

Guidance on RTI Data Items from April 2021

The following table is intended to provide software developers with a brief explanation of the requirements for the fields to aid completion of an RTI submission. Further guidance on operating PAYE in real time is currently available at <https://www.gov.uk/topic/business-tax/payee>

The guidance should be read in conjunction with the relevant technical specifications for electronic submissions. The ordering of the data items in the table below is not a strict representation of the structure within the xml submission.

- The guidance for the Full Payment Submission relates to submissions containing data for the 2021/22 tax year.
- The guidance for the Employer Payment Summary relates to submissions containing data for the 2021/22 tax year.

Data item	Description	Comments	FPS	EPS	Inclusion on a submission by submission basis

Note: All data items which refer to "this period" that is data items: 58, 58A, 58B, 59, 60, 61, 62, 65, 67, 68, 79B, 86A & 86B are this period values for employees who have received all their pay for the period in a single process. Where there have been multiple processing runs in the period, for example a supplementary pay run to cover overtime that was omitted originally, then the data items defined as this period should contain the "run" values not the period to date values. For example, if in the normal pay run the taxable pay was £100 and in the supplementary run the taxable pay was £20 then field 58 will contain £100 for the first FPS for the period and £20 for the second FPS for the period. Assuming this is the first pay period, the "year to date" pay figure (field 41A) will be £100 for the first FPS and then £120 for the second.

Appendix for RTI Data Items Guide

This appendix should be used alongside the data items. You will find further information on selected data items and how incorrect or incomplete items can affect submissions.

The majority of data submitted is accurate and matched correctly to the individual account. The following scenarios cover potential impacts incorrect data can have. Whilst these numbers are small it is important to highlight the issues these can cause.

For the example purposes laid out in the tables below the employee information used is pseudo data to give an understanding of the types of issues that may arise. Please do not use any of these pseudo details shown on your live payroll. In some instances the guidance states if the data is unknown to leave blank.

Appendix 1.1	National Insurance Number covering Data Item 5
Potential Impacts of Incorrect Data	<p><u>Employee:</u></p> <ul style="list-style-type: none"> • New PAYE account may be created under a temporary reference number if no match can be made • Personal Tax Account may not reflect the correct position • Incorrect End of Year figures are held • Incorrect End of Year calculations issued • Benefit claims may be affected • Incorrect tax codes may be issued <p><u>Employer:</u></p> <ul style="list-style-type: none"> • Increased enquiries from employees • Additional administration burden <p><u>Software Developer:</u></p> <ul style="list-style-type: none"> • Increased customer contact • Increased customer support required
Known Data Issues	<ul style="list-style-type: none"> • Entering a pseudo National Insurance Number e.g. RN000031A • Transposition errors when keying in the data manually
Example of Impacts	<p>New employee provides personal details to employer on starter declaration. Key information is missing – National Insurance Number.</p> <p>Instead of leaving the field blank (Data Item 5) per current guidance the employer uses a pseudo National Insurance Number to add employee to the payroll. This passes HMRC validation checks, as it is in a valid format of two letters, six numbers and a letter.</p> <p>HMRC matching rules may be unable to match the details to the individual account. A new account may be set up and a temporary reference number created. Subsequent submissions might have corrected personal details however it can be difficult to use the updated information to match correctly due to the creation of the temporary reference.</p> <p>In this scenario, the employees Personal Tax Account will not show the employment record or submitted payroll details held under the temporary reference number, which may prompt contact to the employer and/or HMRC.</p> <p>This scenario can also occur when updating existing employee details onto a new payroll software package.</p>
Worked Example	<p>New employee provides personal details to employer on starter declaration:</p> <p>National Insurance Number: Left blank by employee</p> <p>Title: Mr Surname: Bloggs Forename: Joseph Second forename: Murray</p>

Appendix 1.1	National Insurance Number covering Data Item 5
	<p>Initials: J M Date of Birth: 03/07/1984 Gender: Male Address: 1 Main Street Address: United Kingdom Postcode: AA1 2BB</p> <p>Employer enters the information onto their payroll software. They use a pseudo of RN000031A. They submit an FPS showing details of the payment made along with the designatory details. Matching rules are applied to the data however the National Insurance Number is NOT a match to any existing accounts found on our systems. A new account is set up under a temporary reference number. The FPS submission received is now held under the temporary reference number.</p> <p>Before the next payment is due, the employee provides their correct National Insurance Number. The employer updates this onto the software. The next FPS submitted now shows the corrected National Insurance Number. HMRC applies the matching rules to this following FPS, this may mean that, although the correct NINO has now been provided, HMRC will continue to match the FPS to the temporary reference account created as a result of the first FPS. At the end of the tax year the employee will have all RTI data for current employer held under the temporary reference number while previous employer record is held under the employees correct National Insurance Number. This will cause issues for HMRC and the employee when the tax year is reconciled.</p>

Potential Impacts of Incorrect Data	<p><u>Employee:</u></p> <ul style="list-style-type: none"> • New PAYE account may be created under a temporary reference number if no match can be made • Personal Tax Account may not reflect the correct position • Incorrect End of Year figures are held • Incorrect End of Year calculations issued • Benefit claims may be affected • Correspondence including tax codes and calculations will not be received <p><u>Employer:</u></p> <ul style="list-style-type: none"> • Increased enquiries from employees • Additional administration burden • Receiving correspondence for employees if business address used <p><u>Software Developer:</u></p> <ul style="list-style-type: none"> • Increased customer contact • Increased customer support required
Known Data Issues	<ul style="list-style-type: none"> • Entering the employers business address • Entering a default address if not known e.g. using the letter 'A' for the first line • Transposition errors when keying in the data manually
Example of Impacts	<p>New employee provides personal details to employer on starter declaration. Key information is missing – Address.</p> <p>Employer uses an address which is not the individuals, most commonly the business address, to add employee to the payroll. This passes HMRC validation checks, as it is still valid data being supplied.</p> <p>If all other designatory details supplied are accurate, an incorrect address may not necessarily create a new account. The main issue is the incorrect address will be updated onto the individuals account when it is the first submission received for a new employment. This inhibits correspondence being delivered to the individual.</p> <p>If the business address has been entered, the employer will receive the correspondence intended for the individual increasing the administration burden to them.</p> <p>The employees Personal Tax Account will not show the correct address for them which may prompt contact to the employer and/or HMRC.</p> <p>In a minority of cases HMRC matching rules may be unable to match the details to the individual account. Appendix 1.5 Starting date and Declaration covering Data Items 24 and 24a	
Potential Impacts of Incorrect Data	<p><u>Employee:</u></p> <ul style="list-style-type: none"> • Duplicate employment may be created • Personal Tax Account may not reflect the correct position • Potential estimated pay issues • Incorrect tax code • Benefit claims may be affected <p><u>Employer:</u></p> <ul style="list-style-type: none"> • Increased enquiries from employees • Influx of potentially incorrect tax codes • PAYE charge in dispute • Additional administration burden <p><u>Software Developer:</u></p> <ul style="list-style-type: none"> • Increased customer contact • Increased customer support required
Known Data Issues	<ul style="list-style-type: none"> • Entering a historic start date after a transfer of employment to a new PAYE reference • Entering a new start date when changing payroll software
Example of Impacts	<p>Employer changes legal entity and requires a new PAYE reference. Employees are transferred from one PAYE reference to another with no change to their employment or terms and conditions.</p> <p>Employer follows TUPE regulations to preserve the employee's existing terms and conditions and uses the employee's original start date on their first FPS from the new PAYE reference to ensure they have the same length of employment as before.</p> <p>This record will be incorrect as the employee is a 'new employee' at the new PAYE reference. Whilst the employer may hold the original start date for HR purposes, for HMRC, a new employee is defined as the first instance where an individual appears at that PAYE reference. For this reason, any individuals who are affected by a TUPE transfer are classed as new employees and a P45 should be issued from the old PAYE reference and used as Starter Information at the new PAYE reference. The P45 may not always be issued to the individual as there has been no break in employment (or pension) to them.</p> <p>This creates a duplicate record and the employee's Personal Tax Account will show incorrect historical records for the new employer, which may prompt contact to the employer and/or HMRC.</p> <p>Another issue can occur when updating existing employee details onto a new payroll software package. In this case, the employee should not be entered as a 'new employee' as they have not changed PAYE reference. The employee should be entered as an 'existing employee' and their Year To Date earnings, and tax code, transferred on to the new payroll software.</p>

Appendix 1.5	Starting date and Declaration covering Data Items 24 and 24a
<p>Worked Example 1 - Employee transfers from one PAYE reference to another under TUPE regulations</p>	<p>National Insurance Number: RN000031A Title: Mr Surname: Bloggs Forename: Joseph Second forename: Murray Initials: J M Date of Birth: 03/07/1984 Gender: Male Address: 1 Main Street Address: United Kingdom Postcode: AA1 2BB Original Employment Start Date: 01/09/1980</p> <p>Employer enters the information onto their payroll software. They use the original start date of 01/09/1980. They submit an FPS showing this information.</p> <p>The new employment record is set up for historical years under the new PAYE reference. This may affect the employee's view of their Personal Tax Account, as it would show they had a further employment in these earlier years. If an employment record was created with a start date earlier than the current year our internal system will note the records not to expect any payroll information relating to earlier years.</p>
<p>Worked Example 2 - Employer changes payroll software and enters a new start date</p>	<p>National Insurance Number: RN000031A Title: Mr Surname: Bloggs Forename: Joseph Second forename: Murray Initials: J M Date of Birth: 03/07/1984 Gender: Male Address: 1 Main Street Address: United Kingdom Postcode: AA1 2BB Original Employment Start Date: 01/09/1980 Start date on new payroll software: 06/05/2018</p> <p>HMRC systems are unable to make a direct match to the existing employment therefore we will create a new employment record commencing 06/05/2018.</p> <p>The duplicate records will require clerical recovery by HMRC to correct these as this is not an automatic process. Until this takes place, the employees Personal Tax Account will show 2 records for the same employer, which may prompt contact to the employer and/or HMRC.</p>

Appendix 1.6	Payroll ID covering Data Items 38 to 40
Potential Impacts of Incorrect Data	<p><u>Employee:</u></p> <ul style="list-style-type: none"> • Duplicate employment may be created • Personal Tax Account may not reflect the correct position • Potential estimated pay issues • Incorrect tax code • Incorrect End of Year figures are held • Incorrect End of Year calculations issued • Benefit claims may be affected <p><u>Employer:</u></p> <ul style="list-style-type: none"> • Increased enquiries from employees • Influx of potentially incorrect tax codes • PAYE liability requires a review • Additional administration burden <p><u>Software Developer:</u></p> <ul style="list-style-type: none"> • Increased customer contact • Increased customer support required
Known Data Issues	<ul style="list-style-type: none"> • Not selecting Payroll ID change indicator • Not including the previous Payroll ID • Not including the previous Payroll ID correctly e.g. omitting leading zeros or characters • Re-using Payroll ID's. These should only be used once, even if an employee leaves your employment then returns. • Payroll ID's should never be re-used, even for new employees in subsequent tax years
Example of Impacts	<p>We will assume all other information for the individual is correct at this point.</p> <p>Employer changes Payroll ID. They include the following:</p> <ul style="list-style-type: none"> • New Payroll ID • Payroll ID change indicator • Correct Year to Date values

Appendix 1.6	Payroll ID covering Data Items 38 to 40		
	<p>They DO NOT include the previous Payroll ID.</p> <p>HMRC systems are unable to make a direct match therefore we will apply further matching rules to compare the financial data:</p> <ul style="list-style-type: none"> • Where a match is made – no issues and the records are updated correctly. • Where no match is made - a duplicate employment record is created in error. <p>The duplicate records will require action by HMRC to correct these as this is not an automatic process. Until this takes place, the employees Personal Tax Account will show 2 records for the same employer, which may prompt contact to the employer and/or HMRC.</p> <p>This scenario can also occur when updating existing employee details onto a new payroll software package.</p>		
<p>Worked Example 1 – Previous Payroll ID missing</p>	<p>We will assume all other information for the individual is correct at this point.</p> <p>Employee Status: Existing Pay Frequency: Monthly Earnings per month: £1,234.56 Current Payroll ID: Z41526 Tax Code: 650L Employer changes payroll ID in month 9 of the tax year to B96857.</p> <table border="0"> <tr> <td data-bbox="405 783 1008 943"> <p>The month 8 FPS showed:</p> <p>Year to Date Pay: £9,876.48 Year to Date Tax: £1107.40 Payroll ID: Z41526</p> </td> <td data-bbox="1037 783 1391 943"> <p>The month 9 FPS shows:</p> <p>Pay in Period: £1,234.56 Year to Date Pay: £11,111.04 Year to Date Tax: £1354.20 Payroll ID: B96857</p> </td> </tr> </table> <p>The employer has correctly selected the Payroll ID change Indicator at Data Item 39 however has not included the previous Payroll ID at Data Item 40. Further matching rules are applied and as the month 9 Pay in the Period plus the month 8 Year to Date pay figure match the month 9 Year to Date pay figure the match is successful.</p> <p>The outcome can significantly differ when the change occurs at the start of the year:</p> <p>Employee Status: Existing Pay Frequency: Monthly Earnings per month: £1,234.56 Previous Payroll ID used up to month 12: Z41526 Month 1 Tax Code: 650L Employer changes payroll ID in month 1 to B96857.</p>	<p>The month 8 FPS showed:</p> <p>Year to Date Pay: £9,876.48 Year to Date Tax: £1107.40 Payroll ID: Z41526</p>	<p>The month 9 FPS shows:</p> <p>Pay in Period: £1,234.56 Year to Date Pay: £11,111.04 Year to Date Tax: £1354.20 Payroll ID: B96857</p>
<p>The month 8 FPS showed:</p> <p>Year to Date Pay: £9,876.48 Year to Date Tax: £1107.40 Payroll ID: Z41526</p>	<p>The month 9 FPS shows:</p> <p>Pay in Period: £1,234.56 Year to Date Pay: £11,111.04 Year to Date Tax: £1354.20 Payroll ID: B96857</p>		

Appendix 1.6	Payroll ID covering Data Items 38 to 40
	<p>The month 12 FPS showed:</p> <p>Year to Date Pay: £14,814.72 Year to Date Tax: £1661.00 Payroll ID: Z41526</p> <p>The month 1 FPS shows:</p> <p>Pay in Period: £1,234.56 Year to Date Pay: £1,234.56 Year to Date Tax: £138.40 Payroll ID: B96857</p> <p>The employer has correctly selected the Payroll ID change Indicator at Data Item 39 however has not included the previous Payroll ID at Data Item 40.</p> <p>In this scenario we cannot apply the further matching rules due to a lack of data present for the year in question (only 1 FPS is held for the year so far) therefore the match is unsuccessful. Our matching rules identify this as a separate employment and a duplicate record is created under the new Payroll ID from month 1.</p>
<p>Worked Example 2 – re-using a previous Payroll ID</p>	<p>We will assume all other information for the individual is correct at this point.</p> <p>Employee Status: Returning Employee Start date: 25/06/2018 Pay Frequency: Monthly Earnings per month: £1,234.56 Tax Code: 650L</p> <p>This employee was previously employed by the company in an earlier tax year and only recently left employment with them on 10/04/2018 (month 1). They have now come back to work for the same employer on 25/06/2018 (month 3). The employee provides the same P45 they received when they left in month 1 as no other employment was undertaken during the break.</p> <p>The month 1 FPS showed:</p> <p>Pay in Period: £617.28 Year to Date Pay: £617.28 Year to Date Tax: £14.80 Payroll ID: Z41526 Leaving date: 10/04/2018</p> <p>The month 3 FPS shows:</p> <p>Pay in Period: £370.36 Year to Date Pay: £370.36 Year to Date Tax: £-14.80R Payroll ID: Z41526 Start date: 25/06/2018</p> <p>The employer has correctly included the start details on the month 3 FPS along with resetting the Year to Date figure to only include earnings from this new period of employment. They have incorrectly re-used the same Payroll ID of Z41526.</p> <p>This may lead to scenarios where 2 different sets of payments for separate periods of employment can be merged together. The result of this action is that, instead of having 2 (or more) EOY P14 records there is only 1 which is based on the last FPS held. Therefore the payroll data for the earlier periods of employment are not being taken into consideration.</p>
<p>Worked Example 3 – Inconsistent</p>	<p>We will assume all other information for the individual is correct at this point.</p> <p>Employee Status: Existing Pay Frequency: Monthly</p>

Appendix 2.1	Best Practice Hints and Tips
Timeline Issues - Order of Processing Submissions	To avoid timeline issues leaver details must be submitted before starter details are provided to ensure the previous employment record is closed before the new record is created. This will allow the new employment record to be set up in the correct position. If the details are received in reverse order this can cause issues with the employees estimated income figures resulting in incorrect tax codes being issued.
Leaver Details	<p>This is Data Item 41 in the guide. If an employee leaves their employment and the information is not available to the payroll at the time they send the FPS, this will need to be reported to HMRC on a subsequent submission. It is important to ensure the following points are adhered to:</p> <ul style="list-style-type: none"> • the actual leaving date is reported, even if this was in a previous tax period • add '0' in the 'Pay and tax in this period' field • add the last reported figures of pay, tax, National Insurance and other payroll information in the 'Year to date' field • use late reporting reason H – Correction to earlier submission as your reason for reporting • show the 'Payment date' as either the current FPS payment date or the last date the employee was paid • submit these details under the same Payroll ID
Occupational Pensions	This is Data Item 145 in the guide and must only be selected where you are a pension provider making payments to an individual. It must not be used under the following circumstance: where you are making payments on behalf of an employee into a pension plan.
Payment after Leaving (PAL)	<p>This is data Item 51 in the guide and this indicator must be selected on any payments made to an employee after a P45 has been issued and leaver details submitted to HMRC. The following actions must be taken when making a payment after leaving:</p> <ul style="list-style-type: none"> • use the tax code OT (SOT, if they are taxed at the Scottish rate) on a 'week 1' or 'month 1' basis • add the additional payment in the 'Year to date' field if the payment is in the same tax year • If the payment is made in a later tax year to the one in which the employee left, an FPS is required in the later tax year for the tax period that payment is made. The year to date figures on the FPS should reflect only that payment. • the original date of leaving must be included • the payment after leaving indicator must be selected • the original Payroll ID must be used • you must provide the employee with a letter detailing the date the payment was made; gross amount of the payment and the PAYE tax deducted; confirmation this is a payment made to them after they left employment; do not provide the employee with another P45
Warning Signs to look out for	<ul style="list-style-type: none"> • Increased Volumes of Tax Codes received unexpectedly • Increased contact from employees with queries about new tax codes received • Online discrepancies with Employer and individual accounts – Business Tax Accounts and/or Personal Tax Accounts

Appendix 2.2	Table of common issues which can affect Tax Codes	
Scenario	HMRC Action	Expected Tax Code Activity
An FPS is sent without a 'Start Date' or 'Starting Declaration' and there is no current Primary employment on the individual's record	A new primary employment record will be created where tax code is anything other than BR, 0T or D prefix	A tax code will be automatically calculated by HMRC. HMRC will review the YTD earnings on the FPS and calculate the tax code based on this information
An FPS is sent without a 'Start Date' or 'Starting Declaration' and there is a current Primary employment on the individual's record – this can be caused by a timeline issue (see Appendix 2.1)	A new secondary employment record will be created where tax code is BR, 0T or D prefix	A tax code will be automatically calculated by HMRC as a secondary source of employment. This tax code will have no tax-free allowances attached
An FPS is sent with a 'Start Date' but without a 'Starting Declaration' and there is no current Primary employment on the individual's record	A new primary employment record will be created where tax code is anything other than BR, 0T or D prefix	A tax code will be automatically calculated by HMRC. HMRC will review the YTD earnings on the FPS and calculate the tax code based on this information
An FPS is sent with a 'Start Date' but without a 'Starting Declaration' and there is a current Primary employment on the individual's record – this can be caused by a timeline issue (see Appendix 2.1)	A new secondary employment record will be created where tax code is BR, 0T or D prefix	A tax code will be automatically calculated by HMRC as a secondary source of employment. This tax code will have no tax-free allowances attached
An FPS is sent without a 'Start Date' or 'Starting Declaration', there is a change of Payroll ID and there is no current Primary employment on the individual's record	A new primary employment record will be created where tax code is anything other than BR, 0T or D prefix	A tax code will be automatically calculated by HMRC. HMRC will review the YTD earnings on the FPS and calculate the tax code based on this information
An FPS is sent without a 'Start Date' or 'Starting Declaration', there is a change of Payroll ID and there is a current Primary employment on the individual's record	A new secondary employment record will be created where tax code is BR, 0T or D prefix	A tax code will be automatically calculated by HMRC as a secondary source of employment. This tax code will have no tax-free allowances attached

Appendix 2.3	Table of Common Issues and Actions Required
Error/Issue	Action to take
Change of payroll ID not reported correctly	Contact the Employer Helpline on 0300 200 3200
Leaver details not submitted	Provide these on an additional/further FPS – HMRC cannot take action to add this internally
Creation of duplicate employment records (recognised by multiple tax codes received)	Contact the Employer Helpline on 0300 200 3200
Creation of a temporary reference number	
High volumes of tax codes received unexpectedly after a change of payroll software takes place	Contact the Employer Helpline on 0300 200 3200
Same FPS file submitted more than once e.g. clicking the 'send' button twice in error before the successful acknowledgement has been received for the first	FPS files are processed in the order they are received. If the subsequent submissions are exact copies of the original with no changes they should be recognised and marked as a duplicate by our systems. As the original file is the one being processed the others will not be actioned. No further action is necessary.
Starter details submitted before leaver details – timeline issues	The employees will need to contact the Tax Office directly on 0300 200 3300 to review their records and re-calculate tax codes as required.
