**Select as many of the symptoms as apply to you**

Remember to select all the symptoms you experience. You may have more than one. You don't have to select all of them.

- A high temperature (fever)**  
This means the person has a fever or has had a fever recently.
- A new cough or change in cough**  
This means you've noticed that you've had a cough that was different to yours.
- Loss of taste or smell**  
This means you've noticed that you can't taste or smell things normally.
