

Department for
International Trade

Cayman Islands

This factsheet provides the latest statistics on trade and investment between the UK and Cayman Islands.

Date of release: 18 June 2021; Date of next planned release: 7 July 2021

Total trade in goods and services (exports plus imports) between the UK and Cayman Islands was **£3.0 billion** in the four quarters to the end of Q4 2020, a decrease of 19.6% or £721 million from the four quarters to the end of Q4 2019. Of this £3.0 billion:

- Total UK **exports** to Cayman Islands amounted to £2.8 billion in the four quarters to the end of Q4 2020 (a decrease of 15.6% or £508 million compared to the four quarters to the end of Q4 2019);
- Total UK **imports** from Cayman Islands amounted to £210 million in the four quarters to the end of Q4 2020 (a decrease of 50.4% or £213 million compared to the four quarters to the end of Q4 2019).

Cayman Islands was the UK's 47th largest trading partner in the four quarters to the end of Q4 2020 accounting for 0.3% of total UK trade.¹

In 2019, the **outward stock of foreign direct investment (FDI)** from the UK in Cayman Islands was £-1.1 billion accounting for -0.1% of the total UK outward FDI stock.

In 2019, the **inward stock of foreign direct investment (FDI)** in the UK from Cayman Islands was £34.8 billion accounting for 2.2% of the total UK inward FDI stock.²

¹ Trade data sourced from the latest ONS publication of [UK total trade](#) data.

² Investment data sourced from the ONS [ad-hoc data release](#) if not provided in the latest ONS [main FDI release](#).

About these statistics

This factsheet presents the latest statistics on trade and investment between the UK and Cayman Islands. It summarises a wide range of publicly available data, from data providers such as the Office for National Statistics (ONS) and HM Revenue and Customs (HMRC), as well as international data providers.

This factsheet is part of a wider range produced by the Department for International Trade which draws together many data sources into one single compendium document for each individual trade and investment partner. The full set of factsheets for different individual partners can be found on the [Trade and Investment Factsheets website](#) on GOV.UK.

Where data are available, these factsheets contain metrics on:

- [Headline trade statistics between the UK and each trading partner for the latest four quarters.](#)
- [Trade statistics by commodity and service type.](#)
- [Trade between the UK and each trading partner, broken down by UK country and English region.](#)
- [UK's market share as a total of all imports for each trading partner.](#)
- [Number of VAT-registered businesses trading goods.](#)
- [UK's Foreign Direct Investment \(FDI\) with each investment partner.](#)
- ['Ease of doing business' rankings and scores.](#)
- [Summary trade and investment data as reported by each trade and investment partner, as well as economic data and projections.](#)

All statistics are correct at the time of publication, with upcoming release dates available on the [Government update schedule for Official Statistics](#). The Department for International Trade strongly recommends users download the latest factsheet to ensure the most up-to-date statistics are used as some statistics are revised on a regular basis.

For the most up to date snapshot of the UK's trade and investment position with all partners, please see the [trade and investment core statistics book](#). These statistics are based on the same data sources as the trade and investment factsheets and therefore are comparable between the two publications. A list of all [Official Statistics](#) publications from the Department for International Trade can be found online.

Trade with Cayman Islands (ONS)^{3 4 5}

Trade definitions

UK exports - Goods and services that were produced or sourced in the UK, which were sold to Cayman Islands.

UK imports - Goods and services that were sold to the UK, which were produced or sourced by Cayman Islands.

Total or 'bilateral' trade - The value of total trade between the UK and Cayman Islands (exports plus imports).

Trade balance - The difference between exports and imports, calculated by UK exports minus UK imports.

Trade surplus - This occurs when the value of UK exports to Cayman Islands is greater than the value of UK imports from Cayman Islands.

Trade deficit - This occurs when the value of UK exports to Cayman Islands is less than the value of UK imports from Cayman Islands.

Headline trade statistics include trade in non-monetary gold (reported within the unspecified goods category), which can significantly affect trends for some partners. Please see the factsheet [quality and methodology report](#) for more information. These statistics are given on a balance of payments (change of ownership) basis.

Note: The latest data includes trade between March and December 2020, which have been affected by the COVID-19 pandemic. As data are presented here for the whole of 2020, trade between January and February 2020 is included before any UK lockdown measures were introduced. Data quality has also been affected and may be subject to larger revisions.

Total trade in goods and services (exports plus imports) between the UK and Cayman Islands was £3.0 billion in the four quarters to the end of Q4 2020, a decrease of 19.6% or £721 million from the four quarters to the end of Q4 2019.

In the four quarters to the end of Q4 2020, **total UK exports** to Cayman Islands amounted to £2.8 billion (a decrease of 15.6% or £508 million compared to the four quarters to the end of Q4 2019).

Of all UK exports to Cayman Islands in the four quarters to the end of Q4 2020, £41 million (1.5%) were **goods** and £2.7 billion (98.5%) were **services**. In the four quarters to the end of Q4 2020, UK **exports of goods** to Cayman Islands increased by 105.0% or £21 million compared to the four quarters to the end of Q4 2019 while UK **exports of services** to Cayman Islands decreased by 16.3% or £529 million compared to the four quarters to the end of Q4 2019.

In the four quarters to the end of Q4 2020, **total UK imports** from Cayman Islands were £210 million (a decrease of 50.4% or £213 million compared to the four quarters to the end of Q4 2019).

Of all UK imports from Cayman Islands in the four quarters to the end of Q4 2020, £4 million (1.9%) were **goods** and £206 million (98.1%) were **services**. In the same period, UK **imports of goods** from Cayman Islands increased by £4 million compared to the four quarters to the end of Q4 2019 while UK **imports of services** from Cayman Islands decreased by 51.3% or £217 million compared to the four quarters to the end of Q4 2019.

This means the UK reported a **total trade surplus** of £2.5 billion with Cayman Islands, compared to a trade surplus of £2.8 billion in the four quarters to the end of Q4 2019. In the four quarters to the end of Q4 2020, the UK had a **trade in goods surplus** of £37 million with Cayman Islands, compared to a trade in goods surplus of £20 million in the four quarters to the end of Q4 2019. Meanwhile, in the four quarters to the end of Q4 2020 the UK reported a **trade in services surplus** of £2.5 billion with Cayman Islands, compared to a trade in services surplus of £2.8 billion in the four quarters to the end of Q4 2019.

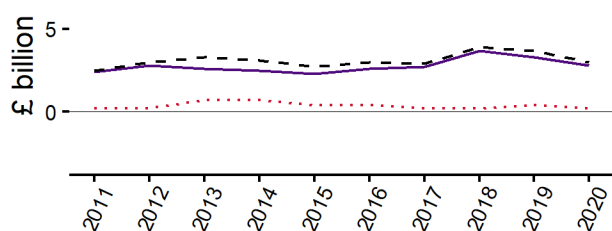

³ Office of National Statistics (ONS) data source for total trade: [UK total trade data \(non-seasonally adjusted\)](#).

⁴ This factsheet contains data as reported by the UK, users are advised to use UK-reported data where possible for consistency between partners. These data are subject to [asymmetries](#) e.g. the value of UK exports to Cayman Islands (reported by the UK) may not match the value of Cayman Islands imports from the UK (reported by Cayman Islands).

⁵ Data are in nominal terms, meaning no adjustment has been made to account for changes in inflation or exchange rate. The totals may not exactly match the sum of their parts due to rounding. Data in this section are non-seasonally adjusted unless otherwise stated and should not be compared to seasonally adjusted data.

The charts below present a time series for trade between the UK and Cayman Islands for each year between 2011 and 2020:

UK trade with Cayman Isd

UK trade balance with Cayman Isd

— Exports ··· Imports - - Total Trade

■ Surplus

Source: ONS, UK trade in goods and services, Q4 2020

The data that are presented in the charts above are given in the table below in £ billion:

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020
Value of total trade	2.5	3.0	3.3	3.1	2.7	3.0	2.9	3.9	3.7	3.0
Value of exports	2.4	2.8	2.6	2.5	2.3	2.6	2.7	3.7	3.3	2.8
Value of imports	0.2	0.2	0.7	0.7	0.4	0.4	0.2	0.2	0.4	0.2
Trade balance	+2.2	+2.6	+1.9	+1.8	+2.0	+2.2	+2.5	+3.5	+2.8	+2.5

In the four quarters to the end of Q4 2020, Cayman Islands was the UK's:⁶

- **47th largest trading partner** (accounting for 0.3% of total UK trade).
 - 133rd largest **goods** trading partner (less than 0.1% of UK goods trade).
 - 26th largest **services** trading partner (0.7% of UK services trade).
- **33rd largest export market** (accounting for 0.5% of total UK exports).
 - 116th largest **goods** export market (less than 0.1% of UK goods exports).
 - 23rd largest **services** export market (1.0% of UK services exports).
- **93rd largest import market** (accounting for less than 0.1% of total UK imports).
 - Joint 143rd largest **goods** import market (less than 0.1% of UK goods imports).
 - 63rd largest **services** import market (0.1% of UK services imports).

More timely data, for trade in goods only⁷, show that UK exports of goods to Cayman Islands increased by 86.7% in the 12 months to April 2021 compared to the same period the previous year. UK imports of goods from Cayman Islands increased by 200.0% over the same period.

Note: As these data are presented for the 12 months ending April 2021, the UK and its trading partners have been affected by lockdown and other measures during the COVID-19 pandemic. Data quality has also been affected and may be subject to larger revisions than usual.

⁶ Rankings are based on the ONS dataset which contains data for all individual partners: [UK total trade data \(non-seasonally adjusted\)](#). Note this dataset is not comparable with other ONS seasonally adjusted datasets.

⁷ ONS data source for trade in the latest 12 months up to April 2021: [UK Trade data \(seasonally adjusted\)](#). Note that these statistics use seasonally adjusted data and are **not directly comparable** to statistics which use non-seasonally adjusted data.

Trade in goods by commodity (ONS)^{8 9}

The **top 5 goods exported from the UK to Cayman Islands** in the four quarters to the end of Q4 2020 were:

- 793 - Ships (£16.0 million)
- 54 - Medicinal & pharmaceutical products (£6.6 million)
- 897C - Jewellery (£2.5 million)
- 78M - Cars (£2.2 million)
- 11 - Beverages (£1.2 million)

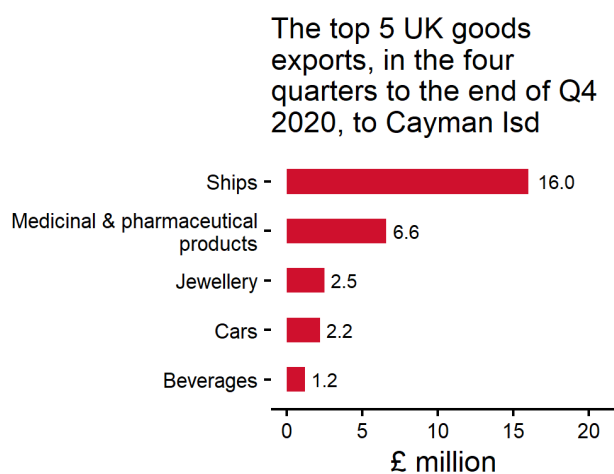

Note: The percentage of the total UK exports of goods to Cayman Islands accounted for by the above commodities are not provided here. This is due to the value of total UK exports of goods to Cayman Islands being rounded to the nearest £million, with commodity trade values being given to a greater level of accuracy. As a result, in some cases, the percentages of the total accounted for by each commodity would sum to more than 100%.

The **top 5 goods imported to the UK from Cayman Islands** in the four quarters to the end of Q4 2020 were:

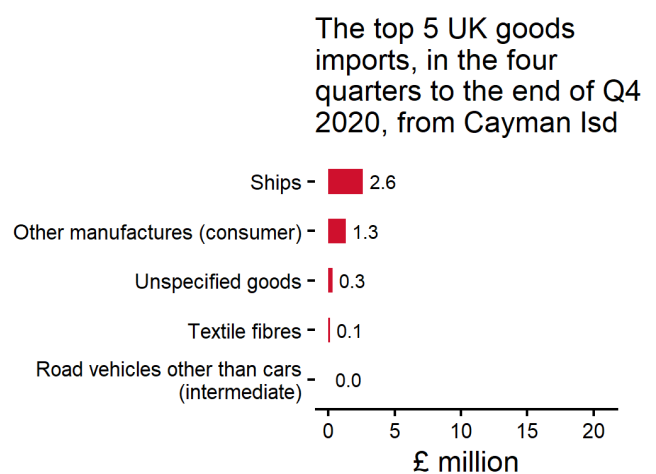

- 793 - Ships (£2.6 million)
- 89OC - Other manufactures (consumer) (£1.3 million)
- 9 - Unspecified goods (£310 thousand)
- 26 - Textile fibres (£130 thousand)
- 78I - Road vehicles other than cars (intermediate) (£40 thousand)

Note: The percentage of the total UK imports of goods from Cayman Islands accounted for by the above commodities are not provided here. This is due to the value of total UK imports of goods from Cayman Islands being rounded to the nearest £million, with commodity trade values being given to a greater level of accuracy. As a result, in some cases, the percentages of the total accounted for by each commodity would sum to more than 100%.

The chart below shows the top 5 products exported from the UK to Cayman Islands and the top 5 products imported to the UK from Cayman Islands, by value, in the four quarters to the end of Q4 2020. All data shown in the chart are provided in the text above.

Source: ONS, April 2021

Source: ONS, April 2021

⁸ Data on trade in goods by commodity are sourced from data by the ONS: [UK trade release \(non-seasonally adjusted\)](#). These statistics for [exports](#) and [imports](#) present the latest data from the April 2021 ONS publication which are given on a monthly basis.

⁹ The commodities are categorised based on [SITC](#) codes using a mixture of level 2 and level 3 codes.

Trade in services by service type (ONS)¹⁰

Note: Service type data for the trade in services between the UK and Cayman Islands in the four quarters to the end of Q4 2020 are not available from UK sources.

Trade in goods by UK countries and English regions (HMRC)¹¹

Regional trade definitions

UK regions - The UK is categorised into 12 regions, which includes 9 regions in England, as well as Wales, Scotland and Northern Ireland. These UK regions are based on the *Nomenclature of Territorial Units for Statistics* references as defined by Eurostat as [NUTS1](#) regions.

Regional trade data - The data are compiled by merging HM Revenues & Customs (HMRC) trade data with employment data from the Interdepartmental Business Register (IDBR) so a business' trade can be allocated to a UK region based on the proportion of its employees employed in that region. Where a trader is not matched with the IDBR, its trade is matched with ONS postcode data to obtain the UK region in which the Head Office of the VAT-registered business is based.

Note: Data for UK regions are not available for Cayman Islands in 2020.

¹⁰ Trade in services by service type is sourced from data by the ONS: [UK trade in services by partner country \(non-seasonally adjusted\)](#).

¹¹ HMRC data source for regional UK trade data: [HMRC Regional Trade Statistics](#) (data extracted from the [interactive tables](#)).

UK Market Share (ONS and UNCTAD)^{12 13}

Market Share definitions

UK market share – Imports from the UK as a percentage of all the goods and services imported by Cayman Islands. Market share is provided for total imports from the UK, as well as for goods and services separately.

Market share methodology – These UK market share statistics are derived by the Department for International Trade, using publicly available data from the Office of National Statistics (ONS) and the United Nations Conference on Trade and Development (UNCTAD). These new statistics allows users to estimate the importance of UK trade on imports to each trading partner. Market share is calculated as the value of imports from the UK using data from [ONS](#), divided by the value of total imports using data from [UNCTAD](#). Data from UNCTAD are converted from US dollars into pounds sterling by using the annual average spot exchange rate¹⁴.

The UK's market share for Cayman Islands in 2019 was as follows:

- The UK market share in Cayman Islands was 2.2% in 2019 for **goods only**. This is an increase of 0.4 percentage points from 2018.
- UK market share in services for Cayman Islands was not available in 2019.

Number of VAT-registered businesses trading goods (HMRC)^{15 16 17 18}

VAT-registered businesses definition

VAT-registered businesses - Any company with a VAT taxable turnover of more than £85,000 must be registered for VAT with HM Revenue & Customs (HMRC). These estimates do not cover unregistered businesses (those businesses who are not registered for VAT and do not have an Economic Operator Registration and Identification (EORI) number), or those businesses that trade in services.

Businesses trading with Cayman Islands in 2019:

- Data on the number of VAT-registered businesses trading with Cayman Islands are not available from this source.

Businesses trading with the world in 2019:

- In 2019, around 159,600 UK **VAT-registered businesses exported goods to the world**, worth around £366.5 billion of exports.
- In 2019, around 256,500 UK **VAT-registered businesses imported goods from the world**, worth around £543.5 billion of imports.

¹² ONS data source for market share: [UK total trade data \(non-seasonally adjusted\)](#).

¹³ UNCTAD data source for market share: [Goods and Services \(BPM6\): Exports and imports of goods and services, annual](#). Some UNCTAD data may be based on estimates.

¹⁴ Annual average spot exchange rates for USD\$ to GBP£ are sourced from the [Bank of England](#).

¹⁵ HMRC data source for VAT-registered businesses trading goods: [HMRC Trade in Goods by Business Characteristics](#).

¹⁶ These are experimental statistics and results should be treated with caution.

¹⁷ Estimates only cover VAT-registered businesses exporting or importing goods. Figures on the 'services' industry in this dataset refers to trade in goods carried out by businesses classified as 'services'. Similar data for UK businesses engaged in trade in services with Cayman Islands are not available. VAT-registered business may trade with multiple trading partners abroad so care should be taken when adding figures for a multiple number of trading partners.

¹⁸ Counts of businesses trading with individual EU partners exclude businesses trading below [Intrastat](#) thresholds, which for 2018 was £1.5million for EU imports and £250,000 for EU exports. The number of VAT-registered businesses has been rounded to the nearest 100 here.

Trade in Value Added (OECD)¹⁹

Trade in Value Added definitions

Trade in Value Added (TiVA) - TiVA is a statistical approach to examine supply chains, which is not possible with conventional ('gross') trade statistics. This is because TiVA treats international trade flows as flows of value added rather than gross flows of final goods and services.

Domestic and foreign value added - In TiVA, gross exports are decomposed into domestic and foreign value added. Domestic value added measures the value added generated by the domestic economy in the production of its exports (e.g. the value added by UK car manufacturers and their UK supply chains in car exports). Foreign value added measures the value added contribution that foreign suppliers make to these exports (e.g. the import of foreign car parts).

TiVA statistics - Although TiVA offers advantages over traditional ways of measuring trade, these statistics are not fully developed. These results are estimates which should be considered complementary to conventional trade statistics and not be over-interpreted. In addition, the geographical detail is limited for developing countries. More information on TiVA can be found in a recent [research report](#) by the Department for International Trade and Cambridge Econometrics.

UK forward linkages for exports - Measures the reliance of foreign exporters on UK value added (inputs).

UK backward linkages for exports - Measures the reliance of UK exporters on foreign value added (inputs).

Employment supported by exports - This provides an estimate of the number of employees in exporting industries, and their domestic supply chains that are supported by exporting activity.

Note: Data for Cayman Islands on forward and backward linkages for exports in 2015 are not available from this data source.

Employment supported by exports:²⁰

- Data for Cayman Islands on employment supported by exports in 2015 are not available.
- Exporting activity in the UK supported 6.6 million persons in 2015 (21.2% of total UK employment). Data regarding the number of UK jobs supported by export activity to Cayman Islands in 2015 are unavailable.

¹⁹ The estimates in this factsheet are based on Trade in Value Added statistics published by the Organisation for Economic Co-operation and Development (OECD): a) [Trade in Value Added database \(Origin of Value Added in Gross Exports, December 2018\)](#); and b) [Trade in Employment \(TiM\) database: Principal indicators](#), indicators EXGR_DEM and EMPN_EXGRDEM. Latest data available from this data source are for 2015.

²⁰ These estimates measure employees directly and indirectly supported by exports i.e. workers employed in exporting businesses and in other domestic businesses supplying inputs to the exporting businesses. The estimates should be interpreted as employment *supported* by exports, rather than employment *created* by exports, as the jobs may have previously existed to serve the domestic market. Employees may also be supported by exports from a multiple number of trading partners. As with the core TiVA data, these estimates are based on a number of assumptions and modelling, so should be interpreted with caution.

Foreign Direct Investment with Cayman Islands (ONS)^{21 22 23}

Foreign direct investment definitions

Foreign direct investment (FDI) - Investment made by a firm or individual in one economy ('direct investor') to acquire a 'lasting interest' in an enterprise operating in another economy. The lasting interest is deemed to exist if the direct investor acquires at least 10% of equity, or equivalently 10% of the voting rights, of the company.

FDI stock - The accumulated value of all previous investments at the end of a reference period. Figures are net, that is the value of investment minus disinvestment. **UK outward FDI stock** provides the total value of FDI by UK investors in economies abroad (investment of a UK parent company in Cayman Islands), while **UK inward FDI stock** provides the total value of FDI by non-UK investors in the UK (investment of a foreign parent company in Cayman Islands).

Data disclosure - It can happen that FDI to a certain partner is coming from only a few investors. In that case, figures are suppressed by the ONS to avoid disclosure of information relating to individual enterprises.

UK outward FDI stock:

- In 2019, the **stock of FDI from the UK in Cayman Islands** was £-1.1 billion, 349.4% or £828 million higher than in 2018. In 2019, Cayman Islands accounted for -0.1% of the total UK outward FDI stock.
- In 2019, the total UK FDI abroad was £1.5 trillion. In 2019, the **top destination for UK FDI** was United States, accounting for 25.3% of the total UK outward FDI stock, followed by Netherlands (10.4%) and Luxembourg (6.4%).

UK inward FDI stock:

- In 2019, the **stock of FDI from Cayman Islands in the UK** was £34.8 billion, 13.8% or £5.6 billion lower than in 2018. In 2019, Cayman Islands accounted for 2.2% of the total UK inward FDI stock.
- In 2019, the total FDI in the UK was £1.6 trillion. In 2019, the **top investor in the UK** was United States, accounting for 24.5% of the total UK inward FDI stock, followed by Netherlands (10.7%) and Luxembourg (8.6%).

²¹ Data for both inward and outward FDI between the UK and Cayman Islands are not available in the main ONS release ([Foreign Direct Investment involving UK companies](#)). Therefore, an [ONS FDI ad-hoc data release](#) is used to provide the latest FDI data for Cayman Islands where it is unavailable in the main ONS release.

²² Data are presented on a directional basis which means they are not directly comparable to the asset/liability report prepared by ONS as part of the Balance of Payments statistical release. Figures are on net basis (investments minus disinvestments) and are given in nominal terms. Negative FDI values occur when disinvestments are greater than investments. Data are on an immediate destination/source basis and not an ultimate destination/source, which is likely to overstate financial centres such as the Netherlands and Luxembourg.

²³ This factsheet contains data as reported by the UK and are subject to asymmetries e.g. UK outward FDI to Cayman Islands (reported by the UK) may not match Cayman Islands inward FDI from the UK (reported by Cayman Islands). For consistency when comparing between partners, users are advised to use UK-reported data as far as possible.

Ease of doing business (World Bank)²⁴

Ease of doing business definitions

Ease of doing business ranking - Trading partners are ranked by World Bank on how easy it is to conduct business with them. A high 'Ease of doing business' ranking means the regulatory environment is more conducive to the starting and operation of a local firm than other trading partners. A total of 190 partners were ranked by World Bank for this metric.

Ease of doing business score - The ease of doing business rankings are based on each partners 'Ease of doing business' score. These scores were determined by scoring each partner in 10 individual indicators, such as the ease of starting a new business and trading across borders, and then taking an average. Rankings for each of these individual indicators can be found on the [World Bank website](#). Each score is on a scale from 0 to 100, where 100 represents the best performance. These scores can be compared between years as an increase in score would indicate that a partner is improving in their ease of doing business with. For further detail, see the [methodology](#) explaining how these scores are calculated.

Note that this report shows data for 2019 in the latest 'Doing Business 2020' report, as all data was benchmarked in May 2019.

Note: The ease of doing business ranking is not available for Cayman Islands.

- **In 2019, the UK was ranked 8th for its ease of doing business** (1 place better than in 2018), behind New Zealand, Singapore, Hong Kong SAR, Denmark, South Korea, United States and Georgia.

These rankings were based on their individual ease of doing business scores:

Note: The ease of doing business score is not available for Cayman Islands.

- **In 2019, the UK had an ease of doing business score of 83.5**, compared to 83.6 in the previous year.

²⁴ World Bank data source: [Ease of Doing Business rankings](#).

Economic statistics (as reported by Cayman Islands)

Trade and investment data for Cayman Islands (UNCTAD)^{25 26 27}

The following data are reported by Cayman Islands and are for reference only. Whenever possible use data from UK sources for trade and investment. All data below are presented in USD\$ in billions.

Year	2012	2013	2014	2015	2016	2017	2018	2019
TRADE								
Nominal exports	1.9	2.7	2.9	3.0	3.1	2.4	2.6	-
Nominal imports	2.0	1.9	2.0	2.1	2.1	2.0	2.2	-
Nominal trade balance	-0.1	0.7	0.9	1.0	1.0	0.5	0.4	-
INVESTMENT								
Inward FDI stock	178.1	246.1	296.0	376.2	440.6	463.5	480.3	515.0
Outward FDI stock	84.7	104.7	128.1	203.5	212.7	221.4	225.5	232.9

²⁵ United Nations Conference on Trade and Development (UNCTAD) data sources for trade: [Goods and Services \(BPM6\): Exports and imports of goods and services, annual](#); and for investment: [Foreign direct investment: Inward and outward flows and stock, annual](#).

²⁶ Estimates are given in italics. Historic data pre-2012 can be found on the [UNCTAD website](#).

²⁷ All trade data are on a Balance of Payments basis. The FDI data are on a directional and net (investment minus disinvestment) basis. These figures are given in current prices and are rounded to the nearest \$0.1 billion, with missing data represented by dashes.

Economic data and projections for Cayman Islands (IMF)^{28 29}

The following table presents economic statistics for Cayman Islands. Projections include assumptions of the effects of COVID-19 and may be subject to change in the future. Estimated data, as well as projections up to 2026, are presented in italics and are subject to revision.

Note: IMF World Economic Outlook does not have data on Cayman Islands.

²⁸ International Monetary Fund (IMF) provide economic commentary in their [World Economic Outlook reports](#). The latest data presented here can be found in their [World Economic Database, April 2021](#).

²⁹ Projections and estimates are given in italics. More information for each metric and each partner, as well as historic data pre-2018, can be found on the [IMF website](#).

Top goods traded with the world by Cayman Islands (UN Comtrade)^{30 31}

Data presented here shows the top commodities traded to the world, not solely the UK, by Cayman Islands. These commodities are presented on a different classification from the earlier data by commodity from the ONS and should not be directly compared.

You access more statistics about individual export and import **markets** for Cayman Islands by using the online [UN Comtrade tool](#) developed by the Department for International Trade and the Department for Business, Energy and Industrial Strategy.

Top goods exported to the world by Cayman Islands

Note: Cayman Islands did not report export data to UN Comtrade by commodity during the past 3 years.

Top goods imported from the world by Cayman Islands

Note: Cayman Islands did not report import data to UN Comtrade by commodity during the past 3 years.

³⁰ United Nations (UN) Comtrade data are sourced from the online [UN Comtrade tool](#). The data reported above are for , but as the data upload to UN Comtrade is continuous, more timely data may be available from the source.

³¹ Data are classified using the [Harmonized System](#) and are given on a physical movement basis, with UK data comparable to HMRC data sources rather than the headline trade figures presented here from ONS.

Top services traded with the world by Cayman Islands (ITC Trade Map)^{32 33 34}

Data presented here shows the top service types traded to the world, not solely the UK, by Cayman Islands.

Top services exported to the world by Cayman Islands in 2019:

Rank	EBOPS Service Type	USD million	% of total services exported
1	Financial services	946	37.5%
2	Travel	605	24.0%
3	Other business services	530	21.0%
4	Insurance and pension services	353	14.0%
5	Transport	67	2.7%
	All services exported	2525	100.0%

Top services imported from the world by Cayman Islands in 2019:

Rank	EBOPS Service Type	USD million	% of total services imported
1	Insurance and pension services	204	22.7%
2	Other business services	181	20.1%
3	Travel	149	16.6%
4	Financial services	148	16.5%
5	Transport	116	12.9%
	All services imported	898	100.0%

³² International Trade Centre (ITC) Trade Map data are sourced from the online [ITC Trade Map tool](#). The data above are for 2019, but as the data upload to ITC is continuous, more timely data may be available from the source.

³³ Data are classified on the [EBOPS 2010](#) basis. 'Other business services' include: Research and development, professional and management consulting services, technical services and trade related services. A full description of all service types can be found on the [UN Statistics Division website](#).

³⁴ Estimates are shown in italics, where for some partners only estimates are available - These data have been included for information and should be treated with caution.

Background Notes

This document is one of a wider set of factsheets between the UK and its individual trade and investment partners which can be found on the [Trade and Investment Factsheets website](#). All of these factsheets are published as [Official Statistics](#) as defined by the [UK Statistics Authority](#), and are compliant with the [Code of Practice for Statistics](#) where they meet user needs as well as promoting trustworthiness, quality and public value in Government statistics. The publication of these factsheets as Official Statistics was agreed by the Chief Statistician at the Department for International Trade, who monitors these factsheets to ensure they continue to adhere to the [Code of Practice for Statistics](#). These factsheets have not been formally assessed by the [Office of Statistics Regulation](#) and are therefore not designated as [National Statistics](#).

As a requisite of publishing as Official Statistics, a [quality and methodology report](#) has been produced which outlines the quality of these factsheets, as well as providing more information on the methodology of the data sources presented here. This report contains hyperlinks to information on the strengths and weaknesses for each data source. Statistics contained in the factsheets from UK data providers all come from Official Statistics publications, with some sources also being from National Statistics publications.

Future updates of these factsheets can be found on the [Government update schedule for Official Statistics](#). These scheduled updates are in line with significant updates from UK data providers when they release new data. Unscheduled releases of the factsheets may also be necessary to accommodate data updates where little or no advanced notice are given, such as in the case of international data updates. Please see the data update schedule and revisions policy in the [quality and methodology report](#) for more information. Please note that there may be occasions where more recent data than is provided here can be found directly from the data providers.

The Department for International Trade welcome any feedback or comments on these factsheets, please send these to statistics@trade.gov.uk.
