World Organisation for Animal Health

Reference Laboratory

- Antimicrobial resistance
- Avian influenza
- Bovine tuberculosis
- Bovine spongiform encephalopathy
- Bovine viral diarrhoea
- Brucellosis
- Classical swine fever
- Contagious agalactia
- Contagious equine metritis
- Enzootic bovine leukosis
- Equine viral arteritis
- Infectious bovine rhinotracheitis
- Newcastle disease
- Rabies
- Salmonellosis
- Scrapie
- Swine Influenza

Collaborating Centre

- Risk Analysis and Modelling

UN Food and Agriculture Organisation

Reference Laboratory

- Brucellosis
- Animal Influenza
- Newcastle disease

Reference Centre

- Antimicrobial resistance

The Animal and Plant Health Agency (APHA) is an internationally recognised centre of scientific excellence providing a wide range of applied research and consultancy to both government and commercial customers.

APHA is a reference laboratory for a number of animal pathogens and diseases and provides expertise as a Collaborating Centre in relation to designated areas of animal health both at National and International level.

National Reference Laboratory

Reference Laboratory

- Animal by-products feed testing
