

The number of people who have received a vaccination for COVID-19 in the UK

Cumulative number of people who have received a COVID-19 vaccination, by date reported, up to 28 Feb

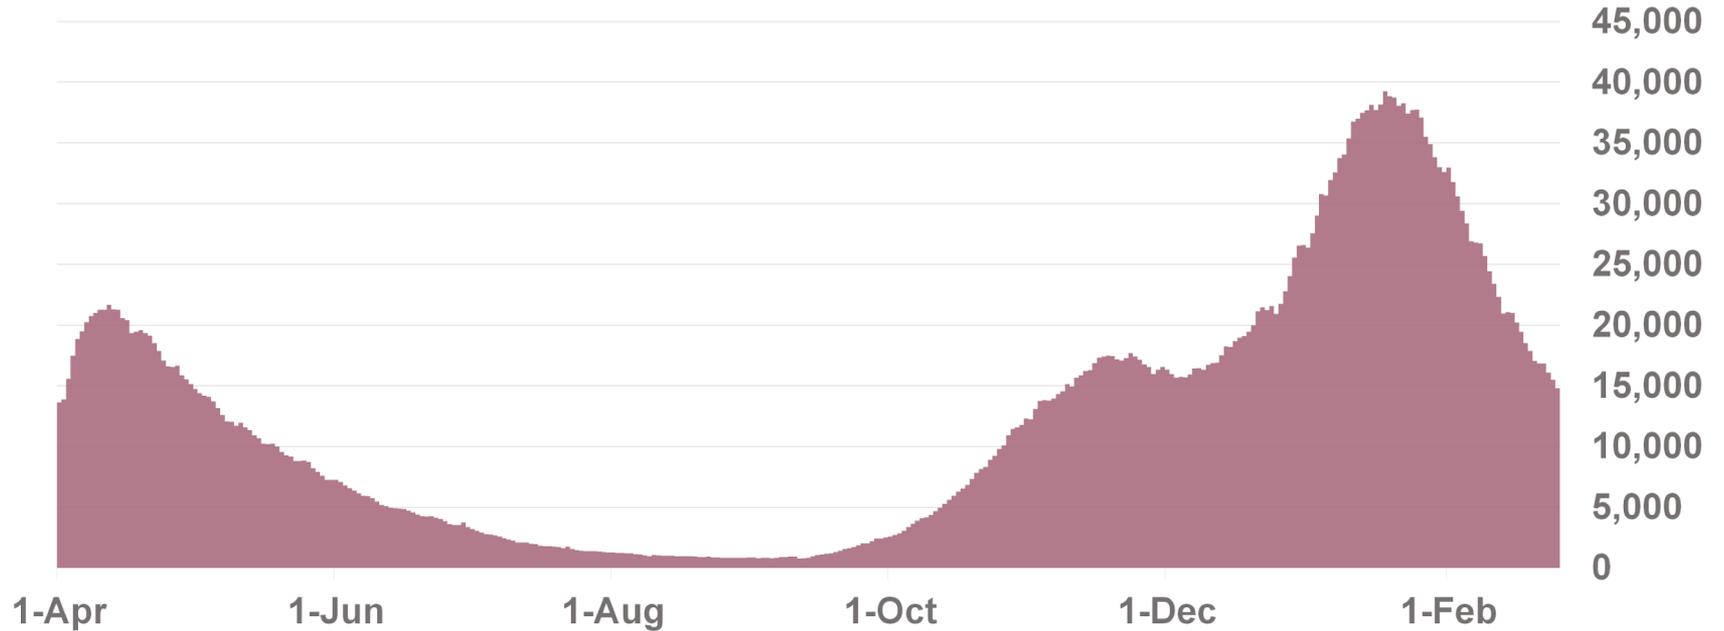

The number of people testing positive for COVID-19 in the UK

Number of cases each day, by date reported, up to 1 Mar

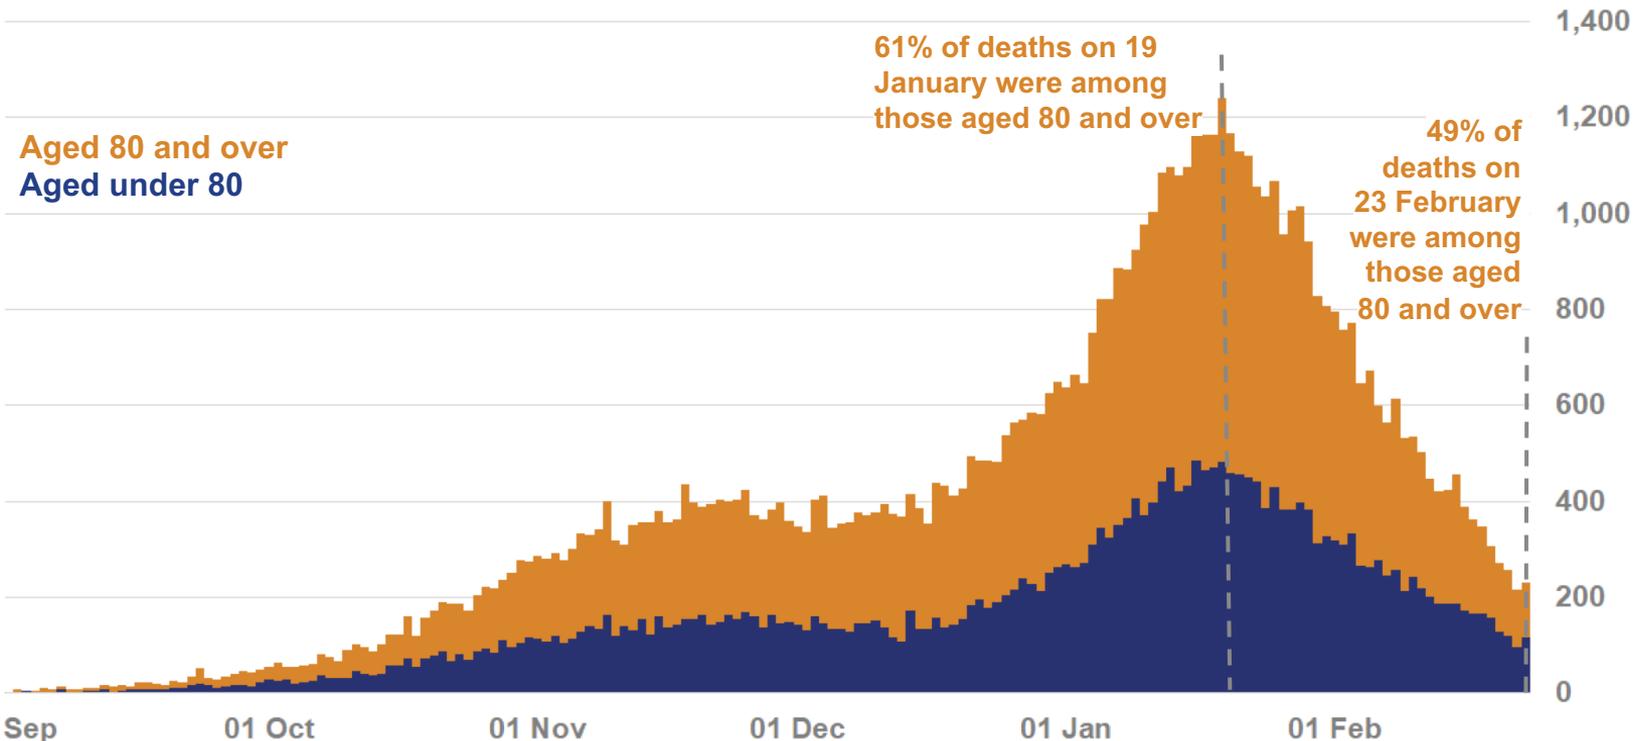

The number of people in hospital with COVID-19 in the UK

Number of people in hospital each day, up to 25 Feb

The number of deaths of people who had a positive test result for COVID-19 in England

Number of deaths each day, by date of death, up to 23 Feb

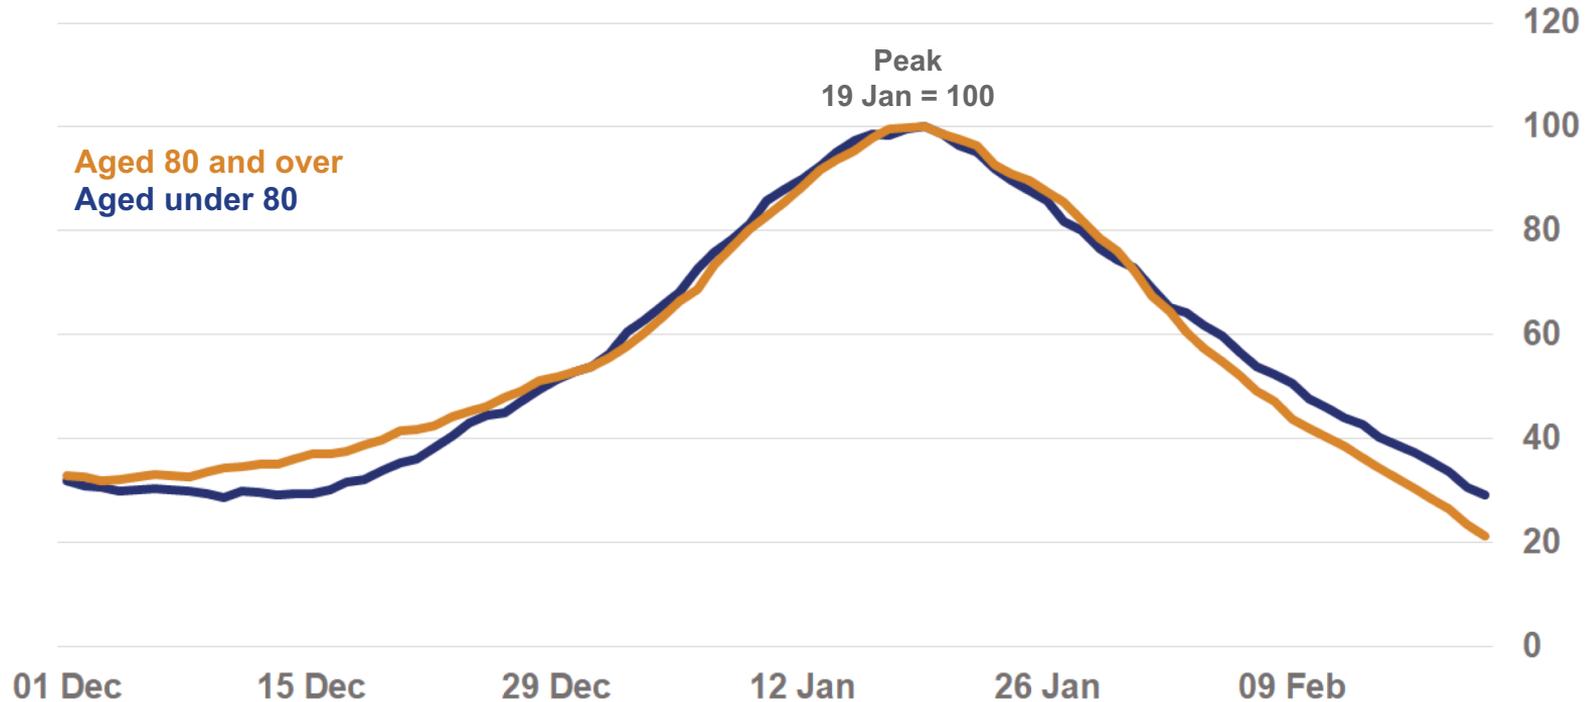

Aged 80 and over
Aged under 80

61% of deaths on 19 January were among those aged 80 and over

49% of deaths on 23 February were among those aged 80 and over

Deaths are falling more quickly in the over 80s

Based on 7-day rolling average of number of deaths each day, by date of death, up to 20 Feb

Statistical notes

Number of people who have received a vaccination for COVID-19, UK:

Number of people who have received a first dose or both a first and a second dose of a vaccination for COVID-19, by day on which the vaccine was reported. Data are reported daily, and include all vaccination events that are entered on the relevant system at the time of extract. This includes reported vaccines that were administered up to and including the date shown.

England data includes vaccinations reported in the National Immunisation Management Service which is the system of record for the vaccination programme in England, including both hospital hubs and local vaccination services. Data are extracted at midnight on the date of report. Welsh data includes vaccinations reported in the Welsh Immunisation System. Data is extracted at 10pm on the date of report. No data was reported for 15 and 16 January 2021. The newly reported number for 17 January 2021 includes vaccinations reported on 15 to 17 January 2021. Scottish data includes vaccinations reported in the Vaccination Management Tool. Data is extracted at 8:30am on the day following the date of report. No data was reported for 15 and 16 January 2021. The newly reported number for 17 January 2021 includes vaccinations reported on 15 to 17 January 2021. Northern Ireland data are extracted at the end of day of the date of report.

Number of daily cases, UK:

Number of individuals who have had at least one positive COVID-19 test result (either lab-reported or lateral flow device), by date reported (the date the case was first included in the published totals). COVID-19 cases are identified by taking specimens from people and testing them for the presence of the SARS-CoV-2 virus. If the test is positive, this is referred to as a case. If a person has had more than one positive test they are only counted as one case. Cases data includes all positive virus test results, even if they are not confirmed by a lab. For example, positive test results from swab tests performed using a lateral flow device, which do not need to go to a lab, contribute towards the cases total.

Patients in hospital with COVID-19, UK:

Total number of people in hospital with COVID-19 in the UK. Definitions are not always consistent between the four nations. England data now covers all Acute Trusts, Mental Health Trusts and the Independent Sector and are reported daily by trusts to NHS England and NHS Improvement. Welsh data include confirmed COVID-19 patients in acute hospitals only, including those recovering.

Statistical notes

COVID-19 daily deaths within 28 days of a positive test, England:

Number of deaths of people who had a positive test result for COVID-19 and died within 28 days of the first positive test. Data presented is by date of death rather than date reported or registered.

COVID-19 daily deaths within 28 days of a positive test, relative to 19 January, England:

Number of deaths of people who had a positive test result for COVID-19 and died within 28 days of the first positive test. Data presented is by date of death rather than date reported or registered. Data used are 7-day rolling averages calculated with the date plotted as the midpoint. Changes are relative to the peak of the second wave, on 19 January. This is represented by a value of 100 on the chart. All other dates are plotted relative to this.
