Re: Removal of filter from colour camera to allow operation at night without extra visible illumination

In your letter dated 27th October 2010, you requested authorisation for the optional removal of the infrared cut-off filter (RedSpeed part number 800-032) from the colour camera for operation at night without additional visible illumination.

We are pleased to inform you that following ACPO approval of the resulting image quality, as reported in a document dated 27th October 2010 and in an email dated 2nd November 2010, this change is acceptable, and no testing will be required before the amendment can be used. It is understood that there will be no other changes in the approved hardware, and no changes to the software.

Our records will be amended to incorporate this optional change.

Ian Humphrey
