3 August 2020

Dear Patrick,

Thank you for your letter of 6 July about smoking related litter.

In the 2017 Litter Strategy we set our ambition to clean up the country within a generation. Smoking related litter is a particularly persistent and widespread problem and I had hoped to see the Tobacco Manufacturers' Association and the companies it represents work more pro-actively to deliver on the commitment it gave during the 2015 select committee inquiry on litter and fly-tipping.

As I mentioned at the recent Tidy Britain APPG meeting, the Government is prepared to extend the offer of a roundtable discussion between various stakeholders, including tobacco product manufacturers as well as Keep Britain Tidy, to discuss progress on the commitments the industry made. I will be writing to the relevant organisations to formally issue this invitation in due course. We must guarantee that any engagement adheres to the WHO's Framework Convention on Tobacco Control.

If we cannot progress this discussion at this roundtable, we will have to reflect on what steps the Government can take going forward to ensure that the tobacco industry takes increasing responsibility for the litter that its products create. The powers we are seeking in the Environment Bill would allow us to mandate an Environmental Permitting Regulations scheme for tobacco filters. Such a scheme could go beyond what Keep Britain Tidy has proposed to the industry as a voluntary approach.

Thank you once again for taking the time to contact me about this important issue. Please let me know if I can be of any further assistance with this or any other matters in the future.

REBECCA POW MP
