Tier allocations and weekly case rates by area (10 February vs 3 February comparison)

Notes:

- The chart shows weekly case rates and tiering allocations as at 4 January.
- The vertical axis plots the most recent weekly case rate per 100k people (up to the 10 February) and the horizontal axis plots the equivalent case rate from the week before. Bubbles above the black line represent areas where weekly case rates increased from one week to another. The size of each bubble is proportional to the most recent case rate per 100k people in those aged over 60 years. Each area is coloured according to its Tier as at Monday morning 4 January 2021 (Green (1); Orange (3), Red (4)).

Sources: Data from Public Health England, Outbreak Surveillance Team. Weekly case rate is defined as the number of cases per 100,000 reported in the seven day period preceding the stated date. Some names have been shortened for legibility.
