Re: Removal of 19" monitor from RedFusion roadside cabinet

In your letter dated 4th June 2010, you requested authorisation for the removal of the 19" rack mounted monitor (Redspeed part # 800-029) from the roadside cabinet of your RedFusion system, due to obsolescence.

We understand that the monitor is for maintenance purposes only and that it will be replaced by an external unit temporarily attached to the roadside cabinet.

We are pleased to inform you that this change is acceptable, and no testing will be required. Furthermore we are happy to treat this monitor as an optional component in current and future systems.

Our records will be amended to incorporate this change.

Ian Humphrey
