National framework for e-sexual and reproductive healthcare

User guide: Issue 2

About Public Health England

Public Health England exists to protect and improve the nation's health and wellbeing, and reduce health inequalities. We do this through world-leading science, research, knowledge and intelligence, advocacy, partnerships and the delivery of specialist public health services. We are an executive agency of the Department of Health and Social Care, and a distinct delivery organisation with operational autonomy. We provide government, local government, the NHS, Parliament, industry and the public with evidence-based professional, scientific and delivery expertise and support.

Overview

National Framework for e-Sexual and Reproductive Healthcare

Framework reference: 5607

Start date: August 2020

End date: July 2023

Extension period: 12 months

Bravo contract notice: 9964c148-722c-4347-be93-9798be86f0e0

This Framework is available for use in England

For further information please email: procurement@phe.gov.uk

Introduction

This user guide is for the National Framework for e-Sexual and Reproductive Healthcare.

Framework scope

Customers can contract with a supplier listed on the National Framework for e-Sexual and Reproductive Healthcare for one of more of the following services:

- HIV/STI self-sampling
- Remote prescribing of selected methods of routine contraception
- Remote prescribing of emergency hormonal contraception

Customers can select from a number of optional add-on services including:

- Chlamydia self-sampling
- Remote prescribing of medication for treatment of chlamydia
- Provision of condoms
- Provision of bridging methods of contraception
- Provision of pregnancy tests

Suppliers

PHE has appointed (in alphabetical order) the following suppliers to the National Framework for e-Sexual and Reproductive Healthcare:

- Brook / Brook Digital Clinic
- Preventx / SH:UK
- SH:24 / SH:24

Who can use this Framework?

The following organisations can use the National Framework for e-Sexual and Reproductive Healthcare:

- any local authority or combined authority in England
- any Clinical Commissioning Group (CCG) in England
- any NHS Trust or NHS Foundation Trust in England
- NHS England and NHS Improvement
- Public Health England

PHE is entitled to allow other groups of organisations to use the Framework. PHE will consult with the PHE Steering Group for HIV / Sexual and Reproductive Health Frameworks and, if relevant, other stakeholders including commissioners.

Service components

Customers can arrange a call-off contract with a supplier listed on the National Framework for e-Sexual and Reproductive Healthcare for access to one of more of the following services:

- Self-sampling for HIV/STIs
- Remote prescribing of selected methods of routine contraception
- Remote prescribing of emergency hormonal contraception

The service specification can be found in the Call-Off Contract (see Appendix 6).

1. Self-sampling for HIV/STIs

The service specification requires that customers can determine eligibility for the HIV/STI self-sampling service based on factors including age or postcode. Customers can choose to allow direct access or for users to be redirected or referred from local services.

Providers are required to conduct an online assessment with eligible users to determine the type of self-sampling kit (capillary or finger-tip blood sampling; 1st pass urine sampling; pharyngeal swab sampling, vulvo-vaginal swab sampling, rectal swab sampling) to be provided to the user. Providers are asked to screen for an appropriate combination of the following infections: HIV; Hepatitis B and Hepatitis C; syphilis; chlamydia and gonorrhoea.

Providers are required to fulfil orders for self-sampling kits and process returned samples. The specification asks providers to arrange for kits to be posted to the user and / or arrange for kits to be available for collection from a local service, as agreed with the customer. Condoms can be provided with the self-sampling kits as an additional, optional service.

Providers are required to process returned samples at an accredited laboratory and to conduct all related activities including results management and, if required, referral for confirmatory testing and / or treatment, and initial of partner notification. Customers can also choose to offer remote prescribing of medication for treatment of uncomplicated cases of chlamydia.

Offline kits for Blood Borne Virus self-sampling are available as a separate service offer to meet the needs of alternative settings such as Substance Misuse services.

2. Emergency contraception

The service specification requires that customers can determine eligibility for the emergency contraception service based on factors including age or postcode. Customers can choose to allow direct access or for users to be redirected or referred from local services.

Providers are required to conduct a remote assessment with eligible service users to determine if emergency hormonal contraception can be prescribed. Providers are asked to offer either or both of: dispensing and supply of medication via the post or for collection from a pharmacy.

Customers can choose to offer the supply of a pack of condoms, the supply of a pregnancy test device, the supply of a bridging method of contraception, and / or the supply of a chlamydia self-sampling kit as additional, optional services for eligible users. Customers can also choose to offer remote prescribing of medication for treatment of uncomplicated cases of chlamydia.

3. Routine contraception

The service specification requires that customers can determine eligibility for the contraception service based on factors including age or postcode. Customers can choose to allow direct access or for users to be redirected or referred from local services.

Providers are required to conduct a remote assessment with eligible service users to determine if a routine method of contraception can be prescribed. Customers can choose to allow one or more of the following to be prescribed: progestogen-only pill (POP); combined oral contraception (COC); contraceptive patch, contraceptive ring; and self-administered injectable contraception. Providers are asked to offer either or both of: dispensing and supply of medication via the post or for collection from a pharmacy.

Customers can choose to offer the supply of a pack of condoms and / or the supply of a chlamydia self-sampling kit as additional, optional services for eligible users. Customers can also choose to offer remote prescribing of medication for treatment of uncomplicated cases of chlamydia.

Suppliers

Brook, Preventx and SH:24 have been appointed to the National Framework for e-Sexual and Reproductive Healthcare to deliver the components outlined in the table below.

| Services | | Product / supplier | | |
|---|---|----------------------|------------------|---------------|
| Services that can be provided via the Framework | | Brook Digital Clinic | SH:UK / Preventx | SH:24 / SH:24 |
| 1 | <ul style="list-style-type: none"> • Self-sampling for HIV/STIs: <ul style="list-style-type: none"> ○ Self-sampling for HIV and STIs ○ Self-sampling for bloodborne viruses* ○ Prescribing medication for treatment of chlamydia* | No | Yes | Yes |

* optional, additional services

Framework procurement and management

Background

Improving sexual and reproductive health and preventing sexual ill-health is important to both individuals and communities. People have different needs at different times; however, most will at some point require access to services including provision of contraception and testing for (and treatment of) sexually transmitted infections.

There has been an expansion of e-sexual and reproductive healthcare provision in England over the last decade. E-sexual and reproductive service provision can complement specialist, clinic-based services in a local area, providing individuals with an alternative method of accessing healthcare.

PHE developed and procured the National Framework for e-Sexual and Reproductive Healthcare as a response to the Covid-19 pandemic to support local commissioning and development of services.

The Framework offers customers a convenient, efficient and cost-effective method for contracting with suppliers of e-sexual and reproductive health services. Suppliers are delivering services to a pre-agreed specification, pre-agreed terms and conditions, and to a published price list.

Procurement process

Public Health England led the establishment and procurement of the National Framework for e-Sexual and Reproductive Healthcare on behalf of the Department of Health and Social Care.

The service specification was developed with input from representatives of the PHE Steering Group for HIV / Sexual and Reproductive Health Frameworks.

PHE adopted a procurement process based on the open tendering procedure described in the Public Contracts Regulations 2019. PHE published a formal notice on the PHE e-Tendering Portal to invite expressions of interest. The corresponding award notices can also be found on the PHE e-Tendering Portal (<https://phe.bravosolution.co.uk>).

Evaluation and appointment of suppliers

Bid submissions were evaluated in accordance with the selection and award criteria (including sub-criterion) detailed in the Invitation to Tender (ITT) documents.

Bids were assessed using the following award criteria:

- non-price (80%): responses to the method statement questions were assessed and scored
- price (20%): submitted prices were assessed and scored

Suppliers were also assessed for their financial stability, track record, experience, and technical and professional ability. Bids that satisfied all aspects of the evaluation process were accepted and the suppliers have been appointed to the Framework.

Framework management and contractual structure

PHE is responsible for the overall management of the National Framework for e-Sexual and Reproductive Healthcare. PHE has established a steering group to advise on the strategic development and management of the Framework.

Customers that wish to contract with a supplier listed on the Framework are required to complete and return to PHE the Customer Access Agreement (Appendix 5) and then arrange for the Call-Off Contract (Appendix 6) to be put in place with the preferred supplier. The relationship between parties is illustrated at Figure 1.

The Call-Off Contract forms part of the Framework Agreement. Call-off terms and conditions have been agreed between PHE and each supplier.

Customers are responsible for managing their own contract with their supplier.

Figure 1. Relationship between the parties to the arrangement

Framework period

The National Framework for e-Sexual and Reproductive Healthcare commenced in August 2020 and will be in place until July 2023 (with an option to extend for 12 months to July 2024).

Customers can use the Framework from 17 August 2020. Contract duration is for agreement between customers and suppliers but should not exceed the end date of the Framework.

Order process

Each of the suppliers has published a brochure to describe and explain the services that can be purchased via the Framework. Further details including links to these brochures and pricing can be found in the following appendices:

- Appendix 1: Brook Digital Clinic / Brook
- Appendix 2: SH:UK / Preventx
- Appendix 3: SH:24 / SH:24

Customers that wish to contract with a supplier listed on the Framework are required to follow the steps described below.

Customers are reminded to act in accordance with their own procurement rules: if a direct award is not possible then a mini-competition could be required.

Step 1: Customer Access Agreement

Please complete and return the Customer Access Agreement (see Appendix 5) to PHE. Please email the form to procurement@phe.gov.uk including 'National Framework for e-Sexual and Reproductive Healthcare' in the subject heading.

Customers need to complete and return the Customer Access Agreement for audit purposes and to evidence that services are being procured via the Framework.

Step 2: Call-Off Contract

Customers need to put in place a contract with their preferred supplier in order to be able to purchase goods and services via the Framework. Customers need to complete the 'Form of Contract' and the 'Order Form' contained within the Call-Off Contract (see Appendix 6). Both the customer and the supplier needs to agree and sign the contract.

Customers also need to complete and submit to their supplier the Customer Information Form and the Local Services Information Form contained in Appendix 4.

Local customisation agreed between the customer and the supplier should be described in the Order Form (within the Call-Off Contract) and the Customer Information Form (Appendix 4).

Please email procurement@phe.gov.uk for further information about the Framework or the order process.

Appendix 1: Brook

Service overview

Brook has been appointed to the National Framework for e-Sexual and Reproductive Healthcare to provide the following services:

- remote prescribing of emergency contraception (component 2)
- remote prescribing of routine methods of contraception (component 3)
- chlamydia self-sampling (additional component)
- remote prescribing of treatment of chlamydia (additional component)

Brook will deliver the above services via the Brook Digital Clinic. For further information please refer to the brochure published at: <http://www.brook.org.uk/digital-clinic>.

Pricing for the Brook Digital Clinic

Component 1: Self-sampling for HIV/STIs

Brook does not offer an HIV/STI self-sampling service via the National Framework for e-Sexual and Reproductive Healthcare.

Chlamydia screening and treatment is available as an additional service for customers of the emergency contraception service (component 2) and the contraception service (component 3).

Component 2: Emergency hormonal contraception

Brook offers remote prescribing of emergency hormonal contraception for supply via the post and / or for collection from selected pharmacies or a Brook clinic*.

Please refer to the brochure at <http://www.brook.org.uk/digital-clinic> for further information.

| Emergency contraception | | | | | |
