

Testing for home care workers

How testing works

Complete a swab test on the same day each week between Thursday and Sunday. Make sure you register, register and post the test on the same day. Make sure you have everything you need before you complete the test, including a Royal Mail return label.

Every 4 weeks
Collect 4 test kits from
your organisation

Every 7 days
Complete, register
and post 1 test kit

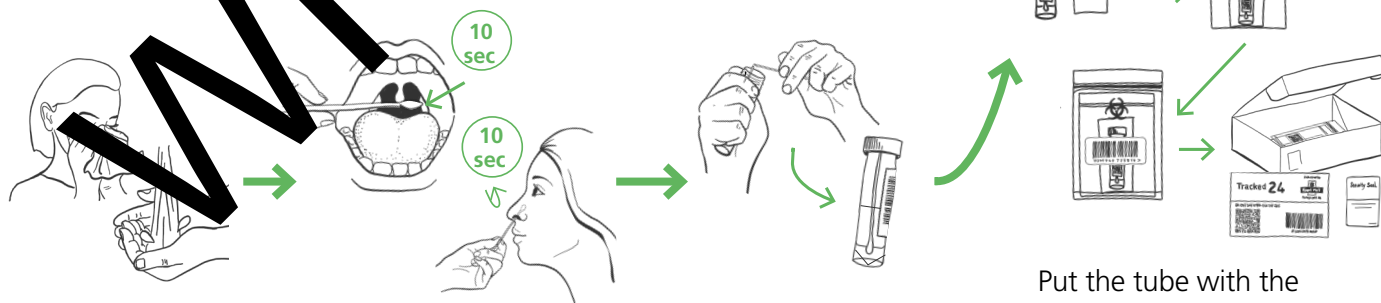

Only test between
Thursday and Sunday

Before testing, make sure you:

- get the unique organisation number (UON) from your homecare agency
- read the instructions provided in your test kit
- check collection times at your nearest Royal Mail priority postbox

You can do this at: www.royalmail.com/services-near-you

1 Take the swab test once every 7 days

Blow your nose and
wash your hands
before testing.

Swab your throat
and nose for 10
seconds each.

Put the swab in the
plastic tube with the lid
securely fastened. The
swab should fit inside
without bending.

Put the tube with the
absorbant pad in a zip-
lock bag, then in the
biohazard bag with the
matching barcode. Package
the biohazard bag in the
provided return box, secure
with the security seal, and
stick on the Royal Mail
return label.

2 Register your test kit online

Register your test kit online at: <https://organisations.test-for-coronavirus.service.gov.uk/register-organisation-tests>

To register you will need your homecare agency's **unique organisation number (UON)**

3 Post your test kit by Royal Mail priority postbox on the same day of testing

Post the completed kits no later than **1 hour** before the last collection time (weekend times may differ from weekdays).

Do not complete or post your test on a bank holiday

Only use a Royal Mail priority postbox

with the label and NHS logos below:

Some priority postboxes have a Sunday collection. They'll show one of these labels:

PRIORITY POSTBOX
SATURDAY & SUNDAY

After testing

You should receive your results within 3-5 days. Conduct 1 test every 7 days.

+ If you get a positive result you must

- put on a face mask immediately if you're outside your home
- inform your manager
- stay home/immediately return home and self isolate for 10 days from your test. You may return to work on day 11 if you've not had a high temperature for 48 hours and are well.

?

If you have any questions you can

- speak to your manager
- call **119**

Do not delay getting help if you're worried. Trust your instincts.

For medical help, contact 111. In an emergency dial 999.
