CURRENT RANGE OF EU MEASURES IN FORCE ON STEEL

This notice gives guidance on the current range of EU measures in force on steel, specifically:

- **The UK leaving the EU**
- **The removal of the end-user requirement for product category 4B.**
- **EU TRQ review findings which came into force on 1 October 2019;**
- **EU definitive safeguard measures on steel introduced on 2 February 2019;**
- **EU provisional safeguard measures on steel introduced on 18 July 2018 (superseded by the definitive measures on steel);**
- **EU anti-dumping and anti-subsidy measures in force against steel or aluminium;**
- **EU countermeasures against US steel and aluminium tariff increases;**

This document is for information purposes only and has no force in law. Please note that where legal advice is required, you should make your own arrangements.

EU DEFINITIVE SAFEGUARD MEASURES ON STEEL

1. The UK is leaving the European Union. The Government's priority is to provide continuity for UK industry wherever possible. Our transition policy is therefore to ensure UK industry retains appropriate trade remedy protections on exit.
2. We are committed to transitioning the definitive safeguard measure on those steel product categories where there is a UK interest. For those that the UK will transition, DIT will adjust the tariff rate quotas to make them UK specific.
3. Once the UK is operating an independent trade policy, the Trade Remedies Investigations Directorate (TRID) will conduct a transition review of the safeguard measure to determine whether the TRQs need to be revoked/varied/maintained for each product category.
4. If, for example, TRID finds that there is no UK production of goods covered under a product category that we have transitioned then they can make a determination to revoke that TRQ without having to do a full assessment (which, where there is a UK producer, would need to be undertaken for the other categories transitioned).
5. During the transition period, the EU will continue to investigate and apply trade remedies on the UK's behalf. At the end of the transition period, trade remedy investigations will be managed by the Trade Remedies Investigations Directorate (TRID). TRID have created a pre-application office to discuss potential trade remedies cases, with UK business. They can be contacted via email at contact@traderemedies.gov.uk.
6. The European Commission, by Commission Implementing Regulation 2019/159 (Official Journal L31 dated 1 February 2019), imposed definitive safeguard measures on 28 product categories of steel imports. These measures have been amended by regulations 2019/1590 and 2020/35 which can be found at www.legislation.gov.uk. These measures replaced the provisional measures imposed by Commission Implementing Regulation 2018/1013 on 18 July 2018. If you have any

questions on safeguards or anti-dumping/anti-subsidy measures relating to these product categories please email christopher.russo@trade.gov.uk.

7. The EU definitive safeguard measures are in the form of Tariff Rate Quotas (TRQs) and will remain in place until 1 July 2021. There are three tariff quota “years”: 2 February 2019 – 30 June 2019; 1 July 2019 – 30 June 2020; and 1 July 2020 – 30 June 2021. If a TRQ is fully used, then an additional 25% import duty will apply to any more imports. Tariff quota levels can be checked at: http://ec.europa.eu/taxation_customs/dds2/taric/quota_consultation.jsp?Lang=en
8. Each product category (apart from product categories 1 and 25) have TRQs set for individual countries as well as a “global” level set for all other countries. See tables below for detail.
9. For the “global” TRQs covering countries not covered by a specific country TRQ, each quota year is split into quarterly (three month) “semesters” (with the exemption of the first semester which is only two months) with each semester having its own TRQ volume.

EU TRQ REVIEW

10. On 1 October 2019, the EU implemented 6 changes to the safeguards measure following a TRQ review. The changes can be summarised as follows:
 - a. Reducing the pace of liberalisation of the quotas not subject to safeguard tariffs from a 5% annual increase to 3% each year.
 - b. Ring-fencing category 4B (metallic coated sheets) for the exclusive use of the automotive sector.
To note, the Commission reversed the end-user requirement on 17 January 2020 with effect from 1 October 2019.
 - c. Product category 1 (hot rolled flat products): limiting individual countries’ access to the global quota to 30% individual countries to access.
 - d. Product categories 13 (rebars) and 16 (wire rod): limiting the access of countries with a country-specific quota for these products to the global quota in the last quarter to 30%.
 - e. Removing country-specific quotas for product category 25 (large welded tubes) so that only a global quota remains.
 - f. Updating the exemptions granted to developing countries from the measures in line with the latest import data.

EU ANTI-DUMPING & ANTI-SUBSIDY MEASURES ON STEEL AND ALUMINIUM

11. Anti-dumping (AD) and anti-subsidy (AS) measures are imposed to protect domestic industry from injury caused by unfairly dumped or subsidised imports, and the Commission has applied these measures to certain product categories covered by the steel safeguards.
12. In order to avoid the imposition of 'double remedies' whereby AD or AS and safeguard duties are simply added up, whenever the safeguard quota is exceeded for products already subject to AD or AS measures, the level of the existing AD and AS duty will be suspended or reduced. If the AD or AS is less than or equal to 25%, no AD or AS duty should be paid. If the AD or AS duty is greater than 25%, only the part of the sum of the AD or AS duty above 25% should be paid. In cases where both an AD and AS duty and a safeguard duty apply and where the sum of AD and AS duty is less than or equal to 25% (i.e. the level of the safeguard out-of-quota duty), no AD or AS duty should be paid. Currently the following AD and AS measures are in place:

Product number	Product category	AD/AS duty	Details/Comment
1	Non Alloy and Other Alloy Hot Rolled Sheets and Strips	Yes	AD635 (Brazil, Iran, Russia and Ukraine) AD630 (China) AS634 (China)
2	Non Alloy and Other Alloy Cold Rolled Sheets	Yes	AD620 (Russia, China)

27	Non-alloy and Other Alloy Cold Finished Bars (N.B. no provisional safeguard measures were imposed.)	No	N/A
28	Non Alloy Wire	No	N/A

EU STEEL COUNTERMEASURES

13. In response to US imposition of increased tariffs on imports of certain steel and aluminium products, the EU introduced “countermeasures” on certain products originating in the USA. There are two sets of countermeasures. The first set applied additional tariffs of 10% or 25% on a range

of goods of US origin including steel and aluminium from 22 June 2018 (Annex 1). The second set will introduce additional import tariffs of 10%, 25%, 35% or 50% from 1 June 2021 (Annex 2) which includes an additional 2 steel and 3 aluminium products. They may be implemented earlier if the EU wins its WTO dispute case against the US decision to introduce increased steel and aluminium import duties. Full details of the countermeasures including the product lists can be found in Commission implementing Regulation 2018/886. If you have further questions, please contact laura.goldthorpe@trade.gov.uk.
