WORKSHOP – International perspectives on future food metrology

26 June 2020

On 26 June, immediately following the Government Chemist conference, representatives from National Measurement Institutes worldwide will meet to identify common areas of interest in future food measurement science and discuss how they could be addressed globally.

The workshop* will include talks and round the table discussions, focused on metrological challenges in the areas of authenticity, allergens, and residues/contaminants.

**The programme for the workshop is in development.*
