions in place.

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	11	£90,363
Non-military	1	£60,000
Total	12	£150,363

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	6	£57,549
ML6	4	£5,437
ML17	1	£27,340
PL5017	1	£37

components for armoured personnel carriers.
 components for military combat vehicles.
 components for sporting guns (2 licences).
 general military vehicle components (2 licences).
 signature suppression coatings for military use.
 sporting guns (1) (2 licences).
 weapon night sights.
 weapon sight mounts.
 weapon sights (3 licences).

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
7A003	1	£60,000

T inertial equipment.

SIELs - Incorporation

Issued

Types of goods on licence	No. of licences	Value
Military	1	£18,000
Total	1	£18,000

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
PL5017	1	£18,000

equipment for the use of NBC detection equipment.

The items being incorporated in this destination are ultimately destined for all or some of the following:

Croatia

SIELs - Transshipment

Issued

Types of goods on licence	No. of licences	Value
Military	1	£721,920
Total	1	£721,920

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML3	1	£721,920

exploding grenade ammunition.

OIELs (excluding Other OIELs)

Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	components for gun laying equipment, components for military image intensifier equipment, components for weapon night sights, components for weapon sights, equipment for the use of weapon sights, gun laying equipment, military image intensifier equipment, technology for the use of equipment for the use of weapon sights, technology for the use of gun laying equipment, technology for the use of military image intensifier equipment, technology for the use of weapon night sights, technology for the use of weapon sight mounts, technology for the use of weapon sights, weapon night sights, weapon sight mounts, weapon sights

OIELs (excluding Other OIELs)

Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	components for airborne electronic warfare equipment, components for aircraft military communications equipment, components for aircraft radars, components for electronic countermeasures equipment, components for electronic warfare equipment, components for ground based radars, components for ground vehicle military communications equipment, components for military aircraft navigation equipment, components for military communications equipment, components for missile navigation equipment, components for naval communications equipment, components for naval electronic warfare equipment, components for naval radars
2	P	components for gun laying equipment, components for military image intensifier equipment, components for weapon night sights, components for weapon sights, equipment for the use of weapon sights, gun laying equipment, military image intensifier equipment, technology for the use of equipment for the use of weapon sights, technology for the use of gun laying equipment, technology for the use of military image intensifier equipment, technology for the use of weapon night sights, technology for the use of weapon sight mounts, technology for the use of weapon sights, weapon night sights, weapon sight mounts, weapon sights
3	P	accessories for training equipment for biological agent detection equipment, accessories for training equipment for chemical agent detection equipment, accessories for training equipment for nuclear radiation detection equipment, components for military electronic equipment, components for training equipment for biological agent detection equipment, components for training equipment for chemical agent detection equipment, components for training equipment for nuclear radiation detection equipment, military electronic equipment, software for the use of training equipment for biological agent detection equipment, software for the use of training equipment for chemical agent detection equipment, software for the use of training equipment for nuclear radiation detection equipment, technology for the use of training equipment for biological agent detection equipment, technology for the use of training equipment for chemical agent detection equipment, technology for the use of training equipment for nuclear radiation detection equipment, training equipment for biological agent detection equipment, training equipment for chemical agent detection equipment, training equipment for military improvised explosive device detection equipment, training equipment for nuclear radiation detection equipment
4	P	components for equipment for the use of test equipment for attack alerting/warning equipment, components for test equipment for attack alerting/warning equipment, equipment for the use of test equipment for attack alerting/warning equipment, software for test equipment for attack alerting/warning equipment, software for the use of test equipment for attack alerting/warning equipment, technology for software for test equipment for attack alerting/warning equipment, technology for test equipment for attack alerting/warning equipment, test equipment for attack alerting/warning equipment
5	P	components for military aero-engines, technology for the production of military aero-engines, technology for the use of military aero-engines, unfinished products for military aero-engines

6	P	components for military improvised explosive device disposal equipment, military improvised explosive device disposal equipment
7	P	software for the simulation of military operation scenarios
8	P	ballistic shields
9	P	components for combat aircraft, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for military support aircraft, components for military training aircraft, components for military utility helicopters, military aircraft head-up displays, military aircraft navigation equipment
10	P	anti-armour ammunition, assault rifles, blank ammunition, components for assault rifles, components for flash suppressers, components for general purpose machine guns, components for grenade launchers, components for gun mountings, components for gun silencers, components for heavy machine guns, components for machine pistols, components for projectile launchers, components for semi-automatic pistols, components for sniper rifles, components for submachine guns, components for weapon day and night sights, components for weapon night sights, components for weapon sights, crowd control ammunition, exploding grenade ammunition, flash suppressers, general purpose machine guns, grenade launchers, gun mountings, gun silencers, heavy machine guns, inert ammunition, machine pistols, mortar bombs, projectile launchers, pyrotechnic ammunition, semi-automatic pistols, small arms ammunition, smoke ammunition, sniper rifles, submachine guns, tear gas/irritant ammunition, wall and door breaching projectiles, weapon day and night sights, weapon night sights, weapon sights
11	P	technology for the development of nuclear reactor fuel element fabrication equipment, technology for the production of nuclear reactor fuel element fabrication equipment, technology for the use of nuclear reactor fuel element fabrication equipment
12	P	components for combat aircraft
13	P	equipment for the use of general military aircraft components, equipment for the use of general military vehicle components, general military aircraft components, general military vehicle components, general naval vessel components

Country Footnotes

- UNSCR 1929 was adopted on 9 June 2010, imposing a fourth round of sanctions against Iran.

The European Union adopted a Council decision on 26 July that imposed a further range of restrictive measures against Iran. The Decision includes measures in the following areas: dual use goods and further restrictions on trade insurance; the financial sector, including freeze of additional Iranian banks and restrictions on banking and insurance; the Iranian transport sector, in particular the Islamic Republic of Iran Shipping Line (IRISL) and its subsidiaries and air cargo; key sectors of the gas and oil industry with prohibition of new investment, technical assistance and transfers of technologies, equipment and services related to these areas, in particular related to refining, liquefaction and LNG technology; and new visa bans and asset freezes especially on the Islamic Revolutionary Guard Corps (IRGC). Council Regulation 991/2010 was adopted on 25 October 2010. This implements the provisions of the Council Decision that fall under EU competence.

All exports for this destination were approved in accordance with the sanctions in place.

Country Footnotes

1. General trade sanctions against Iraq, except prohibitions related to the sale or supply of arms and related materiel, were revoked by the UN Security Council resolution 1483 (22 May 2003), implemented in UK legislation on 14 June 2003 by the Iraq (United Nations Sanctions) Order 2003 [S.I. 2003/1519]. UNSCR 1546 (2004) continues the embargo on arms and related materiel against Iraq, but provides exemptions for equipment required by the Government of Iraq to serve the purposes of UNSCR 1546 (2004).

All exports for this destination were approved in accordance with the sanctions in place.

Country Footnotes

- Arms trade sanctions against Lebanon were adopted by UN Security Council resolution 1701, of 11 August 2006 and by European Council Common Position 2006/625/CFSP. Exceptions to the arms embargo cover the supply of arms and related materiel or the provision of assistance authorised by the Government of Lebanon or by UNFIL. All exports for this destination were approved in accordance with the sanctions in place.

Country Footnotes

1. The arms embargo against Liberia was renewed by UN Security Council resolution 1521 (2003) and extended most recently until 17 December 2011 by UNSCR 1961 (2010). Strict exceptions to the embargo exist for certain purposes - e.g. humanitarian purposes, goods and assistance programmes destined for the UN peacekeeping mission (UNMIL) or the Government of Liberia.

All exports for this destination were approved in accordance with the sanctions in place.

Country Footnotes

1. Arms trade sanctions against Libya were adopted by UN Security Council resolution 1970 in February 2011. UNSCR 1970 (2011) was implemented by the EU through Council Decision 2011/137/CFSP and Regulation No.204/2011. The EU measures also extended the scope of the UN travel ban and asset freeze, plus a ban on the export of equipment which could be used for internal repression.

There are exemptions to the UN arms embargo measures for supplies of non-lethal military equipment intended solely for humanitarian or protective use, protective clothing for use by United Nations personnel, representatives of the media and humanitarian and development works and other sales or supply of arms and

related material as approved in advance by the Committee. Procedures vary: some exports must be approved in advance by the Sanctions Committee while other require notification only.

All exports for this destination must be in accordance with the sanctions in place.

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML6	3	£110,387
ML11	1	£6,600
ML17	1	£34,500

all-wheel drive vehicles with ballistic protection.
military electronic equipment.
military field generators.
military support vehicles (2 licences).

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1C350	3	£2,375,000
5A001	2	£449,513

5A002	2	£3,630
5D001	1	£15,000
6A001	1	£493,000

chemicals used for industrial/commercial processes (3 licences).
equipment employing cryptography (2 licences).
heading sensors for hydrophone arrays.
T radio jamming equipment.
T software for the use of radio jamming equipment.
underwater telecommunications systems.

Country Footnotes

1. On 31 July 2014, the EU Council adopted further sanctions against Russia. Council Decision 2014/512/CFSP provides for restrictions on the supply of arms and military equipment; on dual use items for military use; on certain technologies for the oil industries; and on access to capital markets for certain financial institutions. Restrictive measures currently in force are set out in Council Decision 2014/659/CFSP and Regulation 960/2014 of 8 September 2014.

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	23	£279,156,348
Non-military	30	£35,707,149
Total	53	£314,863,497

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	1	£1,321,250
ML4	1	£191,106,110
ML5	1	£18,000
ML6	6	£400,966
ML7	1	£1,120
ML9	3	£46,107
ML10	5	£1,534,205
ML11	6	£41,139,741
ML14	2	£507,390
ML15	1	£628,200
ML17	1	£3,583
ML21	1	£68,460
ML22	1	£293,687
PL5017	1	£42,087,529

- components for bombs.
- components for combat aircraft.
- components for combat naval vessels (2 licences).
- components for equipment for the use of military guidance/navigation equipment.
- components for frigates.
- components for ground vehicle military communications equipment (3 licences).
- components for inert bombs.
- components for military combat vehicles.
- components for military communications equipment (4 licences).
- components for military helicopters (3 licences).
- components for military infrared/thermal imaging equipment.
- components for military radars.
- components for military support aircraft.
- components for military training equipment.
- T components for NBC protective/defensive equipment.
- components for training bombs.
- equipment for the use of bombs.
- equipment for the use of military communications equipment (2 licences).
- equipment for the use of military guidance/navigation equipment.
- ground vehicle military communications equipment (2 licences).
- military communications equipment.
- military training equipment.
- T NBC protective/defensive equipment.
- signature suppression fittings/coatings/treatments for military use.
- software for military communications equipment.
- technology for bombs.

weapon night sights.

Country Footnotes

- UN Security Council resolution 1940 was adopted on 29 September 2010 lifting all sanctions on Sierra Leone. The United Nations Arms Embargoes (Amendment) Order 1998 (1998/1501) is the domestic implementing legislation and this order will be repealed in due course. Arms trade sanctions against Sierra Leone were adopted by UN Security Council resolution 1171, with exemptions given to the Government of Sierra Leone through named points of entry, the UN, and the Military Observer Group of the Economic Community of West African States.

All exports for this destination were approved in accordance with the sanctions in place.

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	6	£46,192
Non-military	1	£885
Total	7	£47,077

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	1	£18,239
ML4	1	£2,192
ML11	1	£7,305
PL5001	3	£18,455

anti-riot/ballistic shields (2 licences).
ballistic shields.
components for military electronic equipment.
components for military improvised explosive device disposal equipment.
weapon sights.

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
0C001	1	£295
0C002	1	£590

products containing natural uranium.
products containing plutonium-239.
products containing thorium.

OIELs (excluding Other OIELs)

Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	accessories for training equipment for biological agent detection equipment, accessories for training equipment for chemical agent detection equipment, accessories for training equipment for nuclear radiation detection equipment, components for military electronic equipment, components for training equipment for biological agent detection equipment, components for training equipment for chemical agent detection equipment, components for training equipment for nuclear radiation detection equipment, military electronic equipment, software for the use of training equipment for biological agent detection equipment, software for the use of training equipment for chemical agent detection equipment, software for the use of training equipment for nuclear radiation detection equipment, technology for the use of training equipment for biological agent detection equipment, technology for the use of training equipment for chemical agent detection equipment, technology for the use of training equipment for nuclear radiation detection equipment, training equipment for biological agent detection equipment, training equipment for chemical agent detection equipment, training equipment for military improvised explosive device detection equipment, training equipment for nuclear radiation detection equipment
2	P	ballistic shields

all-wheel drive vehicles with ballistic protection.
components for all-wheel drive vehicles with ballistic protection.

Country Footnotes

- Arms trade sanctions against Somalia were adopted by UN Security Council resolution 733 in 1992 and were amended in 2002 by Security Council resolution 1425. Resolutions 1356 (2001), 1772 (2007), 1851 (2008), 1907 (2009) and 1916 (2010) provide for exemptions to the measures for supplies of non-lethal military equipment intended solely for humanitarian or protective use, weapons and military equipment for the support or use of AMISOM or to be used against piracy, supplies and assistance for developing Somali security sector institutions or the TFG. Procedures vary: some exports must be approved in advance by the Sanctions Committee.

All exports for this destination were approved in accordance with the sanctions in place.

SIELs - Incorporation

Issued

Types of goods on licence	No. of licences	Value
Military	16	£277,605
Total	16	£277,605

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML10	13	£57,632
ML11	2	£199,438
ML16	1	£20,535

components for airborne electronic warfare equipment.
components for military support aircraft (9 licences).
components for military transport aircraft (3 licences).
electronic warfare equipment.
general military aircraft components.
unfinished products for military aero-engines.

The items being incorporated in this destination are ultimately destined for all or some of the following:

Austria
Brazil
Colombia
Finland
France
Germany
Italy
Mexico
Pakistan
Saudi Arabia
South Korea
Thailand
Vietnam

OIELs (excluding Other OIELs)

Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	components for airborne electronic warfare equipment, components for aircraft military communications equipment, components for aircraft radars, components for electronic countermeasures equipment, components for electronic warfare equipment, components for ground based radars, components for ground vehicle military communications equipment, components for military aircraft navigation equipment, components for military communications equipment, components for missile navigation equipment, components for naval communications equipment, components for naval electronic warfare equipment, components for naval radars
2	P	components for gun laying equipment, components for military image intensifier equipment, components for weapon night sights, components for weapon sights, equipment for the use of weapon sights, gun laying equipment, military image intensifier equipment, technology for the use of equipment for the use of weapon sights, technology for the use of gun laying equipment, technology for the use of military image intensifier equipment, technology for the use of weapon night sights, technology for the use of weapon sight mounts, technology for the use of weapon sights, weapon night sights, weapon sight mounts, weapon sights
3	P	accessories for training equipment for biological agent detection equipment, accessories for training equipment for chemical agent detection equipment, accessories for training equipment for nuclear radiation detection equipment, components for military electronic equipment, components for training equipment for biological agent detection equipment, components for training equipment for chemical agent detection equipment, components for training equipment for nuclear radiation detection equipment, military electronic equipment, software for the use of training equipment for biological agent detection equipment, software for the use of training equipment for chemical agent detection equipment, software for the use of training equipment for nuclear radiation detection equipment, technology for the use of training equipment for biological agent detection equipment, technology for the use of training equipment for chemical agent detection equipment, technology for the use of training equipment for nuclear radiation detection equipment, training equipment for biological agent detection equipment, training equipment for chemical agent detection equipment, training equipment for military improvised explosive device detection equipment, training equipment for nuclear radiation detection equipment
4	P	components for equipment for the use of test equipment for attack alerting/warning equipment, components for test equipment for attack alerting/warning equipment, equipment for the use of test equipment for attack alerting/warning equipment, software for test equipment for attack alerting/warning equipment, software for the use of test equipment for attack alerting/warning equipment, technology for software for test equipment for attack alerting/warning equipment, technology for test equipment for attack alerting/warning equipment, test equipment for attack alerting/warning equipment
5	P	software for the simulation of military operation scenarios
6	P	ballistic shields
7	P	components for combat aircraft, components for military aircraft ground equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for military support aircraft, components for military training aircraft, components for night vision goggles, components for test equipment for military aircraft head-up displays, components for test equipment for military aircraft navigation equipment, components for test equipment for night vision goggles, military aircraft ground equipment, military aircraft head-up displays, military aircraft navigation equipment, night vision goggles, test equipment for military aircraft head-up displays, test equipment for military aircraft navigation equipment, test equipment for night vision goggles
8	P	components for airborne refuelling equipment, general military aircraft components
9	P	military electronic equipment
10	P	components for combat aircraft
11	P	equipment for the use of general military aircraft components, equipment for the use of general military vehicle components, general military aircraft components, general military vehicle components, general naval vessel components

SIELs - Permanent and Temporary (excluding Incorporation and Transshipment)

Issued

Types of goods on licence	No. of licences	Value
Military	19	£958,652
Non-military	70	£291,348,640
Total	89	£292,307,292

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more

than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry');

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML6	1	£100
ML7	1	£20,000
ML8	2	£68,829
ML9	2	£268,952
ML10	5	£376,685
ML11	4	£106,405
ML14	2	£116,655
ML22	2	£1,026

- T components for combat aircraft.
 components for ground vehicle military communications equipment.
 components for military aero-engines (4 licences).
 components for military training equipment.
 components for submarines (2 licences).
 components for unmanned air vehicles.
- T electronic warfare equipment.
 energetic materials additives.
 military aero-engines.
- T military aircraft navigation equipment.
 military communications equipment.
 military electronic equipment.
 NBC detection equipment.
 pyrotechnics/fuels and related substances.
 technology for military combat vehicles.
 technology for the use of military training equipment.
 training equipment for anti-armour missiles.

Non-military

1	P	components for airborne electronic warfare equipment, components for aircraft military communications equipment, components for aircraft radars, components for electronic countermeasures equipment, components for electronic warfare equipment, components for ground based radars, components for ground vehicle military communications equipment, components for military aircraft navigation equipment, components for military communications equipment, components for missile navigation equipment, components for naval communications equipment, components for naval electronic warfare equipment, components for naval radars
2	P	air-to-air missiles, bombs, components for air-to-air missiles, components for bombs, components for handling equipment for air-to-air missiles, components for handling equipment for bombs, components for launching equipment for air-to-air missiles, components for launching equipment for bombs, handling equipment for air-to-air missiles, handling equipment for bombs, launching equipment for air-to-air missiles, launching equipment for bombs, simulators for air-to-air missiles, simulators for bombs, software for the development of air-to-air missiles, software for the development of anti-armour missiles, software for the development of bombs, software for the production of air-to-air missiles, software for the production of anti-armour missiles, software for the production of bombs, software for the use of air-to-air missiles, software for the use of anti-armour missiles, software for the use of bombs, technology for the development of air-to-air missiles, technology for the development of anti-armour missiles, technology for the development of bombs, technology for the production of air-to-air missiles, technology for the production of anti-armour missiles, technology for the production of bombs, technology for the use of air-to-air missiles, technology for the use of anti-armour missiles, technology for the use of bombs, test equipment for air-to-air missiles, test equipment for bombs, test equipment for handling equipment for air-to-air missiles, test equipment for handling equipment for bombs, test equipment for launching equipment for air-to-air missiles, test equipment for launching equipment for bombs, test models for the development of air-to-air missiles, test models for the development of bombs
3	P	accessories for training equipment for biological agent detection equipment, accessories for training equipment for chemical agent detection equipment, accessories for training equipment for nuclear radiation detection equipment, components for military electronic equipment, components for training equipment for biological agent detection equipment, components for training equipment for chemical agent detection equipment, components for training equipment for nuclear radiation detection equipment, military electronic equipment, software for the use of training equipment for biological agent detection equipment, software for the use of training equipment for chemical agent detection equipment, software for the use of training equipment for nuclear radiation detection equipment, technology for the use of training equipment for biological agent detection equipment, technology for the use of training equipment for chemical agent detection equipment, technology for the use of training equipment for nuclear radiation detection equipment, training equipment for biological agent detection equipment, training equipment for chemical agent detection equipment, training equipment for military improvised explosive device detection equipment, training equipment for nuclear radiation detection equipment
4	P	components for equipment for the use of test equipment for attack alerting/warning equipment, components for test equipment for attack alerting/warning equipment, equipment for the use of test equipment for attack alerting/warning equipment, software for test equipment for attack alerting/warning equipment, software for the use of test equipment for attack alerting/warning equipment, technology for software for test equipment for attack alerting/warning equipment, technology for test equipment for attack alerting/warning equipment, test equipment for attack alerting/warning equipment
5	P	airborne electronic warfare equipment, airborne refuelling equipment, aircraft radars, aircrew protective masks, anti-g/pressure suits, automatic piloting systems for parachuted loads, bomb handling equipment, chaff equipment, components for airborne electronic warfare equipment, components for airborne refuelling equipment, components for aircraft radars, components for aircrew protective masks, components for anti-g/pressure suits, components for automatic piloting systems for parachuted loads, components for ejector seats, components for equipment for the operation of military aircraft in confined areas, components for equipment for the use of military aero-engines, components for equipment for the use of military training aircraft, components for helmet mounted display equipment, components for liquid oxygen converters, components for military aero-engines,

		components for military aircraft ground equipment, components for military aircraft navigation equipment, components for military aircraft pressure refuellers, components for military aircraft pressurised breathing equipment, components for military flying helmets, components for military parachutes, components for military parachutist equipment, components for military training aircraft, control equipment for air-to-air missiles, control equipment for bombs, control equipment for decoy flares, control equipment for fragmentation rockets, control equipment for practice bombs, ejector seats, equipment for the operation of military aircraft in confined areas, equipment for the use of military aero-engines, equipment for the use of military training aircraft, handling equipment for air-to-air missiles, handling equipment for bombs, handling equipment for decoy flares, handling equipment for fragmentation rockets, handling equipment for practice bombs, helmet mounted display equipment, launching equipment for air-to-air missiles, launching equipment for bombs, launching equipment for decoy flares, launching equipment for fragmentation rockets, launching equipment for practice bombs, liquid oxygen converters, military aero-engines, military aircraft ground equipment, military aircraft navigation equipment, military aircraft pressure refuellers, military aircraft pressurised breathing equipment, military flying helmets, military parachutes, military parachutist equipment, technology for the use of military training aircraft, test equipment for military training aircraft
6	P	air guns
7	P	toxins
8	P	components for constructions for ballistic protection of military systems, technology for the production of constructions for ballistic protection of military systems
9	P	software for the simulation of military operation scenarios
10	P	ballistic shields, body armour, bomb suits, civil body armour, components for ballistic shields, components for body armour, components for bomb suits, components for civil body armour, components for military helmets, improvised explosive device disposal equipment, military helmets
11	P	components for sporting guns, pistols, sporting guns, weapon sights
12	P	components for combat aircraft, components for military aircraft ground equipment, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for military support aircraft, components for military training aircraft, components for night vision goggles, components for test equipment for military aircraft head-up displays, components for test equipment for military aircraft navigation equipment, components for test equipment for night vision goggles, military aircraft ground equipment, military aircraft head-up displays, military aircraft navigation equipment, night vision goggles, test equipment for military aircraft head-up displays, test equipment for military aircraft navigation equipment, test equipment for night vision goggles
13	P	components for uranium isotope separation equipment, technology for the use of uranium isotope separation equipment
14	P	components for sporting guns, sporting guns
15	P	toxins
16	P	components for flash suppressers, components for gun mountings, components for gun silencers, equipment for the use of sporting rifles, flash suppressers, gun mountings, gun silencers, sporting guns, weapon sights
17	P	equipment for the use of general military aircraft components, equipment for the use of general military vehicle components, general military aircraft components, general military vehicle components, general naval vessel components

Uzbekistan

Processing Statistics

Median processing time SIELs	6 days
% and number of SIELs completed in 20 working days	100% (2)
% and number of SIELs completed in 60 working days	100% (2)
% [as a % of all SIEL cases processed] and number of SIELs refused	0% (0)

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	2	£2,800
Total	2	£2,800

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	2	£2,800

sporting guns (1) (2 licences).

Venezuela

Processing Statistics

Median processing time SIELs	13 days
% and number of SIELs completed in 20 working days	83% (5)
% and number of SIELs completed in 60 working days	100% (6)
% [as a % of all SIEL cases processed] and number of SIELs refused	0% (0)

SIELs - Permanent and Temporary (excluding Incorporation and Transshipment)

Issued

Types of goods on licence	No. of licences	Value
Non-military	6	£14,881
Total	6	£14,881

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
5A002	6	£14,881

equipment employing cryptography (6 licences).

Vietnam

Processing Statistics

Median processing time SIELs	19 days
% and number of SIELs completed in 20 working days	50% (5)
% and number of SIELs completed in 60 working days	100% (10)
% [as a % of all SIEL cases processed] and number of SIELs refused	0% (0)

Median processing time OIELs	172 days
% and number of OIELs completed in 20 working days	0% (0)
% and number of OIELs completed in 60 working days	0% (0)
% [as a % of all OIELs cases processed] and number of OIELs refused	0% (0)

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Non-military	9	£491,401
Total	9	£491,401

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
2B350	1	£11,400
5A001	2	£255,201
5A002	3	£149,691
5D001	1	£15,000
5D002	1	£2,609
7A003	2	£57,500

T corrosion resistant chemical manufacturing equipment.
 equipment employing cryptography (2 licences).
 T equipment employing cryptography.
 inertial equipment (2 licences).
 radio jamming equipment.
 T radio jamming equipment.
 software for the development of equipment employing cryptography.
 T software for the use of radio jamming equipment.

OIELs (excluding Other OIELs)

Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary

1	P	components for submersible equipment, components for submersible vehicles, heading sensors for hydrophone arrays, high energy capacitors, metal alloy cylindrical forms, metal alloy tubes, submersible equipment
2	T	cryptographic software, equipment employing cryptography, radio jamming equipment

Zambia

Processing Statistics

Median processing time SIELs	18 days
% and number of SIELs completed in 20 working days	67% (4)
% and number of SIELs completed in 60 working days	100% (6)
% [as a % of all SIEL cases processed] and number of SIELs refused	0% (0)

Median processing time OIELs	178 days
% and number of OIELs completed in 20 working days	0% (0)
% and number of OIELs completed in 60 working days	0% (0)
% [as a % of all OIELs cases processed] and number of OIELs refused	50% (1)

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	2	£46,729
Non-military	2	£130,158
Total	4	£176,886

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	1	£820
ML3	1	£45,909

semi-automatic pistols (4).
small arms ammunition.

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1C351	1	£158
5A002	1	£130,000

equipment employing cryptography.
toxins.

OIELs (excluding Other OIELs)

Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	cryptographic software, equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography

Rejected

Applications to this destination refused in full.		
No.	Type	Goods Summary
1	P	components for sporting guns, pistols, sporting guns, weapon sights
