Briefing England

Week commencing 7 June 2021
### Data Definitions

- **SGTF definition**: S-gene target failure is a reliable marker of alpha variant
- **Individuals tested using PCR per day per 100,000 population**: Number of individuals tested using PCR per 100,000 population
- **Percentage individuals tested positive**: Percentage of individuals tested using PCR with specimen dates in the most recent 7-days period who were positive for SARS-CoV-2
- **Community outbreaks**: Number of outbreaks reported to PHE during the 7 day period, excluding those reported from secondary healthcare and care home settings.

### Narrative

- Weekly case rates in all ages group have increased across all regions.
- The North West has the highest case rates in all ages, 60+, 11-16, and 17-21 years. Rates in the North West increased across all age groups in the last week.
- The highest weekly case rates overall is among 17-21 year olds. This age group also has the highest 7 day change.

### High level summary – Regions case rates in 7 days

**26 May 2021 to 01 June 2021**
