

The number of people testing positive for COVID-19 in the UK

Number of cases each day, by date reported, up to 10 Feb

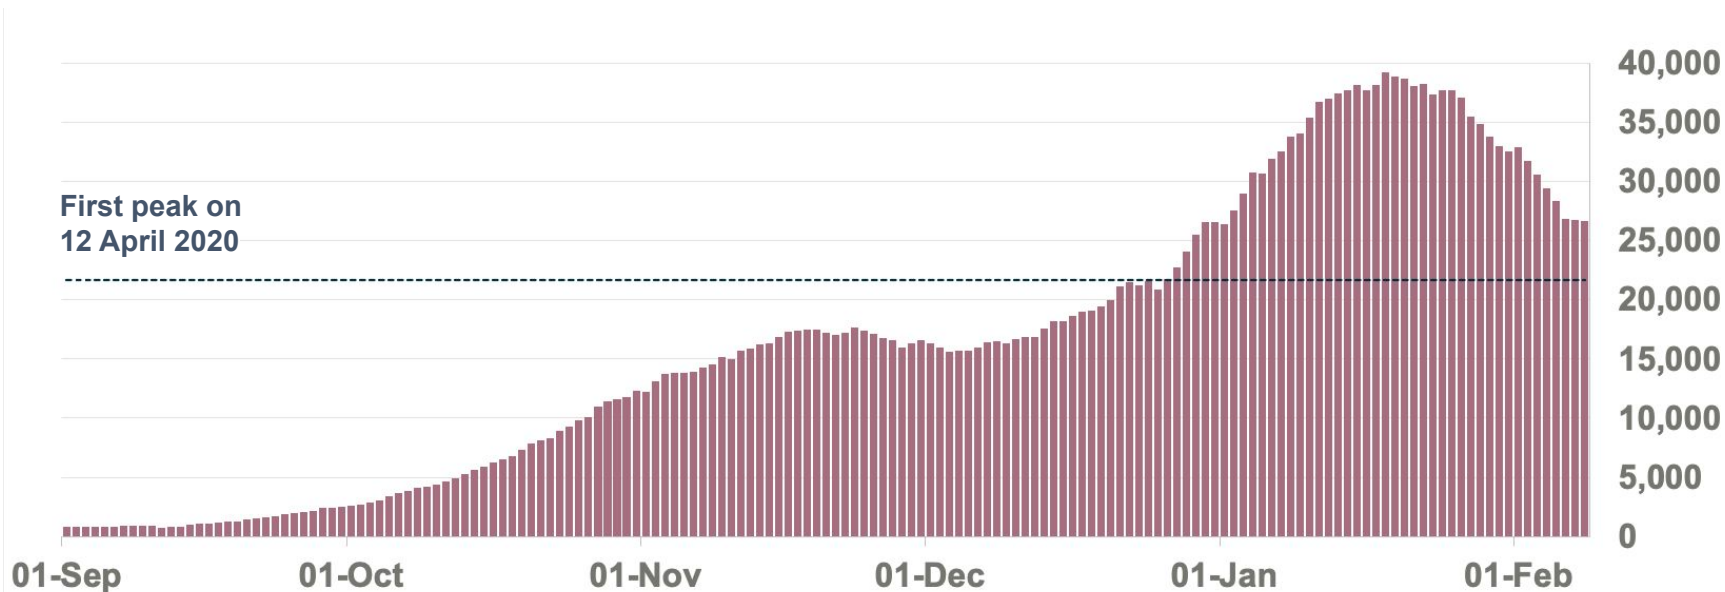

The estimated number of people testing positive for COVID-19 in the community in England

Estimated number of people testing positive in England

The number of people in hospital with COVID-19 in the UK

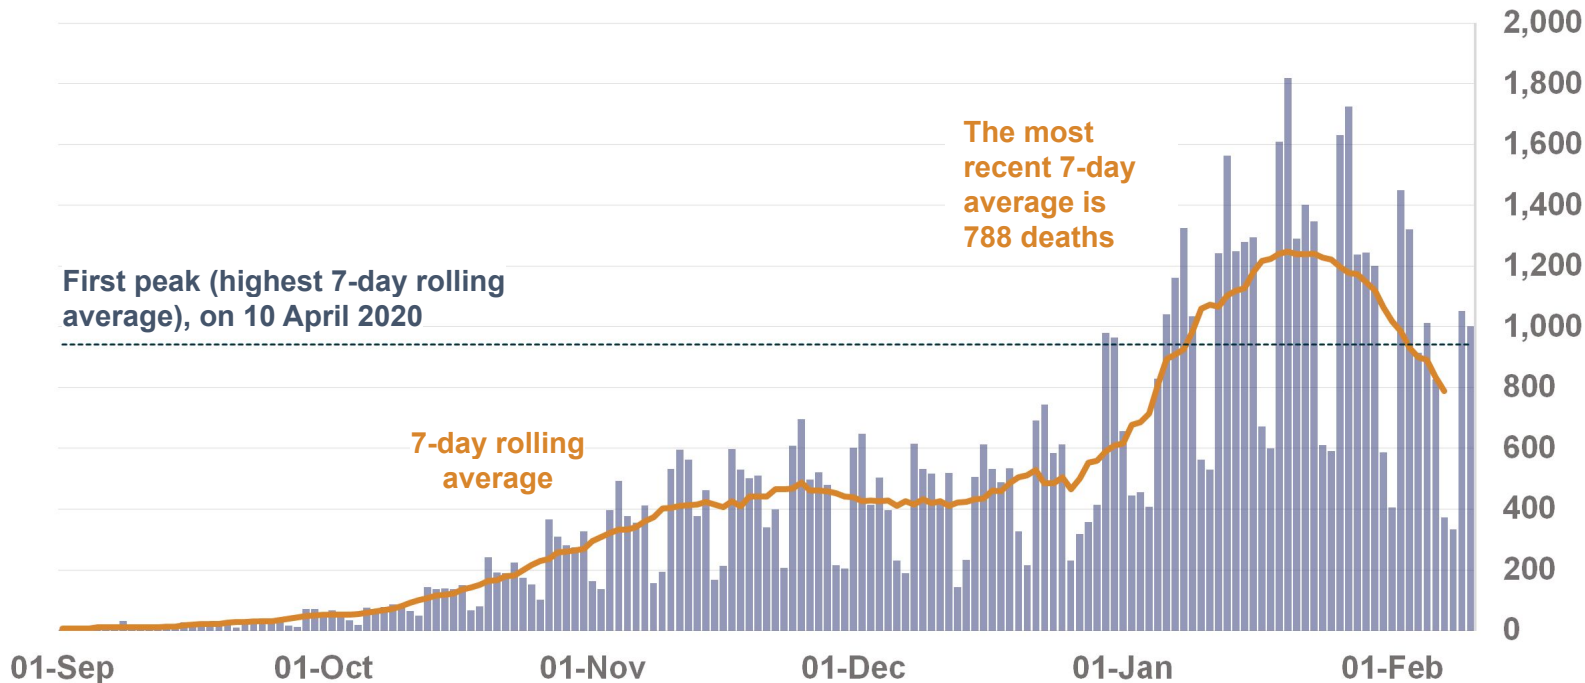

Number of people in hospital each day, up to 8 Feb

First peak on
12 April 2020

The number of deaths of people who had a positive test result for COVID-19 in the UK

Number of deaths each day, by date reported, up to 10 Feb

First peak (highest 7-day rolling average), on 10 April 2020

The most recent 7-day average is 788 deaths

7-day rolling average

The number of people who have received a vaccination for COVID-19 in the UK

Cumulative number of people who have received a COVID-19 vaccination, by date reported, up to 9 Feb

Statistical notes

Number of daily cases, UK:

Number of individuals who have had at least one positive COVID-19 test result (either lab-reported or lateral flow device), by date reported (the date the case was first included in the published totals). COVID-19 cases are identified by taking specimens from people and testing them for the presence of the SARS-CoV-2 virus. If the test is positive, this is referred to as a case. If a person has had more than one positive test they are only counted as one case. Cases data includes all positive virus test results, even if they are not confirmed by a lab. For example, positive test results from swab tests performed using a lateral flow device, which do not need to go to a lab, contribute towards the cases total.

Estimated number of people testing positive for COVID-19 in England:

We provide 95% credible intervals because the figures are based on a model from a sample of people. A credible interval is calculated so that there is a 95% probability of the true value lying in the interval. The estimates refer to infections reported in the community in private households. These estimates exclude infections reported in hospitals, care homes or other institutional settings. To improve stability in our modelling while maintaining relative timeliness of our estimates, we are reporting our official estimates based on the midpoint of the reference week. This week, the reference day for positivity rates is Wednesday 27 January 2021.

For further information, contact infection.survey.analysis@ons.gov.uk.

Patients in hospital with COVID-19, UK:

Total number of people in hospital with COVID-19 in the UK. Definitions are not always consistent between the four nations. England data now covers all Acute Trusts, Mental Health Trusts and the Independent Sector and are reported daily by trusts to NHS England and NHS Improvement. Welsh data include confirmed COVID-19 patients in acute hospitals only, including those recovering. The first peak was 21,687 on 12 April 2020.

COVID-19 daily deaths within 28 days of a positive test, UK:

Number of deaths of people who had a positive test result for COVID-19 and died within 28 days of the first positive test. Data from the four nations are not directly comparable as methodologies and inclusion criteria vary. The 7-day rolling mean average of daily deaths is plotted on the chart on the middle day of each seven day period. Data presented is by date reported rather than date of death or registered. The highest rolling average of the first peak was 942, reported on 10 April 2020.

Statistical notes

Number of people who have received a vaccination for COVID-19, UK:

Number of people who have received a first dose or both a first and a second dose of a vaccination for COVID-19, by day on which the vaccine was reported. Data are reported daily, and include all vaccination events that are entered on the relevant system at the time of extract. This includes reported vaccines that were administered up to and including the date shown.

England

Vaccinations that were carried out in England are reported in the National Immunisation Management Service which is the system of record for the vaccination programme in England, including both hospital hubs and local vaccination services. Data are extracted at midnight on the date of report.

Wales

Vaccinations that were carried out in Wales are reported in the Welsh Immunisation System. Data is extracted at 10pm on the date of report. No data was reported for 15 and 16 January 2021. The newly reported number for 17 January 2021 includes vaccinations reported on 15 to 17 January 2021.

Scotland

Vaccinations that were carried out in Scotland are reported in the Vaccination Management Tool. Data is extracted at 8:30am on the day following the date of report. No data was reported for 15 and 16 January 2021. The newly reported number for 17 January 2021 includes vaccinations reported on 15 to 17 January 2021.

Northern Ireland

Data are extracted at the end of day of the date of report.
