An estimated 22,440 UK seafarers were active at sea in 2019, with overall numbers being broadly stable in recent years.

► Around half of the total active at sea seafarers were officers (10,320 certificated and 1,310 uncertificated) with a further 1,670 officer cadets in training during the financial year 2018/19.

► There has been an overall downward trend in the number of UK seafarers over the past 15 years. However, between 2012 and 2019 numbers have been broadly stable with the exception of 2018.

► The exception to the stable trend is a 23% increase in ratings between 2017 and 2018, followed by an equivalent drop in 2019. This is largely explained by a change in the coverage of the data provided by the Chamber of Shipping. For this reason fluctuations should be treated with caution.

► The majority of UK seafarers active at sea were male (84%), with most female seafarers working as uncertificated officers or as ratings. Females accounted for 3% of certificated officers in 2019.

► Similarly to 2018, in 2019 there were 41,010 seafarers holding certificates to work on UK registered vessels issued by the Maritime and Coastguard Agency, with around 14,350 of these being UK nationals.

About these statistics

This release presents a range of statistics relating to the number of seafarers working in the UK shipping industry, including the best current estimate of the number of UK nationals active at sea. These figures are used to monitor broad trends in employment of seafarers and are used by the Department for Transport, industry bodies and trade unions.

Data sources

This release presents figures from two main data sources:

► Section 2 presents data on officers who have certificates allowing them to work in the UK shipping industry, derived from data held by the Maritime and Coastguard Agency (MCA) in their Seafarer Documentation System. These figures should provide good estimates of seafarers with certificates, however, it is not possible to tell from the data whether individuals are active at sea. Therefore, it is assumed that 84% of those holding certificates are active at sea and that their retirement age is 62. See accompanying Technical Note for more information on methodology.

► Section 3 is based on data collected via the annual Seafarer Employment Survey conducted by the UK Chamber of Shipping (CoS) of their member companies. This provides an estimate of seafarers active at sea for member companies, of all ranks. Chamber membership does not cover all companies operating in the UK industry meaning that these figures do not provide complete coverage (with no uplift currently made to account for this).

The two sources are combined to produce an estimate of UK seafarers active at sea as set out in section 1 - the best estimate of UK nationals working at sea in ‘merchant navy’ roles. This includes any UK national working on a registered vessel in a regular sea-going capacity (excluding fishing vessels).

Other relevant information is presented where possible, including on officer cadets (from MCA, section 2), maritime apprenticeships (Department for Education, section 4) and seafarer projections to present the fullest range of available statistics on seafarers.

Coverage and key definitions

Coverage. These statistics relate to the UK shipping industry, though this is not easy to define precisely. MCA data relates to officers of all nationalities who hold certificates to work on UK registered vessels; CoS data relates to member companies, which typically means that they will have some interest or base in the UK (though the seafarers they employ may work on vessels registered in another country). Tug owner companies were included for the first time in the 2018 figures.

Time period covered. CoS data reflects the industry as at June 30th of each year. In previous years MCA data has been supplied on June 30th, however data for 2019 was returned to the Department in October 2019. It is not anticipated that the later return should have a significant effect on the statistics.

Trends over time. These figures are intended to provide broad indications of trends over time, however CoS data can fluctuate for a number of reasons including changes in CoS membership or in the industry. No adjustment is made for these effects, so any large fluctuations in year-on-year trends should be treated with caution.
An estimated 22,440 UK seafarers\(^1\) were active at sea in 2019. The majority of these UK seafarers are officers or cadets, and the total includes:

- 10,320 certificated officers, based on MCA data on certificates held, with an assumption that 84% of those holding certificates are active at sea and that their retirement age is 62.
- 1,670 officer cadets were in training in the 2018/19 financial year.
- 1,310 uncertificated officers and 9,140 ratings employed by companies that are members of the UK Chamber of Shipping (including the Royal Fleet Auxilliary).

The overall trend in the number of UK seafarers over the past 15 years has been downward, though since 2012 numbers have been broadly stable with the exception of 2018. In 2018, there was an uptick in the number of seafarers, driven by an increase in ratings. However, this change partly reflects changes in membership of the Chamber of Shipping, and differences in the number of members providing data over the years. This affects the number of ratings recorded in particular. Thus the interpretation of these trends should be made with caution.

---

**Seafarer types**

To serve as a certificated officer on a merchant ship, a Certificate of Competency (CoC) or equivalent must be obtained; in the UK these are issued by MCA.

Trainee officers, or cadets, are not part of a ship's crew but are on board to gain experience.

Uncertificated officers are those without certificates who are employed in technical or catering/hotel functions, mainly in the cruise and ferry sectors.

Ratings are semi-skilled experienced workers who are not required to revalidate their competencies as certificated officers are, or other staff without maritime training (e.g. hotel and catering staff).

---

1. These figures do not capture all UK seafarers active at sea. Ratings and uncertificated officers employed by CoS non-member companies, or by member companies that did not respond to the annual survey are omitted; past attempts to collect data from non-member companies suggest that they employ some UK seafarers though a relatively small number of UK nationals compared to CoS members. Additionally, no attempt is made to adjust for seafarers collected in the CoS survey where nationality is not recorded. Taken together, these factors could mean that the total number of UK seafarers is undercounted by a few thousand.
As of October 2019, 41,010 seafarers held seafarer certificates issued by MCA - 26,930 were Certificates of Competency (CoCs) and 11,340 were Certificates of Equivalent Competency (CECs). Of these, 14,350 were UK nationals.

These figures relate to certificates issued, and some of those holding certificates will not be working at sea. Whilst it is likely that many UK nationals with CoCs and those holding CECs will be working on UK flagged ships, or in the UK industry, this is less likely to be true of non-UK nationals who obtain CoCs in the UK.

Seafarer certificates issued by MCA held in October 2019 (SFR0203)

Total: 41,010

**UK officers**

The majority of UK nationals with certificates held CoCs (12,820), with 1,040 holding yacht certificates, 410 Tug and Inshore Craft (TIC) certificates and 80 CECs.

Of those with CoCs, the trends over time in the numbers holding deck and engine certificates have been similar, with there generally being slightly more deck officers than engine.

UK officers (aged under 62) with CoCs, 2009 to 2019 (SFR0201)

![Graph showing numbers of certificates over time]

Numbers of certificates of all types last peaked in 2006 and have declined over the years since then. This peak may have reflected a surge in renewed certificates prior to February 2002 when the STCW regulations were fully implemented. Certificates are valid for five years and if not renewed, certificates issued in this period would have expired by June 2007.

2. The International Convention on Standards of Training, Certification and Watchkeeping sets qualification standards for personnel working on seagoing merchant ships.
The vast majority (97%) of UK officers with CoCs were male in 2019. This varied from 95% of deck officers to 99% of engineering officers (equivalent figures for ratings are on page 9). The overall proportions for deck and engineer categories have remained the same in 2019 as they were in 2018.

In 2019, UK nationals holding CoCs were typically older than non-UK nationals holding CECs, with 44% of UK CoC holders being aged 45 or over in 2019, compared to 35% of non-UK CEC holders. The ageing profile of UK seafarers was one of the issues identified in the 2015 Maritime Growth Study.

Age distribution of UK officers with CoCs and non-UK officers with CECs, 2019 (SFR0202)

Non-UK officers: Certificates of Equivalent Competency

Together, Polish, Filipino, Ukrainian, Romanian and Russian nationals accounted for around 57% of those holding UK CECs.

In 2019, there were 11,290 non-UK nationals with valid CECs, a 1% increase compared to 2018. The average number of non-UK nationals with CECs over the past five years equates to around 10,700, a figure which is broadly on trend with 2019 data.

Non-UK officers with CECs from other nationalities account for 23%

STCW 2016 (Manila Amendment)

The STCW Convention 1978 has been recently amended by the 2016 Manila Amendments and contains new training requirements.

Between 1 July 2013 and 1 January 2017 seafarers were required to undertake additional training in compliance with these Manila Amendments and hold the requisite certification.
Non-UK officers: Certificates of Competency

In 2019, 14,115 non-UK nationals held valid CoCs issued in the UK, with the majority (73%) of these being from India, and all of the top 5 countries being members of the Commonwealth.

Nationality distribution of non-UK officers with CoCs, 2019 (SFR0205)

Officer trainees

The estimated number of officer cadets in training for the financial year 2018/19 was 1,670. In the same year, the number of new entrants under the SMarT1 scheme was 800.

The number of SMarT trainees tends to reflect the level of SMarT funding, as can be seen in the chart below. In 2018 a doubling of the future level of SMarT funding was announced, with an expected increase in the number of new entrants in future years.

Additional data supplied by MCA highlighted at 10% of new SMarT entrants in 2018/19 were female, up from 5% in 2017/18. DfT and the maritime industry are working together through Maritime UK’s Women in Maritime Taskforce to improve the gender balance at all levels in the maritime industry both at sea and on shore.

Officer trainees, 1998/99 to 2018/19 (SFR0206)
In 2019, it is estimated that UK nationals accounted for 25% of the 67,170 seafarers active at sea working for companies within the membership of the UK Chamber of Shipping.

A further 16% of seafarers were from other countries in the European Economic Area (EEA), while 53% were from countries outside the EEA and 6% of seafarer nationalities were unknown.

**UK uncertificated officers and ratings: trends by type**

The number of UK uncertificated officers is estimated to be 1,310 in 2019, accounting for around 8% of all UK seafarers active at sea. This proportion has been relatively stable over the past three years.

The number of UK ratings in 2019 is consistent with levels seen between 2012 and 2017 accounting for around 55% of UK seafarers active at sea. The exception to this trend is an uptick of 23% in 2018. This increase is explained through a large company moving their business to the UK in 2018 and the subsequent fall in 2019 by a different large company leaving the membership (see CoS Seafarer Employment Survey side box).

**UK uncertificated officers active at sea by type, 2002 - 2019**

(SFR0301)

**UK ratings active at sea by type, 2002 - 2019**

(SFR0301)

---

**CoS Seafarer Employment Survey**

The figures in this section are based on the UK Chamber of Shipping Seafarer Employment Survey (previously manpower survey), an annual survey carried out since 2002, which asks about crew employed including details of age, gender and nationality.

The survey is essential for providing estimates of UK uncertificated officers and ratings active at sea. This data is unavailable from the MCA source which only provides information on certificates held by officers.

The survey response rate for 2019 was 90%, which is consistent with previous years. No adjustment has been made for companies which did not provide data.

The CoS data does not provide complete coverage, and trends over time can be impacted by changes in membership or operations. For example, if a large company decided to move its operations or crewing outside the UK, this could result in large fluctuations in the figures. The data however, provides the best available source for monitoring patterns and broad trends of employment in the UK shipping industry.

**Uncertificated officers and ratings**

These officers are mainly employed by the cruise and ferry industry where large scale changes can rapidly take place affecting employment patterns, making these numbers volatile. For example, the total number of ratings in the catering/ hotel/ other sector has fluctuated the last five years. This is largely due to new companies joining and leaving the UK Chamber of Shipping.
Age and gender profiles of UK seafarers active at sea

The majority of UK seafarers active at sea in 2019 were male (84%); of certificated officers 97% were male. Amongst ratings, men accounted for an estimated 98% of deck and 99% of engine ratings, compared with 53% for the hotel/catering/other grouping.

In 2019 deck and engine ratings tended to be older on average than other seafarers. Of deck and engine ratings up to the age of 61, 69% and 67% respectively were aged 40 to 61. This is compared with equivalent figures of 46% for hotel/catering/other ratings, and 47% of certificated officers active at sea.

Seafarers active at sea by nationality

In 2019, an estimated 25% of the seafarers active at sea with CoS member companies were UK nationals, with 16% of seafarers being from other European Economic Area (EEA) countries.

An estimated 45% of certificated officers were from the UK, with a further 29% from other EEA countries. This compares with 19% of ratings coming from the UK - around 65% of ratings were from outside the EEA.

3. Age figures should be treated with caution and should not be used in comparison to previous years due to a change in CoS membership in 2019

Nationality groups

The EEA is comprised of the EU and Norway, Iceland, Leichtenstein.

The seafarer nationality was unknown for around 6% of the total recorded in the 2019 survey, with around 7% of certificated officers not having nationality recorded, this is roughly consistent with previous years.
This section briefly summaries data available on seafarers and trainees available from other published sources, in areas where users of these statistics have expressed interest.

**Seafarer projections**

The latest seafarer projections were published in 2016; although based on the same underlying data as presented in these statistics, numbers were the results of a modelling approach which made a number of adjustments and assumptions, and so are not directly comparable.

The figures projected an increase in the supply of UK ratings, and a decrease in the supply of total UK officers - though sensitivity scenarios were also produced.

**Sensitivity scenarios for the supply of UK seafarers, 2016 to 2026 (SFR0401)**

**Maritime apprenticeships**

Apprenticeships are jobs with structured training which give apprentices a foundation to their career. Information on apprenticeships in the maritime sector is available via the [Maritime Skills Alliance](https://www.maritime-skills-alliance.org.uk).

Currently limited statistics are available, but the latest show that the number of able seafarer (deck) apprenticeships starts was as follows:

- 2016/17: 30 starts ([link to data](https://www.gov.uk/government/collections/apprenticeships-statistics))
- 2017/18 (to the end of Q2 of the academic year): 40 starts ([link to data](https://www.gov.uk/government/collections/apprenticeships-statistics))

These figures provide an indication of the number of ratings currently being trained via apprenticeships, but there are other apprenticeships related to maritime where statistics are not readily available.
Wider context

The figures on page 3 do not attempt to count everyone who works in a seagoing capacity in the UK; the focus is on the ‘merchant navy’ for which seafarer certification is managed by the MCA. The following are other groups that are outside the scope of this publication but may be considered to be in seafarer roles:

► The Royal Navy, which has a regular trained strength of around 30,000 based on Ministry of Defence statistics (however the Royal Fleet Auxiliary is included in the above estimates).

► Fishermen – there were an estimated 11,960 UK fishermen in 2018 based on statistics compiled by the Marine Management Organisation.

► Superyachts – most UK nationals working as crew aboard yachts will not be in scope of the above statistics (though officers with certificates not restricted to yachts will be). Industry estimates place the number of UK nationals working in the superyachts sector at 19,000.

► Workboats – those working on smaller vessels, such as those in companies belonging to the National Workboat Association, are unlikely to be covered though no estimate is available.

► Inland waterways – MCA has issued 3,600 Boatmaster licences for work on inland waters and near coastal work over the five years to mid-2017.

► Those working in roles on shore.

It is possible that seafarers can belong to more than one of these groups. Producing an overall estimate of all UK nationals working at sea from the available data is challenging.

Further information

Data tables. This release is a summary of a larger set of data tables, charts and documentation on seafarer statistics available from the Department for Transport website at: https://www.gov.uk/government/statistics/seafarers-in-the-uk-shipping-industry-2019.

National Statistics. These statistics are badged as National Statistics meaning that they are produced to high professional standards set out in the Code of Practice for Statistics. These statistics were designated as National Statistics in February 2013. More information can be found here: https://www.gov.uk/government/publications/maritime-and-shipping-statistics-national-statistics-status.

Details of Ministers and officials who receive pre-release access to these statistics up to 24 hours before release can be found here: https://www.gov.uk/government/publications/pre-release-access-lists-for-maritime-and-shipping-series.

Next update. The next update in this annual series is provisionally scheduled for December 2020. To hear more about DfT statistics publications as they are released please follow us on Twitter via our @DfTstats account: http://www.twitter.com/DfTstats.
