ACRONYMS AND ABBREVIATIONS

Acronym	Definition
BMS	Below Minimum Size
CECAF	Fisheries Committee for the Eastern Central Atlantic
ERS	Electronic Reporting System
EU	European Union
FAO	Food and Agriculture Organisation
GPS	Global Positioning System
ICES	International Council for the Exploration of the Sea
LOA	Length Overall
MCRS	Minimum Conservation Reference Size (formerly Minimum Landing Size (MLS))
ММО	Marine Management Organisation
PO	Producers Organisation(s)

UTC	Co-ordinated Universal Time
VMS	Vessel Monitoring System
WGS	World Geodetic System

DEFINITIONS

Expression	Definition
3-Alpha FAO fish species codes	ASFIS list of species includes 12 751 species items selected according to their interest or relation to fisheries and aquaculture. For each species item stored in a record, codes (ISSCAAP group, taxonomic and 3-alpha) and taxonomic information (scientific name, author(s), family, and higher taxonomic classification) are provided. An English name is also available for most of the records.
Competent Authority (or authority / authorities)	For the purposes of this document the Competent Authority is the Marine Management Organisation (MMO) who act as the Regulatory Body. This document also refers to the MMO Fisheries Monitoring Centre as part of this organisation.
First Sale Fish	Fish being marketed for the first time.
Product Presentation	A description of the processed state of the fisheries product or part thereof in accordance with the codes and descriptions in Annex I of Fisheries Administration No 404/2011 of 8 April 2011

Third Country	A country which is not part of the UK

Obligations Regarding Sales Notes

Summary

This document is intended to be used by all sellers and buyers of 'first-sale' fish (except quantities of less than 30 kg when purchased for personal consumption) and Marine Enforcement Officers (MEO).

It is a mandatory requirement, in law, for registered buyers of 'First Sale' fish to record details of their purchase in a document referred to as a 'Sales Note'.

This document is intended to help you¹ understand more about your obligations as the purchaser of 'First Sale' fish with regard to the Fisheries Administration Sales Note. However, it is not a comprehensive guide to UK legislation for the fishing industry. It is to be used as a guide; not as a definitive interpretation of UK legislation.

¹ Where the term 'you' is used in this document, this always refers to the purchaser of 'First Sale' fish

⁻ this being defined as: fish being marketed for the first time.

Revision: September 2019

1 Why you need to record the details of your purchase of 'First Sale' fish

UK Law states that you, the buyer or seller of 'First Sale' fish are required to accurately record the details of your transaction on a Fisheries Administration Sales Note.

This document is intended to help you understand more about your obligations as the seller or purchaser of First Sale fish with regard to the Sales Note. However, it is not a comprehensive guide to UK legislation for the fishing industry. It is to be used as a guide; not as a definitive interpretation of the legislation.

Information shown in the appendices of this document is for guidance only. The information is subject to change without notice, so you may need to contact your local MMO Office to ensure you are up-to-date with the current legislative requirements.

The figure you record on the Sales Note shall be the figure resulting from the weighing². It is not necessarily the same as that recorded in the Fishing Logbook by the Master of the fishing vessel.

You must always remember that it is the **responsibility of the Seller or the Buyer of First Sale Fish** to ensure that all the information recorded in the Fisheries Administration Sales Note is accurate.

² Refer to: Document No.: H8.10-G-061 - Obligations Regarding the Weighing of Fish Catches.

2 Who needs to use a Fisheries Administration Sales Note – and what type?

All purchasers of 'First Sale' fish are required to complete a Fisheries Administration Sales Note.

This includes ALL registered buyers, registered auctions or registered fish markets and other registered bodies or persons authorised by the Marine Management Organisation (MMO).

2.1 If your annual financial turnover in first sales of fisheries products is less than £175 000

A 'paper', or 'electronic' (preferred), format Sales Note is required to be completed.

2.2 If your annual financial turnover in first sales of fisheries products is £175 000 or more

An 'electronic' (computerised) Sales Note is required to be completed.

2.3 You may not need to use a Sales Note if you meet certain conditions

To be exempt from completing a Sales Note you need to meet the following condition:

If you have purchased no more than 30 kg of fish products which are to be used only for private consumption and therefore not sold on the market.

3 What information needs to be recorded on the Sales Note?

The information recorded on the Sales Note must include the following details:

- 1. The name and identification number of the fishing vessel that has landed the fish product you have bought.
- 2. The port and date of landing the fish product.
- 3. The name of the Master (or the operator) of the fishing vessel. If you have bought your fish from a different source you must record the name of the seller.
- 4. Your name, as the buyer, and your VAT number, tax identification number, or other unique identifier.
- 5. The FAO alpha-3 code of each species and the relevant geographical area in which the catches were taken.

Note: This must include details of the relevant geographical area of capture: FAO area, sub-area and sub-division, ICES division, NAFO, NEAFC sub-area, CECAF area, GFCM sub area or third country fishing zone.

- **Note:** The geographical area to be recorded is the relevant ICES area. Refer to Appendix 3 for an approximate map showing these areas.
- **Note:** Species must be recorded using the 3-Alpha FAO fish species codes. A list of the most common species can be found in <u>Appendix 4</u> of this document.

The full list of 3-Alpha FAO fish species codes can be viewed at URL: <u>https://agriculture.gov.mt/en/fisheries/Documents/fao-</u> <u>specieshttps://agriculture.gov.mt/en/fisheries/Documents/fao-species-</u> <u>codes.pdfcodes.pdf</u>

6. The quantities of each species in kilograms in product weight, broken down by type of product presentation or the number of individuals if the relevant quota is managed on the basis of individuals.

- **Note:** The figure resulting from the weighing shall be used for the completion of sales notes. Refer to: Document No.: H8.10-G061 Obligations Regarding the Weighing of Fish Catches.
- **Note:** Species must be recorded using the Product Presentation 3Alpha Codes. A list of these can be found in Appendix 5 of this document.
- 7. For all products subject to marketing standards³, as appropriate, the individual size or weight, grade, presentation and freshness.
- 8. if you have any species that are below the applicable minimum conservation reference size, these must be recorded in terms of:
 - the quantity (net weight in kg) or the number of individual species
 - details of the location where they are being stored

Note: Refer to <u>Landing Obligation</u> and <u>Recording Catches of Fish</u> <u>below Minimum Size</u> (see References).

9. The place and the date of the sale.

10. Where possible, record the following information:

- the reference number and date of invoice
- where appropriate, the reference number and date of the sales contract

³ Reference should be made to Article 33 and Article 34 of Regulation (EU) No. 1379/2013 – Common Marketing Standards. Article 34 (Compliance with Common Marketing Standards) states:

^{1.} The products intended for human consumption for which common marketing standards are laid down may be made available on the UK market only in accordance with those standards.

^{2.} All fishery products landed, including those that do not comply with common marketing standards, may be used for purposes other than direct human consumption, including fish meal, fish oil, pet food, food additives, pharmaceuticals or cosmetics.

This legislation should be read in conjunction with UK fisheries rules Regulations 2018

11. Where applicable, record the following information:

- record the reference number of the take-over declaration
- record the reference number of the transport document

12. The price you paid for the fish.

Note: Examples of Fisheries Administration Sales Notes are illustrated in Appendices 1 and 2.

4 What to do with the information recorded on the Sales Note

a) If your annual financial turnover in first sales of fisheries products is less than £175 000:

You, the buyer, must submit your (paper) Sales Note, or send it electronically, to the local MMO Office within 48 hours of purchasing your fish.

b) If your annual financial turnover in first sales of fisheries products is £175 000 or more:

You, the buyer, must transmit your (electronic) Sales Note, to the MMO within 24 hours of purchasing your fish using the UK Electronic Reporting System (ERS).

4.1.1 Registering for the UK Electronic Reporting System

Before you can use the ERS you have to register. To register, you must either complete Section D of the RBS1 form when you first register as a buyer or seller or, if you are already a registered buyer/seller, sign up at any time using the form RBS5. Registration is free.

You can use the following links:

RBS1:

system.pdf

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/ attachment_data/file/828722/RBS1_Apply_for_registered_status_as_a_buyer _or_seller_of_firstsale_fish__including_shellfish_and_nephrops__in_the_UK.pdf RBS5 https://assets.publishing.service.gov.uk/government/uploads/system/uploads/ attachment_data/file/704651/RBS5_Access_to_online_electronic_salesnote

Send your completed application form to the Registration of Buyers and Sellers department of the MMO (refer to Section 5 of this document).

Once your application has been processed you will receive login details for the secure ERS Website.

4.1.2 Using the UK Electronic Reporting System

The UK Electronic Reporting System (ERS) allows you to submit sales notes electronically using one of the following methods:

- 1. Direct data entry through the ERS website suitable if you purchase small quantities of fish.
- 2. Send a Comma Separated Variable (CSV) file (e-mailed) to the ERS hub. The e-mail address is: salesnote.live@fishhub.net (you can use this to submit a file containing multiple sales notes).
- 3. Using a predefined spreadsheet template supplied by the UK Fisheries Authorities ('Option 5'). As a buyer you can use this spreadsheet template to submit a single sales note or multiple sales notes.

5 Further Enquiries

Enquiries should be directed to the local office of the MMO.

MMO Contact Details:

Registration of Buyers and Sellers Marine Management Organisation The Fish Quay Sutton Harbour Plymouth Devon PL4 0LH United Kingdom

Telephone no.: 0208 026 9052.

Appendix 4 FAO 3-Alpha Codes of the Most Common Fish Species Landed in the UK

This list is the most common species caught and the associated Food and Agriculture Organisation (FAO) of the United Nations short code. The list is not a comprehensive list of all species. A full list of codes is available on the FAO website. Registered Buyers and Sellers (RBS) can also access a list on the Electronic Recording System (ERS) when entering sales information. This list can be viewed online at URL:

		Preduct pr	esentation alpha-3 codes
	i-Alphu produst presentation code	Prescritation	Description
	CBF	Cod humerfly (escalado)	HEA with skin on, upine on, tail on
	CLA	Claws	Class only
	DWT	ICCAT code	Gilled, gutted, part of head off, fina off
	FIL	Filleted	HEA+GUT+TLD+bones off, each fish originates two fiftets not joined by my par
	FIS	Fillered and skinned fillers	FIL SKI Each fish originates two fillets not joined by any part
	FSB	Filleseil with skin and bones	Filleted with skin and bones on
	FSP	Filleted skinned with pinbone on	Filleted with skin removed and pinbone on
	GHT	Gutted headed and tailed	GUII+TLD
	GUG	Gumed and gilled	Guts and gills removed
	GUII	Gutted and hended	Guts and head removed
	GUI,	Gunad liver in	GUT without removing liver parts
	GUS	Gutted headed and skinned	GUII+SKI
	our	Gunal	All gets removed
	HEA	Hendel	Heads off
	IAP	Japanese eut	Transversal cut removing all parts from head to helly
	JAT	Tailed Japanese cut	Arpanese cat with tail removed
	I.AP	Lappen	Double fillet, IIFA, skin-tails+fins ON
	I.VR	Liver	Liver only. In case of collective presentation use code LVR-C
	OTH	Other	Any other presentation (7)
	ROF	Rest (n)	Roe(s) only in case of collective presentation use code ROE-C
	SAD	Solted dry	Headeal with skin on, spine on, tail on and salted directly
