

ROMANIZATION OF ARABIC

BGN/PCGN 1956 System (Revised Presentation 2019)

This System was adopted by the BGN in 1946 and by the PCGN in 1956 and is applied by BGN and PCGN in the systematic romanization of Arabic geographical names in Bahrain, Egypt, Iraq, Jordan, Kuwait, Libya, Oman, Qatar, Saudi Arabia, Syria, the United Arab Emirates, Yemen, the West Bank and Gaza Strip¹.

Uniform results in the romanization of Arabic are difficult to obtain, since vowel points and diacritical marks are generally omitted from both handwriting and printed script. It follows that for correct identification of the words which appear in any particular name, knowledge of its standard Arabic-script spelling including proper pointing, and recognition of dialectal and idiosyncratic deviations are essential.

In order to bring about uniformity in the Roman-script spelling of geographical names in Arabic-language areas, the system is based insofar as possible on fully pointed Modern Standard Arabic (MSA). In the interest of clarity, vowel pointing to indicate short vowels has been applied to the examples given below, and examples of the, more usual, unpointed script have also been provided; it should also be noted that the dots which occur on some characters of the Arabic script are not vowels but rather are an integral part of the base consonant.

Arabic script is written from right to left, and does not make a distinction between upper and lower case.

Table 1 below shows the written consonant characters used in standard Arabic script; Table 2 shows vowel characters and other diacritical marks, some of which are usually not written; and Table 3 shows the Perso-Arabic script characters which, although not part of the standard Arabic alphabet, are sometimes used to represent sounds not present in Standard Arabic. These tables should be used in conjunction with the Notes and Special Rules which follow. These explain elements of Arabic grammar and orthography which affect romanization and should be treated as an integral part of the Romanization System for Arabic.

¹ It is not used to represent names in Algeria, Chad, Comoros, Djibouti, Lebanon, Mauritania, Morocco, Sudan or Tunisia, where the spellings used on official Roman-script sources are used.

Table 1: Standard Arabic Consonant Characters

	Script				Unicode value (Independent)	Romanization	Roman Unicode value (lower case)	Example		
	Final	Medial	Initial	Independent				Pointed Script	Unpointed Script	Roman Script
1	ء				0621	<i>not romanized in word-initial position</i> <small>see Note 2</small>	-	أَبُو ظَبْيٍ	أبو ظبي	Abū Ḥaby
						<i>' in all other positions</i> <small>see Note 2</small>	2019	بَيْرُ زَيْتٍ	بئر زيت	Bi'r Zayt

								مُحَافَظَة دِمَشَق	محافظة دمشق	Muḥāfazat Dimashq

Table 2: Vowel Characters and Diacritical Marks²

	Script	Unicode value	Romanization	Roman Unicode value (lower case)	Example		
					Pointed Script	Unpointed Script	Roman Script
1	◌َ	064E	a	0061	البَصْرَة	البصرة	Al Baṣrah
2	◌ِ	0650	i ³	0069	الرِّيَاض	الرياض	Ar Riyāḍ
3	◌ُ	064F	u	0075	الْقُدْس	القدس	Al Quds
4	◌َا	0627	ā <i>see Notes 3 & 10</i>	0101	بَابِ الْمَنْدَبِ	باب المنذب	Bāb al Mandab
5	◌ِي	0649	ī	012B	الْمَدِينَة	المدينة	Al Madīnah
6	◌ُو	0648	ū	016B	صُور	صور	Ṣūr
7	◌َى , ◌َى	0649, 0649+0670	á <i>see Note5</i>	00E1	مَرَسَى مَطْرُوح	مرسى مطروح	Marsá Maṭrūḥ
8	◌ِ	0652	<i>not romanized</i>	-	<i>Indicates absence of short vowel</i>		
9	◌َي	064A	ay	0061+0079, 0061+012B	صَيِّدَا	صيذا	Ṣaydā
10	◌َوْ	0648	aw	006F+0077	الدَّوْحَة	الدوحة	Ad Dawḥah
11	◌ُ	064B	a ⁿ		<i>See note 6</i>		
12	◌ِ	064D	i ⁿ		<i>See note 6</i>		
13	◌ُ	064C	u ⁿ		<i>See note 6</i>		
14	◌ِ	0651	<i>doubling of consonant</i> <i>see Note7</i>	-	مُحَمَّد	محمد	Muḥammad

² Numbers 1, 2, 3, 8, 11, 12, 13 and 14 are not usually written.

³ This vowel mark should be romanized as ‘i’ when it occurs below the consonant character or below the *shaddah* (see row 14 and note 7), which itself occurs above a consonant character.

	Script	Unicode value	Romanization	Roman Unicode value (lower case)	Example		
					Pointed Script	Unpointed Script	Roman Script
15	او	0627 + 0648	Ū or Aw in word initial position <i>see Note 11</i>	016A or 0041+0077	أوزونلار	اوزونلار	Ūzūnlār
					أوسط	اوسط	Awsaṭ
			āw in word medial or final position <i>see Note 11</i>	0101+0077	سناو	سناو	Sanāw
16	اي	0627+064A	Ī in word initial position <i>see Note 11</i>	012B	ايران	ايران	Īrān
			āy in word medial or final position	0101+0079	تلّ السّراي	تلّ السراي	Tall as Sarāy
17	آ	0671	’ <i>see Note 8</i>	2019	<i>See note 8</i>		
18	آ	0622	Ā in word initial position <i>see Notes 3 & 9</i>	0101	آلبو معيط	الבו معيط	Ālbū Mu‘ayṭ
			’ā in word medial position <i>see Notes 3 & 9</i>	2019+0101	قرآن	قرآن	Qur’ān

Table 3: Modified/Non-Standard Arabic Script Characters

	Script				Unicode value (Independent)	Romanization	Roman Unicode value (lower case)	Example		
	Final	Medial	Initial	Independent				Pointed Script	Unpointed Script	Roman Script
1	پ	ڤ	پ	پ	067E	p	0070	سَلْمَانِ پَاك	سَلْمَانِ پَاك	Salmān Pāk
2	چ	چ	چ	چ	0686	ch	0063+0068	تَلَّ كُوچِك الصَّغِيرِ	تَل كُوچِك الصغیر	Tall Kūchik aş Şaghîr
3	ف	ف	ف	ف	06A4	v	0076	مَزَّة فِيلَات غَرْبِيَّة	مزة فيلات غربية	Mazzah Villāt Gharbīyah
4	ق	ق	ق	ق ⁴	06A8	g	0067	قَفْصَة	قفصة	Gafṣah (Gafsa)
5	گ	گ	گ	گ ⁵	06AF	g	0067	تَلَّ گَمْر	تل گمر	Tall Gamr
6	گ	گ	گ	گ ⁶	06B4	g	0067	زَاگُورَة	زاگورة	Zāgūrah (Zagora)

⁴ Used in Tunisian Arabic Script.

⁵ Used principally in Iraq, but also sometimes used in other Arabic speaking countries to represent the ‘g’ sound.

⁶ Used in Moroccan Arabic Script.

Numerals									
٠	١	٢	٣	٤	٥	٦	٧	٨	٩
0	1	2	3	4	5	6	7	8	9

Although Perso-Arabic script is written from right to left, numerical expressions, e.g. ١٩٦٨ → 1968, are written from left to right.

NOTES

1. The symbol ○ is used in this system to symbolise any Arabic consonant character. It is not itself an Arabic letter.

2. *Hamzah* (ء) is written in Arabic in association with most instances of initial *alif*, except those which belong to the definite article *al* or which bear a *maddah* (see note 9). *Hamzah* is written above the *alif* (أ) if the accompanying short vowel is a *fathah* or *ḍammah* and usually below the *alif*(إ) if the accompanying short vowel is a *kasrah*. When the purpose is to indicate the presence of a glottal stop, *hamzah* is written over medial *alif* (أ), *wāw* (ؤ) and *yā'*, typically without dots (ئ); or following final *alif* (اء), these characters serving only to “bear” the hamzah. *Hamzah* following *kasrah* (إ) is written (ئ); the *yā'* is usually in the initial or medial form and the dots are omitted e.g. *bi'r* (بئر). *Hamzah* following *ḍammah* (ؤ) is written (ؤ). *Hamzah* following a long vowel is written without a bearer and is positioned on the line of print like a regular character, e.g. *ṣan'ā'* صنعاء. The romanization of *hamzah* (ʿ – Unicode encoding 2019) should always be carefully distinguished from that of *'ayn* (ع – Unicode encoding 2018).

3. *Alif*(ا) occurs with the following uses:

a. Initially, it indicates that the word begins with a vowel or diphthong; the *alif* itself is not romanized, but rather “carries” the short vowel, which is romanized;

e.g., أبو ظبي → *Abū Ṣaby*.

b. With *maddah* (آ – row 18 in the vowel table), it is represented *ā*; e.g., أبو مُعَيْط → *Ālbū Mu'ayṭ*. See also note 9.

c. Medially and finally it is represented *ā*; e.g., باب → *Bāb*, صيدا → *Ṣaydā*.

d. Medially and finally, *alif* may serve as the bearer of *hamzah*, e.g. رأس → *ra's*. See also note 2.

4. The *tā' marbūṭah* character (ة), which looks like *hā'* with two dots above and occurs only at the end of words, is romanized **h**, except in an *iḍāfah*⁷ noun phrase

⁷ The *iḍāfah* is a grammatical construction in Arabic consisting of two or more nouns, which indicates a relationship of possession between the words. For example, *Muḥāfaẓat Baghdad*, which could be translated in English as the Governorate **of** Baghdad.

construction, where it is romanized **t**, in accordance with pronunciation. e.g. *Muḥāfaẓah* (as an isolated word) but *Muḥāfaẓat Baghdād*. In exceptional cases, when it is necessary to distinguish it from the *tā' marbūṭah*, the ending *fathah + hā'* (هَ) may be romanized *a·h* when the character *hā'* (هَ) is pronounced as such. Example: *Muntaza·h*. (See also special rule 13). The *tā' marbūṭah* is always preceded by the short vowel *fathah* (َ) and is therefore romanized as **ah** or **at**, except when it is preceded by *alif* when it is romanized **āh** (not āah), e.g. *Ḥamāh* (حماة), and as **āt** within an *iḍāfah* construction.

5. The character *yā'* (in final form but without dots) preceded by the vowel point *fathah* is known as *alif maqṣūrah*. This character may also be pointed ى and should be romanized *á*. See character 7 in the vowel table.

6. The classical Arabic grammatical endings written with the nunation symbols (*tanwīn*) may be romanized, when necessary, by aⁿ, iⁿ, uⁿ. In modern spoken Arabic, these endings have become silent and should not be romanized: e.g. classical *alifⁿ*; modern *alif*.

7. Doubled consonant sounds are represented in Arabic script by placing a *shaddah* (ّ) over a consonant character, although like the short vowels the *shaddah* may not always be written. In romanization the letter should be doubled, e.g. *Quwwah*, *'Abbās*. However, the combination of the consonant character *yā'* with a *shaddah* preceded by a *kasrah* (ِ) at the end of a word is romanized **ī**, e.g. *Gharbī*; a word ending *kasrah + yā'* with a *shaddah + tā' marbūṭah* is romanized **īyah** (rather than *iyyah*), e.g. السُّلَيْمَانِيَّة is romanized *As Sulaymānīyah* and not *As Sulaymāniyyah*; and when the *kasrah + yā' + shaddah* combination is followed by the sound masculine plural ending (ِيْنَ or يُونِ) it should be romanized as *-īyīn/īyūn*, e.g. ساحة العباسيين should be romanized as *Sāḥat al 'Abbāsīyīn*.

8. *Hamzat al waṣl* (ِ), which is utilized only in the pointing of classical Arabic, is romanized ' as illustrated in the classical form of its name *hamzatu'l waṣli*.

9. Since *maddah* (َ), which is placed over *alif* (ا), often occurs in word-initial position, no confusion results from the use of *ā* for *alif maddah* (َ) as well as for *fathah* followed by *alif* (اَ).

10. The ligature ٱ represents *lām-alif*, and should be romanized *lā*.

11. In word initial position the combination *Alif+Wāw* (او) is sometimes used to render an initial long vowel sound in words of non-Arabic origin. Where this is clearly the case it should be romanized *Ū*. In words of Arabic or uncertain origin it should be romanized *Aw*. In word-medial or word-final position it should always be romanized *āw*. Similarly the combination *Alif+Yā'* (اي) is romanized *Ī* to render an initial long vowel

sound but as āy in word-medial or word-final position.

SPECIAL RULES

1. The Arabic definite article *al* (ال) should be treated as follows:
 - a. Initial definite articles should be capitalized and hyphens should not be used to connect parts of names, e.g. *Ash Shāriqah*. When appearing medially in a name the initial ‘a’ should be lower case, e.g. *Tall al Laḥm*.
 - b. When the definite article precedes a word beginning with one of the “sun letters” t, th, d, dh, r, z, s, sh, ṣ, ḍ, ṭ, ḏ, l, or n – the l is assimilated in pronunciation and romanization, thus yielding, for example, the romanization *Ar Riyād*, rather than *Al Riyād* for الرياض.
 - c. If sources contradict over the inclusion or non-inclusion of the definite article in a name, preference should be given to the form with the article.

2. Conjunctions and prepositions should be romanized according to their written form in Arabic script and should be lower case. In cases where the conjunction or preposition ends in a long or short vowel any assimilated pronunciation should not be shown in the romanized form. e.g. *Khabb wa ash Shaʿf* (خبب والشعف).
There are two exceptions to this rule:
 - a. In the case of the preposition *li* (ل), where the *alif* of the definite article is assimilated in the written form as well as pronunciation, the written form should be shown in romanization as follows: *Miṣr liṭ Ṭayarān* (مصر للطيران); *Ash Sharikah al ʿĀmmah lil Maghāzil* (الشركة العامة للمغازل).
 - b. In the case of the preposition *bi* (ب), the *alif* of the definite article is assimilated in pronunciation and, although the *alif* remains in the written form the short vowel it carries changes from ‘a’ to ‘i’. For example: *Al Qaryah bid Duwayr* (القرية بالدوير) but *Ad Duwayr* (الدوير); and *Al Ḥarajah bil Qurʾān* (الحرجة بالقرآن) but *Al Qurʾān* (القرآن).

3. The Arabic word for God (الله) should be written *Allāh*. The *alifkhanjarīyah* (*dagger alif*) (◌ِ) above the second ل (*lām*) in the word الله, like the short vowels, is not usually written but should be romanized *ā*, like a full-size *alif*. This diacritical mark appears in a few other Arabic words, for instance on the *alif maqṣūrah* as described in note 5.

4. Names which consist of noun phrases⁸ should be written as separate words. The definite article within such names should be romanized *al*, not *ul*, e.g., *ʿAbd Allāh*, *ʿAbd ar Raḥmān*, *Dhū al Faqār*, and as noted in special rule 1, the medial *al* should be lower case .

5. The Arabic word بن should be romanized *Bin* rather than *Ibn* whenever written

⁸ See also note 4

without *alif*, that is between two proper nouns, e.g., *‘Umar Bin al Khaṭṭāb*. Where it appears with *alif* (ابن), it should be romanized *Ibn*.

6. The Turkish word *Paşa* should be romanized from Arabic script as *Bāshā*. The Turkish word *Bey* should be romanized as *Bey* in Egyptian names, no matter how it is written in Arabic-language sources, but in other Arabic areas it should be romanized as *Bak* where written بك and as *Bayk* when written بيك.

7. The modern colloquial word *Sīdī* (سيدي) should be give precedence over the classical form *Sayyidī*. This does not preclude the spelling *Sayyidī* if the latter is indicated by the Arabic script or other evidence – for instance, if the *yā’* is written with a *shaddah* (ّ).

8. The colloquial word *Bū* should not be changed to the standard form *Abū*.

9. The colloquial word for water, written مية on Arabic maps, should be romanized *Mayyat*.

10. Place names of Aramaic origin in Syria often contain initial consonant clusters consisting of *b* plus another consonant such as *l* or *h*. In romanization, the clusters *bl*, *bh*, etc., should be so represented.

11. In names containing the Arabic word for back, ridge, or hill, appearing as either *Ḍaḥr* (ظهر) or *Ḍaḥr* (ضهر) in Arabic sources, the word should be romanized to reflect the particular Arabic spelling shown. Where sources differ, preference should be given to the form found on the most authoritative source.

12. In formal Arabic, the spelling of some words ending in a long vowel character may change according to that word’s grammatical function in a sentence. For example, the personal name *Abū Bakr* (ابو بكر) would become *Abī Bakr* (ابي بكر) when preceded by a generic in an *idāfah* construction⁹ e.g. *Shāri’ Abī Bakr* (شارع ابي بكر – Abu Bakr Street). The spelling of such words as found on the most authoritative source should be used in the romanized form of the name. Other common words affected by this rule are *Banū/Banī* (sons of...) and *Dhū/Dhī* (owner of...).

Examples of names in this category include *Jabal Abā aṣ Ṣabbān* (جبل ابا الصبان) and *Muḥāfaẓat Dhī Qār* (محافظة ذي قار).

13. Occasionally the character sequences كِه, دُه, سُه, and تِه occur. They may be romanized *k·h*, *d·h*, *s·h*, and *t·h* in order to differentiate these romanizations from the digraphs *kh*, *dh*, *sh*, and *th*, which are used to represent the characters خ, ذ, ش, and ث respectively. See also note 4.

⁹ See footnote 6
