Initial teacher education inspection framework and handbook

The framework for inspecting initial teacher education (ITE) partnerships is available in the first part of this document. The handbook available in the second part of this document describes the main activities carried out during inspections of ITE partnerships in England under section 18B of the Education Act 1994.

Introduction

1. This document sets out the statutory basis and framework for initial teacher education (ITE) inspections in England from September 2020. It sets out the principles that apply to inspection and the evaluation criteria that inspectors use to make their judgements, and on which they report, when carrying out ITE inspections. It reflects the expectations of different pathways to becoming a qualified teacher for early years (EY), primary and secondary schools and further education and skills (FES). Inspectors will inspect partnership phases for which they have appropriate expertise and training.

2. This document describes the main activities carried out during inspections of ITE under section 18B of the Education Act 1994 and the Education and Inspections Act 2006.

3. The document has two parts:
   - Part 1 – The ITE framework: why we inspect ITE partnerships
     This sets out the purposes and principles of the inspection of ITE partnerships and the statutory basis for doing so.
   - Part 2 – The ITE handbook: how we will collect evidence and judge ITE partnerships
     This part contains information about the processes before, during and after the inspection. It contains the evaluation criteria that inspectors use to make the graded judgements about the ITE partnership and includes examples of the kinds of evidence and activities used by inspectors to make their judgements.

The document also has an annex:

- Annex A. Instructions and guidance for thematic subject inspections
  This contains the evaluation criteria on the quality and effectiveness of training in subject/specialist areas of the ITE curriculum.

Privacy notice

4. During inspection, inspectors will collect information about staff and trainees at the partnership by looking at records, survey responses and other recorded information. Inspectors will also visit trainees while they are receiving training and/or teaching in schools and other settings. Inspectors may also meet with trainers, newly qualified teachers (NQTs),1 leaders, managers, mentors and employers, where appropriate.

---

1 Our reference to an NQT is to a teacher or former trainee teacher who has completed successfully an initial teacher education course.
5. Ofsted uses this information to prepare its report and for the purposes set out in its privacy notice. In most cases, Ofsted will not record names. However, some of the information recorded may make it possible to identify a particular individual. Ofsted will not publish any information that identifies an individual trainee or member of partnership staff in the report.

6. Section 18B (5) of the Education Act 1994 sets out Her Majesty’s Chief Inspector’s (HMCI) ‘right to inspect, and take copies of, any records kept by the training provider, and any other documents containing information relating to the training provider’ when inspecting a training provider.

7. Section 132 of the Education and Inspections Act 2006 sets out HMCI’s power to ‘inspect, take copies of, or take away any documents relating to the education or training’ during inspections of FES teacher training programmes. This power also enables our inspectors to inspect computers and other devices that may hold information.

8. In the vast majority of partnerships, Ofsted will gather evidence electronically using a range of devices, including laptops, mobile phones and tablets. All evidence is securely transferred to Ofsted’s systems. Inspectors may take photographs of trainees’ work, but the trainee’s name will not be recorded.

---

Part 1. The ITE framework: why we inspect ITE partnerships

What are the legal requirements for the inspection of ITE?

The ITE inspection framework

9. This framework sets out the purpose of ITE inspections, how Ofsted inspections promote improvement, the principles of inspection and the statutory basis for ITE inspections. It explains who inspects ITE and the factors that determine the timing of an ITE inspection.

What is the purpose of ITE inspections?

10. The inspection of an ITE partnership provides an independent external evaluation of its effectiveness and a diagnosis of what it should do to improve. It is based on the range of evidence available to inspectors, which they evaluate against a national framework, and takes full account of our policies and relevant legislation in areas such as safeguarding, and equality and diversity.

11. Ofsted’s inspections of ITE perform four essential functions:

- They provide trainees and prospective trainees with an expert, independent assessment of how well an ITE partnership is performing and the quality of ITE offered.
- They ensure that NQTs and former EY and FES trainees are well prepared to meet the needs of children, pupils and learners in their care.
- They provide information to the Secretary of State for Education and to Parliament about the work of ITE partnerships and the extent to which an acceptable standard of teacher training is being provided. This provides assurance that minimum standards are being met, provides confidence in the use of public money and assists accountability, as well as indicating where improvements are needed.\(^3\)
- They encourage the improvement of individual ITE partnerships and the education system as a whole.

A force for improvement

12. Ofsted exists to be a force for improvement through intelligent, responsible and focused inspection and regulation.\(^4\) This is our guiding principle. The primary

---

\(^3\) Section 118 of the Education and Inspections Act 2006; www.legislation.gov.uk/ukpga/2006/40/contents.

purpose of inspection under this framework is to bring about improvement in the services we inspect.

13. Through the use of evidence, research and inspector training, we ensure that our judgements are as valid and reliable as they can be. These judgements focus on key strengths, from which other partnerships can learn intelligently, and areas of weakness, from which the partnership should seek to improve. Our inspections act as a trigger to others to take action.

**What determines the timing of an ITE inspection?**

14. The criteria used for the annual risk assessment process are published on an annual basis in the autumn term letter to ITE partnerships. The inspection arrangements will ensure that the frequency of inspection is proportionate to the performance and circumstances of ITE partnerships. This means that some ITE partnerships may be inspected more frequently than once during the current six-year cycle. The timing of an ITE inspection is determined by the annual risk assessment process and the calendar information that ITE partnerships return to us on an annual basis.

15. New partnerships will have their first inspection in their second year of delivering ITE to trainees. For new partnerships with innovation status, this will be their third year.

**Risk assessment**

16. We use risk assessment to ensure that our approach to inspection is proportionate, so that we can focus our efforts on where we can have the greatest impact. Risk assessment combines an assessment of each partnership, based on analysis of official national data, with a more in-depth desk-based review of a wider range of information.

17. We use a broad range of indicators to select ITE partnerships for inspection.

18. In a risk assessment, we analyse:

- the partnership’s course arrangements, and the number of trainees in each age phase submitted to us via the annual partnership survey
- the views of trainee teachers, as provided through the trainee online questionnaire\(^5\)
- the time since the last inspection
- the outcomes of the previous inspection, as well as the inspection framework that it was inspected under

\(^5\) A note to ITE partnerships: we are in the process of reviewing the content of the trainee online questionnaire. Further details will be provided to ITE partnerships in due course.
any other significant concerns that are brought to our attention, for example complaints about the partnership.

19. An ITE partnership that has been judged as requires improvement or to be inadequate will have a re-inspection (of the phase(s) judged as requires improvement) in the next academic year. The re-inspection will be within 12 months of the inspection that graded the partnership requires improvement or inadequate. The re-inspection will focus on ensuring that the partnership is consistently good, that it adheres to the ITT compliance criteria, and that it ensures that trainees receive their minimum entitlement, which is set out in the Department for Education’s (DfE) ITT core content framework. Inspectors involved in re-inspections will use the instructions and guidance set out in this handbook.

Principles of inspection and regulation

20. Inspection of ITE partnerships provides important information to potential trainees, trainees, employers and other stakeholders about the quality of ITE. These groups should be able to make informed choices about different partnerships based on the information published in our inspection reports.

21. This handbook sets out the judgements that apply to all phases of ITE and training programmes of individual partnerships. These are underpinned by consistent, researched criteria for reaching those judgements. Inspectors will take comparable approaches to gathering evidence for different phases, although there may be some variation. Inspectors will comply with relevant guidance and codes of conduct, but they will always try to be curious.

22. Inspection provides assurance to the public and to government that: minimum standards for educating trainee teachers are being met; where relevant, public money is being spent well; and arrangements for safeguarding are effective.

Statutory basis for ITE inspections

23. This framework sets out the statutory basis for ITE inspections carried out under the Education Act 1994.

24. Section 18B\textsuperscript{8} of the Education Act 1994\textsuperscript{9} provides the remit for HMCI to inspect initial training of teachers for schools and, when requested by the Secretary of State, a duty to do so.

25. The Education and Inspections Act 2006\textsuperscript{10} and the Education and Inspections Act 2006 (Prescribed Education and Training etc) Regulations 2007\textsuperscript{11} additionally define the remit of HMCI to cover the inspection of publicly funded training of further education teachers.

26. Early years initial teacher training (EY ITT) inspections are covered under paragraph 9(1) of Schedule 13 (Interaction with other authorities) to the Education and Inspections Act 2006,\textsuperscript{12} which states that ‘The Chief Inspector may make arrangements with a public authority for the carrying out by him (a) in England or Wales, or (b) in Northern Ireland, of inspections of any institution or matter which he is not required or authorised to carry out by virtue of any other enactment.’

**The Equality Act 2010**

27. The ITE inspection framework is intended to encourage improvement in the education and training provided to all trainee teachers in England. The ITE inspection framework and criteria are clear that the expectation is that all trainee teachers will receive a high-quality, ambitious education.

28. Inspectors will assess the extent to which the partnership complies with the relevant legal duties as set out in the Equality Act 2010,\textsuperscript{13} including, where relevant, the Public Sector Equality Duty and the Human Rights Act 1998.\textsuperscript{14}

**One-stage inspection model**

29. The arrangements for inspecting ITE from September 2020 are very different from those in the previous framework. The inspection will have more responsibility for focusing on areas that have the greatest impact on a trainee’s education and development, and the overall impact on a trainee’s education.

30. The evidence from our pilot inspections with ITE partnerships has led to the introduction of a new one-stage inspection model. The new ITE inspection

\textsuperscript{10} Education and Inspections Act 2006; www.legislation.gov.uk/ukpga/2006/40/contents.

framework focuses on the quality of education and training, with emphasis on the training programme, visits to trainees’ teaching, and the ITE partnership’s curriculum, as key elements at the heart of inspection.

31. For inspections of primary and secondary partnerships, inspectors will consider how well partnerships have translated the minimum entitlement, which is set out in the ITT core content framework, into a carefully sequenced curriculum of education and training, including subject and phase expertise. Inspectors will ensure that trainees have been assessed against the teachers’ standards and early years teachers’ standards.

32. The new approach is built around the connectedness of curriculum, teaching and assessment within the ‘quality of education and training’ judgement.

33. The inspection team will normally be on-site for four days, within a single week.

**The ITE curriculum**

34. A partnership’s ITE curriculum sets out the aims of a teacher training programme. It also sets out the structure for those aims to be implemented, including the knowledge, skills and behaviours to be gained at each stage. It enables the evaluation of trainees’ knowledge and skills against those expectations.

35. The teachers’ standards provide an end-point assessment for qualified teacher status (QTS) in primary and secondary phases delivered by ITE partnerships and are not a curriculum.

36. We will judge fairly partnerships that take radically different approaches to the ITE curriculum. We recognise the importance of partnerships’ autonomy to choose their own curriculum approaches. If leaders are able to show that they have built a curriculum with appropriate coverage, content, structure and sequencing, then inspectors will assess the partnership’s curriculum favourably. For primary and secondary ITE, partnerships must ensure that the curriculum provides, in full, trainees with the minimum entitlement set out in the DfE’s ITT core content framework.

**When can an inspection take place?**

37. Because trainees in the autumn term have only just started their training, inspectors are unable to gather sufficient evidence to determine the quality of education and training. ITE inspections (including re-inspections and focused thematic subject inspections) will therefore usually only take place in either the spring or summer term.

---

Part 2. The ITE handbook

How we will collect evidence and judge ITE partnerships

38. This handbook is primarily a guide for inspectors on how to carry out ITE inspections. However, it is made available to ITE partnerships and other organisations to ensure that they are informed about the processes and procedures of inspection. It seeks to balance the need for consistency in inspections with the flexibility required to respond to the individual circumstances of each ITE provider.

39. This handbook should not be regarded as a set of inflexible rules, but as an account of the procedures of inspection. Inspectors will use their professional judgement when they use this handbook. It applies to all inspections of ITE partnerships carried out from September 2020 under the ITE inspection framework (‘the framework’).

Clarification for partnerships

40. The information below confirms our requirements. This is to dispel myths about inspection that can result in unnecessary workload in partnerships. It is intended to highlight specific practices that we do not require.

41. Ofsted will:

- take a range of evidence, including that in electronic form, into account when making judgements. This will include official national data, discussions with leaders and managers, staff and trainees, and questionnaire responses
- judge fairly partnerships that take a radically different approach to the curriculum. Inspectors will assess any partnership’s curriculum favourably when leaders have built or adopted a curriculum with appropriate coverage, content (for primary and secondary schools in line with the ITT core content framework), structure and sequencing and have implemented it effectively and have assessed trainees against the relevant standards for their phase of education
- report on any failure to comply with statutory arrangements when they form part of the inspection framework and evaluation schedule (see page 33 of this handbook)
- invite the partnership’s representative or equivalent (a maximum of two per phase meeting), phase leaders and managers to observe the inspectors’ end-of-day and final team meetings.

42. Ofsted will not:

- grade individual lessons led by trainees or sessions led by trainers/mentors
provide evidence that could be used in capability/disciplinary proceedings or for the purposes of performance management or the partnership’s ‘cause for concern’ arrangements

create unnecessary workload for partnership staff/trainees through its report recommendations

advocate a particular method of planning (including lesson planning), teaching or assessment; it is for partnerships to determine their practices and it is for leadership teams to justify these on their own merits rather than by referring to this handbook

expect ITE curriculum planning to be organised around the teachers’ standards, which are an end-point assessment for QTS and not a curriculum

expect any particular recruitment and selection process.

43. Ofsted does not require partnerships to provide:

- evidence in any specific format, as long as it is easily accessible to inspectors
- ITE curriculum planning (and trainee teaching planning) in any specific format
- evidence for inspection beyond that set out in this handbook
- photographic evidence of trainees’ work (although inspectors may ask to take photographs of trainees’ work, which will be anonymised)
- any written record of teachers'/trainees’ oral feedback to pupils
- individual lesson plans
- previous lesson plans
- grading evidence of trainees’ progress against individual professional standards (early years teacher status (EYTS)/ QTS/qualified teacher learning and skills (QTLS))
- performance and trainee tracking information
- assessment or self-evaluation, other than that which is already part of the partnership’s business processes.

44. Ofsted does not require partnerships to:

- do additional work or to ask trainees to do work specifically for the inspection
- carry out a specified method or frequency of assessing trainees during their practical teaching experiences
- use the Ofsted evaluation schedule to grade teaching or individual lessons
- provide additional information outside of their normal ITE curriculum planning
produce a self-evaluation document or summary in a particular format. Any assessment that is provided should be part of the partnership’s business processes and not be generated solely for inspection purposes.

45. Ofsted does not specify:

- how planning (including curriculum and lesson-planning) should be set out, the length of time it should take or the amount of detail it should contain
- the frequency, type or volume of trainee assessments, observations or feedback
- the content of, or approach to, trainee assessments.

**Before the inspection**

**Notification and introduction**

46. We will normally contact the ITE partnership representative by telephone to announce the inspection between 9.30am and 11.00am three working days before the inspection. This will normally be on a Wednesday.

47. If the partnership representative is unavailable when the notification call is made, we will ask to speak to the most senior member of staff. Once we have informed the partnership by telephone that the inspection will take place, we will send confirmation to the partnership by email.

48. The inspection support administrator (ISA) will then send the partnership a note setting out key information for leaders to be aware of before the inspection. This will include:

- Ofsted’s privacy notice (partnership leaders should ensure that this is shared with any schools and trainees that inspectors will be meeting during the inspection)
- a notice informing the partnership that inspectors will use a range of technology to gather evidence electronically, including mobile devices, tablets and laptops
- a request for partnerships to share information or evidence relating to matters that are fundamental to the work of any ITE partnership.

**Information that partnerships must provide by 10.30am on the first day of inspection**

49. The lead inspector will ask the partnership to provide certain information to aid preparation. The ISA will send the partnership a document requesting that the following are made available to inspectors by 10.30am the next day, at the formal start of the inspection:
a summary of any self-evaluation document (in whatever form the partnership chooses to conduct its self-evaluation). Partnerships may choose to share this information with the lead inspector before the on-site inspection begins.

a list of all partnership settings, indicating where trainees are currently placed (if no trainees are currently assigned to a partnership setting, inspectors will want to know when the last placement was assigned to the setting).

maps and other practical information

access to Wi-Fi, if it is available, so that inspectors can connect to the internet

for primary and secondary partnerships, an overview of how the partnership meets the requirements set out in the ITT core content framework

information about the ITE curriculum, including an overview of the training calendar, and handbooks for aspects of the course being explored in detail through focused reviews

handbooks for courses:
- for EY and FES, particularly for any subjects/curriculum areas being explored through a focused review
- for primary and secondary, particularly for any subjects/curriculum areas defined in the ITT core content framework that are being explored through a focused review

any available evidence of internal and external monitoring and evaluation, including external examiners’ reports and how the findings are used to improve the ITE curriculum

evidence of the involvement of settings, schools and/or colleges in the leadership of the ITE partnership and the recruitment and selection of trainees

an overview of the design and delivery of education and assessment (postgraduate certificate in education, professional graduate diploma in education, qualified teacher status, and so on) offered by the ITE partnership

the number of trainees in each age phase and their subject(s)/specialisms

information about the review, evaluation and development of provision

evidence of involvement in the ITE partnership of schools, colleges and/or other settings in a range of socio-economic circumstances, and those judged as requires improvement and new academies whose predecessor was judged less than good

background information on each trainee, including qualifications, relevant prior experience and, for postgraduates, information about their undergraduate/postgraduate qualifications
• how effectively leaders and managers ensure compliance with the requirements and expectations of an apprenticeship

• evidence of the experience and expertise of mentors and trainers

• evidence of the professional development provided for mentors and trainers, to support the delivery of a carefully sequenced and coherent curriculum (that for primary and secondary mentors/trainers encompasses the ITT core content framework)

• evidence of the quality and effectiveness of the ITE partnership’s work in the areas covered by any annual focused thematic subject inspections

• evidence of improvement planning and the impact of this on the quality of the partnership’s education and training.

50. Additionally, inspectors will usually arrange to discuss briefly with partnership leaders information about:

• the settings selected for visits during the inspection, including mentors and trainees (this should not be extensive)

• how the partnership assesses trainees (including against the teachers’ standards for primary and secondary trainees and the early years teachers’ standards for early years trainees).

This conversation is likely to take place before visiting trainees. Partnerships do not need to have this information prepared in writing.

Preparation

51. Once we have informed the ITE partnership of the inspection, the lead inspector will contact the partnership by telephone and ask to speak to the ITE partnership representative. (In multi-phase provision, this conversation will be held for each phase of the partnership.) The outcomes of this preparation should be captured electronically on evidence cards by the lead inspector.

52. Inspectors’ preparatory telephone conversations with partnership representatives will have two elements:

• a reflective, educationally focused conversation about the partnership’s context, challenges and progress since the last inspection

• a shorter inspection-planning conversation that focuses on practical and logistical issues.

53. It may be that both these elements are discussed in a single telephone conversation. Alternatively, the conversations may be carried out as two or more separate telephone meetings with a break in between, as agreed between the lead inspector and the partnership representative.
54. In practice, there are likely to be a number of shorter conversations on administrative matters between the lead inspector and the partnership representative. Discussions are likely to focus on organisational issues, such as visits to trainees and organising meetings.

The reflective, educationally focused conversation

55. This discussion will take place on the day of the notification call, normally between 12.30pm and 3pm. However, the lead inspector will endeavour to ensure that practical arrangements are in place that take account of the partnership’s availability and avoid disrupting its day-to-day programme. This conversation will usually last around 90 minutes.

56. Inspectors will use this conversation to understand:

- the partnership’s context, and the progress it has made since the previous inspection, including assessment of the partnership’s current strengths and weaknesses, and any specific progress made on areas for improvement identified at previous inspections that remain relevant under the current inspection framework
- how leaders ensure, and assure themselves of, the ambition of the ITE curriculum, that it is designed around subject and phase dimensions, and that it is coherently planned and sequenced towards cumulatively sufficient knowledge and skills for future learning and employment
- where partnerships include primary and secondary trainees, inspectors will discuss with leaders the way in which they have translated the ITT core content framework into a carefully sequenced curriculum for trainees and how they have ensured all aspects of that framework are covered. Inspectors will also discuss aspects of the programme that go beyond that framework. The discussion will explore how and why leaders have prioritised particular aspects of the programme
- how trainees are taught to promote pupils’ positive behaviour and attitudes, and how their practice in meeting the needs of pupils who speak English as an additional language (EAL) and pupils with special educational needs and/or disabilities (SEND) is developed throughout the ITE curriculums offered
- how leaders have ensured that the partnership is contributing to and meeting the local demand for teachers
- any enhancements and adaptations to the programme to meet the need of current trainees and local/national priorities
- (where applicable) how leaders ensure the centre-based and placement-based ITE curriculums are purposefully integrated to ensure that trainees make the best possible progress in their teaching
- how leaders ensure, and assure themselves, that the ITE curriculum is informed by the updated available evidence
how leaders ensure, and assure themselves, that trainees receive clear, consistent and effective training and mentoring

how leaders ensure monitoring and assessment of trainees’ progress in mastering the components of the ITE curriculum, without creating an unnecessary burden

the ongoing changes to the ways in which ITE partnerships are being led and managed.

57. The educationally focused conversation will seek to clarify:

- the number of trainees in each age phase and their subject(s)/specialisms (where appropriate)
- information about the organisation of the ITE partnership, including staff names and responsibilities.

58. For primary, secondary and FES teacher training, the lead inspector will discuss the specific subject areas that should form part of a focused review of the inspection. From this conversation, the inspector will reach a decision on which subject areas to focus on, and this will inform the inspection planning discussion. For inspections of primary partnerships, inspectors will focus on early reading/phonics and the foundation subjects as a whole. Other subject areas may be agreed as a focus with the partnership leaders.

**Inspection planning discussion**

59. This discussion will normally begin on the morning after the notification call, normally on a Thursday. However, the lead inspector will endeavour to ensure that practical arrangements take account of the partnership representative’s availability and aim to avoid disrupting the partnership’s day-to-day programme.

60. The lead inspector will:

- (where applicable) request a copy of the timetable for any centre-based training taking place during the inspection and a copy of the current staff list
- discuss any information about previously planned interruptions to normal routines during the inspection
- consider information about specific schools, colleges and/or other settings and (where applicable) centre-based training, recruitment and selection, and other events taking place during the inspection week
- discuss whether any trainers/trainees cannot be visited while teaching for any reason (for example, if they are subject to capability procedures)
- (where applicable) review details of trainees’ placements or place of work, including addresses and unique reference numbers (URNs) for schools, colleges and/or settings
discuss trainee visits and meetings to support exploration of the training course(s)

make arrangements for meetings with relevant staff, including those responsible for ITE curriculum delivery, mentor training and with groups of mentors

clarify any cross-phase aspects of the inspection that the lead inspector could undertake to avoid duplication, for example compliance, Disclosure and Barring Service (DBS) and safeguarding checks, or reporting and monitoring incidents of discrimination and/or harassment

request information about staff absence and other practical issues

find out whether there are particular reasons why they cannot observe any trainees or training sessions

organise a meeting with those responsible for governance and oversight of the partnership

discuss the availability of NQTs to give feedback on their training experiences

agree a place where the inspection team(s) can meet

provide an opportunity for the partnership to ask any questions or raise any concerns, such as perceived conflicts of interest.

61. The lead inspector may also need clarification from the ITE partnership, for example when information is not available on the partnership’s website.

62. Inspectors must observe the inspectors’ code of conduct\textsuperscript{16} (as indicated in paragraph 135). They should be as flexible as possible, to fit in with the ITE partnership’s arrangements, while ensuring that they can gain robust evidence to support inspection judgements.

63. We expect partnerships to work with inspectors to ensure a positive working relationship based on courteous and professional behaviour. As such, partnerships should observe the code of conduct.\textsuperscript{17}

**Further inspection preparation carried out by the lead inspector**

64. To draw an initial picture of the ITE partnership’s performance, planning for inspection will be informed by analysis of a wide range of information. Inspectors will review and consider:

- the previous inspection report on the age phase(s) of the partnership

any surveys or monitoring letters
the outcomes of any risk assessment undertaken by Ofsted
information on our provider information portal, including any complaints received since the last inspection and compliance action taken by the DfE
information available from the trainee online survey (where relevant) and questionnaires
relevant publicly available information, such as the ITE partnership’s website
information provided to Ofsted on an annual basis by the ITE partnership.

65. In addition to the information requested from the partnership, inspectors will review and consider:

all relevant information held by Ofsted, including:
  – any complaints made about the partnership
  – most recent partnership return (if still in use)
  – the partnership’s website/social media feeds.

66. The lead inspector should consider the following local information to help understand the context in which trainee teachers are being prepared:

relevant findings from any inspection of the local area’s arrangements for identifying, assessing and meeting the needs of young children with SEND
the most recent inspection report on the relevant local authority’s children’s services.

67. Inspectors will use the information to hold discussions about SEND training and the preparation for the trainees’ child protection responsibilities while training in schools.

68. Trainees’ perceptions are important in coming to a view about the effectiveness of an ITE partnership. Alongside first-hand discussions with trainees, inspectors will use the trainee online questionnaire when taking trainees’ views into account. Inspectors will also take account of the results of past surveys carried out internally by the ITE partnership.

69. ITE partnerships may want to encourage trainees to complete the online questionnaire for trainees. It will be available annually during the summer term.

---

18 The provider information portal gives inspectors a high-level view of information about providers that Ofsted inspects and regulates.
19 ‘The handbook for the inspection of local areas’ effectiveness in identifying and meeting the needs of children and young people who have special educational needs and/or disabilities’, Ofsted, April 2016; www.gov.uk/government/publications/local-area-send-inspection-guidance-for-inspectors.
of each academic year. Where responses are received, the partnership-led summary will be shared in hard copy with individual partnerships to help with their own improvement planning between inspections.

70. Inspectors will access summary information from the online survey of trainees twice during the inspection process. Before the inspection begins, inspectors will have access to information available from the current and previous years, and again during the third day of inspection. This allows further responses received during the inspection to be considered.

Information for inspectors

71. After receiving the information requested from the ITE partnership, lead inspectors will liaise with phase leaders and managers to select a sample of trainees to meet.

72. Inspectors will visit a selection of trainees to support their focused reviews of the ITE curriculum:

- primary and EY teams will always include a focused review and trainee visits on early reading and phonics, and foundation subjects
- secondary teams will visit a selection of trainees specialising in the subject areas that inspectors have agreed will be a focused review with the partnership representative
- FES teams will visit a selection of trainees. The selection will depend on the nature of training provided by the partnership and the range of specialisms held by trainees. Inspectors will agree their strategy with the partnership.

73. Wherever possible, inspectors will maximise the time available by visiting a number of trainees based in the same schools, colleges and/or other settings. Lead inspectors must check that the schools, colleges and/or other settings selected are not due to be visited as part of another known Ofsted inspection by completing a record of visit (ROV) form and emailing it to dataacquisition@ofsted.gov.uk.

74. Lead inspectors may work with the partnership representative to organise a range of conference calls with trainees, particularly those who are placed in settings that are geographically challenging to visit.

75. Lead inspectors must provide a letter for the ITE partnership to send electronicaoly to any school, college and/or other setting that will be visited by inspectors as part of the ITE inspection. This letter explains that the inspector will visit the school, college and/or other setting as part of the inspection of the ITE partnership. Lead inspectors must identify the nature and timing of inspection activities to be undertaken in these settings to enable the ITE partnership to make the necessary practical arrangements. These activities are likely to include visits to trainees teaching lessons/sessions and discussions with trainees and mentors, along with scheduling time to read trainees’ files or
equivalent evidence. Each of these activities enables inspectors to examine how
the central ITE education and training are embedding into the trainees’
placement-based experiences.

76. The lead inspector will identify (where applicable) any centre-based training
sessions and/or other events that they wish to visit and the range of
discussions that will need to be arranged. Lead inspectors should discuss and
agree these requirements with the ITE partnership as soon as possible to
enable them to make the necessary practical arrangements.

77. The ITE partnership will confirm the inspection timetable in discussion with the
lead inspector and will set out the practical arrangements for the inspection
team, including, for example, rooms and car parking.

78. The lead inspector will prepare and distribute brief joining instructions to the
inspection team. In a multi-phase inspection, the relevant phase lead will be
responsible for preparing these and distributing them to their team. The joining
instructions are likely to include:

- essential information about the ITE partnership and the timing of the
  inspection
- a brief summary of the pre-inspection information
- a clear indication of individual inspectors’ roles and responsibilities
- programme subject areas that will be inspected during the first two days of
  the inspection. These should be discussed and agreed with the leaders and
  managers of the ITE partnership. Inspectors must inspect early reading and
  phonics when looking at early years and primary training courses. For
  primary and secondary ITE curriculums, inspectors must ensure they will be
  able to judge whether the course provides trainees with their minimum
  entitlement, as set out in the ITT core content framework. Day 3 of the
  inspection will allow the lead inspector (or phase lead) to carry out
  additional subject focused reviews, as agreed during the initial inspection
  planning. However, in smaller partnerships it may not be necessary to
  introduce additional areas to sample. Days 3 and 4 will also allow inspectors
to look more broadly at leadership and management. However, inspectors
should be flexible with their programme if other opportunities to gather
evidence are available. For example, if a recruitment and selection event is
taking place on day 1 or 2 of the inspection, inspectors may include this in
their inspection evidence-gathering

- an inspection programme, including details of the trainees, the schools,
colleges and/or other settings to be visited and any other inspection
activities, including team meetings and how these relate to the subject
areas of the ITE curriculum being explored.

79. Lead inspectors must deploy inspection team members effectively to contribute
to the evaluation of the two key judgements.
80. Inspectors must plan sufficient time for team meetings and oral feedback so that they can conclude the inspection in good time.

**Requests for deferral or cancellation**

81. A partnership may request a deferral of its inspection. It may make a request to the ISA when it is notified of the inspection, or to the lead inspector on the day it is notified of the inspection. We will not normally consider a deferral request if we receive it after 4.30pm on the day the partnership is notified. If the ISA or lead inspector receive a request, they must immediately contact the regional duty desk. We will decide whether this should be granted, in accordance with our deferral policy.21

**The inspection**

**Days allocated to inspection and inspection team members**

82. Inspections will consist of four days within the same week. The size of the inspection team will vary according to the size of the partnership.

**Concurrent inspection of validated programmes**

83. Ofsted may align the inspection of FES partnerships where their ITE shares a common validating university. Lead inspectors will be aware that their inspection is scheduled concurrently with that of other FES partnerships nationally/regionally. Lead inspectors will share information where this may have commonality across the partnerships sharing a validating university. Lead inspectors of the concurrent inspections must make contact with each other during preparation and on-site evidence collection.

**Arrival time on the first day of inspection**

84. On the first day of inspection, inspectors will arrive between 10.30am and 12pm. However, lead inspectors and phase lead inspectors should adapt the start time to ensure that inspectors do not need to travel on a Sunday evening.

**Gathering and recording evidence**

85. Although meetings with leaders are important, inspectors’ first priority during inspections is to collect first-hand evidence.

86. Inspectors will evaluate evidence of the intent, implementation and impact of the ITE curriculum for trainees. Inspection activities to gather evidence will include:

- talking to stakeholders, including partnership leaders, trainees and mentors

- observing trainees and mentors, including during teaching practice
- talking to partnership headteachers
- examining written evidence provided by the partnership and trainees.

87. Evidence relevant to the framework criteria that has been gathered through different inspection activities should be brought together to inform judgements.

88. Inspectors must record their electronic evidence clearly, ensuring that evidence is labelled and tagged for all inspection activities correctly.

89. Electronic evidence is the main record of the evidence that has been considered in the inspection and may be scrutinised for retrieval or for quality assurance monitoring and in the event of a complaint.

90. Inspectors will also request:

- evidence of how the ITE partnership meets the relevant mandatory ITT criteria or the EY ITT requirements and all relevant legislation and guidance, including that related to meeting the relevant professional standards (for QTS or EYTS), promoting equality and diversity, eliminating discrimination, and safeguarding.

Evaluating different approaches to teacher education

91. Ofsted does not advocate that any particular teaching approach should be used exclusively with trainees. Different approaches to ITE can be effective in preparing trainee teachers for their first year of teaching. What is appropriate will depend on the aims of a particular training session or activity, and its place in the sequence of teaching a particular topic and subject. Nevertheless, any approach used has features that must be present to ensure that it is delivered effectively. Our research commentary sets out our understanding of those factors.

Overarching approach to inspection

92. The ITE framework focuses on factors that both research and inspection evidence indicate contribute most strongly to high-quality education and training. The framework seeks to put a single, joined-up conversation about education at the heart of inspection. It is built around the connectedness of the trainee curriculum, training on pedagogical approaches and assessment of trainees within the ‘quality of education and training’ judgement. As a result, the inspection methodology for this judgement is structured to ensure that inspectors will be able to gather evidence through the focused review. This is to ensure inspectors are able to gather evidence of how a partnership’s activities to deliver high-quality education and training for its trainees connect and work together to achieve the highest standards.
93. The crucial element for inspectors is to be able to form a connection between different pieces of evidence. Inspectors will not emphasise one specific type of evidence above all others. Instead, inspectors will focus on gathering evidence that is balanced and connected. Our research on work scrutiny and lesson visits has shown that having a variety of types of connected evidence strengthens the conclusions that inspectors are able to reach.

94. This evidence will always lead inspectors back to the overall quality of education and training on offer. The focus of inspection will not be on one particular training session or trainee. Rather, it will be on the interconnection of all of these pieces of evidence and what they tell inspectors and leaders about whether trainees are teaching effectively and enabling pupils to make progress in the sense of knowing more, remembering more and being able to do more. The evidence from our piloting of the framework is that this approach enables inspectors and leaders to build up a clear picture of whether the partnership is meeting the criteria set out in the ‘quality of education and training’ judgement.

**Inspector visits to training**

95. Lead inspectors may ask for visits (where applicable) to centre- or placement-based training to be carried out jointly with partnership leaders, mentors and/or trainers. Following a visit to a training session, inspectors should provide an opportunity to discuss how the training builds on previous training and how it will link to centre-based learning for trainees. Inspectors should follow this up with further discussions with trainees and mentors.

96. Visits to training sessions should focus on:

- the content and context of the session within subject and phase-specific dimensions of the partnership’s curriculum and the content laid out in the ITT core content framework
- whether the session is part of a curriculum that is ambitious in scope, coherent, and rigorous in content choice
- whether the content of the observed session fits into a well-sequenced programme of sessions
- (where applicable) evidence of how observed training is part of a purposefully integrated curriculum across the centre- and school-based settings
- whether, in this session, trainees are able to build on previous learning (when relevant).

**Undergraduate initial teacher education**

97. Lead inspectors should ensure that they are aware of any undergraduate provision when preparing and planning for an inspection.
98. Lead inspectors should be aware of the regulations that limit the changes to undergraduate course provision that universities can make once trainees have begun training. Judgements about undergraduate provision should not penalise partnerships for elements beyond their control.

Meeting with stakeholders

99. Inspectors will conduct meetings or hold conference call discussions with individual or groups of:

- trainees
- trainers
- mentors
- phase leaders and managers
- NQTs/employed teachers
- members of the strategic partnership committee
- other stakeholders.

Initial meeting with the partnership’s representative/senior leaders

100. Inspectors should meet with the partnership’s representative/senior leaders to discuss the ITE curriculum. Partnership leaders will be able to explain the organisation and structure of the ITE curriculum to inspectors. Inspectors should:

- discuss how the ITE curriculum is ambitious in scope and rigorous in content choice
- ensure that the ITE curriculum is coherent and well sequenced and leads to cumulatively sufficient knowledge and skills
- for primary and secondary programmes, discuss how the partnership ensures that it meets the minimum expectations set out in the ITT core content framework. The framework describes in detail the minimum entitlement of all primary and secondary trainee teachers, which all ITE partnerships must incorporate in full within their curriculum
- (where applicable) ensure that discussions focus on both centre-based input for trainees and how partnerships blend the school-based and centre-based curriculums
- ensure conversations explore how the course structure is designed around subject- and phase-specific dimensions
- ensure that leaders understand that information does not need to be in any specific format, as long as it is easily accessible for the inspection team
ensure that all information from leaders and staff about the ITE curriculum is considered, including how trainees are supported in managing their workload

ensure that leaders are responding to the needs of individuals and groups of trainees, and how they are adapting the ITE curriculum or pastoral arrangements for each new cohort of trainees.

Meeting with subject leaders/staff

101. Inspectors should arrange subject meetings with the appropriate leaders/managers and any other key staff. Subjects will be selected based on the pre-inspection evidence and discussions with senior leaders.

102. Inspectors should gather first-hand evidence to evaluate how well:

- the course structure is designed to prepare trainees to teach the subject within their phase of education
- the course prepares trainees for teaching subjects across the full curriculum (EY/primary)\(^{22}\) and, where appropriate, inspectors may sample any specialism(s) offered as part of their course
- (where applicable) leaders ensure that the placement-based training aligns with and reinforces the content, sequencing and progression of the centre-based ITE curriculum (inspectors of primary and secondary ITE will ensure that the overall content of courses provides trainees with their minimum entitlement laid out in the ITT core content framework)
- leaders identify gaps in prospective trainees’ fundamental English and mathematics skills that will not be covered in the course content and ensure those gaps are filled before the course is completed.

Meeting with mentors

103. Inspectors will use meetings with mentors to consider how the training and support they provide for trainees is part of a subject- and phase-specific curriculum that is purposefully integrated (where applicable) across the centre- and school-based settings. This conversation will allow inspectors to consider the role of mentors within the partnership and whether the mentors’ agreed role allows them to provide trainees with the training and support they need.

Meeting with trainees, NQTs and former EY/FES trainees

104. Inspectors will use meetings to consider how far trainees have been taught and learned the intended curriculum and whether they are gaining the practical experience, support and feedback they need.

\(^{22}\) This may include looking at a sample of specialisms offered within primary courses.
105. Ofsted does not have a preferred model for dividing the curriculum between centre- and placement-based training. For example, inspectors of FES partnerships understand that they may need to spend longer considering the taught curriculum through placements. However, inspectors will consider how well this training aligns with and complements the intentions of (where applicable) centre-based leaders.

106. Inspectors should ensure that they also consider trainees’ knowledge and practice in behaviour management, meeting the needs of pupils with SEND and those who speak English as an additional language and (primary only) systematic synthetic phonics.

107. Meetings should be held in a variety of ways to maximise the number of trainees that inspectors can meet during an inspection. This can include:

- (where applicable) visits to placements where multiple trainees, NQTs and former EY/FES trainees are present
- arranging a telephone call, allowing trainees to dial in
- setting up individual calls where a specific issue needs to be discussed or is important for evidence gathering
- meetings where the partnership is based
- focus group discussions with a range of trainees, NQTs and former EY/FES trainees to discuss the impact of training.

108. Discussions with NQTs and former EY/FES trainees should allow inspectors to explore how well they felt prepared in their subject(s)/areas of specialisation or for the EY/primary curriculum.

**Engaging with the partnership’s representative, leaders and managers**

109. Inspection has the strongest impact on improvement when the ITE partnership understands the evidence and findings that have led to the judgements and recommendations for improvement. The lead inspectors will ensure that the partnership representative/leaders (where relevant, a maximum of two observers per phase) and managers at team and final meetings:

- are kept up to date with how the inspection is proceeding
- understand how the inspection team reaches its judgements
- have opportunities to clarify how evidence is used to reach judgements
- understand the strengths and weaknesses identified when looking at the ITE curriculum
- at end-of-day team meetings only, are given the opportunity to present additional evidence.
110. The lead inspector should meet with the partnership’s representative daily during the inspection to:

- provide an update on emerging issues and enable the ITE partnership to provide any further relevant evidence
- allow the partnership’s representative to raise any concerns, including those related to the conduct of the inspection or the conduct of individual inspectors
- alert the partnership’s representative to any serious concerns that may lead to the ITE partnership being judged less than good and/or non-compliant with ITT criteria and other statutory requirements.

111. The inspector will record any key points arising from discussions with the partnership’s representative on their electronic evidence.

**Teaching apprenticeships**

112. Inspectors will consider how well leaders and managers ensure that the apprenticeship curriculum meets the principles and requirements of an apprenticeship.

113. Evidence will include the extent to which the partnership’s staff engage with employers to:

- complete the apprenticeship commitment statement
- plan the initial assessment, training, assessments, review points and milestones throughout – agree any additional qualifications to be included
- monitor and support apprentices to progress quickly, gain new knowledge, skills and behaviours and achieve to their full potential.

114. Inspectors will judge how well trainers, assessors, coaches and mentors communicate up-to-date vocational and technical subject knowledge that reflects expected practice and meets employers’ needs.

115. Inspectors will determine whether apprentices acquire that knowledge effectively so that they demonstrate the skills and behaviours that will enable them to complete their apprenticeships, contribute to their workplace and fulfil their career aims by progressing to their intended job roles, other sustained employment, promotion or, where appropriate, a higher level of apprenticeship or qualification.

**The use of data on inspection**

116. Inspection judgements will not be based on data. However, inspectors will use nationally available data, such as data on employment and completion of qualifications, to help prepare for the inspection. Where patterns are identified in the data, these will form part of the rationale for exploring particular aspects
of the ITE curriculum. However, data will not be a factor that determines final grades at the end of the inspection.

117. Where partnerships gather information and/or benchmark outcomes data against wider sector data, inspectors will not seek to validate this information. Inspectors will focus on what leaders have established from their data and how this has been used to improve the ITE curriculum for trainees and the pupils they teach. Inspectors may check that such data avoids premature use of generic outcome descriptors, such as the teachers’ standards, and ask leaders to explain how the data has been used to shape improvement planning and secure better quality for trainees.

**Team meetings during the inspection**

118. The inspection team for each phase will:

- meet briefly at the end of each day, where possible, to discuss emerging findings – a maximum of two nominated phase leaders or managers from the ITE partnership will be invited as observers
- meet at the end of the inspection for a grading meeting – a maximum of two phase leaders and managers from the ITE partnership will be invited as observers, but all judgements will be made by inspectors and the inspection team
- meet with other inspection teams at a cross-phase grading meeting, where relevant, to finalise judgements and identify areas of improvement – the phase leaders and managers and the partnership’s representatives are invited as observers, but all judgements are made by inspectors and the inspection team
- record the outcomes of all team meetings electronically.

**Reaching final judgements**

119. The inspection team will also ensure that time is set aside to prepare for the final team meeting and the final feedback. During the final team meeting, an evaluation card will be completed. The main points for feedback to the ITE partnership will be recorded as the meeting progresses.

120. Where there are multi-phase inspections, phase teams will meet in a cross-phase grading meeting to identify any common strengths and areas for improvement across the partnership, and to ensure that the grade criteria are

---

24 Where a face-to-face meeting is not possible, team members will discuss their findings by telephone with the lead inspector, who will discuss these with phase leaders and managers or the provider’s representative.
interpreted in the same way. Lead inspectors will also agree the points to be included in the commentary at the start of the report.

**Providing feedback**

121. The on-site inspection ends with a final feedback meeting with the ITE partnership. The lead inspector must ensure that the ITE partnership is clear:

- about the provisional grades awarded for each key judgement
- about the key findings from the inspection, as summarised in the final summary evaluation – the lead inspector must give sufficient details to enable all attendees to understand how judgements have been reached
- that the grades are provisional and so may be subject to change as a result of quality assurance procedures or moderation, and must, therefore, be treated as restricted and confidential to the relevant senior personnel (as determined by the ITE partnership) until the partnership receives the final report
- that the main findings of the inspection and the main points provided orally in the feedback, subject to any change, will be referred to in the text of the report, although the text of the report may differ slightly from the oral feedback
- about any recommendations for improvement
- about the procedure leading to the publication of the report
- about the procedure for making a complaint about the inspection
- if the ITE partnership is being placed in a category of concern, that it may make comments on the judgements in the draft report during quality assurance; that is, it is not limited to comments on factual accuracy.

**After the inspection**

**The inspection report**

122. The (phase) lead inspector is responsible for writing the inspection report and submitting the evidence to Ofsted shortly after the inspection ends.

123. The lead inspector will:

- ensure that the text of the report explains the judgements and reflects the evidence
- the findings in the report are consistent with the feedback given to the ITE partnership at the end of the inspection
- submit the final version of the record of visits (ROV) to dataacquisition@ofsted.gov.uk.
124. The report usually contains sections for the different phases inspected. In ITE partnerships where there are a small number of trainees across both the primary and secondary phases (under 60 trainees), the report will provide one set of judgements covering both the primary and secondary phases.

**Arrangements for publishing the report**

125. Inspection reports will be quality assured before we send a draft copy to the ITE partnership. The draft report is restricted and confidential to the relevant personnel (as determined by the ITE partnership) and should not be shared more widely or published.

126. Normally within 15 working days of the end of the inspection, the ITE partnership will be invited to comment on the draft report. The ITE partnership will have five working days to complete the factual accuracy check (FAC).

127. The lead inspector will respond to the ITE partnership’s comments about factual accuracy. The FAC comments of both the partnership and the lead inspector will be reviewed by the regional SHMI for ITE and/or the specialist adviser for ITE, if appropriate.

128. Typically, the ITE partnership will receive an electronic version of the report within 23 working days of the end of the inspection. In most circumstances, the final report will be published on Ofsted’s website within 30 working days.

129. The ISA will email the final version of the report to:

- the ITE partnership
- the lead inspector
- the DfE.

130. The inspection process should not be treated as complete until all inspection activity has been carried out and the final version of the inspection report has been published on Ofsted’s website.

**The inspection evidence base**

131. The evidence base for the inspection will be retained in line with Ofsted’s retention and disposal policy. This is normally for six years from when the report is published. We may decide that retaining it for longer is warranted for research purposes.

---

25 The term ‘report’ is used to describe the formal written outcome of the inspection.
Quality assurance and complaints

Quality assurance

132. All inspectors are responsible for the quality of their work. The lead inspector (or overall lead inspector in the case of multi-phase inspections) must ensure that inspections are carried out in accordance with the principles of inspection and the Ofsted code of conduct.  

133. We monitor the quality of inspection through a range of formal processes. This may involve a telephone call to the inspector to discuss progress, or an on-site visit during the inspection. When an on-site quality assurance visit is scheduled, the lead inspector will explain the purpose and format during the initial telephone conversation with the partnership’s representative.

134. Lead inspectors should contact the SHMI for ITE, copying in the ITE specialist adviser, if an ITE partnership is likely to be judged as outstanding, inadequate or requires improvement, or if there is any potential aspect of non-compliance.

135. All ITE partnerships are invited to take part in a post-inspection survey so that their views about the quality of the inspection are obtained and contribute to the development of inspection.

Handling concerns and complaints

136. The great majority of our work is carried out smoothly and without incident. If concerns do arise during the inspection, they should be raised with the lead inspector as soon as possible, in order to resolve issues before the inspection is completed. Any concerns raised, and actions taken, will be recorded in the inspection evidence.

137. If it is not possible to resolve concerns during the inspection, the ITE partnership may wish to lodge a formal complaint. The lead inspector will ensure that the partnership is informed that it is able to make a formal complaint and that information about how to complain is available on our website.

The code of conduct of inspections

138. So that inspection is productive and beneficial, it is important that inspectors and ITE partnerships establish and maintain an appropriate working relationship based on courtesy and professional behaviour. Inspectors are expected to uphold the code of conduct below.

---

Inspectors’ code of conduct

139. Inspectors are required to uphold the highest professional standards in their work and to treat everyone they encounter during inspections fairly and with respect. Inspectors will:

- evaluate objectively, be impartial and inspect without fear or favour
- evaluate provision in line with frameworks and statutory and initial teacher training criteria and requirements (for inspections of schools, ITE inspectors will ensure that all provision is in line with the ITT core content framework)
- base all evaluations on clear and robust evidence
- have no declared connection with the ITE partnership that could undermine their objectivity
- report honestly and clearly, ensuring that judgements are fair and reliable
- carry out their work with integrity, treating all those they meet with courtesy, respect and sensitivity
- try to minimise the stress on those involved in the inspection
- act in the best interests of stakeholders and consider their well-being
- maintain purposeful and productive dialogue with those being inspected, and communicate judgements clearly and frankly
- respect the confidentiality of information, particularly about individuals and their work
- respond appropriately to reasonable requests
- take prompt and appropriate action on any safeguarding or health and safety issues.

The ITE partnership’s engagement with inspectors

140. Ofsted expects ITE partnerships to play their part by ensuring that inspectors can conduct their inspections in an open and honest way and evaluate the ITE partnership objectively. Ofsted expects ITE partnership staff to:

- apply their own codes of conduct in their dealings with inspectors
- enable inspectors to conduct their inspections in an open and honest way
- enable inspectors to evaluate the ITE partnership objectively against the inspection framework
- provide evidence that will enable inspectors to report honestly, fairly and reliably about the ITE partnership
- liaise with inspectors to minimise disruption, stress and bureaucracy
- ensure that the health and safety of inspectors is not prejudiced while they are on the ITE partnership’s premises
■ maintain a purposeful dialogue with inspectors
■ draw any concerns about the inspection to the attention of inspectors promptly and in a suitable manner
■ understand the need for inspectors to observe practice and talk to those they observe without the presence of a manager.
The evaluation schedule – how we will judge ITE partnerships

141. The evaluation schedule is not exhaustive. It does not replace the professional judgement of inspectors. Inspectors must interpret the way that grades are described according to stage of training and phase of education.

142. Inspectors will use the evaluation schedule in conjunction with the instructions and guidance in Part 1 of this handbook.

143. Inspectors will make judgements on the following (wherever appropriate for each phase):

- overall effectiveness

and the two key judgements:

- quality of education and training
- leadership and management.

144. Inspectors will use the following four-point scale to make both judgements:

- grade 1: outstanding
- grade 2: good
- grade 3: requires improvement
- grade 4: inadequate.

What inspectors will consider when making judgements

145. Inspectors will use the criteria set out below to make each of the graded judgements. The handbook explains how these criteria are applied in each context.

Overall effectiveness

146. Inspectors will use all the evidence to evaluate what it is like to be a trainee at the ITE partnership. In making their judgements about an ITE partnership’s overall effectiveness, inspectors will consider whether the standard of education and training is good or whether it exceeds good and is outstanding. If it is not good, then inspectors will consider whether it requires improvement or is inadequate.

Reaching a judgement of outstanding

147. This handbook introduces a new method of evaluating whether an ITE partnership is outstanding in one or more judgement areas. Outstanding is a challenging and exacting judgement. In order to reach this standard, inspectors
will determine whether the partnership meets all the criteria for good under that judgement and does so securely and consistently. In other words, it is not enough that the partnership is strong against some aspects of the judgement and not against others; it must meet each and every criterion for good. In addition, there are further criteria set out under the outstanding judgement which the partnership will also need to meet. Our aim in making this change is that a partnership should only be judged outstanding in a particular area if it is performing exceptionally. This exceptional performance should be consistent and secure across all judgement areas in order to be judged outstanding overall.

**Reaching a judgement of good, requires improvement or inadequate**

148. When considering a final judgement, inspectors will assess whether the evidence they have gathered shows that the partnership’s overall quality is most closely aligned with the good criteria. If all aspects of the good criteria are consistently met, inspectors will consider whether all the outstanding criteria are met. For a partnership to be graded outstanding, it must be consistently meeting all aspects of the good and outstanding criteria.

149. Where a partnership does not, on a ‘best fit’ basis, meet the good criteria consistently and none of the inadequate criteria apply, the partnership will be graded as requires improvement.

150. Where inspectors’ evidence shows that any of the inadequate criteria apply, then this aspect of the ITE partnership’s work will be judged inadequate.

**Overall effectiveness**

151. In judging the partnership’s overall effectiveness, inspectors will take account of the two key judgements: the quality of education and training and the leadership and management of the partnership.

152. In coming to each of these key judgements, inspectors will draw on evidence from the inspection of each phase(s) and consider the impact of the judgements of the phase(s) on the ITE partnership as a whole.

153. Inspectors must consider whether the ITE provided by the partnership complies with the relevant statutory ITT criteria or EY ITT requirements and all relevant legislation and guidance, including that related to promoting equality and diversity, eliminating discrimination, and safeguarding. For primary and secondary school training, inspectors must ensure that the partnership provides trainees with their minimum entitlement, as set out in the ITT core content framework.

154. Where appropriate, inspectors must also consider the extent to which the ITE provided by the partnership complies with apprenticeship requirements and expectations.
Inspectors will judge the overall effectiveness by applying the grading criteria set out below.

### Grade descriptors for overall effectiveness

#### Outstanding (1)
- The quality of education and training is outstanding.
- The quality of leadership and management is outstanding.

#### Good (2)
- Both key judgements must be at least good.

#### Requires improvement (3)
- Where the partnership is judged as requires improvement in either of the two key judgements, the partnership’s overall effectiveness will also be requires improvement, unless one is judged inadequate.
- ITE is non-compliant with statutory criteria and requirements and/or all relevant legislation and guidance, excluding that related to promoting equality and diversity, eliminating discrimination and safeguarding. Non-compliance is likely to be minor and not have a significant impact on the quality of education and training provided to training teachers.

#### Inadequate (4)
- The judgement on the partnership’s overall effectiveness will be inadequate when either one or both of the key judgements is inadequate.
- ITE is non-compliant with the ITT compliance criteria. Non-compliance is likely to have a significant impact on:
  - the quality of education and training provided to trainee teachers
  - the safeguarding of pupils in EY, schools or colleges
  - the quality of apprenticeships.
- The partnership does not comply with relevant legislation and guidance relating to equality and diversity, and eliminating discrimination.

### The quality of education and training

Inspectors will take a rounded view of the quality of education and training that a partnership provides. This will include close consideration of the ITE curriculum.
157. Inspectors will consider the knowledge and skills that the partnership plans that trainees will gain at each stage (we call this ‘intent’). They will also consider the way that the ITE curriculum developed or adapted by the partnership is taught and assessed in order to support trainees to build their knowledge and to apply that knowledge as skills (we call this ‘implementation’). Finally, inspectors will consider the outcomes that trainees achieve as a result of the ITE curriculum (we call this ‘impact’).

**Intent**

158. In evaluating the ITE partnership’s intent, inspectors will primarily consider the curriculum provided by the ITE partnership, and will discuss this with the partnership’s representatives, leaders and managers. Inspectors must ensure that the curriculum provided prepares trainees to meet the relevant professional standards (QTS, EYTS or for professional formation in FES). For primary and secondary phases, ITE inspectors must ensure that partnerships provide the minimum entitlement outlined in the ITT core content framework.

**Implementation**

159. In evaluating the implementation of the ITE curriculum, inspectors will primarily evaluate how trainees are taught, trained and supported at the centre and placement level, including the quality of mentoring.

**The use of assessment**

160. Inspectors will evaluate how assessment of trainees is used to support the teaching of the ITE curriculum.

161. Ongoing assessment of trainees should be largely formative. Inspectors should check that trainees are gaining, applying and refining the knowledge and skills set out in the ITE curriculum. Assessment should also be used to help trainees embed knowledge and use it fluently, and assist trainers/mentors in refining a robust ITE curriculum. Therefore, partnerships should avoid the premature use of summative assessments, for example generic outcome descriptors such as the teachers’ standards.

162. For apprentice teachers, the partnership should make accurate and rigorous assessments that enable apprentices to take their end-point assessments.

163. The partnership should make accurate and rigorous final assessments for the award of QTS in relation to the teachers’ standards for primary and secondary trainees, and the award of EYTT for early years ITT trainees or professional standards for FES teachers and trainers.

**Impact**

164. When inspectors evaluate the impact of the education and training provided by the partnership, their focus will primarily be on whether trainees know more
and remember more of the intended curriculum and apply that knowledge to their practice.

**Grade descriptors: quality of education and training**

Note: These descriptors should not be used as a checklist.

165. Inspectors will use professional judgement when judging the partnership’s quality of education and training:

- If all aspects of the good criteria are consistently met, inspectors will consider whether all the outstanding criteria are met. For a partnership to be graded outstanding, it must be consistently meeting all aspects of the good and outstanding criteria.
- Where a partnership does not, on a ‘best fit’ basis, meet the good criteria consistently and none of the inadequate criteria apply, the partnership will be graded as requires improvement.
- Where inspectors’ evidence shows that any of the inadequate descriptors apply, then this aspect of the ITE partnership’s work will be judged inadequate.

### Outstanding (1)

- The partnership meets all the criteria for good quality of education and training securely and consistently.
- The quality of education and training provided is exceptional.

In particular, the following apply:

**Intent**

The partnership’s training programme is:

- designed to ensure that generic principles are always understood practically and in relation to subject and phase
- co-produced with partners to ensure integration and sequencing across the partnership
- delivered by leaders, mentors, (where applicable) centre-based and placement staff throughout the partnership who have a firm and common understanding of the intended curriculum and what it means for their practice
- designed to consistently give trainees necessary expertise in the subject(s) they teach. The curriculum is designed to ensure that trainees are introduced to the tools to develop their knowledge further, for example through sharing access to professional networks.

**Implementation**

- Teaching and training are of a high quality, which allows trainees to learn the intended curriculum effectively.
The curriculum is delivered effectively across all settings within the partnership.

Trainers and mentors are consistently skilful at drawing on the taught curriculum during their interactions with trainees, particularly during mentoring sessions and feedback following observations.

**Impact**

The taught ITE curriculum is learned by all trainees. This content is routinely and skilfully applied by trainees to their professional practice.

Trainees are able to apply what they have learned from the range of different placement experiences and settings.

---

**Good (2)**

**Intent**

**Principles informing the ITE curriculum**

**Ambitious**

- The ITE curriculum is ambitious in scope and rigorous in content choice. It is coherent and well sequenced and leads to cumulatively sufficient knowledge and skills.

- For primary and secondary programmes, the ITT core content framework defines in detail the minimum entitlement of all trainee teachers, which all ITT partnerships must incorporate – in full – within their curriculums. The ITE curriculum will encompass the full entitlement described in the ITT core content framework.

- EY and FES programmes will prepare trainees for EY teacher status or professional formation at the end of their training.

**Designed around subject and phase**

- The course structure is designed around subject and/or phase-specific dimensions. The application of generic principles is taught and practised as and when appropriate.

- For primary phase, training will ensure that trainees learn to teach early reading using systematic synthetic phonics as outlined in the ITT core content framework and that trainees are not taught to use competing approaches to early reading that are not supported by the most up-to-date evidence. Trainees will be taught the importance of providing pupils/learners with enough structured practice to secure fluency in both reading and numeracy work.

---

---

28 Inspectors will adapt their focus on the ITE curriculum to take into account the design approach as set out by the partnership.
For EY programmes, trainees will gain knowledge of appropriate curriculum content as well as appropriate pedagogies for children.

For FES programmes, trainees will gain or consolidate appropriate knowledge and skills for the vocational, pre-vocational or academic courses that they will teach. The ITE curriculum will be designed to secure competence in appropriate teaching skills. (Where applicable) centre-based leaders have ensured that trainees are gaining high-quality training and professional practice in their placement settings.29

**Purposefully integrated**

- The ITE curriculum is purposefully integrated across its different partnership settings.
- Inclusion and teaching pupils with SEND are meaningfully integrated into all aspects of the training programme.

**Informed by up-to-date evidence**

- The ITE curriculum is designed to equip trainees with up-to-date research findings, for example as outlined for primary and secondary phase trainees in the ITT core content framework.
- The curriculum ensures that trainees are taught how to apply principles from scholarship relevant to their subject and phase when making professional decisions. In the ITE curriculum, trainees learn how to assess the appropriateness and value of new approaches that they might encounter in future, by considering the validity and reliability of any research on which the approach depends, by considering its context in existing community debates (for example, subject, phase, SEND, psychology) and by relating it to their professional experience.
- Trainees know about up-to-date research for promoting inclusion and teaching pupils with SEND and are able to apply this knowledge in their subject and phase.

**High expectations**30

- The ITE curriculum introduces trainees to the scope and richness of the knowledge that pupils can acquire in each subject. The curriculum is designed to ensure that trainees practise communicating shared values that improve school culture, sustain excellent behaviour and strengthen pupils’ vision of excellence in a subject.

**How pupils learn**

- The ITE curriculum ensures that trainees know how pupils can be taught to acquire expertise and how this applies in their subject and phase. Trainees are taught how to ensure that pupils remember and/or practise components

---

29 Professional practice in this context refers to vocational training courses such as plastering and plumbing.
30 Points 5 to 13 in the DfE guidance are structures to reflect the sequential order of teachers’ standards.
of knowledge and skills that they teach, and to ensure that pupils integrate new knowledge into larger concepts or accounts. Trainees are also taught that some pupils experience specific difficulties with acquiring, recalling and using knowledge.

**Subject and curriculum**

- The ITE curriculum provides a systematic and critical introduction to key educational traditions, practices and debates within the trainees’ specialist subject(s) and/or phase(s). It ensures that subject knowledge is sufficient to enable trainees to identify and evaluate content for their teaching, considering matters of scope, coherence, sequencing and emphasis. Trainees will be taught to identify appropriate pedagogies that secure the curriculum intent.

**Classroom practice**

- The ITE curriculum introduces trainees to the up-to-date evidence on effective classroom practice, including both how to present subject matter clearly and explicitly, promoting appropriate discussion, reflection and questioning, and how to use relevant pedagogy to enable effective teaching of the subject/specialist area. Trainees will be taught how to resource lesson sequences within their specialist subject or subjects within their phase, and to understand how sequences fit into and serve wider goals for that subject.

**Adaptive teaching**

- The ITE curriculum will teach trainees to promote inclusion. Trainees will be taught the ways in which knowledge promotes inclusion, for example by giving access to texts, by allowing participation in discussion or by ensuring equal readiness for next steps in a curriculum. The ITE curriculum is designed to ensure that trainees recognise foundational curriculum components, teach them so that they are learned securely, identify misconceptions and explicitly remediate these through subsequent planning, teaching or feedback. Trainees will be taught to recognise signs that may indicate SEND and know how to help pupils overcome barriers to learning. Trainees will be taught to adapt their teaching, while maintaining high expectations, by working closely with expert colleagues, such as the school’s special educational needs coordinator and other special education professionals.

**Assessment of pupils**

- The ITE curriculum will ensure that trainees know why, when and how to assess in a subject and phase context. Trainees will be taught how to seek and draw conclusions about what pupils have learned, for example to look for fluent recall or deployment in order to establish whether pupils have embedded an intended concept or procedure. The ITE curriculum will introduce trainees to important concepts in assessment, such as why teaching ‘of the subject domain’ rather than ‘to the test’ is important.

**Managing pupils’ behaviour**
The ITE curriculum will teach trainees the key principles of behaviour management and the importance of consistency of approach among teachers within an institution. The ITE curriculum will ensure that trainees learn how to teach pupils explicitly how to behave. Such practice will include setting and securing high standards of behaviour, creating an environment that allows pupils to focus on learning and establishing classroom routines.

**Professional behaviours**

- The ITE curriculum will prepare trainees for a fulfilling and successful career as a teacher. Trainees are taught how to manage their workloads and to maintain their own health and welfare, as well as how to engage with relevant subject and/or scholarly communities, including communities of practice relating to technical and vocational training, where relevant.
- Trainees are taught how to promote pupils’ safety and welfare. Trainees understand their statutory safeguarding duties and responsibilities.
- Trainees are explicitly taught high standards for teachers’ personal and professional conduct, including promoting a positive view of inclusion.

**Pupils’ physical and mental health**

- Trainees will be taught how to respond appropriately to pupil needs arising from physical and mental health issues and how schools can promote good physical and mental health.

**Implementation**

**How trainees are taught**

- All trainers (including mentors) draw on and model expert application of their own knowledge and skills, relevant to the subject and phase within which they operate. Trainers model and foster informed use of relevant professional and academic literature when teaching trainees how to appraise subject and curriculum approaches and find meaningful opportunities to enhance trainees’ subject and curriculum knowledge and their phase expertise.
- The ITT core content framework defines a key role for ‘expert colleagues’ in respect of the skills to be practised or introduced in the ITE curriculum. Partnerships will ensure that all ‘expert colleagues’ understand their role in delivering the ITE curriculum.
- Trainees receive clear, consistent and effective training and mentoring across the placement settings. They have adequate opportunities to observe expert colleagues, for example, as they plan lessons, teach pupils and undertake assessment. Trainees have enough opportunities to practise, with appropriate support. They receive regular, focused feedback and are supported through focused and challenging discussion.
- Flexible and responsive opportunities are given for individual trainees to observe and learn from diverse, excellent practice in different settings, including in specialist settings such as special schools and pupil referral units. These might also include vocational placements, diverse contexts or settings.
related to trainees’ own interests that are relevant to the pupils or subjects being taught.  

- Trainees are helped to discern and create useful connections across training experiences and relate these experiences to subject- or phase-specific challenges.

### Assessment of trainees

- Ongoing assessment of trainees focuses on whether trainees are gaining, applying and refining the knowledge and skills set out in the ITE curriculum, with particular attention to subject-specific dimensions. Ongoing assessment diagnoses deficits and allows remediation of gaps. Ongoing assessment avoids premature use of generic descriptors such as the teachers’ standards, which outline final outcomes and not the curriculum, which, when learned, enables those outcomes.

- For primary and secondary programmes, the ITT core content framework is not used as an assessment framework. Trainee teachers are not expected to collect evidence against the ITT core content framework. Instead, partnerships will use it to design an ITE curriculum that ensures that all trainees receive their full entitlement, as described in the ITT core content framework.

- When targets are set for trainees, they:
  - are produced collaboratively between mentors and trainees
  - relate to programme content to be mastered and specific expertise to be developed
  - are adapted flexibly in response to trainees’ progress and needs, ensuring that agreed actions are implemented by all parties.

- The partnership makes accurate and rigorous final assessments for the award of QTS in relation to the teachers’ standards for primary and secondary trainees, the award of EYTS for EY ITT trainees or professional standards for FES teachers and trainers.

### Impact

#### Professional development

- Trainees learn the intended knowledge and skills set out in the ITE curriculum. Their secure mastery of knowledge and skills is evident in any planning produced, teaching, evaluation and assessment.

- Trainees reflect on their teaching in the context of the curriculum components that they intended pupils to master. In such reflection, they take into account their assessment of what and how much pupils have securely learned.

---

31 One example among many might be musical or artistic practice or an industrial setting.

32 It is for the partnership to decide on the planning requirements for trainees. However, this should take into account the stage of training that trainees are at and the workload demands that result.
When trainees complete their training, they are aware of their professional strengths and areas for improvement. FES trainees understand what they need to do to achieve QTLS during their first year of training.

**Requires improvement (3)**

- The quality of education and training provided by the partnership is not good.

**Inadequate (4)**

- The quality of education and training is inadequate if any one of the following applies:

**Intent**

**Principles informing the ITE curriculum**

**Ambitious**

- The ITE curriculum lacks ambition and rigour in content choice. It lacks coherence and fails to develop cumulatively sufficient knowledge and skills for trainees.

- For primary and secondary programmes, the partnership has not ensured that its ITE curriculum encompasses the full entitlement described in the ITT core content framework.

- The partnership has not ensured that the ITE curriculum prepares trainees to meet the professional standards required for their phase (QTS/EYTS or for professional formation in FES).

- For EY and FE programmes, the partnership does not prepare trainees for EYTS or FE professional formation at the end of their training.

**Designed around subject and phase**

- Primary training does not ensure that trainees only learn to teach early reading using systematic synthetic phonics.

- For EY programmes, trainees have not gained sufficient knowledge of appropriate curriculum content and pedagogies for children.

- For FE programmes, trainees have failed to gain appropriate knowledge and skills for the vocational, pre-vocational or academic courses that they will teach.

- For FE programmes, trainees are not gaining high-quality training and professional practice in their placement settings.33

**Informed by up-to-date evidence**

---

33 Professional practice in this context refers to vocational training courses such as plastering and plumbing.
Trainees do not know about up-to-date research for promoting inclusion and teaching pupils with SEND and so are unable to apply this knowledge in their subject and phase.

**Adaptive teaching**

- The ITE curriculum does not teach trainees how to promote inclusion. Trainees are not taught to recognise signs that may indicate SEND and know how to help pupils overcome barriers to learning.

**Assessment of pupils**

- The ITE curriculum does not ensure that trainees know why, when and how to assess in a subject and phase context.

**Managing pupils’ behaviour**

- The ITE curriculum does not teach trainees the key principles of behaviour management, how important it is to teach pupils how to behave and the importance of consistency of approach among teachers within an institution.

**Professional behaviours**

- Trainees are not taught how to promote pupils’ safety and welfare. Trainees do not understand their statutory safeguarding duties and responsibilities.
- Trainees are not explicitly taught high standards for teachers’ personal and professional conduct, including promoting a positive view of inclusion.
- Trainees are not taught how to manage their workloads and to maintain their own health and welfare.

**Implementation**

**How trainees are taught**

- Trainees consistently receive unclear and ineffective training and mentoring across various settings.
- Trainee have few opportunities to observe expert colleagues.
- Trainees consistently receive poorly focused feedback and are not supported through focused and challenging discussion.

**Assessment of trainees**

- For primary and secondary programmes, the ITT core content framework is, incorrectly, being consistently used as an assessment framework.
- Trainee teachers are expected to collect evidence against the ITT core content framework.

**Impact**

**Professional development**

- When trainees complete their training, they are unaware of their professional strengths and areas for improvement. FE trainees do not understand what they need to do to achieve QTLS during their first year of training.
Leadership and management

166. Inspectors will evaluate the work of senior leaders, managers and other leaders with leadership and management roles when reaching this judgement.

167. Inspectors will take account of ongoing changes to the ways in which ITE partnerships are being led and managed.

168. Within the context of the overall activities of the ITE partnership, inspectors must examine the impact of leaders and managers, working at all levels, in improving or sustaining high-quality training provision.

169. Inspectors must consider how effectively leaders and managers ensure that overall partnership provision prepares trainees to teach subject(s) well, including:

- considering how leaders have used the DfE’s guidance on addressing workload in ITE to eliminate unnecessary workload, to prepare trainees for the realities of teaching

- ensuring subject leaders and other subject trainers have appropriate subject qualifications, subject teaching experience and ongoing subject training to lead, design and deliver subject dimensions of courses

- overseeing and engaging with decisions concerning the scope, depth, timing and sequencing of content of overall subject provision, so that:
  
  in the secondary phase, trainees receive:
  - comprehensive, coherent (across settings) and well-paced training in how to plan, teach and assess their subjects
  - training that promotes excellent teaching through high levels of subject and curriculum knowledge.

  in the primary phase, trainees receive:
  - adequate training in all national curriculum subjects, relationships and religious education, sufficient to understand the scope, purpose and principles of each subject, to begin to build secure frameworks of knowledge for each subject and to recognise high-quality subject resources that make efficient use of lesson time
  - thorough training in the teaching of systematic synthetic phonics, early number work and handwriting, including focused practice in school placements, based on up-to-date research.

- creating the right conditions for subject leaders and other subject trainers (and, in secondary, subject mentors) to renew and strengthen the subject dimensions of training. This might happen through collaboration in the

---

34 DfE ‘addressing teacher workload in initial teacher education (ITE)’; https://www.gov.uk/government/publications/addressing-workload-in-initial-teacher-education-ite
sourcing, production or adaptation of high-quality subject resources or
through providing trainers with opportunities for ongoing consideration of
quality in subject practice or subject curriculums

- allowing subject distinctiveness to flourish within programmes so that
generic programme structures do not compromise subject rigour.

170. Inspectors must consider how relentlessly leaders and managers pursue a
vision for excellence focused on improving or sustaining high-quality provision
for trainees, including:

- Ensuring that the ITT core content framework is thoroughly taught,
appropriately integrated within the ITE curriculum as a whole and reinforced
in the partnership’s various settings

- the rigorous implementation of well-focused improvement plans based on
robust and perceptive self-evaluation of overall ITE curriculum intent,
implementation and impact

- a thorough analysis of improvements in trainees’ practice, for example in
securing good behaviour, in teaching reading using systematic synthetic
phonics, in applying effective approaches for pupils with SEND and, in
secondary, in ensuring that pupils master foundational subject components
and know how to assess and use those components in their later teaching

- training that successfully integrates:
  - general principles for learning to teach (such as the application of up-to-
date research in the science of learning or in classroom management)
  - learning to teach a subject (subject knowledge, subject pedagogy and
subject curriculum)
  - learning to be a teacher (professional behaviours and values)

- the consistent application of effective policies and procedures across the
partnership, for example ensuring trainees receive their entitlement to good-
quality mentoring and regular mentoring time, and ensuring routine target-
setting and target reviews are detailed, subject-specific where appropriate,
and rooted in a thorough evaluation of trainees’ recent practice

- providing high-quality professional development for all mentors and trainers
involved in the ITE partnership

- effective liaison with employing settings, schools and colleges in the local
area/region, in order to promote high-quality induction of NQTs/former
trainees

- strategic and effective engagement in the system-wide leadership of ITE in
order to address local, regional and national concerns, including those
related to teacher quality, supply and retention issues, and to improve the
education sector’s professional capacity for curriculum improvement, in line
with the quality of education focus of the education inspection framework
whether trainers evaluate their teaching to ensure that sufficient knowledge and skills are learned by the trainees who they train.

171. Inspectors must consider how strongly and effectively schools, colleges and/or other settings are engaged in the ITE partnership, for example through their involvement in:

- strategic leadership and management
- quality assurance systems
- recruitment and selection of trainees
- the design and delivery of training and assessment
- the review, evaluation and development of provision with
  - schools, colleges and/or other settings in challenging socio-economic circumstances and those judged to require improvement
  and in FE with
- employer and business engagement.

172. Inspectors must consider evidence of appropriate monitoring and assessment of trainees’ progress in mastering the components of the overall ITE curriculum, for example through leaders’ and managers’ success in:

- monitoring the quality of the overall ITE curriculum, its implementation and impact on trainees’ teaching and professional behaviours, including acting on findings in order to improve trainees’ progress
- evaluating accurately the quality of the intent, implementation and impact of ITE curriculum and overall training provision in relation to other ITE partnerships
- ensuring that each trainee’s individual training programme is both responsive to ongoing formative assessment of strengths, gaps and needs and takes every opportunity to embed knowledge and skills of the ITT core content framework, for example by ensuring that regular review of routine targets, new target-setting and personalised training activities draw on the ITT core content framework wherever appropriate
- drawing on evaluations and satisfaction surveys of trainees, NQTs and former trainees to review and improve provision
- actively seeking feedback on the performance of NQTs/former trainees from employers to improve the quality of provision
- monitoring the preparation of trainees for employment and induction
- ensuring that the final assessment arrangements rigorously establish whether trainees have met the minimum level of practice expected of
teachers as defined in the teachers’ standards, the EY teachers’ standards or the 2014 professional standards for FE teachers and trainers

- understanding and applying the fundamental principle that ‘the curriculum is the progression model’, for example through avoiding any attempt to track progress numerically or through premature use of final outcome descriptors such as the EY teachers’ standards, the teachers’ standards or the quality of teaching and learning standards.

173. Inspectors must consider the partnership’s demonstrable capacity to bring about further improvements, as shown by a combination of:

- a track record of improving or maintaining high-quality provision
- specific improvements in the quality of training, including national priority areas for ITE, and implementation of the ITT core content framework within the overall ITE curriculum and the impact this has on improving trainees’ practice over time
- leaders’ and managers’ attention to building subject-specific capacity in trainers and mentors, so that training provision in all aspects of the school curriculum is secure and sustainable.

174. Inspectors must consider how well leaders and managers ensure the rigour of the partnership’s recruitment and selection process by:

- recruiting trainees with the potential to meet the needs of local, regional or national employers and the needs of the wider educational community, including schools, colleges and/or settings in challenging socio-economic circumstances and those judged as requires improvement
- selecting candidates with appropriate qualifications, relevant subject/specialist knowledge and the potential to meet the relevant professional standards by the end of their training
- placing applicants on a training programme that makes best use of their skills, aptitudes and previous experience and develops their subject knowledge where appropriate.

175. Inspectors must consider how effectively leaders and managers ensure compliance with the initial teacher training statutory criteria and requirements, and all relevant legislation and guidance, including that related to:

- promoting equality and diversity
- eliminating discrimination
- safeguarding, including e-safety.

Grade descriptors: leadership and management of the partnership
176. Inspectors will use professional judgement when judging the partnership’s leadership and management:

- If all aspects of the good criteria are consistently met, inspectors will consider whether all the outstanding criteria are met. For a partnership to be graded outstanding, it must be consistently meeting all aspects of the good and outstanding criteria.
- Where a partnership does not, on a ‘best fit’ basis, meet the good criteria consistently and none of the inadequate criteria apply, the partnership will be graded as requires improvement.
- Where inspectors’ evidence shows that any of the inadequate descriptors apply, then this aspect of the ITE partnership’s work will be judged inadequate.

**Outstanding (1)**

- The partnership meets **all** the criteria for good in leadership and management **securely** and **consistently**.
- Leadership and management are exceptional.
In particular, the following apply:

- leaders and managers are relentless in pursuing a vision for excellence focused on improving or sustaining high-quality provision for trainees
- leaders and managers are highly proactive in ensuring schools, colleges and/or other settings are engaged in the ITE partnership and contribute to success of the partnership’s work
- leaders’ and managers’ priorities ensure that, overall, the partnership’s provision fully prepares trainees to teach effectively the curriculum they will be responsible for
- monitoring and assessment of trainees’ progress check that trainees are learning the sequenced components of the ITE curriculum
- trainees’ views are used routinely by leaders and managers to evaluate the effectiveness of the course, plan for improvement and measure the impact of initiatives.

177. In order to judge whether the partnership is good or requires improvement, inspectors will use a ‘best fit’ approach, relying on the professional judgement of the inspection team.

**Good (2)**

**Governance**
Schools, colleges and early years settings work with the partnership in order to contribute as a partnership to:

- the strategy for recruitment and selection of trainees
- the development of the education and training trainees receive
- systematic evaluation of the intent and implementation of the ITE curriculum
- the strategic leadership of the ITE provision.

Quality assurance systems sustain effective and consistent teaching of coherent, well-planned programmes, and their integration across the ITE partnership.

Engagement and liaison with employers assist an effective continuum from initial teacher training to induction and early career development.

**Vision of excellence**

- High-quality mentors benefit from an effective cycle of mentor induction, training and feedback that involves all partners. Schools, colleges and/or early years settings work with the partnership to ensure that, as far as is possible, mentoring supports the intent of the ITE curriculum.

- Leaders and managers have a clear picture of the partnership’s strengths and weaknesses, and have used this knowledge to secure improvements for trainees.

- Improvement planning is based on rigorous and systematic evaluation of the ITE curriculum, using evidence of qualitative impact on trainees’ learning, professional knowledge, developing expertise and classroom performance. Evaluation takes into account, where appropriate, the perspectives of training partners, surveys from employers, trainees and former trainees, and an understanding of local, regional and national needs.

- Selection procedures ensure that trainees are ready to acquire the relevant curriculum/vocational knowledge and teaching expertise during the course and show clear potential to meet the required professional standards by the end of their training.

- Trainees receive appropriate and timely professional and pastoral support, including managing workload and maintaining good mental health. The partnership is alert and intervenes, where possible, to avoid trainees with the capacity to continue training withdrawing from the programme.

**Workload**

- Partnership leaders do not encourage unnecessary bureaucratic workload demands such as excessive paperwork, for example for generic tracking against teachers’ standards that is not related to immediate, specific programme components, training targets and needs or require additional
documentation specifically to be created solely for the purpose of assessment against the teachers’ standards.

- All trainers understand the limitations of the different forms of assessing pupils’ learning. Trainers do not require trainees to mark or assess pupils’ work in a way that creates unnecessary burdens for trainees or which detracts from their own wider learning within the course programme.

- Partnership leaders make proportionate demands with regard to creating lesson plans and balancing the need for the trainees to learn how to plan sequences of lessons with workload considerations.

**Equality and diversity**

- Where possible, partnership leaders ensure that training provision includes placements that offer diverse experiences across pupil attainment, demographics and needs.

- Partnership leaders ensure that training respects and teaches knowledge and application of fundamental British values and the Equality Act 2010.

- Partnership leaders ensure that the partnership consistently meets the DfE’s ITE compliance criteria.³⁵

178. In order to judge whether the partnership is good or requires improvement, inspectors will use a ‘best fit’ approach, relying on the professional judgement of the inspection team.

**Requires improvement (3)**

- Leadership and management are not good.

- For primary and secondary programmes, the partnership does not comply fully with the ITT core content framework. The non-compliance does not have a significantly negative impact on the overall quality of the ITE curriculum for trainees. The ITT core content framework details the minimum entitlement of all trainee teachers, which all ITT partnerships must incorporate – in full – within their curriculum.

**Compliance**

- Partnership leaders have failed to ensure that the partnership consistently meets the DfE’s ITE compliance criteria. Identified areas of the programme that do not meet the compliance criteria are minor and easily rectified. Consequently, the gaps in compliance do not create a significant impact on trainees or their training.

Inadequate (4)

Leadership and management are likely to be inadequate if one or more of the following apply:

- Schools, colleges and early years settings are not routinely able to work with the provider to contribute to:
  - the partnership’s strategy for recruiting trainees or
  - the evaluation of the partnership’s ITE curriculum.

- Quality assurance systems do not sustain effective and consistent teaching of coherent, well-planned programmes and their integration across the ITE partnership.

- The partnership does not liaise or engage with employers, resulting in an ineffective continuum from ITE to induction and early career development.

- Mentoring training does not focus on ensuring quality interactions between trainees and mentors. Mentoring is consistently not matching the intent of the ITE curriculum.

- For early years and primary programmes, mentors do not support the teaching of systematic synthetic phonics. Some trainees are being poorly prepared to teach systematic synthetic phonics after the completion of their course.

- Improvement planning is weak. It is not based on rigorous and systematic evaluation of the ITE curriculum.

- Selection procedures do not ensure that trainees are ready to acquire the relevant curriculum/vocational knowledge and teaching expertise during the course and show clear potential to meet the required professional standards by the end of their training.

- For primary and secondary programmes, the partnership does not comply with the ITT core content framework in multiple areas or in areas that have a significantly negative impact on the overall quality of the ITE curriculum for trainees. The ITT core content framework details the minimum entitlement of all trainee teachers, which all ITT partnerships must incorporate – in full – within their curriculum.

Workload

- Partnership leaders do not routinely check that bureaucratic workload demands are avoided by all partners. Unnecessary burdens are placed on trainees, and these routinely detract from their own wider learning within the training programme.

Equality and diversity

- Partnership leaders do not ensure that training respects and teaches knowledge and application of fundamental British values and the Equality Act 2010.
Compliance

- Partnership leaders have failed to ensure that the partnership consistently meets the DfE’s ITE compliance criteria. Identified areas of the programme that do not meet the compliance criteria are not minor and have a significant impact on trainees or their training.

- Partnership leaders have failed to ensure that the partnership fulfils the requirements of a quality apprenticeship.
Annex A. Instructions and guidance for focused thematic subject inspections

Background

179. Focused thematic subject inspections concentrate solely on the quality and effectiveness of individual subject training in primary and secondary ITE partnerships. These visits are undertaken as part of the ITE inspection framework, but also contribute towards national thematic subject reports led by Ofsted’s national subject leads. Inspectors focus on the preparation of trainee teachers within individual subjects.

180. ITE partnerships are selected for ITE thematic subject inspections based on an annual risk assessment process that uses a range of data available to Ofsted. However, Ofsted may include partnerships due to their size, geography or secondary subject provision.

181. ITE partnerships will receive their next ITE inspection in accordance with routine inspection scheduling arrangements. Focused thematic subject inspections cannot change the primary or secondary inspection grade for overall effectiveness, but if the thematic subject inspection raises concerns about the standard of training provided, then this may influence the timing of the next inspection of the ITE partnership.

182. This guidance sets out the judgements that inspectors make and report on when evaluating the quality and effectiveness of a subject in a thematic subject inspection and the range and types of evidence they will use.

183. All focused thematic subject inspections are carried out in accordance with the principles and code of conduct for inspectors, as set out in paragraph 135.

184. Thematic subject inspections are led by a specialist ITE lead inspector. These are inspectors who are contributing to national subject thematic studies and are experienced ITE lead inspectors. They will be allocated three days to plan, conduct and report on the inspection event. They may be joined by up to three team inspectors for each phase on the second day of the inspection, depending on the size of the primary and/or secondary ITE partnership.
Evaluating the quality and effectiveness of training in subject/specialist areas of the ITE curriculum

Introduction

185. In all focused thematic subject inspections, inspectors are required to evaluate the quality and effectiveness of subject/specialist training.

186. Inspectors will provide a feedback letter that identifies strengths and weaknesses. They will reach these findings by carefully considering the evidence gathered and using their professional judgement.

Outline guidance

187. Inspectors must consider first-hand evidence, including a sample of visits to trainees teaching the subject being inspected and observations of any school- or (where applicable) centre-based subject training taking place at the time of the thematic subject inspection.

188. Inspectors will take account of the following in their evaluation:

- the quality and effectiveness of training in preparing trainees to teach the subject to children/pupils/learners and to promote and manage good behaviour in the subject and age range for which they are trained
- whether trainees, ‘if teaching early reading, demonstrate a clear understanding of systematic synthetic phonics’ by the end of their training and whether trainees ‘manage behaviour effectively to ensure a good and safe learning environment’
- any specific issues raised in the last inspection report about the subject or behaviour management and whether these have been tackled effectively and are showing clear signs of improvement
- the views of trainees, NQTs, mentors, trainers, induction tutors and employers on the quality of subject training and its impact on trainees’ teaching and pupils'/learners’ learning
- the effectiveness of the ITE partnership’s work in seeking and responding to satisfaction surveys, including those from trainees, NQTs, induction tutors and employers, about the quality of subject training
- how the partnership has taken account of the ITT core content framework, ensuring that the subject training has taken account of the up-to-date research to support subject training
- the quality, coherence and rigour of school- and (where applicable) centre-based subject training

- the quality and effectiveness of training materials, directed tasks, assignments and audits related to the subject being inspected
- the quality and effectiveness of placement schools in providing experiences that develop trainees’ confidence and competence in the teaching of the subject being inspected
- the expertise and effectiveness of mentors and other trainers in providing high-quality subject training
- the effectiveness of leaders and managers in ensuring that the quality and effectiveness of the subject training is sustained or improving.

**Focused thematic subject inspections**

189. The ISA will telephone the ITE partnership the afternoon before the first of the three days allocated to the inspection to inform the partnership’s representative of the inspection and the inspector’s expected time of arrival to complete preparation. This phone call could take place on any day of the week. Focused thematic subject inspections usually take place during the spring or summer terms. If the partnership’s representative is unavailable, the lead inspector will ask to speak to the most senior member of staff present. If it is not possible to contact the ITE partnership, the lead inspector will inform the ITE partnership of the focused thematic subject inspection on arrival.

190. Inspectors and ITE partnerships should follow the guidance for deferral in paragraph 78.

191. As soon as it is certain that the focused thematic subject inspection can take place, the ISA will notify the inspector. The ISA will send the partnership representative the privacy notice information and formal confirmation of the inspection by email. The email will include contact details for the ISA and an outline of the arrangements for publication of the thematic subject inspection letter after the event.

192. Inspectors should make initial preparations for the inspection on the morning after the initial notification. Preparation should be conducted on site, with the partnership representative. When preparing for inspection, inspectors should be flexible enough to gather secure evidence to evaluate and report on the main focus of the inspection. Wherever possible, inspectors should maximise the time available by visiting a number of trainees based in particular schools, colleges and/or settings.

**During the inspection**

**Inspection activities**

193. Inspection activities should involve:

- observations of school- and/or (where applicable) centre-based subject training
visiting trainees teaching the subject focus of the thematic subject inspection

analysis of directed tasks, assignments and audits related to the thematic subject inspection

scrutiny of the ITE partnership’s records and documentation, including:
- training materials
- evaluations of the quality of school- and (where applicable) centre-based subject training
- evaluations of mentor subject training and monitoring

discussions with:
- individual and/or groups of trainees and NQTs
- trainers, mentors, induction tutors and employers
- key staff involved in training in the subject that is the focus of the thematic inspection

examination of additional documentation, including, for example:
- reports or action plans from the DfE and/or other key partners
- analysis of trainees’, NQTs’ and employers’ views on the impact of actions taken to improve subject training
- case or impact studies provided by the ITE partnership.

While discussions are important, the main focus will be on gathering first-hand evidence, including:

- observations of school- and/or (where applicable) centre-based subject training
- trainees’ and NQTs’ teaching of the subject being inspected.

Inspection activities will be tightly focused on:

- issues that relate directly to the quality and effectiveness of training in the subject
- any concerns raised by the pre-inspection analysis or during the inspection, including those raised by trainees in the trainee online survey.

Engaging with the partnership’s representative, phase leaders and managers

The principles for engaging with the partnership’s representative and leaders and managers are set out in paragraphs 109 to 111 and should be applied during thematic subject inspections. The lead inspector should exercise discretion in adapting and extending the approach according to the ITE partnership’s circumstances.
197. It is important that professional dialogue is maintained throughout the inspection. Emerging strengths and issues should be discussed during feedback at the end of the inspection and should not be a surprise to the ITE partnership.

198. Throughout the inspection, inspectors are asked to thoroughly probe the areas of concern and acknowledge where the ITE partnership has been successful in tackling areas for improvement.

Feedback on visits to trainees, and school- and centre-based training sessions

199. Feedback on the quality of subject teaching is an integral and essential part of the inspection. Inspectors must follow the guidance for feedback and discussion in paragraph 121.

200. The lead inspector and the partnership’s representative should decide which members of the ITE partnership will attend the feedback, especially when the feedback is challenging or raises sensitive issues.

201. The feedback must:

- report on the range of evidence gathered
- explain the thematic subject inspection findings, including strengths and weaknesses
- make clear that the text of the inspection findings letter will be quality assured and may differ slightly from the wording of the oral feedback, although it will contain the same clear messages and the judgements are unlikely to change.

202. If the thematic subject inspection has raised serious concerns, this may affect the timing of the next ITE inspection. The lead inspector will make sure that the ITE partnership is aware of this and will inform the SHMI for ITE and/or the specialist adviser for ITE. However, the likely timing of any further inspection will not be indicated to the ITE partnership.

The thematic subject inspection letter

203. The letter will be published on Ofsted’s website within 15 days of the end of the inspection.

204. Normally within eight working days of the end of the inspection, the ITE partnership will be notified that the letter is available for a FAC. The ISA carries out this process if necessary. The ITE partnership will have one working day to complete the FAC.

205. The lead inspector will respond to the ITE partnership’s comments about factual accuracy. The FAC comments of both the partnership and lead inspector
will be reviewed by the SHMI for ITE and/or the specialist adviser for ITE if appropriate. The ITE partnership will then receive an electronic version of the letter, normally within 14 working days of the end of inspection. After that time, the letter will be published on the Ofsted website, normally within 19 working days of the end of the inspection.

206. The ISA will email the final version of the letter to:

- the ITE partnership
- the lead inspector
- the DfE.

207. In general, thematic subject inspection letters are expected to be between 700 and 1,000 words in length. Inspectors will make professional judgements about the amount of detail needed to clearly explain the quality and effectiveness of an ITE partnership’s training in the subjects inspected. The letter will include:

- the strengths and weaknesses identified within the subject(s) reviewed or inspected as part of the focused thematic subject inspection.
The Office for Standards in Education, Children’s Services and Skills (Ofsted) regulates and inspects to achieve excellence in the care of children and young people, and in education and skills for learners of all ages. It regulates and inspects childcare and children’s social care, and inspects the Children and Family Court Advisory and Support Service (Cafcass), schools, colleges, initial teacher training, further education and skills, adult and community learning, and education and training in prisons and other secure establishments. It assesses council children’s services, and inspects services for children looked after, safeguarding and child protection.
