Case rate by age group and region

Data from the 28 April 2021 to 21 May 2021

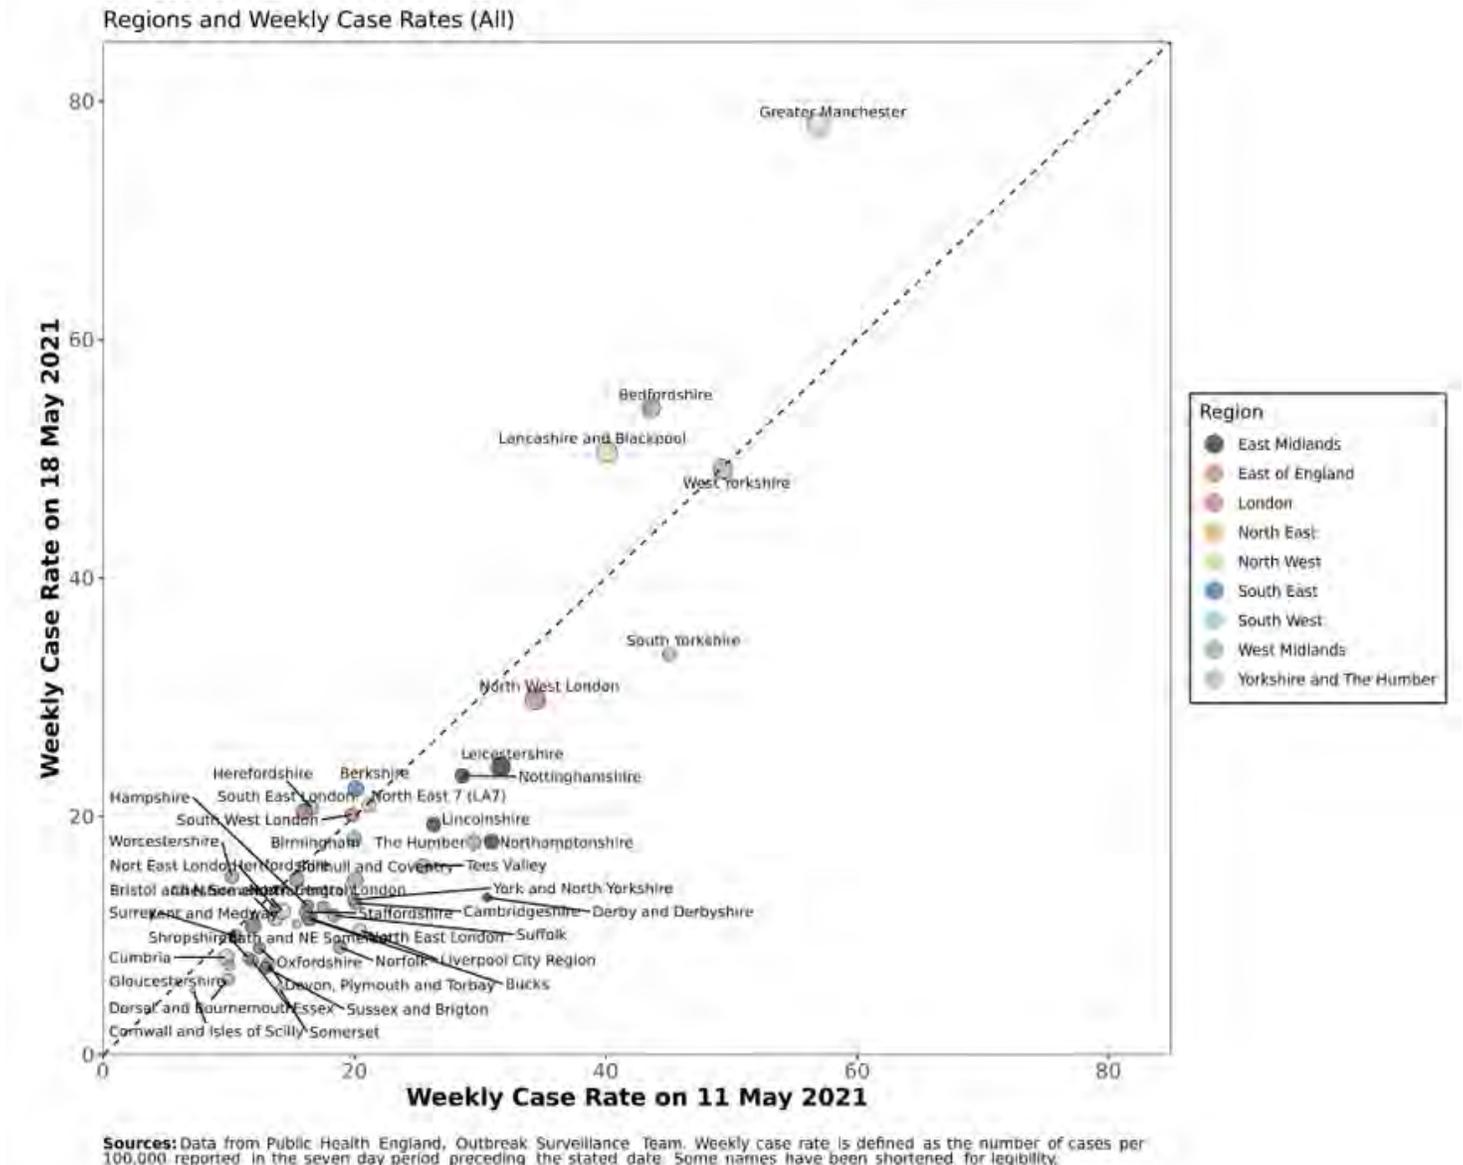

Red dashed line denotes 4 last days of incomplete data. Black dotted line denotes 17th of May - Step 3 of COVID roadmap

Note: Due to the decrease in case rates the range has been changed to now show 100+ cases/100,000 as the top scale point rather than 500+ cases /100,000

Weekly case rates by area (18 May vs 11 May comparison)

- The chart shows weekly case rates by area as on 18 May 2021 compared to weekly case rates by area as on 11 May.
- The vertical axis plots the most recent weekly case rate per 100k people (up to the 18 May), and the horizontal axis plots the equivalent case rate from the week before. The higher the bubble, the worse the current case rate picture.
- The size of each bubble is proportional to the most recent case rate per 100k people in those aged over 60 years.
- The colour of each bubble indicates which region the area is in.
