Before reviewing the Model Interim Payment Terms, please read:

- Procurement Policy Note 01/20 – Responding to COVID-19
- Procurement Policy Note 02/20 – Supplier relief due to COVID-19

Purpose of the Model Interim Payment Terms

The purpose of the Model Interim Payment Terms is to provide a set of terms that contracting authorities can use to implement PPN02/20 in providing contractual relief to suppliers who have been affected by COVID-19. This includes preventing a supplier claiming separate relief from another source of Government financial support on COVID-19, to the effect that the supplier gains an undue advantage by claiming relief twice for the same hardship.

Who should use the Model Interim Payment Terms?

All contracting authorities to which PPN 02/20 applies should consider using these terms.

What contracts are the Model Interim Payment Terms designed for?

The Model Interim Payment Terms are designed for public contracts for the delivery of goods and services. Authorities should seek legal advice to ensure that the Model Interim Payment Terms are consistent with the contract which they seek to vary. Should an authority wish to vary a contract for works, legal advice should be sought.

How do the Model Interim Payment Terms work?

- The Model Interim Payment Terms allows a supplier, which the authority has identified as at risk because of COVID-19, to set out to the authority the contractual relief that it requires to deal with business disruption because of COVID-19.
- The request for an interim payment structure is set out by the supplier in an Interim Payment Proposal. This process is available after the supplier and authority have considered whether other forms of relief from contractual controls might be more appropriate (for example, performance indicator/service credit relief).
- When the supplier sets out the interim payment relief it requires, it also sets out why it needs the relief (e.g., staff wages or sub-contractor payment). This process allows the supplier to set out to the authority exactly what it needs and why.
- The clauses around open book transparency and supplier provision of supporting information allows the authority to check that the proposals that the supplier put forward are complied with when relief is given.
- If the supplier does not spend any interim payments in line with what it said it required the payments for, fails to act transparently and with integrity, or takes an undue advantage of the relief, the authority can take action necessary to recover any interim payments.
- The Model Interim Payment Terms prevents a supplier claiming contractual relief from an authority and claiming separate relief from the Government to the effect that the supplier gains an undue advantage by claiming relief twice for the same hardship.
