## LEP geography Profiles

What follows are 38 LEP geography Profiles, one for each LEP Area. These covering a selection of indicators about the foundations of People, Ideas, Infrastructure, Business Environment and (implicitly) Place. Each profile is laid out as a two-page spread, showing these indicators together with visualisations providing additional breakdowns of interesting datasets. This underlying data will be released as part of the Outlook and is available for further analysis.

For each of the indicators in the profiles the value for the LEP Geography is shown, together with the % growth over the last three years (unless otherwise stated). Growth rates over multiple years smooth out some of the volatility found in year-on-year changes and allow for better trend identification. The England figures are shown as a comparator and to provide context. The information on growth rates, and the way it has been presented, allows the reader to spot trends across multiple indicators. It also allows readers to focus

the analysis on the evolution of LEP areas over time and the comparison of LEP geography trends with trends in England, rather than on benchmarking LEP areas against others.

Using all the indicators in the framework, the LEP geography profiles also show (in blue text) the indicators that stand out positively or negatively for each LEP geography. These have been algorithmically determined by using the top-5 indicators on the positive and negative side for each LEP geography, on the basis of each's indicator Z-Score. The Z-score measures the indicator value's relationship to the values of the same indicator for other geographies at the same level (i.e. how many standard deviations a particular data point differs from the mean value of what is being observed or measured). By taking all indicators for a particular geography, and sorting them by Z-score, it is possible to identify those that "stand out" the most for that particular geography (i.e. any LEP geography will be more or less of an outli-

er in different indicators).

A note of caution should be given about the experimental nature of this approach. This information is provided as additional food for thought and may present additional interesting aspects emerging from the data. However, each LEP geography will have its own already recognised set of strengths and weaknesses, which may or may not mirror those of the data presented here. It is essential to not take single data points and indicators at face value, and always triangulate the information gathered from multiple indicators with the local knowledge and narratives around growth and productivity of local areas.

## Data sources

The following datasets have been used throughout this report. These are subject to the data licences below:

- + Data from the UK Higher Education Statistics Agency: Creative Commons Attribution 4.0 International Licence<sup>34</sup>, except where otherwise stated.
- + ONS and ONS-NOMIS Data: Open Government Licence and UK Government Licensing Framework<sup>35</sup>
  - Geography lookups and national statistics: Contains National Statistics data © Crown copyright, 2019
  - Digital boundaries, reference maps, and OS Open Data used throughout the study: OS data © Crown copyright and database right, 2019; Royal Mail data © Royal Mail copyright and database right, 2019; National Statistics data © Crown copyright and database right, 2019;
- + Trade data collected by HM Revenue and Customs (HMRC): Contains National Statistics data © Crown copyright, 2019
- + Data from the Department for Transport (DfT), Department for Education (DfE), and Department for Environment, Food and Rural Affairs (DEFRA): Open Government Licence and UK Government Licensing Framework<sup>36</sup>
- + UKRI's Gateway to Research Data: Open Government Licence<sup>37</sup>
- + Data from Digital Science's GRID (Global Research Identifiers Database): Creative Commons Public Domain 1.0 International licence<sup>38</sup>
- + OFCOM Data on digital infrastructure: Contains information licensed by the Office of Communications<sup>39</sup>
- + Data from the ERC's growth dashboards accessed by ERC under the provisions of ERC's unified project with the UK Data Service's Secure Lab<sup>40</sup>

# Black Country

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Black Country	England
Population, 2017	1,186,098 (▲1.7%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	729,943 (▲1.2%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	17.4% (▼0.1%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	6.9% (▼22.5%)	4.5% (▼15.1%)
Jobs density, 2017	0.71 (▲1.4%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	3.65%	3.57%
HE Qualifiers, 2017-18	6,165 (▲2%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	28.9% (▲2.1%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£14,403 (▲1.7%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Black Country	England
Premises with full fibre broadband (%), 2018	1.9% (▲Inf%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	84.12% (▲22.8%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	492,890 (▲1%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	12 / 15 / 10 (▲1 / 2 / 2%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	4.1 (▼9.4%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	281.3	660.3
Air pollution, population weighted mean levels PM2.5, 2017	9.8 (▼6.1%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	10,909	2,549,499

Of the indicators in the framework, in Black Country LEP, the following stand out as positive developments: Percentage in non-permanent employment (3.0%), average minimum travel time to key services (car) (9.51 minutes), average minimum travel time to key services (cycle) (11.58 minutes), average minimum travel time to key services (public transport) (14.58 minutes), Percentage of premises with 4G service indoors (84.12%). On the other hand, the following indicators show potential areas of concern: Percentage of workforce with NVQ2 or less (42.3%), percentage of high growth firms (4.4%), life satisfaction mean score (7.49), unemployment 16+ (6.9%), percentage of workforce with NVQ4+ (28.9%).

# Ideas

Evidence shows that the generation of new knowledge contributes to long-term economic growth. The graph below shows the main topics (HESA cost centres) where national and international R&D funding has been awarded to Higher Education Institutions in the LEP. The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	Black Country	England
Firms undertaking R&D activities (% of firms), 2019	24.2% <span style="color: green;">▲21%</span>	21.0% <span style="color: green;">▲23.5%</span>
Value of grant funding, national, 2017	£925,000 <span style="color: red;">▼32.6%</span>	£3,855,181,000 <span style="color: green;">▲5.4%</span>
Value of grant funding, international, 2017	£3,279,000 <span style="color: green;">▲214.4%</span>	£1,204,459,000 <span style="color: green;">▲11.1%</span>
Number of active grants from UKRI and Innovate UK, 2018	122 <span style="color: red;">▼4.7%</span>	27,593 <span style="color: green;">▲29.1%</span>
Researcher staff in HE institutions, 2017	2,190 <span style="color: green;">▲3.1%</span>	303,750 <span style="color: green;">▲4.7%</span>
Employment in science, engineering and technology (%), 2018	5.5 <span style="color: green;">▲12.2%</span>	7.8 <span style="color: green;">▲5.4%</span>
Cummulative patent portfolio of HEIs, 2017	27 <span style="color: green;">▲125%</span>	16,454 <span style="color: green;">▲4.2%</span>
Income from contract research in HEIs, 2017	£1,665,000 <span style="color: green;">▲232.3%</span>	£1,161,159,000 <span style="color: green;">▲6.3%</span>
Active spin-offs from HEIs, 2017	24 <span style="color: red;">▼69.2%</span>	12,758 <span style="color: green;">▲15.6%</span>

# Business Environment

LEP economies have different specialisation profiles. The graph below shows the location quotients of major SIC sectors in the LEP, in terms of employment and business concentration, with respect to the England average. The size of the bubbles gives an idea of the size of these sectors in terms of number of jobs.

Indicator (3yr growth rates)	Black Country	England
GVA per hour worked (£), 2017	£27.3 <span style="color: green;">▲3%</span>	£34.1 <span style="color: green;">▲4.1%</span>
Regional GVA (all sectors, £ million), 2016	£ 20,120 <span style="color: green;">▲2.2%</span>	£1,498,232 <span style="color: green;">▲7%</span>
Business count, all sectors, 2018	39,825 <span style="color: green;">▲3.8%</span>	2,697,205 <span style="color: green;">▲4.4%</span>
Startups per 10K, 2017	39 <span style="color: green;">▲21.8%</span>	53 <span style="color: green;">▲8.2%</span>
Startup 3-year survival rate (%), 2017	54.9% <span style="color: green;">▲4.9%</span>	54.8% <span style="color: green;">▲2.2%</span>
Startups reaching £3m turnover (%), 2017	6% <span style="color: green;">▲15.3%</span>	8% <span style="color: green;">▲10.3%</span>
High growth firms, 2017 (%)	4.4% <span style="color: red;">▼6.1%</span>	6.4% <span style="color: green;">▲4.9%</span>
Product or service innovators (% firms), 2019	28.5% <span style="color: green;">▲42.5%</span>	25.2% <span style="color: green;">▲32.6%</span>
Process innovators (% firms), 2019	19.9% <span style="color: green;">▲65.8%</span>	17.0% <span style="color: green;">▲54.5%</span>

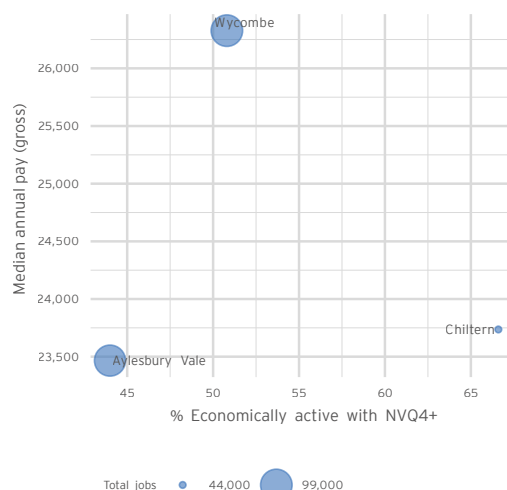

# Buckinghamshire Thames Valley

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Buckinghamshire Thames Valley	England
Population, 2017	535,918 (▲1.7%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	326,628 (▲0.9%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	18.6% (▲1.8%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	1.9% (▼50%)	4.5% (▼15.1%)
Jobs density, 2017	0.87 (▲3.6%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	4.44%	3.57%
HE Qualifiers, 2017-18	4,000 (▼5.1%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	51.2% (▼0.4%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£27,304 (▲3.1%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Buckinghamshire Thames Valley	England
Premises with full fibre broadband (%), 2018	5.0% (▲90.8%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	71.16% (▲26.5%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	219,990 (▲2.2%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	16 / 20 / 11 (▲10 / 2 / 3%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	5.6 (▼6.7%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	530.5	660.3
Air pollution, population weighted mean levels PM2.5, 2017	10.6 (▲16.8%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	12,027	2,549,499

Of the indicators in the framework, in Buckinghamshire Thames Valley LEP, the following stand out as positive developments: Percentage of firms with product or service innovations (38.1%), gross disposable household income (GDHI) per head (£27,304), percentage in employment who are self employed (15.9%), unemployment 16+ (1.9%), life satisfaction mean score (7.87). On the other hand, the following indicators show potential areas of concern: Ratio of median house price to median gross annual earnings (15.38), ratio of lower quartile house price to lower quartile gross annual earnings (19.33), air pollution (population-weighted mean levels PM2.5) (10.6), percentage in non-permanent employment (5.6%), percentage of startups reaching £3m turnover (6%).

# Ideas

Evidence shows that the generation of new knowledge contributes to long-term economic growth. The graph below shows the main topics (HESA cost centres) where national and international R&D funding has been awarded to Higher Education Institutions in the LEP. The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	Buckinghamshire Thames Valley	England
Firms undertaking R&D activities (% of firms), 2019	19.1% (▲36.4%)	21.0% (▲23.5%)
Value of grant funding, national, 2017	£324,000 (▼61.2%)	£3,855,181,000 (▲5.4%)
Value of grant funding, international, 2017	£ 65,000 (▼79.4%)	£1,204,459,000 (▲11.1%)
Number of active grants from UKRI and Innovate UK, 2018	123 (▲1.7%)	27,593 (▲29.1%)
Researcher staff in HE institutions, 2017	1,165 (▼1.3%)	303,750 (▲4.7%)
Employment in science, engineering and technology (%), 2018	8.1 (▼5.8%)	7.8 (▲5.4%)
Cummulative patent portfolio of HEIs, 2017	0	16,454 (▲4.2%)
Income from contract research in HEIs, 2017	£242,000 (▼67.2%)	£1,161,159,000 (▲6.3%)
Active spin-offs from HEIs, 2017	0	12,758 (▲15.6%)

# Business Environment

LEP economies have different specialisation profiles. The graph below shows the location quotients of major SIC sectors in the LEP, in terms of employment and business concentration, with respect to the England average. The size of the bubbles gives an idea of the size of these sectors in terms of number of jobs.

Indicator (3yr growth rates)	Buckinghamshire Thames Valley	England
GVA per hour worked (£), 2017	£37.1 (▲1.6%)	£34.1 (▲4.1%)
Regional GVA (all sectors, £ million), 2016	£ 16,097 (▲7.6%)	£1,498,232 (▲7%)
Business count, all sectors, 2018	33,905 (▲2.6%)	2,697,205 (▲4.4%)
Startups per 10K, 2017	60 (▲1.9%)	53 (▲8.2%)
Startup 3-year survival rate (%), 2017	58.6% (▲4.2%)	54.8% (▲2.2%)
Startups reaching £3m turnover (%), 2017	6% (▲22.7%)	8% (▲10.3%)
High growth firms, 2017 (%)	6.4% (▼1.6%)	6.4% (▲4.9%)
Product or service innovators (% firms), 2019	38.1% (▲124.1%)	25.2% (▲32.6%)
Process innovators (% firms), 2019	18.3%	17.0% (▲54.5%)

# Cheshire and Warrington

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Cheshire and Warrington	England
Population, 2017	926,536 (▲1%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	564,093 (▼0.2%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	21.1% (▲2.7%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	3.5% (▼10.3%)	4.5% (▼15.1%)
Jobs density, 2017	1.01 (▲6.3%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	4.72%	3.57%
HE Qualifiers, 2017-18	5,265 (▲11.4%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	47.4% (▲7.5%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£20,821 (▲0.6%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Cheshire and Warrington	England
Premises with full fibre broadband (%), 2018	2.9% (▲49.6%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	72.60% (▲43.6%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	419,960 (▲2%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	16 / 20 / 11 (▲8 / 6 / 4%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	8.8 (▼1.9%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	936.3	660.3
Air pollution, population weighted mean levels PM2.5, 2017	7.3 (▼12.8%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	26,385	2,549,499

Of the indicators in the framework, in Cheshire and Warrington LEP, the following stand out as positive developments: Percentage of startups reaching £1m turnover (2%), jobs density (1.01), percentage of high growth firms (7.4%), percentage of skills-shortage vacancies (15.99%), air pollution (population-weighted mean levels PM2.5) (7.3). On the other hand, the following indicators show potential areas of concern: CO<sub>2</sub> emissions (8.8 t per capita), job vacancy rate (4.72%), active spin-offs from HEIs (0), percentage of economically active with trade apprenticeships (2.8%), researcher staff in HE institutions (1,830).

# Ideas

Evidence shows that the generation of new knowledge contributes to long-term economic growth. The graph below shows the main topics (HESA cost centres) where national and international R&D funding has been awarded to Higher Education Institutions in the LEP. The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	Cheshire and War rington	England

# Coast to Capital

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Coast to Capital	England
Population, 2017	2,027,861 (▲1.5%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	1,258,980 (▲0.9%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	19.1% (▲1.4%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	4.4% (▲22.2%)	4.5% (▼15.1%)
Jobs density, 2017	0.81 (▲0%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	4.96%	3.57%
HE Qualifiers, 2017-18	14,205 (▲7.2%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	50.7% (▲5.2%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£23,174 (▲2.5%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Coast to Capital	England
Premises with full fibre broadband (%), 2018	5.0% (▲123.4%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	78.47% (▲30.9%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	873,860 (▲2%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	14 / 17 / 10 (▲7 / 4 / 3%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	4.2 (▼6.5%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	552.3	660.3
Air pollution, population weighted mean levels PM2.5, 2017	10.6 (▲14.4%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	49,344	2,549,499

Of the indicators in the framework, in Coast to Capital LEP, the following stand out as positive developments: Percentage of workforce with NVQ4+ (50.7%), gross disposable household income (GDHI) per head (£23,174), percentage of workforce with NVQ2 or less (25.4%), percentage in employment who are self employed (12.6%), CO<sub>2</sub> emissions (4.2 t per capita). On the other hand, the following indicators show potential areas of concern: Ratio of median house price to median gross annual earnings (14.75), percentage of economically active with trade apprenticeships (1.9%), ratio of lower quartile house price to lower quartile gross annual earnings (18.50), job vacancy rate (4.96%), air pollution (population-weighted mean levels PM2.5) (10.6).

# Ideas

Evidence shows that the generation of new knowledge contributes to long-term economic growth. The graph below shows the main topics (HESA cost centres) where national and international R&D funding has been awarded to Higher Education Institutions in the LEP. The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	Coast to Capital	England
Firms undertaking R&D activities (% of firms), 2019	22.2% <span style="color: green;">▲30.6%</span>	21.0% <span style="color: green;">▲23.5%</span>
Value of grant funding, national, 2017	£ 35,564,000 <span style="color: green;">▲4.6%</span>	£3,855,181,000 <span style="color: green;">▲5.4%</span>
Value of grant funding, international, 2017	£ 10,176,000 <span style="color: red;">▼6.9%</span>	£1,204,459,000 <span style="color: green;">▲11.1%</span>
Number of active grants from UKRI and Innovate UK, 2018	742 <span style="color: green;">▲7.2%</span>	27,593 <span style="color: green;">▲29.1%</span>
Researcher staff in HE institutions, 2017	5,640 <span style="color: green;">▲6%</span>	303,750 <span style="color: green;">▲4.7%</span>
Employment in science, engineering and technology (%), 2018	8.8 <span style="color: green;">▲2.3%</span>	7.8 <span style="color: green;">▲5.4%</span>
Cummulative patent portfolio of HEIs, 2017	102 <span style="color: red;">▼18.4%</span>	16,454 <span style="color: green;">▲4.2%</span>
Income from contract research in HEIs, 2017	£ 15,119,000 <span style="color: green;">▲5.3%</span>	£1,161,159,000 <span style="color: green;">▲6.3%</span>

Startups reaching £3m turnover (%), 2017	7% <span style="color: green;">▲25%</span>	8% <span style="color: green;">▲10.3%</span>
High growth firms, 2017 (%)	6.7% <span style="color: green;">▲1.6%</span>	6.4% <span style="color: green;">▲4.9%</span>
Product or service innovators (% firms), 2019	26.1% <span style="color: green;">▲37.4%</span>	25.2% <span style="color: green;">▲32.6%</span>
Process innovators (% firms), 2019	14.8% <span style="color: green;">▲13.8%</span>	17.0% <span style="color: green;">▲54.5%</span>

# Cornwall and Isles of Scilly

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Cornwall and Isles of Scilly	England
Population, 2017	563,608 (▲2%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	330,285 (▲1%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	24.5% (▲2.1%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	2.9% (▼47.3%)	4.5% (▼15.1%)
Jobs density, 2017	0.87 (▲6.1%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	3.01%	3.57%
HE Qualifiers, 2017-18	1,630 (▲24%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	37.7% (▲5%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£17,021 (▲0.6%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Cornwall and Isles of Scilly	England
Premises with full fibre broadband (%), 2018	30.8% (▲6.9%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	59.86% (▲110.8%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	275,350 (▲2.1%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	25 / 27 / 13 (▲14 / 5 / 3%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	5.1 (▼12.2%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	605.0	660.3
Air pollution, population weighted mean levels PM2.5, 2017	6.8 (▼23.3%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	16,585	2,549,499

Of the indicators in the framework, in Cornwall and Isles of Scilly LEP, the following stand out as positive developments: Percentage of premises with full fibre broadband (30.8%), percentage in employment who are self employed (17.6%), air pollution (population-weighted mean levels PM2.5) (6.8), unemployment 16+ (2.9%), life satisfaction mean score (7.82). On the other hand, the following indicators show potential areas of concern: Average minimum travel time to key services (cycle) (24.87 minutes), average minimum travel time to key services (car) (13.41 minutes), average minimum travel time to key services (public transport) (27.07 minutes), percentage of startups reaching £3m turnover (4%), Percentage of premises with 4G service outdoors (73.84%).

Value of grant funding, international, 2017	£ 33,000 (▼3400%)	£1,204,459,000 (▲11.1%)
Number of active grants from UKRI and Innovate UK, 2018	77 (▲10%)	27,593 (▲29.1%)
Researcher staff in HE institutions, 2017	805 (▼12%)	303,750 (▲4.7%)
Employment in science, engineering and technology (%), 2018	6.3 (▼6%)	7.8 (▲5.4%)
Cummulative patent portfolio of HEIs, 2017	0	16,454 (▲4.2%)
Income from contract research in HEIs, 2017	£277,000 (▲93.7%)	£1,161,159,000 (▲6.3%)
Active spin-offs from HEIs, 2017	87 (▲102.3%)	12,758 (▲15.6%)

# Business Environment

LEP economies have different specialisation profiles. The graph below shows the location quotients of major SIC sectors in the LEP, in terms of employment and business concentration, with respect to the England average. The size of the bubbles gives an idea of the size of these sectors in terms of number of jobs.

Indicator (3yr growth rates)	Cumbria	England
GVA per hour worked (£), 2017	£29.3 (▲4.2%)	£34.1 (▲4.1%)
Regional GVA (all sectors, £ million), 2016	£ 11,853 (▲7.8%)	£1,498,232 (▲7%)
Business count, all sectors, 2018	28,110 (▲0.2%)	2,697,205 (▲4.4%)
Startups per 10K, 2017	30 (▼17.7%)	53 (▲8.2%)
Startup 3-year survival rate (%), 2017	57.9% (▼4.9%)	54.8% (▲2.2%)
Startups reaching £3m turnover (%), 2017	4% (▼25.7%)	8% (▲10.3%)
High growth firms, 2017 (%)	5.0% (▼1.1%)	6.4% (▲4.9%)
Product or service innovators (% firms), 2019	21.3% (▲52.1%)	25.2% (▲32.6%)
Process innovators (% firms), 2019	20.5%	17.0% (▲54.5%)

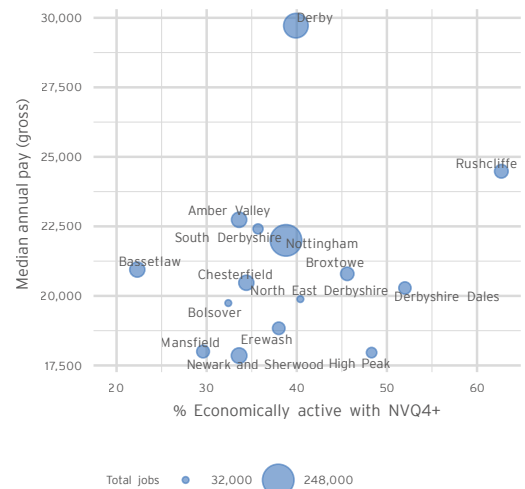

# Derby, Derbyshire, Nottingham and Nottinghamshire

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Derby, Derbyshire, Nottingham and Nottinghamshire	England
Population, 2017	2,196,060 (▲1.6%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	1,381,552 (▲0.9%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	18.9% (▲1.8%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	4.2% (▼14.3%)	4.5% (▼15.1%)
Jobs density, 2017	0.79 (▲2.6%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	2.61%	3.57%
HE Qualifiers, 2017-18	27,475 (▲10.9%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	37.8% (▲4.7%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£16,303 (▼0.5%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Derby, Derbyshire, Nottingham and Nottinghamshire	England
Premises with full fibre broadband (%), 2018	3.6% (▲596.2%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	78.17% (▲36.6%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	963,460 (▲1.5%)	23,950,000 (▲1.7%)
Average minium travel time to key services in minutes (cycle / public transport / car), 2016	16 / 18 / 11 (▲14 / 3 / 3%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	6.5 (▼8.1%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	604.9	660.3
Air pollution, population weighted mean levels PM2.5, 2017	9.2 (▼5.7%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	110,418	2,549,499

Of the indicators in the framework, in Derby, Derbyshire, Nottingham and Nottinghamshire LEP, the following stand out as positive developments: Income from regeneration and development programmes (£ 13,559,000), job vacancy rate (2.61%), percentage of skills-shortage vacancies (18.71%), percentage of difficult to fill vacancies (28.28%), ratio of median house price to median gross annual earnings (7.24). On the other hand, the following indicators show potential areas of concern: Gross disposable household income (GDHI) per head (£16,303), percentage of firms with product or service innovations (22.8%), percentage in employment who are self employed (8.9%), jobs density (0.79), startups per 10K population (35).

# Ideas

Evidence shows that the generation of new knowledge contributes to long-term economic growth. The graph below shows the main topics (HESA cost centres) where national and international R&D funding has been awarded to Higher Education Institutions in the LEP. The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	Derby, Derbyshire, Nottingham and Nottinghamshire	England
Firms undertaking R&D activities (% of firms), 2019	18.7% <span style="color: green;">▲10%</span>	21.0% <span style="color: green;">▲23.5%</span>
Value of grant funding, national, 2017	£100,335,000 <span style="color: green;">▲0.1%</span>	£3,855,181,000 <span style="color: green;">▲5.4%</span>
Value of grant funding, international, 2017	£ 26,662,000 <span style="color: red;">▼13.2%</span>	£1,204,459,000 <span style="color: green;">▲11.1%</span>

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Gloucestershire	England
Premises with full fibre broadband (%), 2018	8.4% (▲88.6%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	64.10% (▲69.1%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	284,580 (▲2%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	17 / 20 / 11 (▲8 / 1 / 3%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	5.7 (▼8.5%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	629.3	660.3
Air pollution, population weighted mean levels PM2.5, 2017	8.8 (▼1.2%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	27,649	2,549,499

Of the indicators in the framework, in Gloucestershire LEP, the following stand out as positive developments: Startup 3-year survival rate (61.3%), unemployment 16+ (2.9%), percentage in non-permanent employment (3.8%), percentage of firms undertaking R&D activities (24.8%), percentage of firms with product or service innovations (28.0%). On the other hand, the following indicators show potential areas of concern: Percentage of startups reaching £3m turnover (5%), percentage of firms implementing process innovation (14.0%), Percentage of premises with 4G service indoors (64.10%), percentage of startups reaching £1m turnover (1%), percentage of difficult or hard to fill vacancies (42.67%).

The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	Gloucestershire	England
Firms undertaking R&D activities (% of firms), 2019	24.8% (▲24%)	21.0% (▲23.5%)
Value of grant funding, national, 2017	£596,000 (▼9.1%)	£3,855,181,000 (▲5.4%)
Value of grant funding, international, 2017	£913,000 (▲12.7%)	£1,204,459,000 (▲11.1%)
Number of active grants from UKRI and Innovate UK, 2018	347 (▲5.8%)	27,593 (▲29.1%)
Researcher staff in HE institutions, 2017	1,120 (▲4.7%)	303,750 (▲4.7%)
Employment in science, engineering and technology (%), 2018	8.3 (▼1.2%)	7.8 (▲5.4%)
Cummulative patent portfolio of HEIs, 2017	0	16,454 (▲4.2%)
Income from contract research in HEIs, 2017	£600,000 (▲17.6%)	£1,161,159,000 (▲6.3%)
Active spin-offs from HEIs, 2017	33 (▲10%)	12,758 (▲15.6%)

# Business Environment

LEP economies have different specialisation profiles. The graph below shows the location quotients of major SIC sectors in the LEP, in terms of employment and business concentration, with respect to the England average. The size of the bubbles gives an idea of the size of these sectors in terms of number of jobs.

Indicator (3yr growth rates)	Gloucestershire	England
GVA per hour worked (£), 2017	£32.2 ▲5.4%	£34.1 ▲4.1%
Regional GVA (all sectors, £ million), 2016	£ 16,259 ▲5%	£1,498,232 ▲7%
Business count, all sectors, 2018	34,020 ▲3.6%	2,697,205 ▲4.4%
Startups per 10K, 2017	38 ▼6.7%	53 ▲8.2%
Startup 3-year survival rate (%), 2017	61.3% ▲5.9%	54.8% ▲2.2%
Startups reaching £3m turnover (%), 2017	5% ▼20.6%	8% ▲10.3%
High growth firms, 2017 (%)	6.3% ▼3.5%	6.4% ▲4.9%
Product or service innovators (% firms), 2019	28.0% ▲7.7%	25.2% ▲32.6%
Process innovators (% firms), 2019	14.0% ▲7.7%	17.0% ▲54.5%

# Greater Birmingham and Solihull

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Greater Birmingham and Solihull	England
Population, 2017	2,031,281 (▲1.6%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	1,273,876 (▲1.4%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	16.4% (▲0.8%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	6.1% (▼12.9%)	4.5% (▼15.1%)
Jobs density, 2017	0.84 (▲5%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	5.41%	3.57%
HE Qualifiers, 2017-18	27,610 (▲3.5%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	39.0% (▲2.1%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£16,476 (▲1.1%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Greater Birmingham and Solihull	England
Premises with full fibre broadband (%), 2018	2.6% (▲115.9%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	80.88% (▲31.1%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	820,720 (▲1.2%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	13 / 16 / 10 (▲11 / 3 / 4%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	4.6 (▼8.8%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	1,381.8	660.3
Air pollution, population weighted mean levels PM2.5, 2017	9.8 (▼0.4%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	42,181	2,549,499

Of the indicators in the framework, in Greater Birmingham and Solihull LEP, the following stand out as positive developments: Income from regeneration and development programmes (£ 40,060,000), business demography net change (births-deaths) (3,610), startups per 10K population (67), public green spaces (1,381.8 ha per 10,000 population), average minimum travel time to key services (car) (9.92 minutes). On the other hand, the following indicators show potential areas of concern: Job vacancy rate (5.41%), percentage of economically active with trade apprenticeships (1.8%), unemployment 16+ (6.1%), percentage of skills-shortage vacancies (32.18%), percentage in non-permanent employment (5.5%).

# Heart of the South West

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Heart of the South West	England
Population, 2017	1,740,683 (▲1.6%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	1,030,699 (▲0.5%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	23.8% (▲2.4%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	3.3% (▼19.5%)	4.5% (▼15.1%)
Jobs density, 2017	0.87 (▲1.2%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	3.74%	3.57%
HE Qualifiers, 2017-18	17,370 (▲3%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	38.4% (▼0.5%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£18,071 (▼0.4%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Heart of the South West	England
Premises with full fibre broadband (%), 2018	3.2% (▲102.8%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	66.60% (▲59.5%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	805,710 (▲1.9%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	19 / 22 / 12 (▲18 / 6 / 4%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	5.1 (▼10.9%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	437.0	660.3
Air pollution, population weighted mean levels PM2.5, 2017	7.8 (▼11.4%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	114,751	2,549,499

Of the indicators in the framework, in Heart of the South West LEP, the following stand out as positive developments: Life satisfaction mean score (7.83), percentage in employment who are self employed (13.0%), startup 3-year survival rate (58.1%), air pollution (population-weighted mean levels PM2.5) (7.8), Internal migration (within the UK) (14,804.83). On the other hand, the following indicators show potential areas of concern: Percentage of premises with 4G service outdoors (73.48%), percentage of high growth firms (5.0%), aged dependency ratio (23.8%), percentage of difficult or hard to fill vacancies (44.82%), startups per 10K population (30).

# Ideas

Evidence shows that the generation of new knowledge contributes to long-term economic growth. The graph below shows the main topics (HESA cost centres) where national and international R&D funding has been awarded to Higher Education Institutions in the LEP. The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	Heart of the South West	England
Firms undertaking R&D activities (% of firms), 2019	21.2% <span style="color: green;">▲17.8%</span>	21.0% <span style="color: green;">▲23.5%</span>
Value of grant funding, national, 2017	£ 64,950,000 <span style="color: green;">▲12.7%</span>	£3,855,181,000 <span style="color: green;">▲5.4%</span>
Value of grant funding, international, 2017	£ 24,228,000 <span style="color: green;">▲38.2%</span>	£1,204,459,000 <span style="color: green;">▲11.1%</span>
Number of active grants from UKRI and Innovate UK, 2018	1,091 <span style="color: green;">▲9.8%</span>	27,593 <span style="color: green;">▲29.1%</span>
Researcher staff in HE institutions, 2017	7,710 <span style="color: green;">▲6.9%</span>	303,750 <span style="color: green;">▲4.7%</span>
Employment in science, engineering and technology (%), 2018	6.2 <span style="color: green;">▲12.7%</span>	7.8 <span style="color: green;">▲5.4%</span>
Cummulative patent portfolio of HEIs, 2017	150 <span style="color: green;">▲11.9%</span>	16,454 <span style="color: green;">▲4.2%</span>
Income from contract research in HEIs, 2017	£ 20,626,000 <span style="color: green;">▲24.7%</span>	£1,161,159,000 <span style="color: green;">▲6.3%</span>
Active spin-offs from HEIs, 2017	185 <span style="color: green;">▲31.2%</span>	12,758 <span style="color: green;">▲15.6%</span>

# Business Environment

LEP economies have different specialisation profiles. The graph below shows the location quotients of major SIC sectors in the LEP, in terms of employment and business concentration, with respect to the England average. The size of the bubbles gives an idea of the size of these sectors in terms of number of jobs.

Indicator (3yr growth rates)	Heart of the South West	England
GVA per hour worked (£), 2017	£279 <span style="color: green;">▲5.2%</span>	£341 <span style="color: green;">▲4.1%</span>
Regional GVA (all sectors, £ million), 2016	£ 34,231 <span style="color: green;">▲6.1%</span>	£1,498,232 <span style="color: green;">▲7%</span>
Business count, all sectors, 2018	84,485 <span style="color: green;">▲1.9%</span>	2,697,205 <span style="color: green;">▲4.4%</span>
Startups per 10K, 2017	30 <span style="color: red;">▼4%</span>	53 <span style="color: green;">▲8.2%</span>
Startup 3-year survival rate (%), 2017	58.1% <span style="color: green;">▲4.6%</span>	54.8% <span style="color: green;">▲2.2%</span>
Startups reaching £3m turnover (%), 2017	6% <span style="color: green;">▲12.6%</span>	8% <span style="color: green;">▲10.3%</span>
High growth firms, 2017 (%)	5.0% <span style="color: red;">▼8.3%</span>	6.4% <span style="color: green;">▲4.9%</span>
Product or service innovators (% firms), 2019	25.0% <span style="color: green;">▲31.6%</span>	25.2% <span style="color: green;">▲32.6%</span>
Process innovators (% firms), 2019	17.3% <span style="color: green;">▲73%</span>	17.0% <span style="color: green;">▲54.5%</span>

Premises with full fibre broadband (%), 2018	2.9% (▲64.1%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	77.74% (▲25.8%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	670,820 (▲1.3%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	14 / 16 / 10 (▲5 / 3 / 3%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	5.7 (▼7.5%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	619.0	660.3
Air pollution, population weighted mean levels PM2.5, 2017	7.0 (▼16.3%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	83,313	2,549,499

Of the indicators in the framework, in Lancashire LEP, the following stand out as positive developments: Percentage of economically active with trade apprenticeships (5.1%), percentage of startups reaching £1m turnover (2%), active spin-offs from HEIs (1,052), air pollution (population-weighted mean levels PM2.5) (7.0), ratio of lower quartile house price to lower quartile gross annual earnings (7.19). On the other hand, the following indicators show potential areas of concern: Life satisfaction mean score (7.61), gross disposable household income (GDHI) per head (£16,110), percentage in employment who are self employed (8.8%), port freight (4,630 tonnes), percentage in non-permanent employment (5.4%).

# Business Environment

LEP economies have different specialisation profiles. The graph below shows the location quotients of major SIC sectors in the LEP, in terms of employment and business concentration, with respect to the England average. The size of the bubbles gives an idea of the size of these sectors in terms of number of jobs.

Indicator (3yr growth rates)	Lancashire	England
GVA per hour worked (£), 2017	£30.4 <span style="color: green;">▲9.3%</span>	£34.1 <span style="color: green;">▲4.1%</span>
Regional GVA (all sectors, £ million), 2016	£ 30,821 <span style="color: green;">▲8.3%</span>	£1,498,232 <span style="color: green;">▲7%</span>
Business count, all sectors, 2018	61,600 <span style="color: green;">▲3.1%</span>	2,697,205 <span style="color: green;">▲4.4%</span>
Startups per 10K, 2017	38 <span style="color: green;">▲7.6%</span>	53 <span style="color: green;">▲8.2%</span>
Startup 3-year survival rate (%), 2017	55.2% <span style="color: green;">▲2.2%</span>	54.8% <span style="color: green;">▲2.2%</span>
Startups reaching £3m turnover (%), 2017	6% <span style="color: green;">▲12.9%</span>	8% <span style="color: green;">▲10.3%</span>
High growth firms, 2017 (%)	6.7% <span style="color: green;">▲4.8%</span>	6.4% <span style="color: green;">▲4.9%</span>
Product or service innovators (% firms), 2019	24.1% <span style="color: green;">▲0.4%</span>	25.2% <span style="color: green;">▲32.6%</span>
Process innovators (% firms), 2019	18.5% <span style="color: green;">▲42.3%</span>	17.0% <span style="color: green;">▲54.5%</span>

# Leeds City Region

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Leeds City Region	England
Population, 2017	3,063,074 (▲1.2%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	1,927,537 (▲0.5%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	17.4% (▲1.8%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	4.7% (▼21.7%)	4.5% (▼15.1%)
Jobs density, 2017	0.82 (▲1.2%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	4.49%	3.57%
HE Qualifiers, 2017-18	40,250 (▲4.6%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	38.9% (▲8.4%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£16,240 (▼0.6%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Leeds City Region	England
Premises with full fibre broadband (%), 2018	6.0% (▲206%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	82.76% (▲20%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	1,328,440 (▲1.4%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	14 / 17 / 10 (▲8 / 3 / 4%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	5.3 (▼6%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	409.9	660.3
Air pollution, population weighted mean levels PM2.5, 2017	7.7 (▼5.6%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	94,07	2,549,499

Of the indicators in the framework, in Leeds City Region LEP, the following stand out as positive developments: Percentage of difficult or hard to fill vacancies (18.07%), percentage of skills-shortage vacancies (13.61%), Percentage of premises with 4G service indoors (82.76%), housing stock, including vacant (1,328,440), population (3,063,074). On the other hand, the following indicators show potential areas of concern: Job vacancy rate (4.49%), gross disposable household income (GDHI) per head (£16,240), public green spaces (409.9 ha per 10,000 population), employment in science, engineering and technology (6.5%), GVA per hour worked (£29.2).

# London

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	London	England
Population, 2017	8,825,001 (▲1.8%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	5,973,028 (▲1.2%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	11.8% (▲2%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	5.4% (▼11.5%)	4.5% (▼15.1%)
Jobs density, 2017	1.02 (▲4.1%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	3.78%	3.57%
HE Qualifiers, 2017-18	137,065 (▲4.5%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	60.0% (▲2.6%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£27,825 (▲4%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	London	England
Premises with full fibre broadband (%), 2018	11.7% (▲78.8%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	95.99% (▲7.9%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	3,524,450 (▲2%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	10 / 12 / 9 (▲5 / 4 / 4%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	3.6 (▼15.3%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	440.5	660.3
Air pollution, population weighted mean levels PM2.5, 2017	12.2 (▲9.3%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	582,63	2,549,499

Of the indicators in the framework, in London LEP, the following stand out as positive developments: Long-term international migration flow (inflow-outflow) (83,488), number of research organisations and facilities (1,478), regional GVA (all sectors, £ million) (£408,478), HE leavers taking employment in the region (52,850), business count (all sectors) (568,195). On the other hand, the following indicators show potential areas of concern: Internal migration (within the UK) (-113,908.35), number of properties at risk of flooding (582,630), percentage of economically active with trade apprenticeships (1.1%), air pollution (population-weighted mean levels PM2.5) (12.2), startup 3-year survival rate (51.8%).

# Ideas

Evidence shows that the generation of new knowledge contributes to long-term economic growth. The graph below shows the main topics (HESA cost centres) where national and international R&D funding has been awarded to Higher Education Institutions in the LEP. The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	London	England
Firms undertaking R&D activities (% of firms), 2019	19.8% <span style="color: green;">▲23.8%</span>	21.0% <span style="color: green;">▲23.5%</span>
Value of grant funding, national, 2017	£1,106,528,000 <span style="color: red;">▼0.1%</span>	£3,855,181,000 <span style="color: green;">▲5.4%</span>
Value of grant funding, international, 2017	£389,380,000 <span style="color: green;">▲7%</span>	£1,204,459,000 <span style="color: green;">▲11.1%</span>
Number of active grants from UKRI and Innovate UK, 2018	8,603 <span style="color: green;">▲25.2%</span>	27,593 <span style="color: green;">▲29.1%</span>
Researcher staff in HE institutions, 2017	65,695 <span style="color: green;">▲4.3%</span>	303,750 <span style="color: green;">▲4.7%</span>
Employment in science, engineering and technology (%), 2018	8.6 <span style="color: green;">▲7.5%</span>	7.8 <span style="color: green;">▲5.4%</span>
Cummulative patent portfolio of HEIs, 2017	5,906 <span style="color: green;">▲14.6%</span>	16,454 <span style="color: green;">▲4.2%</span>
Income from contract research in HEIs, 2017	£275,452,000 <span style="color: red;">▼10.6%</span>	£1,161,159,000 <span style="color: green;">▲6.3%</span>
Active spin-offs from HEIs, 2017	2,843 <span style="color: green;">▲17.3%</span>	12,758 <span style="color: green;">▲15.6%</span>

# Business Environment

LEP economies have different specialisation profiles. The graph below shows the location quotients of major SIC sectors in the LEP, in terms of employment and business concentration, with respect to the England average. The size of the bubbles gives an idea of the size of these sectors in terms of number of jobs.

Indicator (3yr growth rates)	London	England
GVA per hour worked (£), 2017	£44.9 <span style="color: green;">▲4%</span>	£34.1 <span style="color: green;">▲4.1%</span>
Regional GVA (all sectors, £ million), 2016	£408,478 <span style="color: green;">▲7.7%</span>	£1,498,232 <span style="color: green;">▲7%</span>
Business count, all sectors, 2018	568,195 <span style="color: green;">▲5.8%</span>	2,697,205 <span style="color: green;">▲4.4%</span>
Startups per 10K, 2017	91 <span style="color: green;">▲4.2%</span>	53 <span style="color: green;">▲8.2%</span>
Startup 3-year survival rate (%), 2017	51.8% <span style="color: green;">▲3.4%</span>	54.8% <span style="color: green;">▲2.2%</span>
Startups reaching £3m turnover (%), 2017	9% <span style="color: green;">▲8.9%</span>	8% <span style="color: green;">▲10.3%</span>
High growth firms, 2017 (%)	8.0% <span style="color: red;">▼0.5%</span>	6.4% <span style="color: green;">▲4.9%</span>
Product or service innovators (% firms), 2019	22.7% <span style="color: green;">▲33.5%</span>	25.2% <span style="color: green;">▲32.6%</span>
Process innovators (% firms), 2019	15.2% <span style="color: green;">▲38.2%</span>	17.0% <span style="color: green;">▲54.5%</span>

# New Anglia

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	New Anglia	England
Population, 2017	1,655,368 (▲1.4%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	977,832 (▲0.4%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	23.5% (▲2.2%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	4.3% (▲2.4%)	4.5% (▼15.1%)
Jobs density, 2017	0.83 (▲2.5%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	3.73%	3.57%
HE Qualifiers, 2017-18	8,840 (▲8.7%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	33.9% (▲0.9%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£17,651 (▼0.9%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	New Anglia	England
Premises with full fibre broadband (%), 2018	1.7% (▲233.5%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	62.38% (▲98.3%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	760,310 (▲1.7%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	22 / 24 / 13 (▲12 / 11 / 4%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	5.6 (▼11.5%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	625.4	660.3
Air pollution, population weighted mean levels PM2.5, 2017	9.6 (▼6.6%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	85,402	2,549,499

Of the indicators in the framework, in New Anglia LEP, the following stand out as positive developments: Life satisfaction mean score (7.79), startup 3-year survival rate (57.7%), Internal migration (within the UK) (10,634.18), percentage of economically active with trade apprenticeships (3.8%), percentage in non-permanent employment (4.3%). On the other hand, the following indicators show potential areas of concern: Percentage of firms implementing process innovation (12.5%), average minimum travel time to key services (cycle) (22.34 minutes), percentage of workforce with NVQ2 or less (38.5%), average minimum travel time to key services (car) (12.60 minutes), average minimum travel time to key services (public transport) (24.47 minutes).

4G service, indoors (% premises), 2018	65.02% (▲40%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	285,750 (▲2.9%)	23,950,000 (▲1.7%)
Average minium travel time to key services in minutes (cycle / public transport / car), 2016	19 / 22 / 12 (▲20 / 6 / 4%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	6.4 (▼5.9%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	566.5	660.3
Air pollution, population weighted mean levels PM2.5, 2017	10.1 (▲6.8%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	19,991	2,549,499

Of the indicators in the framework, in Oxfordshire LEP, the following stand out as positive developments: Intellectual property income (£ 56,257,000), percentage of firms undertaking R&D activities (40.2%), employment in science, engineering and technology (14.2%), cumulative patent portfolio of HEIs (3,662), income from contract research in HEIs (£179,910,000). On the other hand, the following indicators show potential areas of concern: Percentage in non-permanent employment (7.3%), Percentage of premises with 4G service indoors (65.02%), job vacancy rate (4.57%), ratio of lower quartile house price to lower quartile gross annual earnings (16.07), ratio of median house price to median gross annual earnings (12.14).

Evidence shows that the generation of new knowledge contributes to long-term economic growth. The graph below shows the main topics (HESA cost centres) where national and international R&D funding has been awarded to Higher Education Institutions in the LEP. The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	Oxfordshire	England
Firms undertaking R&D activities (% of firms), 2019	40.2% <span style="color: green;">▲43.6%</span>	21.0% <span style="color: green;">▲23.5%</span>
Value of grant funding, national, 2017	£412,357,000 <span style="color: green;">▲7.9%</span>	£3,855,181,000 <span style="color: green;">▲5.4%</span>
Value of grant funding, international, 2017	£164,548,000 <span style="color: green;">▲4.1%</span>	£1,204,459,000 <span style="color: green;">▲11.1%</span>
Number of active grants from UKRI and Innovate UK, 2018	3,133 <span style="color: green;">▲22.2%</span>	27,593 <span style="color: green;">▲29.1%</span>
Researcher staff in HE institutions, 2017	14,885 <span style="color: green;">▲2.8%</span>	303,750 <span style="color: green;">▲4.7%</span>
Employment in science, engineering and technology (%), 2018	14.2 <span style="color: green;">▲6%</span>	7.8 <span style="color: green;">▲5.4%</span>
Cummulative patent portfolio of HEIs, 2017	3,662 <span style="color: green;">▲7.7%</span>	16,454 <span style="color: green;">▲4.2%</span>
Income from contract research in HEIs, 2017	£179,910,000 <span style="color: green;">▲6.2%</span>	£1,161,159,000 <span style="color: green;">▲6.3%</span>
Active spin-offs from HEIs, 2017	291 <span style="color: green;">▲17.3%</span>	12,758 <span style="color: green;">▲15.6%</span>

# Business Environment

LEP economies have different specialisation profiles. The graph below shows the location quotients of major SIC sectors in the LEP, in terms of employment and business concentration, with respect to the England average. The size of the bubbles gives an idea of the size of these sectors in terms of number of jobs.

Indicator (3yr growth rates)	Oxfordshire	England
GVA per hour worked (£), 2017	£36.2 <span style="color: green;">▲4.2%</span>	£34.1 <span style="color: green;">▲4.1%</span>
Regional GVA (all sectors, £ million), 2016	£ 22,776 <span style="color: green;">▲8.5%</span>	£1,498,232 <span style="color: green;">▲7%</span>
Business count, all sectors, 2018	36,455 <span style="color: green;">▲1.5%</span>	2,697,205 <span style="color: green;">▲4.4%</span>
Startups per 10K, 2017	40 <span style="color: red;">▼5.4%</span>	53 <span style="color: green;">▲8.2%</span>
Startup 3-year survival rate (%), 2017	59.0% <span style="color: green;">▲2.5%</span>	54.8% <span style="color: green;">▲2.2%</span>
Startups reaching £3m turnover (%), 2017	7% <span style="color: green;">▲20.5%</span>	8% <span style="color: green;">▲10.3%</span>
High growth firms, 2017 (%)	6.6% <span style="color: green;">▲10%</span>	6.4% <span style="color: green;">▲4.9%</span>
Product or service innovators (% firms), 2019	30.9% <span style="color: green;">▲14.4%</span>	25.2% <span style="color: green;">▲32.6%</span>
Process innovators (% firms), 2019	23.8% <span style="color: green;">▲25.3%</span>	17.0% <span style="color: green;">▲54.5%</span>

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Solent	England
Population, 2017	1,612,170 (▲1.4%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	995,332 (▲0.8%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	20.5% (▲1.8%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	3.4% (▼30.6%)	4.5% (▼15.1%)
Jobs density, 2017	0.78 (▼1.3%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	3.50%	3.57%
HE Qualifiers, 2017-18	23,530 (▲8.8%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	37.8% (▲1.3%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£17,600 (▲1.8%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Solent	England
Premises with full fibre broadband (%), 2018	5.5% (▲508.3%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	75.21% (▲42.2%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	701,790 (▲1.6%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	18 / 20 / 13 (▲25 / 7 / 5%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	4.6 (▼7.6%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	814.7	660.3
Air pollution, population weighted mean levels PM2.5, 2017	10.2 (▲3.9%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	52,63	2,549,499

Of the indicators in the framework, in Solent LEP, the following stand out as positive developments: Active spin-offs from HEIs (1,188), startups per 10K population (68), percentage of difficult or hard to fill vacancies (26.68%), life satisfaction mean score (7.79), CO<sub>2</sub> emissions (4.6 t per capita). On the other hand, the following indicators show potential areas of concern: Average minimum travel time to key services (car) (12.51 minutes), air pollution (population-weighted mean levels PM2.5) (10.2), jobs density (0.78), percentage of startups reaching £1m turnover (2%), percentage of high growth firms (5.7%).

# Swindon and Wiltshire

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	Swindon and Wiltshire	England
Population, 2017	716,406 (▲1.5%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	439,251 (▲0.4%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	19.3% (▲2.9%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	4.2% (▲10.5%)	4.5% (▼15.1%)
Jobs density, 2017	0.88 (▲1.1%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	3.97%	3.57%
HE Qualifiers, 2017-18	NA NA	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	40.5% (▼6.5%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£19,546 (▼0.4%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	Swindon and Wiltshire	England
Premises with full fibre broadband (%), 2018	3.9% (▲141.7%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	72.54% (▲47.6%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	311,460 (▲2.6%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	22 / 22 / 13 (▲29 / 6 / 6%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	5.5 (▼9.1%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	552.4	660.3
Air pollution, population weighted mean levels PM2.5, 2017	9.2 (▲1.5%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	13,341	2,549,499

Of the indicators in the framework, in Swindon and Wiltshire LEP, the following stand out as positive developments: Startups per 10K population (62), startup 3-year survival rate (58.3%), number of properties at risk of flooding (13,341), percentage of economically active with trade apprenticeships (3.9%), percentage in non-permanent employment (4.2%). On the other hand, the following indicators show potential areas of concern: Percentage of skills-shortage vacancies (43.38%), business demography net change (births-deaths) (-5,635), percentage of difficult or hard to fill vacancies (51.95%), average minimum travel time to key services (car) (12.51 minutes), average minimum travel time to key services (cycle) (21.67 minutes).

# Business Environment

LEP economies have different specialisation profiles. The graph below shows the location quotients of major SIC sectors in the LEP, in terms of employment and business concentration, with respect to the England average. The size of the bubbles gives an idea of the size of these sectors in terms of number of jobs.

Indicator (3yr growth rates)	The Marches	England
GVA per hour worked (£), 2017	£26.5 ▲1.9%	£34.1 ▲4.1%
Regional GVA (all sectors, £ million), 2016	£ 14,010 ▲4.2%	£1,498,232 ▲7%
Business count, all sectors, 2018	35,470 ▲1.2%	2,697,205 ▲4.4%
Startups per 10K, 2017	31 ▼6.6%	53 ▲8.2%
Startup 3-year survival rate (%), 2017	57.8% ▼0.1%	54.8% ▲2.2%
Startups reaching £3m turnover (%), 2017	6% ▲28.3%	8% ▲10.3%
High growth firms, 2017 (%)	6.4% ▲10.8%	6.4% ▲4.9%
Product or service innovators (% firms), 2019	23.2% ▲54.7%	25.2% ▲32.6%
Process innovators (% firms), 2019	19.2% ▲140%	17.0% ▲54.5%

# West of England

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	West of England	England
Population, 2017	1,139,791 (▲1.9%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	734,366 (▲1.7%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	17.4% (▲0.3%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	3.9% (▼9.3%)	4.5% (▼15.1%)
Jobs density, 2017	0.93 (▲2.2%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	3.67%	3.57%
HE Qualifiers, 2017-18	23,725 (▲8.3%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	51.3% (▲6.4%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£19,381 (▼0.2%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	West of England	England
Premises with full fibre broadband (%), 2018	5.8% (▲218.8%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	80.68% (▲27.9%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	489,520 (▲2%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	14 / 17 / 11 (▲15 / 6 / 10%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	4.8 (▼7.8%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	524.0	660.3
Air pollution, population weighted mean levels PM2.5, 2017	91 (▲3.5%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	78,397	2,549,499

Of the indicators in the framework, in West of England LEP, the following stand out as positive developments: Percentage of workforce with NVQ2 or less (22.9%), percentage of workforce with NVQ4+ (51.3%), percentage of high growth firms (6.9%), percentage of startups reaching £3m turnover (8%), employment in science, engineering and technology (9.4%). On the other hand, the following indicators show potential areas of concern: Percentage in non-permanent employment (5.5%), percentage of firms with product or service innovations (22.6%), life satisfaction mean score (7.66), port freight (8,741 tonnes), percentage of skills-shortage vacancies (26.98%).

# Ideas

Evidence shows that the generation of new knowledge contributes to long-term economic growth. The graph below shows the main topics (HESA cost centres) where national and international R&D funding has been awarded to Higher Education Institutions in the LEP. The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	West of England	England

Air pollution, population weighted mean levels PM2.5, 2017	7.4 (▼14.6%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	62,557	2,549,499

Of the indicators in the framework, in Sheffield City Region LEP, the following stand out as positive developments: Ratio of lower quartile house price to lower quartile gross annual earnings (7.83), ratio of median house price to median gross annual earnings (6.65), air pollution (population-weighted mean levels PM2.5) (7.4), job vacancy rate (2.89%), percentage of economically active with trade apprenticeships (4.2%). On the other hand, the following indicators show potential areas of concern: Percentage in non-permanent employment (6.2%), jobs density (0.73), unemployment 16+ (5.6%), gross disposable household income (GDHI) per head (£15,292), percentage in employment who are self employed (8.4%).

# Ideas

Evidence shows that the generation of new knowledge contributes to long-term economic growth. The graph below shows the main topics (HESA cost centres) where national and international R&D funding has been awarded to Higher Education Institutions in the LEP. The ability to secure funding from competitive research funding sources is an indication of both research output and research excellence.

Indicator (3yr growth rates)	Sheffield City Region	England
Firms undertaking R&D activities (% of firms), 2019	19.7% <span style="color: green;">▲15.9%</span>	21.0% <span style="color: green;">▲23.5%</span>
Value of grant funding, national, 2017	£172,811,000 <span style="color: green;">▲25.4%</span>	£3,855,181,000 <span style="color: green;">▲5.4%</span>
Value of grant funding, international, 2017	£ 32,471,000 <span style="color: red;">▼13.5%</span>	£1,204,459,000 <span style="color: green;">▲11.1%</span>
Number of active grants from UKRI and Innovate UK, 2018	1,341 <span style="color: green;">▲19.9%</span>	27,593 <span style="color: green;">▲29.1%</span>
Researcher staff in HE institutions, 2017	10,295 <span style="color: green;">▲0.9%</span>	303,750 <span style="color: green;">▲4.7%</span>
Employment in science, engineering and technology (%), 2018	6.9 <span style="color: green;">▲27.8%</span>	7.8 <span style="color: green;">▲5.4%</span>
Cummulative patent portfolio of HEIs, 2017	352 <span style="color: red;">▼12%</span>	16,454 <span style="color: green;">▲4.2%</span>
Income from contract research in HEIs, 2017	£ 65,540,000 <span style="color: green;">▲60.3%</span>	£1,161,159,000 <span style="color: green;">▲6.3%</span>
Active spin-offs from HEIs, 2017	311 <span style="color: green;">▲51%</span>	12,758 <span style="color: green;">▲15.6%</span>

# Business Environment

LEP economies have different specialisation profiles. The graph below shows the location quotients of major SIC sectors in the LEP, in terms of employment and business concentration, with respect to the England average. The size of the bubbles gives an idea of the size of these sectors in terms of number of jobs.

Indicator (3yr growth rates)	Sheffield City Region	England
GVA per hour worked (£), 2017	£27.6 <span style="color: green;">▲3.6%</span>	£34.1 <span style="color: green;">▲4.1%</span>
Regional GVA (all sectors, £ million), 2016	£ 34,048 <span style="color: green;">▲6.3%</span>	£1,498,232 <span style="color: green;">▲7%</span>
Business count, all sectors, 2018	67,255 <span style="color: red;">▼0.8%</span>	2,697,205 <span style="color: green;">▲4.4%</span>
Startups per 10K, 2017	37 <span style="color: green;">▲0.9%</span>	53 <span style="color: green;">▲8.2%</span>
Startup 3-year survival rate (%), 2017	54.7% <span style="color: green;">▲0.6%</span>	54.8% <span style="color: green;">▲2.2%</span>
Startups reaching £3m turnover (%), 2017	7% <span style="color: green;">▲3.5%</span>	8% <span style="color: green;">▲10.3%</span>
High growth firms, 2017 (%)	5.9% <span style="color: red;">▼0.1%</span>	6.4% <span style="color: green;">▲4.9%</span>
Product or service innovators (% firms), 2019	22.1% <span style="color: green;">▲22.8%</span>	25.2% <span style="color: green;">▲32.6%</span>
Process innovators (% firms), 2019	15.8% <span style="color: green;">▲21.5%</span>	17.0% <span style="color: green;">▲54.5%</span>

# South East Midlands

## People

Economies with a larger share of qualified population and good earnings tend to be more dynamic and with more opportunity. The graph below shows the relationship between economically-active qualified population and median earnings in the LEP's Local Authorities. The size of the bubbles gives an idea of the size of these economies in terms of number of jobs.

Indicator (3yr growth rates)	South East Midlands	England
Population, 2017	2,016,952 (▲2.3%)	55,619,430 (▲1.5%)
Working age population, 2017, 16-64	1,260,884 (▲1.3%)	34,950,948 (▲0.8%)
Aged dependency ratio (%), 2017	16.5% (▲2.6%)	18.0% (▲1.7%)
Unemployment 16+ (%), 2017	4.7% (▲27%)	4.5% (▼15.1%)
Jobs density, 2017	0.87 (▲4.8%)	0.87 (▲3.6%)
Job vacancy rates (%), 2017	3.70%	3.57%
HE Qualifiers, 2017-18	23,225 (▼18.5%)	644,265 (▲4.7%)
% of workforce with NVQ4+, 2018	40.5% (▲4.1%)	43.5% (▲2.8%)
Gross disposable household income (GDHI) per head (£), 2017	£20,071 (▲1.9%)	£19,988 (▲1.5%)

## Infrastructure

In terms of infrastructure, good places to live are those where there is a presence of amenity and key services, but there can be a trade-off between access to green spaces and close conveniences and employment centres. The graph below shows some of these main metrics for the LEP's Local Authorities. Average travel times also give an overall idea of the transaction costs involved when moving people and goods in the region.

Indicator (3yr growth rates)	South East Midlands	England
Premises with full fibre broadband (%), 2018	7.0% (▲64.5%)	6.1% (▲89.9%)
4G service, indoors (% premises), 2018	72.95% (▲47%)	78.29% (▲29.3%)
Housing stock, including vacant, 2017	836,870 (▲2.7%)	23,950,000 (▲1.7%)
Average minimum travel time to key services in minutes (cycle / public transport / car), 2016	16 / 20 / 11 (▲12 / 5 / 3%)	15 / 18 / 11 (▲10 / 4 / 3%)
CO <sub>2</sub> emissions (t per capita), 2016	5.7 (▼7.4%)	5.3 (▼10.3%)
Public green spaces (ha per 10,000 population), 2019	603.7	660.3
Air pollution, population weighted mean levels PM2.5, 2017	10.3 (▲5.3%)	9.4 (▲0.1%)
Number of properties at risk of flooding, 2019	26,795	2,549,499

Of the indicators in the framework, in South East Midlands LEP, the following stand out as positive developments: Social, community and cultural engagement carried out by HEIs (782,591,104 attendees), percentage of firms with product or service innovations (36.0%), startups per 10K population (78), percentage of firms undertaking R&D activities (31.0%), percentage of firms implementing process innovation (22.0%). On the other hand, the following indicators show potential areas of concern: Business demography net change (births-deaths) (-2,680), air pollution (population-weighted mean levels PM2.5) (10.3), startup 3-year survival rate (55.1%), income from regeneration and development programmes (£1,309,000), unemployment 16+ (4.7%).
