

Under-10m Cod VIId

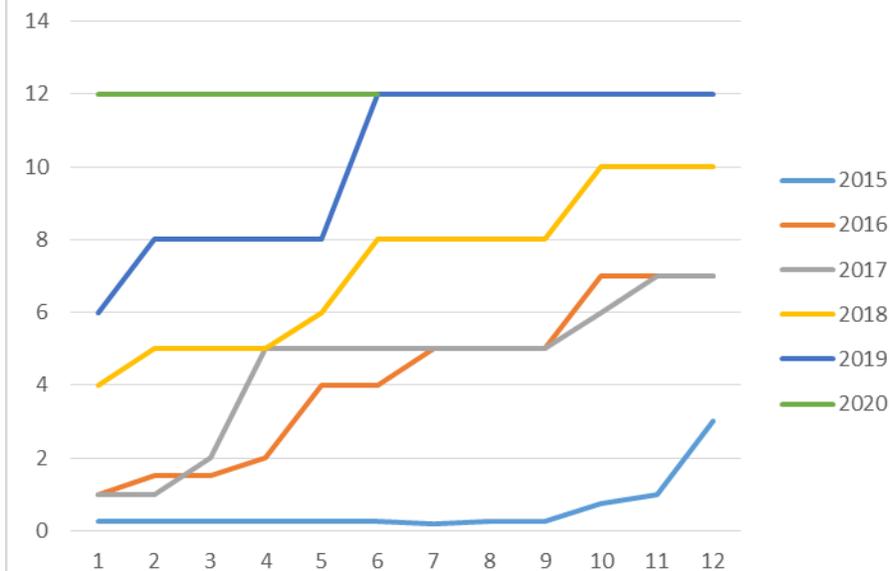

- During May, 13 vessels landed VIId Cod and 12 landed less than 10kg.
- Highest monthly landing to-date was ~400kg in January.
- Plenty of available quota.
- Increase in September / October or contact me if needed sooner.
- **Over-10m 1.8t available, 0.4t landed to-date.**

Under-10m Plaice Vlld-e

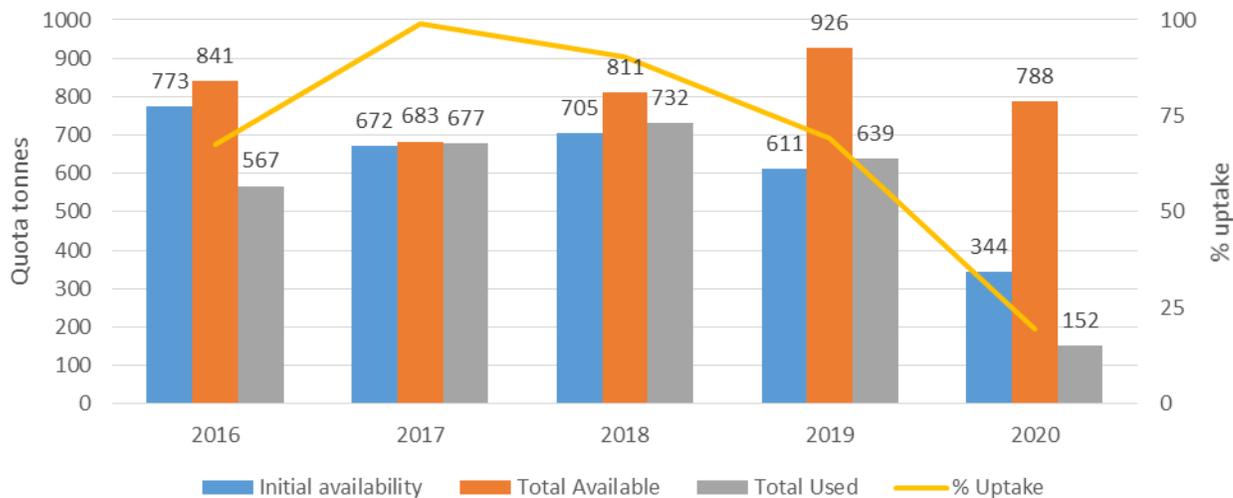

Monthly Uptake 2015-2020

Catch limits

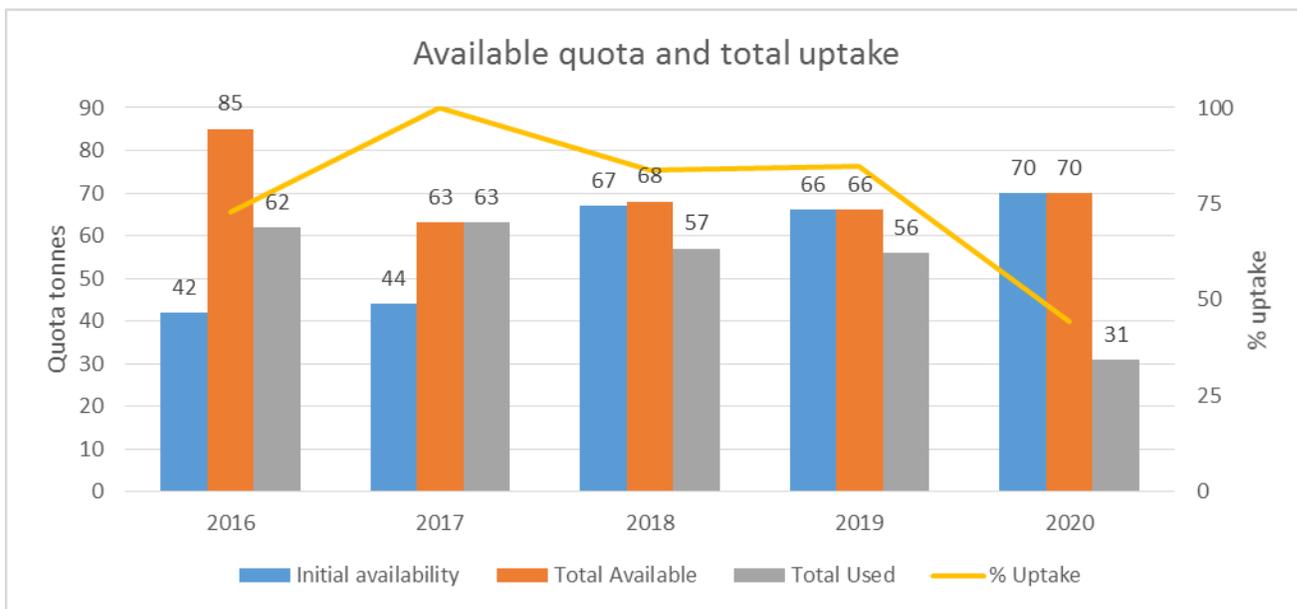

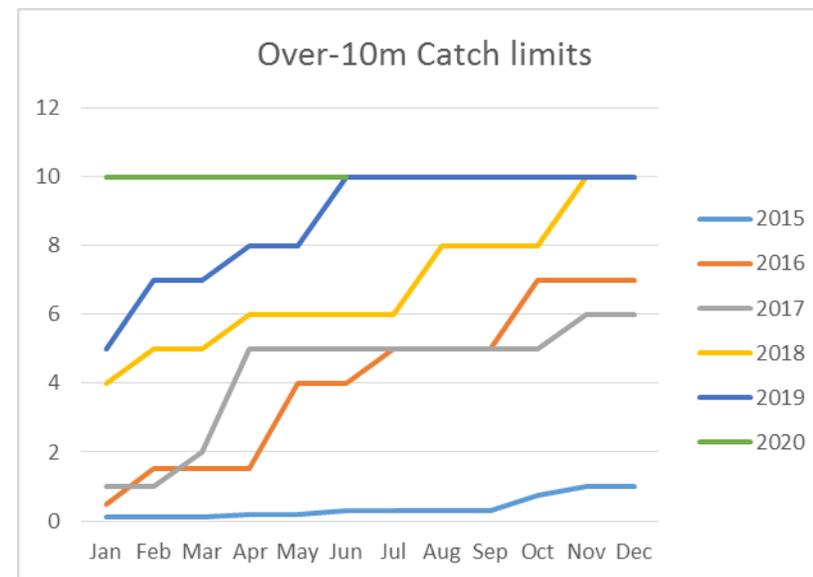

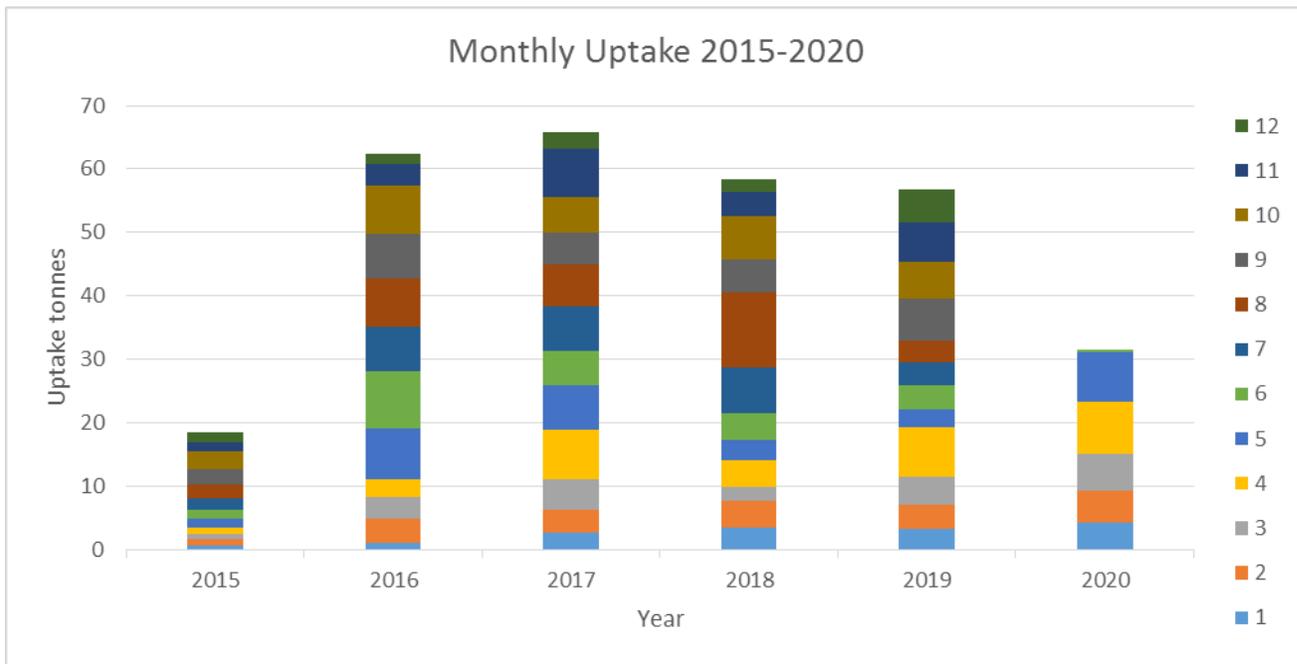

Available quota and total uptake

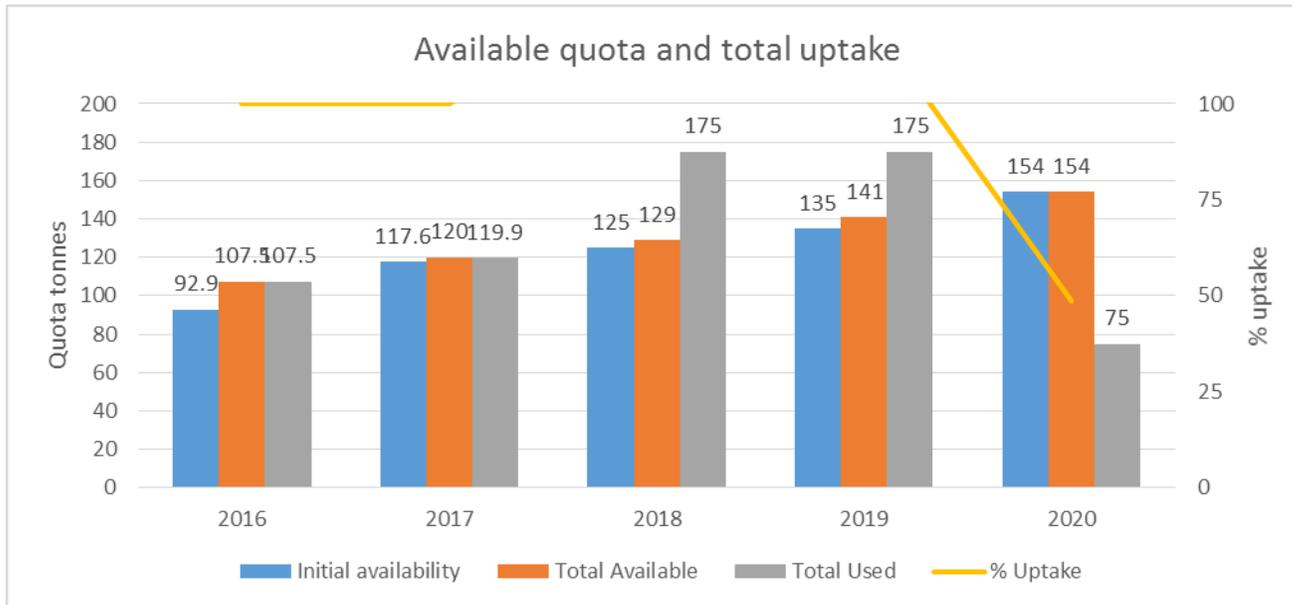

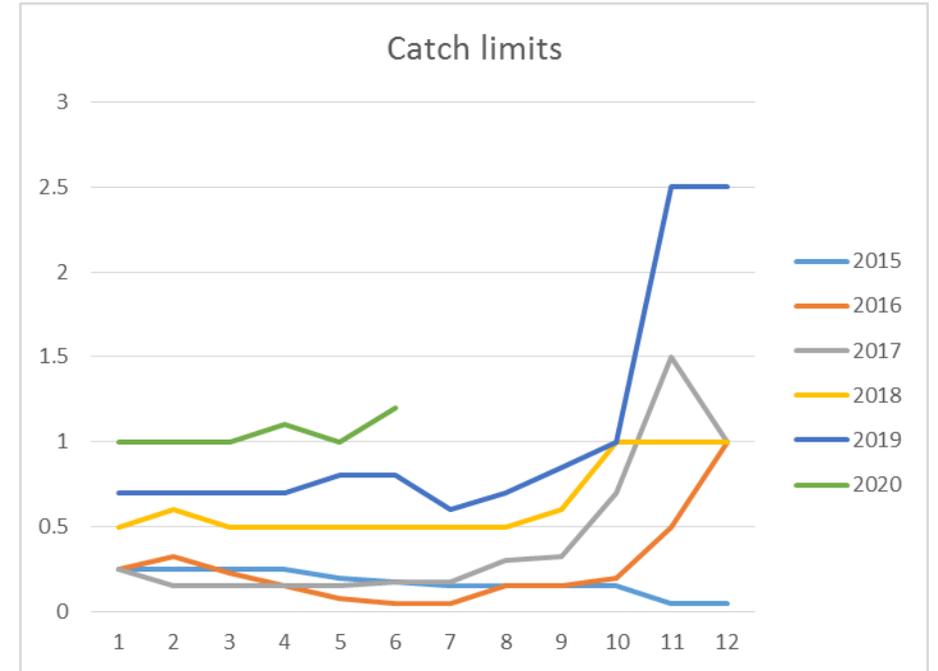

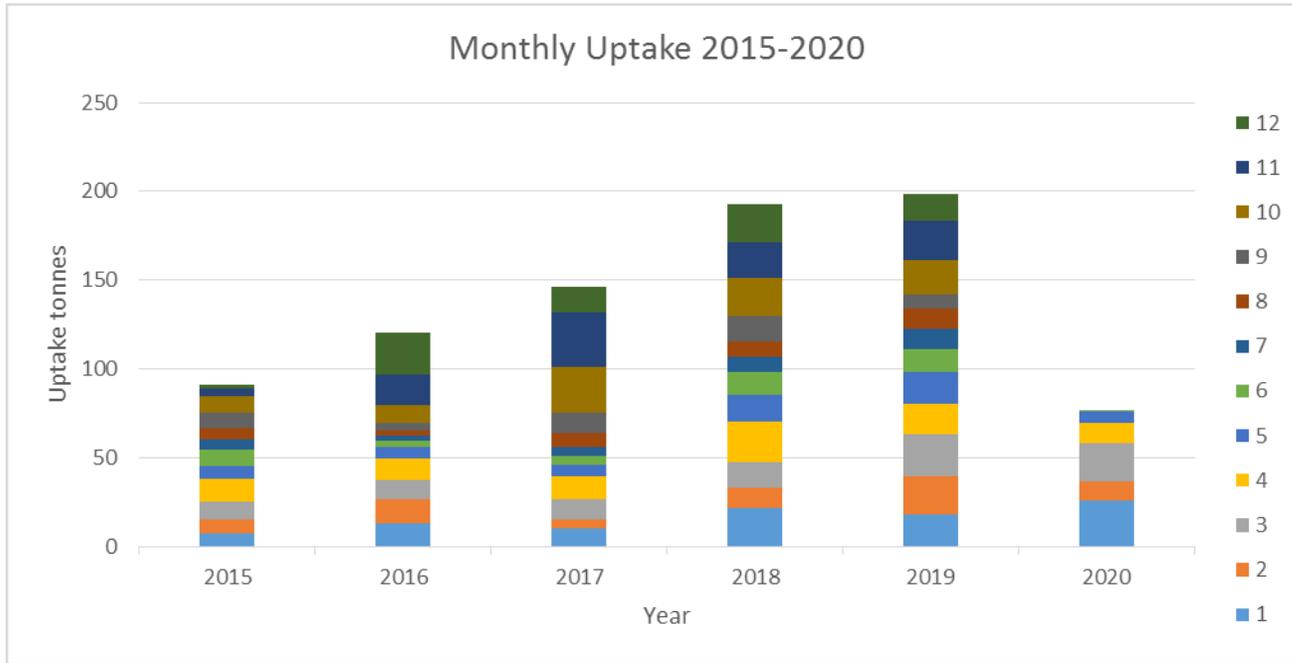

- 85% of this is landed into 7d.
- I understand that the fishing has been poor this year.
- Max monthly landing was 8t in April.
- Catch limits appear un-restrictive.

Over-10m Plaice VIId-e

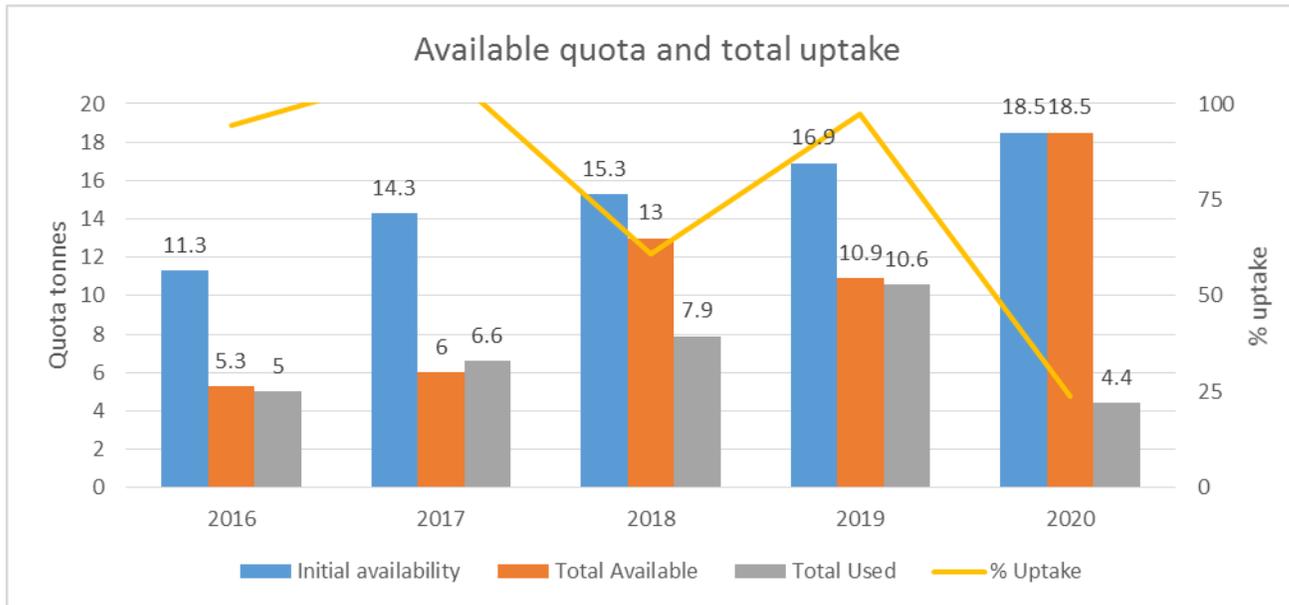

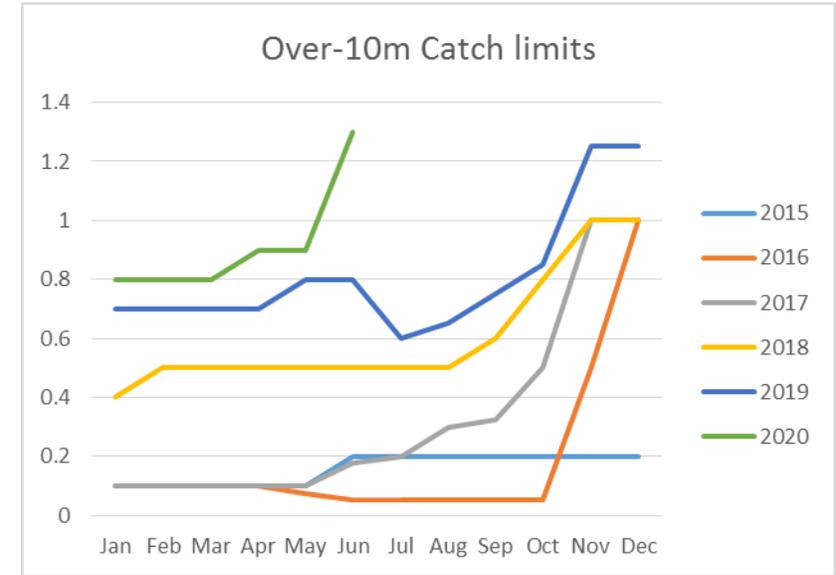

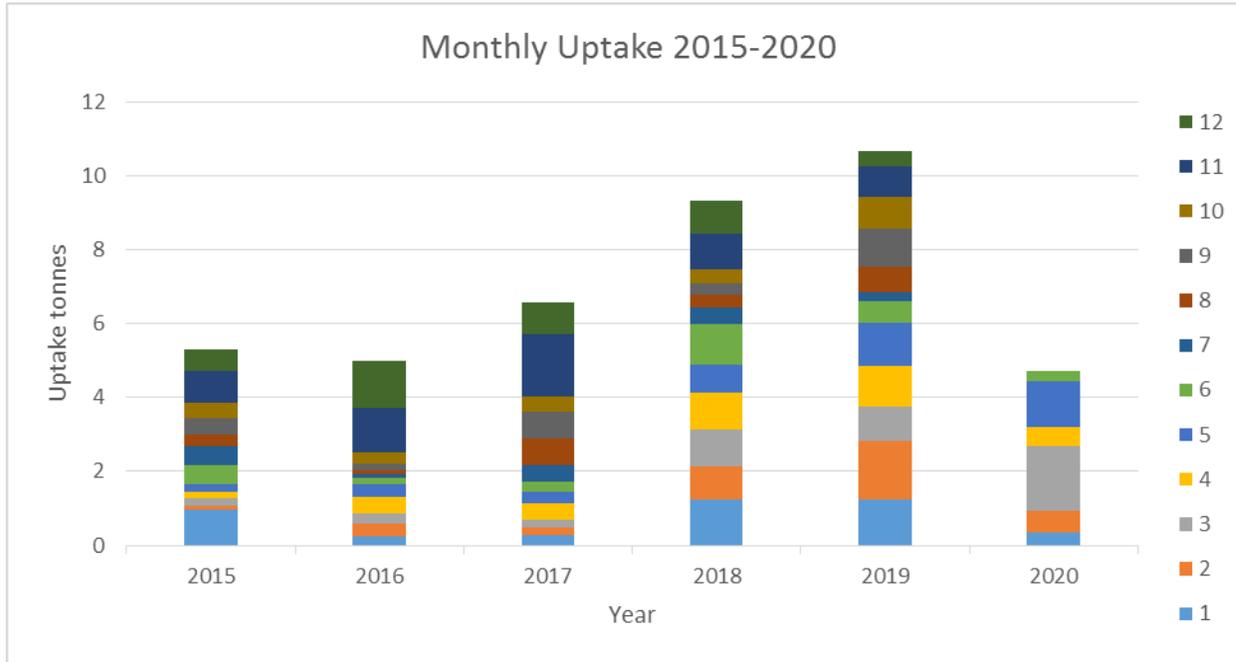

- 30% of this is landed into 7d.
- Max landing was 4.5t from 7e in April.
- Catch limits are unrestrictive.
- Can trade in from U10s if needed.

Under-10m Skate VIId

- We have an additional 40t of flexibility with the wider Area VI/VII that can be used this year.
- Uptake can therefore be regarded as 40%.
- Maximum monthly catch in May was ~500kg.
- I understand catch limits are OK but I can increase when needed.

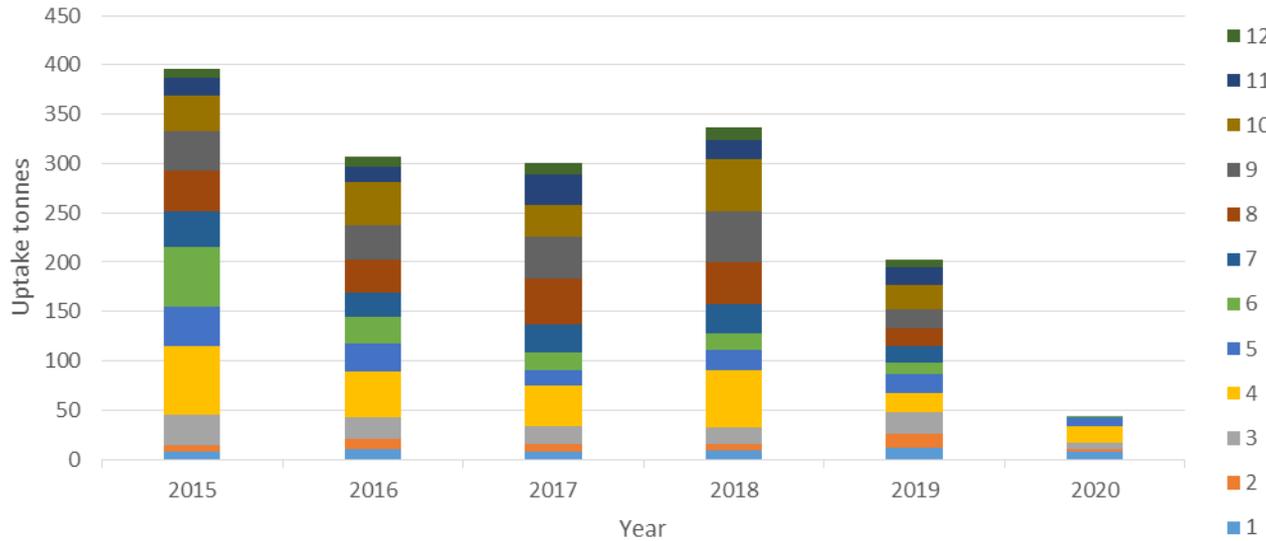

Over-10m Skate VIId

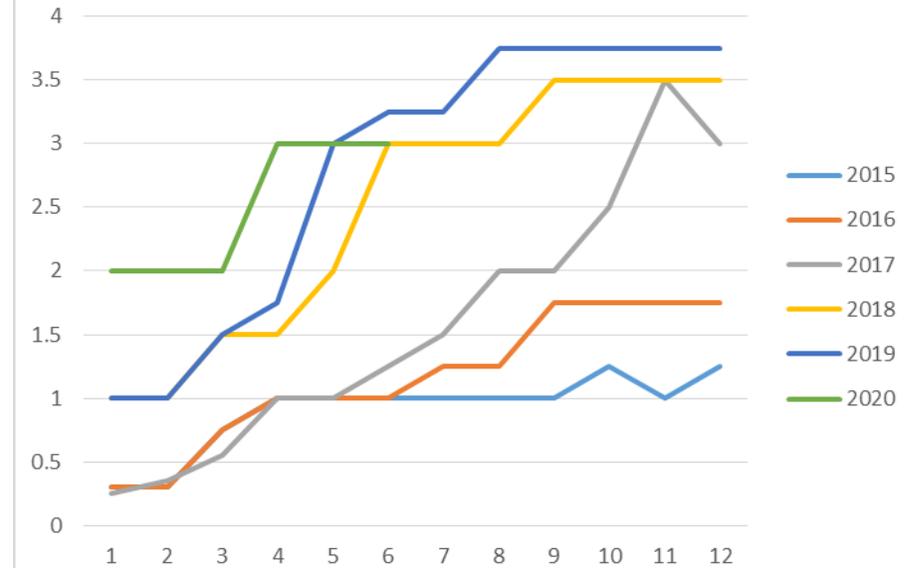

- Recent increase in catch limit to 1.3t following request from fisherman.
- Maximum monthly landing to-date was 800kg in March then 670kg in May.

Under-10m Sole VIId

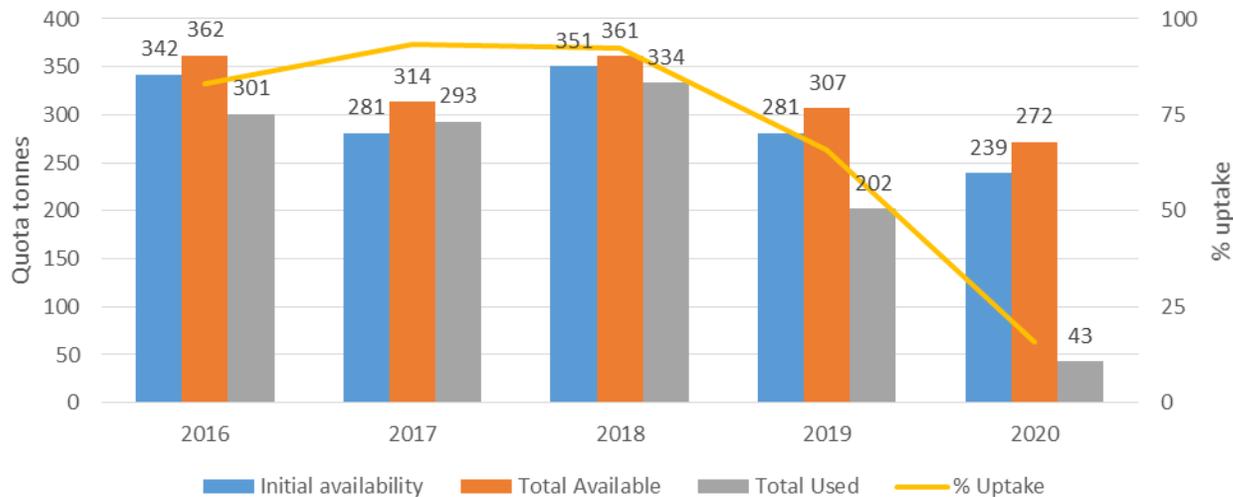

Monthly Uptake 2015-2020

Catch limits

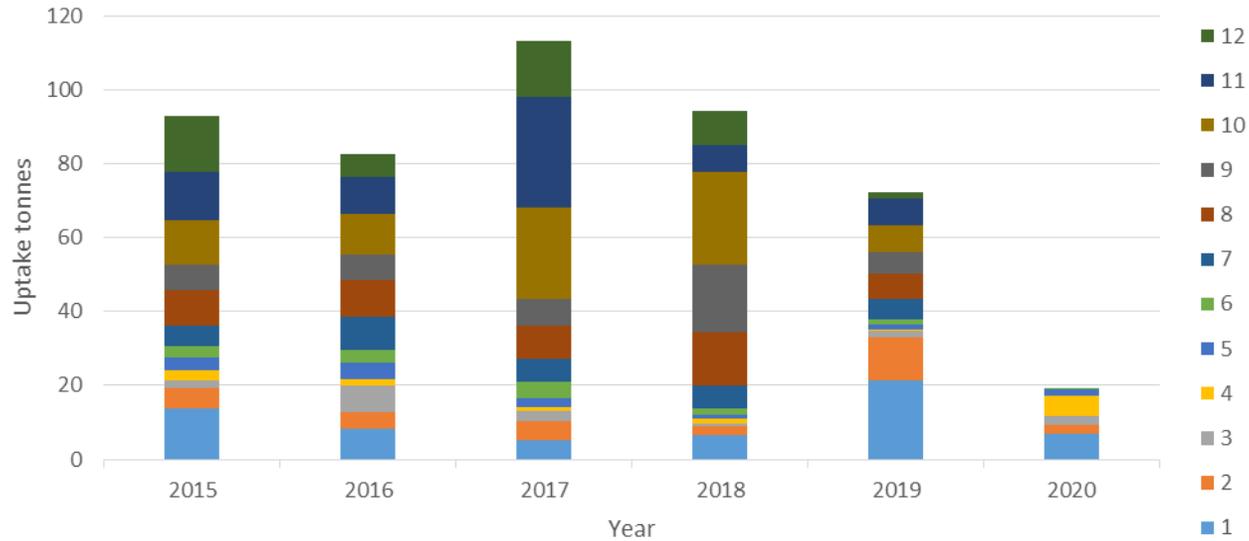

Available quota and total uptake

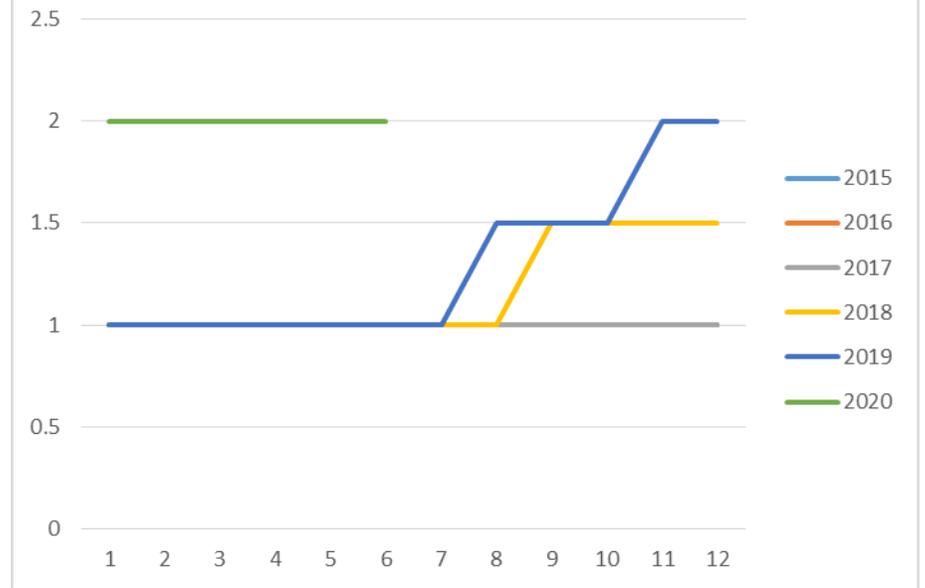

- I understand that the 'May Rot' and volume of spider crabs was particularly bad last year and is again this year.
- April highest landing was 2.5t and May was 700kg
- Over-10m uptake is 0.5t from an 5.1t available.

Under-10m Western Mackerel

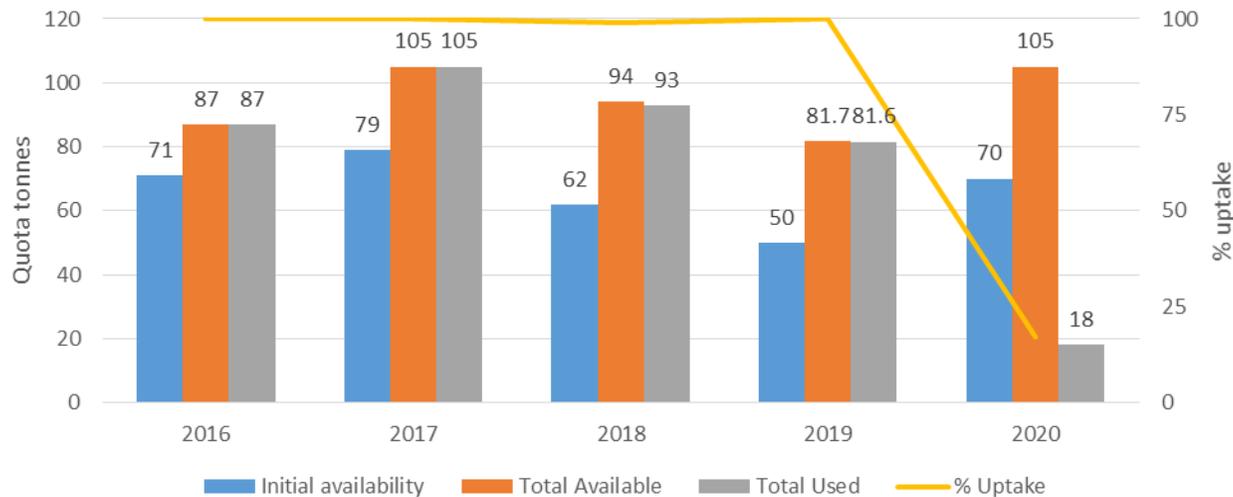

Monthly Uptake 2015-2020

Catch limits

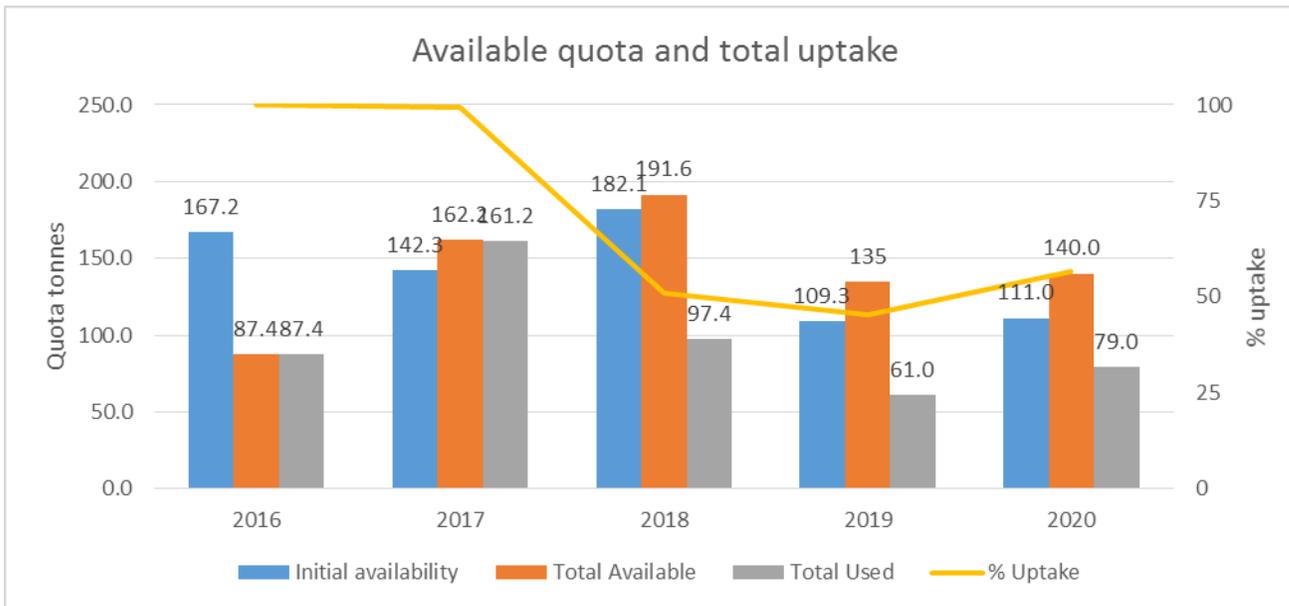

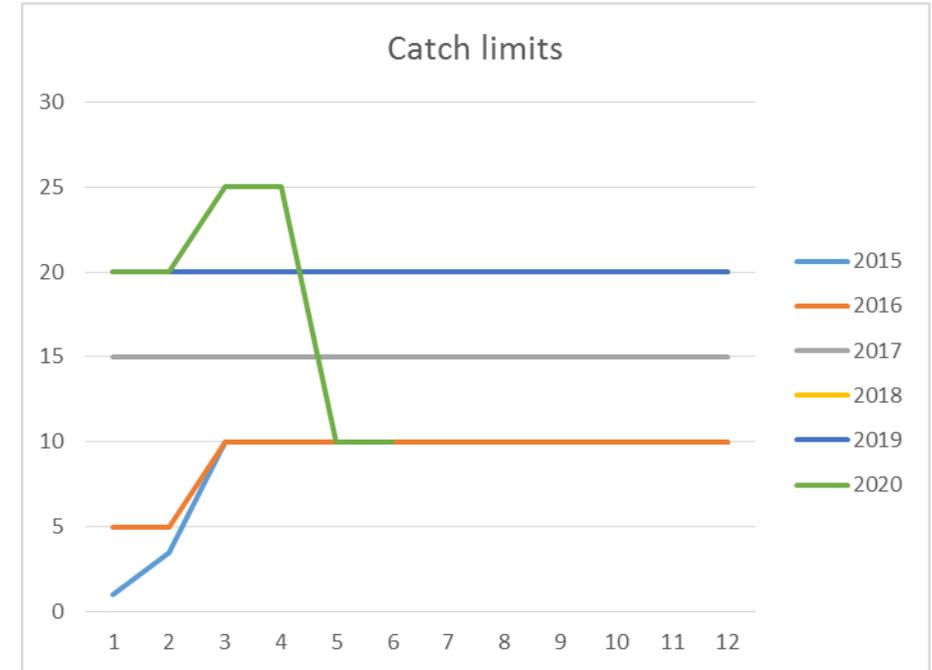

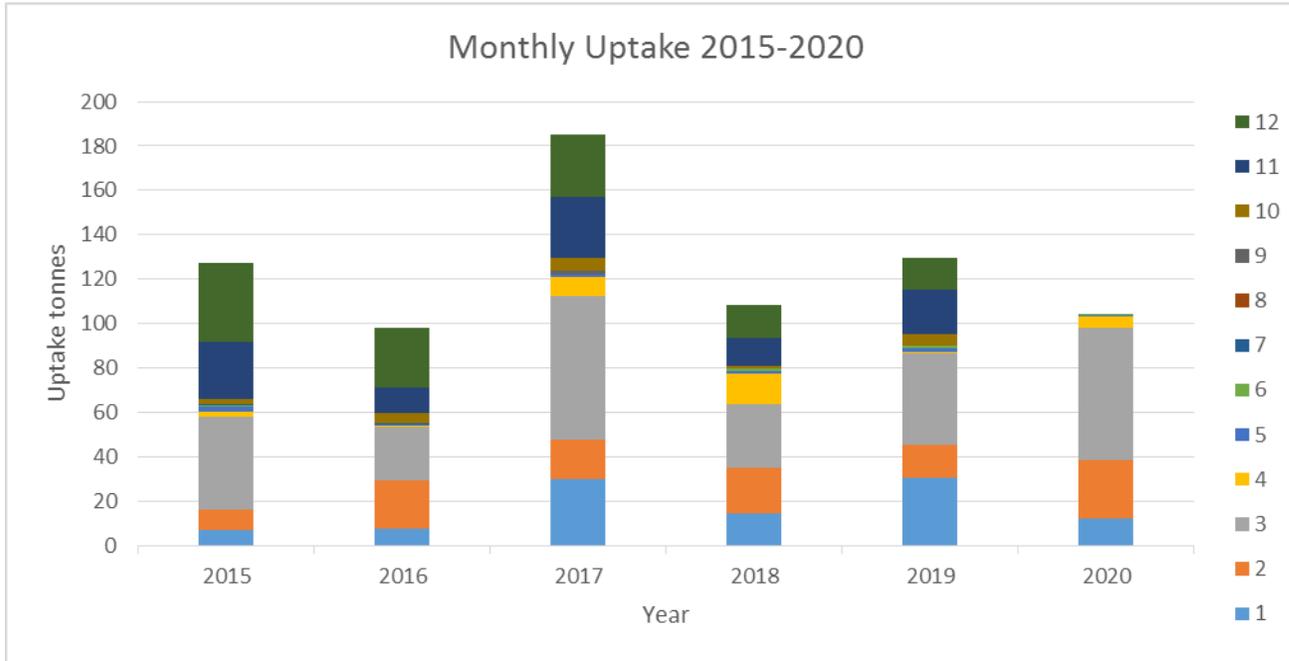

Available quota and total uptake

- Landings are predominantly into 7e. <20% into 7d.
- 2t catch limit appears ample but we have been asked to consider introducing a hand-line allowance that would allow catches up to potentially 10t per month if caught with hand-lines. Similar to the SW.
- Concern from other industry members however that increased landings may bring the landed value down.
- landings are supported from SW handline allocation when needed.
- **Over-10m uptake is 0.1t from an available 3t.**

Under-10m Herring IVc / VIId

- Predominantly a 4c fishery (<20% from 7d)
- Catch limits reduced in May as this is a winter fishery.
- I think we have sufficient quota for the remainder of the year but please advise if you know of vessels intending to target it this winter.
- Over-10m uptake is 0.8t from an available 0.9t. I will trade in from the under-10s if needed.
