# Leaving hospital to go to a care home

HM Government

This **Easy Read leaflet** tells you:

- why you need to leave hospital

- what will happen after you leave hospital.

You will leave hospital when:

- you do not need hospital care

- you can get the right care outside of hospital.

## Why am I leaving hospital?

You are leaving hospital because your **health team**

has agreed you can get better in a **care home** or **nursing home**.

## Can I stay in hospital?

**NHS**

No, because the **NHS** is busy helping patients who have **coronavirus**, which is also known as **COVID-19**.

**Coronavirus** is a new illness that can make it hard for you to breathe.

Some people who get the illness will need to go to hospital.

It is important that we have enough **beds** in our hospitals to look after people with **coronavirus** who need hospital care.

So, you will leave hospital as soon as it is safe.

If you refuse the care offered

you **cannot** stay in hospital.

## What will happen when I leave hospital?

When you leave hospital, it is very important that you:

- stay safe

- get the right care.

Before you leave hospital, someone will **talk** to you:

- about the best way to leave hospital

- how you are going to **travel** to a care home or nursing home.

A family member, friend or carer can join you for this talk.

When you leave hospital, you will get:

- the **care and support** you need

- a **bed** in a care home or a nursing home.

The NHS will **pay** for any care or support you need to help you get better.

After you leave hospital you may stay in more than one **care home** or **nursing home**.

This is because the NHS want to find the best place for your long-term care.

Your **health team** can answer any questions you may have.

## Who can I contact?

After you leave hospital:

- if you are worried about your health

- if you need to speak to someone about your care

please get in touch with:

<Name of local team>

Call <local telephone number>
