Introduction and purpose of the document

1. This document provides technical information about how we process information provided in the Individualised Learner Record (ILR) data collection to produce the qualification achievement rates (QAR) dataset.

2. This dataset produces the education and training 2020 to 2021 QAR products. This document also provides information about how we generate the information in the QAR dashboard.

3. Please read this document alongside the <u>ILR standard file specifications and</u> <u>reference data documents</u> and the <u>2020 to 2021 QAR business rules</u>.

Understanding the terminology

4. The terms 'we' and 'ESFA' refer to the 'Education and Skills Funding Agency' and associated staff.

5. When we refer to 'you' or 'providers', this includes colleges, sixth forms, training organisations, local authorities and employers that receive funding from us, or Advanced Learner Loans (loans) payments from the Student Loans Company (SLC) on behalf of learners, to deliver education and training.

Changes since the publication of 2020 to 2021 version 1.2 in September 2021

6. Amendment to the contents table of the QAR dataset at paragraph 46 to include reference to 'Orig_Learn_Start_Date'.

Changes from the 2019 to 2020 technical specification document

7. Recognising the ongoing impact of the pandemic and published <u>guidance on the</u> <u>awarding of qualifications for summer 2021</u>, qualifications which are/ may be subject to a teacher assessed grade will not be included (*Categories B1 and B2*). Ofqual's <u>Summer</u> <u>2021 Qualification Explainer Tool (ofqual.gov.uk)</u> confirms which qualifications will be subject to a teacher assessed grade. In addition, Access to HE Diplomas which may, in extenuating circumstances be subject to a teacher assessed grade, are also out of scope for QAR. Further information is available on QAA website <u>COVID-19 support and</u> <u>information (accesstohe.ac.uk)</u>. 8. These may be subject to change throughout the 2020/21 Academic Year, so please ensure close contact and communication with your awarding organisations and refer to the explainer tool for further details.

9. We have also clarified how we use R04 data in your QAR data set.

Changes from the 2019 to 2020 QAR dataset

10. We have removed these fields as we no longer require them:

- KeySkills_Excl
- Non_Reg_ESOL_Excl
- Tutorial_Excl

Education and training QAR methodology

- 11. We base the overall QAR on the hybrid end year, which is the later of:
 - the actual end year of a learning aim
 - the planned end year of a learning aim
 - the reporting year

We include the reporting year to capture those overdue continuing learning aims, overdue planned breaks or late completions recorded in the following academic year (up to R04). See paragraph 533 for further details on how we calculate the hybrid end year.

12. The learning aims included in the 2020 to 2021 overall QAR are those with a hybrid end year of 2020 to 2021.

13. There can be a delay between completing a learning aim and the notification of the achievement. To account for this delay and ensure all relevant leavers are included, we use information from the 2021 to 2022 R04 ILR to identify learning aims with a planned end date in 2020 to 2021. If you update records in your 2021 to 2022 R04 return that you submitted in your 2020 to 2021 R14 return, then we will use the R04 record to determine your QAR.

Exclusions from education and training QARs

14. The <u>business rules</u> describe how we calculate the QARs and which learning aims will not be included in the QAR calculations.

15. We exclude some learning aims from QARs to ensure the results are more credible and appropriate. The reasons include (and this is not an exhaustive list):

- if it is part of a new programme of learning, such as a new pilot, that providers need time to get used to delivering
- if we do not fund the aim, or is not financed by an advanced learner loan
- if the aim not a qualification
- if it is affected by circumstances where we have agreed an exception (for example, if the learner is transferred to a new provider due to intervention from us)

16. The table below describes the scenarios where we exclude learning aims. The definition of the derived variables below are in the <u>ILR standard file specifications and</u> <u>reference data documents</u>.

Description	Rules for identifying the excluded aim
A learner has transferred to a new provider due to a college merger.	Aims where the Withdrawal Reason is 47 (Learner has transferred to another provider due to a college merger), and the Learning Actual End Date is less than the Learning Start Date on the new UKPRN (matching on Unique Learner Number). The Learning Start Date on the new UKPRN must be within 30 days or less than the Learning Actual End Date on the original UKPRN.
For the overall QAR, learning aims where the learner has transferred to a different aim with the same provider.	 Aims where: the Completion Status is 3 (Learner has withdrawn from the learning activities leading to the learning aim); and the Withdrawal Reason is 40 (Learner has transferred to a new learning aim with the same provider); and a new aim is recorded (matching on Unique Learner Number and UKPRN) with a Learning Start Date that is 120 days or less after the Learning Actual End Date of the original aim.
For the overall QAR, learning aims where the learner has temporarily withdrawn from the aim due to an agreed break in learning.	Aims where the Completion Status is 6 (Learner has temporarily withdrawn from the aim due to an agreed break in learning). Under certain circumstances, we do not exclude learning aims where the learner has temporarily withdrawn from the aim due to an agreed break in learning. See paragraphs 28 to 35.
Learning aims where a learner has transferred to a new provider because of intervention from us.	Aims where the Withdrawal Reason is 7 or 41 (Learner has transferred between providers due to intervention by or with the written agreement of the Education and Skills Funding Agency OR Learner has transferred to another provider to undertake learning that meets a specific government strategy).

Description	Rules for identifying the excluded aim

The exclusion also applies to aims reported in 2018 to 2019 or 2017 to 2018 that meet the same conditions for the corresponding earlier years.	 the actual or planned end dates are not in 2019 to 2020 or later, the record was first reported complete in the 2019 to 2020 ILR The record is not an update to a learning aim, which would otherwise have been an overdue planned break, counted in the 2019 to 2020 hybrid end year.

Processing standard files

Process flow diagram

17. This flow diagram below shows how we process ILR information for multiple funding years to produce the QARs dataset, which is the source of the information used for the QAR dashboard.

Identifying education and training aims

- 18. The method for choosing learning aims are:
 - the **Aim Type** is not 1 (Programme aim) and

• the **Programme Type** is not 2, 3, 10, 20, 21, 22, 23, 24 or 25 (Advanced level apprenticeship, Intermediate Level Apprenticeship, Higher Apprenticeship, Higher Apprenticeship – level 4, Higher Apprenticeship – level 5, Higher Apprenticeship – level 6, Higher Apprenticeship – level 7+, Traineeship, Apprenticeship standard respectively)

Processing learner reference number changes

19. Providers assign the Learner reference number and we use this number to match aims across years.

20. If, for any reason, a learner's Learner reference number changes, either within a funding year or between years, then you must record this using the Learner reference number in previous year field.

21. We use the information in the Learner reference number in the previous year field to change the Learner reference numbers for previous years to the latest Learner reference number. We keep the original Learner reference number in the QAR dataset in the LearnRefNumber_orig field.

22. If you do not return the Learner reference number in previous year field when there has been a change, then the process of matching aims does not work correctly. This creates 2 records in the QAR dataset for the same aim: one using the old Learner reference number and one using the new Learner reference number. Where the aim from the earlier year's ILR file does not have any achievement data, this will reduce your QAR.

23. If you use the Learner reference number in previous year field when there **has not** been a change in the learner's Learner reference number, then this will prevent us from correctly matching that learner's aims.

24. You **must** remove the data from this field between years, as detailed in the <u>ILR</u> <u>specification</u>, otherwise the learners will not match correctly.

Example:

Learner A has a Learner reference number of 'LNA1234' in 2018 to 2019. Due to a change in the provider's management information system, Learner A has a new Learner reference number in 2019 to 2020 of 'LRA9876'. For the QAR to match correctly, you must record the references as follows:

- In 2018 to 2019:
 - Learner reference number = LNA1234
 - Learner reference number in previous year is not returned
- In 2019 to 2020:
 - Learner reference number = LRA9876
 - Learner reference number in previous year = LNA1234
- In 2020 to 2021:
 - Learner reference number = LRA9876
 - Learner reference number in previous year is not returned (2019/20 QAR cannot match if reported in R04)

Matching learning aims across years

25. Many learning aims take more than one year to complete, meaning that the same learning aims for a learner can appear on more than one ILR file.

26. We use various combinations of variables to ensure we match the correct records across years. We match the UKPRN, Learner reference number, and Aim reference together with the following combinations, in the following sequence.

- Learning start date, Learning planned end date, Learning actual end date
- Learning start date, Learning planned end date
- Learning start date, Expected end year (P_Expendyr), Learning actual end date
- Learning start date, Expected end year

27. Once we have matched learning aim records, we discard those from previous years, leaving just the latest information for each learning aim in the QAR dataset.

Identifying overdue continuing aims and planned breaks

28. Continuing learning aims (with a Completion status of 1 'The learner is continuing or intending to continue the learning activities leading to the learning aim') in the R14 ILR return for a funding year, that do not have a corresponding record in the following funding year, are treated as a withdrawal for the overall methodology.

For example, if the year you submitted the record on the ILR is '2019/2020' and there is no corresponding record in 2020 to 2021 R14 ILR return:

- the hybrid end year (P_Hybridendyr) is set to 2020; and
- P_Count_Overall is set to 1; and
- P_Ach_Overall is set to 0

If you subsequently return the record in the ILR in any of the years after, we will exclude it from your QAR so that the same record is not counted against QARs in 2 different years.

29. Aims where the learner is on a planned break (with a Completion status of 6 'Learner has temporarily withdrawn from the aim due to an agreed break in learning'), are treated as a withdrawal for the overall methodology where either of these apply:

- they do not have a corresponding restart record in the same funding year
- they do not have a corresponding restart record in the following funding year

• if the planned break was recorded in the ILR R14 return for funding year 2019 to 2020, they do not have a corresponding restart record by the R04 ILR return of the funding year 2021 to 2022

30. An ILR record is a restart record if it has a Learning Delivery Funding and Monitoring Type of 'RES' with a Learning Delivery Funding and Monitoring Code of 1 (Learning aim restarted).

31. We match restart records to planned break records by matching on UKPRN, Learner reference number and Learning aim reference where the Original learning start date on the restart record matches the Learning start date or Original learning start date of the planned break record; this allows for situations where the planned break was itself a restart.

32. For example, an aim where the learner is on a planned break, that is submitted in the 2018 to 2019 ILR (YearAimSubmitted is '2018/19'), **has** a corresponding restart record if:

- the UKPRN, Learner reference number and Learning aim reference number on the planned break record is the same as the UKPRN, Learner reference number and Learning aim reference number on a restart record; and
- either the Learning start date or the Original learning start date on the planned break record is the same as the Original learning start date on the restart record; and
- the restart record was submitted in the 2018 to 2019, 2019 to 2020 or 2020 to 2021 ILR (YearAimSubmitted is '2018/19', '2019/20' or 2020/21')

33. If an aim where the learner is on a planned break that is submitted in the 2018 to 2019 ILR (YearAimSubmitted is '2018/19'), **does not have** a corresponding restart record:

- the reporting year is set to one year after the later of the expected end year or actual end year; and
- P_Count_Overall is set to 1; and
- P_Ach_Overall is set to 0

34. An aim where the learner is on a planned break, that is submitted in the 2019 to 2020 ILR (YearAimSubmitted is '2019/20'), **has** a corresponding restart record if:

• the UKPRN, Learner reference number and Learning aim reference number on the planned break record is the same as the UKPRN, Learner reference number and Learning aim reference number on a restart record; and

- either the Learning start date or the Original learning start date on the planned break record is the same as the Original learning start date on the restart record; and
- the restart record was submitted in the 2019 to 2020 or 2020 to 2021 ILR, or the 2021 to 2022 R04 ILR (YearAimSubmitted is '2019/20', '2020/21' or '2021/22')

35. If an aim where the learner is on a planned break that is submitted in the 2019 to 2020 ILR (YearAimSubmitted is '2019/20'), **does not have** a corresponding restart record:

- the reporting year is set to one year after the later of the expected end year or actual end year; and
- P_Count_Overall is set to 1; and
- P_Ach_Overall is set to 0

Key principles for QAR, pass rate and retention rate calculations

36. The key principles of calculating QARs, pass rate and retention rates are as follows:

- we only include learning aims funded by us or by an advanced learner loan
- we exclude the aims described in paragraph 15
- we class uncashed AS levels as non-achievement

Overall qualification achievement, pass and retention rate calculations

37. We use the following fields from the QAR dataset to calculate overall QARs, pass rates and retention rates:

- Hybrid end year (P_Hybridendyr) This field is the later of the actual learning end year (P_Actendyr), expected learning end year (P_Expendyr), or the reporting year
- P_Count_Overall This field indicates whether a learning aim has ended (a Learning actual end date is present), or it is an overdue continuing learning aim or an overdue continuing planned break
- P_Ach_Overall This field indicates whether a learning aim has been achieved (achieved learning aims have an Outcome of 1 or 7 (Achieved or Achieved and cashed (AS levels only))

- P_Complete_Overall This field indicates whether a learning aim has been successfully completed (successfully completed learning aims have a Completion status of 2 (The learner has completed the learning activities leading to the learning aim))
- 38. For each funding year the overall QAR percentage is:

Number of learning aims that have achieved X 100 Number of learning aims that have ended

For each hybrid end year (P_Hybridendyr) the overall QAR percentage is:
 Number of learning aims where P_Ach_Overall is 1
 X 100

Number of learning aims where P_Count_Overall is 1

40. For each funding year, the overall pass rate percentage is:

Number of learning aims that have achieved

X 100

X 100

Number of learning aims that have been successfully completed

41. For each hybrid end year (P_Hybridendyr), the overall pass rate percentage is:

Number of learning aims where P_Ach_Overall is 1

Number of learning aims where P Complete Overall is 1

42. For each funding year, the overall retention rate percentage is:

- 43. For each hybrid end year (P_Hybridendyr), the overall retention rate percentage is:
 - Number of learning aims where P_Complete_Overall is 1 Number of learning aims where P_Count_Overall is 1 X 100

52. For any learning aim not classified using the rules above, set to 'Other Non-Reg'.

Calculating the hybrid end year

53. To understand the logic that hybrid end year uses, it is important to highlight the key QAR derived variables that we use to calculate the hybrid end year, and then how we use these in the calculation. The following examples relate to the 2020 to 2021 QAR data set and we refer to this as the current QAR.

54. The key derived variables are:

- Actual End Year this is the same as P_Actendyr
- Planned End Year this is the same as P_Expendyr

• Reporting Year – this refers to the academic year you submitted the learning aim to us. If the academic year is after the current QAR year, then we set this variable to 2020.5 (for example, if you report the learning aim in 2021 to 2022)

• Overdue Continuing Aim – this is the same as Overdue_Continuing_Aim

• Overdue Planned Break – this is the same as Overdue_Planned_Break

• Year First Reported Completed – this refers to the academic year you first reported the record with a Completion status of code 2 ('Complete') or 3 ('Withdrawn'). If the academic year you first reported the record with a Completion status of code 2 or 3 is after the current QAR year, then we set this variable to 2020.5 (for example, if you report the learning aim in 2021 to 2022)

55. We then implement 2 steps to calculate the hybrid end year:

Step 1

56. We assign all records an initial value in step 1, based on the Actual End Year (P_Actendyr) and Planned End Year (P_Expendyr) derived variables. The table below explains the conditions we use to set the values. If the data does not meet the first condition, then we apply the second condition. If the data does not meet the second condition, then we apply the third condition.

Condition	Outcome	Example
If the actual end year is unpopulated	we set hybrid end year to 2020.5.	
If the planned end year is greater than or equal	we set hybrid end year to equal the planned end year.	The planned end date is 31/08/2020. The actual end date is 30/05/02020.
to the actual end year		The planned end year is 2020. The actual end year is 2019.
		2020 is greater than 2019, so the hybrid end year is set to 2020.
Else	we set hybrid end year to equal the actual end year.	

Step 2

57. We use the output from step 1 for step 2, when we account for the other derived variables.

Condition	Outcome	Example
If the record is marked as an overdue continuing aim	we set the hybrid end year to the maximum value recorded in the actual end year, planned end year and reporting year derived variables.	The record is marked as an overdue continuing aim, the reporting year is 2018, the actual end year is unpopulated and the planned the planned end year is 2020. The hybrid end year is set to 2020.
If the record is marked as an overdue planned break and the hybrid end year from step 1 is after the current QAR year	we set the hybrid end year to 2020.5.	
If the record is marked as an overdue planned break and the hybrid end year	we set the hybrid end year to the hybrid end year from step 1 plus one	The record is marked as an overdue planned break, the planned end year is 2019 and the actual end year is 2018.
from step 1 is not after the current QAR year	year.	The hybrid end year from step 1 is 2019, the hybrid end year in step 2 is set to 2019 plus one year, so the hybrid end year is set to 2020.
If the year first reported completed is after the hybrid end year from step	we set the hybrid end year to equal the first year reported complete.	The planned end year is 2019, the actual end year is 2018, the year first reported complete is 2020.
1		The hybrid end year from step 1 is 2019, the year first reported complete is after this, so the hybrid end year is set to 2020.
Else	hybrid end year is set to the value from step 1.	

Further examples

58. The following table gives some more examples using the steps given above.

Key criteria	Hybrid end year and explanation
 Planned end date = 20/05/21 Actual end date (AED) = 20/05/20 AED first reported in 2020/21 	2020/21 – because the later of the 3 dates is in the 2020 to 2021 funding year.
