The Animal and Plant Health Agency (APHA) is an internationally recognised centre of scientific excellence providing a wide range of applied research and consultancy to both government and commercial customers.

APHA is a reference laboratory for a number of animal pathogens and diseases and provides expertise as a Collaborating Centre in relation to designated areas of animal health both at National and International level.

**UN Food and Agriculture Organisation**
- Reference Laboratory
  - Brucellosis
  - Animal Influenza
  - Newcastle disease
- Reference Centre
  - Antimicrobial resistance

**World Health Organisation**
- Collaborating Centre
  - Rabies - designation under review

**World Organisation for Animal Health**
- Reference Laboratory
  - Antimicrobial resistance
  - Avian influenza
  - Bovine tuberculosis
  - Bovine spongiform encephalopathy
  - Bovine viral diarrhoea
  - Brucellosis
  - Classical swine fever
  - Contagious agalactia
  - Contagious equine metritis
- Collaborating Centre
  - Risk Analysis and Modelling
  - Enzootic bovine leukosis
  - Equine viral arteritis
  - Infectious bovine rhinotracheitis
  - Newcastle disease
  - Rabies
  - Salmonellosis
  - Scrapie
  - Swine Influenza

**National Reference Laboratory**
- Reference Laboratory
  - Animal by-products feed testing
  - Antimicrobial resistance
  - Aujeszky’s disease
  - Avian influenza
  - Bovine tuberculosis
  - Brucellosis
  - Campylobacter
  - Classical swine fever
  - Contagious equine metritis
  - Echinococcus
  - Enzootic bovine leukosis
  - Equine encephalomyelitis
  - Equine infectious anaemia
  - Equine viral arteritis
  - Newcastle disease
  - Giardia
  - Porcine Epidemic Diarrhoea
  - Rabies
  - Rift Valley fever
  - Salmonella
  - Swine Influenza
  - Teschen disease
  - Trichinella
  - Transmissible spongiform encephalopathies
  - Veterinary mycoplasmas
  - West Nile fever
