

Radar tracks of G-UCESS and N40GS

Notes:-

1. Height is radar height from Mode C SSR. (1013 mbs datum)
2. Time is related to descent of G-U ESS
3. Speeds are true airspeeds computed from radar plot and reported wind velocities.
These speeds are accurate only to ± 10 knots.

Flight trials simulation of descent (paragraph 1.16.3)
