

COMMITTEE ON CARCINOGENICITY OF CHEMICALS IN FOOD, CONSUMER PRODUCTS AND THE ENVIRONMENT

Follow up to horizon scanning topics – March 2021

Introduction

1. This paper presents the regular follow up to the last full horizon scanning held in November 2020 outlining the topics identified during that discussion and an update on topics being considered by IARC and the EU Scientific Committees.

Topics from COC horizon scanning 2020

2. Below are the priority topics agreed at the horizon scan in November 2020:
- Maintain a watching brief on factors affecting cancer susceptibility including shift work, stress and other lifestyle factors and how that might affect assessment of chemicals and carcinogenicity
 - Consider an update to guidance on assessment of nanomaterials, possibly as a joint activity across COC, COM and COT
 - Gain awareness of the potential effects of antibiotics and antivirals on the microbiome
 - Consider a joint discussion with COM on thresholds for in vivo mutagens and whether there is new information subsequent to the 2010 COM opinion

Joint horizon scanning topics

3. On 24th -25th November 2020, the COC and COM held a joint meeting to which COT members were also invited, and one of the discussion items was joint horizon scanning. From this discussion, the following topics were agreed and the Secretariats will consider how to progress these either as joint topics or which Committee might lead on these:

- Use of toxicogenomics/omics technologies in toxicity testing
- PBPK modelling – a COT workshop was held the following week; COC members participating may wish to feed back on this.
- Next generation sequencing
- Further exploration of microplastics/microparticles and their composition – also linking with COMEAP
- Development of a dynamic cancer risk model, including consideration that pre-cancer effects are assessed as 'general' toxicity pathways, and other influencers on cancer/toxicity risk (e.g. shift work)

This is a background paper for discussion.
It does not reflect the views of the Committee and should not be cited.

- Knowledge sharing across the three Committees, including impacts of EU Exit
- Consideration of uncertainty, use of uncertainty factors and margins of exposure – noting this also links with other activities.

COM and COT horizon scanning topics

4. The Committee has previously requested sight of the COM and COT horizon scanning activities. The latest COT horizon scanning paper is attached for information at Annex A.

Upcoming IARC meetings

5. IARC have one upcoming meetings on their website with respect to the Monograph series (<http://monographs.iarc.fr/ENG/Meetings/index.php>) :

- Meeting 130 (5-12 October 2021) is on:
 - 1,1,1-Trichloroethane (CAS No. 71-55-6)
 - Hydrazobenzene (CAS No. 122-66-7)
 - N-Methylolacrylamide (CAS No. 924-42-5)
 - Diphenylamine (CAS No. 122-39-4)
 - Isophorone (CAS No. 78-59-1)

Upcoming EU Scientific Committee topics

6. The EU Scientific Committee on Consumer Safety (SCCS) has not held any Plenary meetings since those reported in November 2020. SCCS has working groups on:

- Cosmetic Ingredients (last meeting 19/01/2021)
- Nanomaterials in Cosmetic Products (last meeting 14/01/2021), and
- Methodologies (last meeting 16/12/2020).

7. The agenda and minutes of recent EU Scientific Committee on Health, Environmental and Emerging Risks (SCHEER) Plenary meetings are attached in Annex B. SCHEER has working groups on:

- Aluminium in toys (last meeting 27/09/2017)
- Anaerobic biodegradation of linear alkylbenzene sulphonates (last meeting 03/02/2020)
- Safety of breast implants in relation to anaplastic large cell lymphoma (last meeting 05/02/2021)
- E-cigarettes (last meeting 18/02/2021)
- Certain organic chemicals emitted from squishy toys (last meeting 07/12/2020)
- Emerging environmental risks (last meeting 11/09/2018)

This is a background paper for discussion.
It does not reflect the views of the Committee and should not be cited.

- Emerging issues at the environment-social interface (last meeting 04/07/2019)
- Fuel marker (last meeting 09/01/2019)
- Guidelines on the benefit-risk assessment of the presence of phthalates in certain medical devices (last meeting 05-06/06/2019)
- Guidance on the structure and contents of SCHEER opinions (last meeting 17/06/2016)
- Potential risks to human health of light emitting diodes (last meeting 02/03/2018)
- Non-human primates testing (last meeting 02/05/2017)
- Onshore hydrocarbon exploration and production in the EU (last meeting 24/09/2018)
- Safety of PIP silicone breast implants (last meeting 10/10/2017)
- Rapid risk assessment (last meeting 26-27/11/2019)
- Sunbeds (last meeting 24-25/10/2016)
- Tobacco additives (last meeting 24/06/2016)
- UVC lamps (last meeting 18/01/2017)
- Weight of evidence and uncertainties (last meeting 08/02/2018)
- Water Framework Directive (last meeting 01/06/2017), and
- Water reuse (last meeting 12/05/2017).

8. The European Food Safety Authority has a substantial body of work across its Scientific Committee and Panels. More detail is available here: <https://www.efsa.europa.eu/en/science/scientific-committee-and-panels>. EFSA currently has open consultations on a number of substances, and also on methodological questions. The full list of open consultations is here: <https://www.efsa.europa.eu/en/calls/consultations><https://www.efsa.europa.eu/en/calls/consultations>. Expected upcoming consultations are here: <https://www.efsa.europa.eu/en/consultations/consultationsplanner>. This includes a public consultation report on the use of the BMD approach in risk assessment, and a technical report on targeted consultation on the scientific guidance on appraising and integrating evidence from epidemiological studies for use in EFSA's scientific assessments.

Question for the Committee

9. Members are asked to consider this material and whether there are any further topics to consider for future horizon scanning.
