1. Call Context

The 2014 to 2020 European Structural and Investment Funds bring the European Regional Development, European Social Fund and part of the European Agricultural Fund for Rural Development together into a single European Union Structural and Investment Funds Growth Programme for England supporting the key growth priorities of innovation, research and development, support for Small and Medium Enterprises, low carbon, skills, employment, and social inclusion.

The Funds are managed by the Department for Communities and Local Government for European Regional Development Fund, Department for Work and Pensions for European Social Fund and the Department for Environment Food and Rural Affairs for European Agricultural Fund for Rural Development. In London, the Greater London Authority acts as an Intermediate Body for the European Regional Development Fund and European Social Fund programmes. Unless stated otherwise, the term “Managing Authority” will apply to all these organisations. These Departments are the Managing Authorities for each Fund. The Managing Authorities work closely with local partners who provide:

- Practical advice and information to the Managing Authorities to assist in the preparation of local plans that contribute towards Operational Programme priorities and targets;
- Local intelligence to the Managing Authorities in the development of project calls (decided by the Managing Authorities) that reflect Operational Programme and local development needs as well as match funding opportunities;
- Advice on local economic growth conditions and opportunities within the context of Operational Programmes and the local European Structural and Investment Funds Strategy to aid the Managing Authority’s assessments at outline and full application stage.

This call is issued by the Department for Communities and Local Government and invites outline applications in respect of the European Regional Development Fund. European Regional Development Fund is specifically focussed on investment to support economic growth and job creation. The call invites proposals in respect of Priority Axis 3 of the European Regional Development Fund Operational Programme: Enhancing the Competitiveness of Small and Medium Sized Enterprises against the requirements set out in this call document.

1.1 National Context

The primary aim of Priority Axis 3 is to improve the competitiveness of Small and Medium Sized Enterprises by increasing the capacity and capability of Small and Medium Sized Enterprises and promoting entrepreneurship. The priority axis will support the Government’s commitment to support Small and Medium Sized
Enterprises and in doing so strengthen the pipeline of high growth business across England.¹

A range of Investment Priorities will focus European Regional Development Fund intervention to support entrepreneurship and increase the growth capacity of Small and Medium Sized Enterprises. These are:

**Investment Priority 3a - Promoting entrepreneurship, in particular by facilitating the economic exploitation of new ideas and fostering the creation of new firms, including through business incubators. Specific objective: Increase entrepreneurship, particularly in areas with low levels of enterprise activity and amongst under-represented groups.**

There are disparities in rates of business start-ups, in some territories and amongst some groups. For instance, 37% of start-ups in 2013 were located in London and the South East, with only 23% within Northern Local Enterprise Partnership territories. Some groups are particularly under-represented in enterprise relative to their share of the overall population; for instance only 18% of enterprises are majority female led; and whilst minority ethnic groups make up 14% of the population of England, only 6.2% of enterprises are minority ethnic group led.²

Measured by the Total early stage Entrepreneurial Activity (TEA) rate, excluding a jump in 2012, there has been a steady increase in the Total Entrepreneurial Activity for England. The UK and England are third highest in the G7, behind US and Canada but still just below average for the innovation driven economies as defined by the World Economic Forum’s Global Competitiveness Report. In 2013 in England, the Total Entrepreneurial Activity rate was 7.5% and the average across the innovation driven economies was 7.9%. The goal will be to show, by the end of the programme, a higher increase in the Total Entrepreneurial Activity rate in England than for the average across innovation driven economies.

**Investment Priority 3c - Supporting the creation and the extension of advanced capacities for products, services and development. Specific objective: Increase the growth capacity of Small and Medium Sized Enterprises**

The support provided through this Investment Priority will help Small and Medium Sized Enterprises to develop their capacity. This will look at productivity drivers, including the technological and business infrastructure and finance that will be required to ensure that those Small and Medium Sized Enterprises with the potential to grow can do so. This will include strengthening supply chains to take better advantage of globalisation by attracting high growth and innovative Small and

---

1. High Growth businesses are defined as those with at least 10 employees and who have experienced growth at an annual average of 20% over a three year period.
2. According to 2013 BPE estimates with Small Business Survey data
Medium Sized Enterprises where they can introduce new high value added products or services. The objective is to improve their productivity and help them grow and create jobs.

Productivity in Small and Medium Sized Enterprises in England lags behind productivity in large enterprises. In 2011 Small and Medium Sized Enterprise GVA per employee in England was £43,600; and for large enterprise this was £51,000. There were also wide regional disparities across England with average Small and Medium Sized Enterprise GVA per employee ranging from £33,000 in the North East to £65,000 in London. Variation can also be seen across sectors, with Small and Medium Sized Enterprises in manufacturing on average 41.6% less productive than larger firms.

**Investment Priority 3d - Supporting the capacity of small and medium sized enterprises to grow in regional, national and international markets and to engage in innovation processes**

**Specific objective:** Increase growth capability of Small and Medium Sized Enterprises.

Existing Small and Medium Sized Enterprises face a number of barriers which restrict their ability to achieve their growth ambitions. These include:

- Information and coordination failures which limit awareness, access and take-up of business support;
- High up-front costs and perceived difficulties in navigating legal, regulatory and cultural environments which constrain the number of Small and Medium Sized Enterprises entering new export markets; and
- Known market failures in the disproportionate costs of establishing and costing risks given the relatively small amounts of capital involved.

Actions to develop capacity of Small and Medium Sized Enterprises work alongside actions to develop capability of Small and Medium Sized Enterprises. Both will lead to an increase in jobs created in Small and Medium Sized Enterprises and in Small and Medium Sized Enterprise productivity.

**1.2 Local Development Need**

This call will focus on Investment Priorities 3a, 3c and 3d. Where the expectation is that the outcome of this call will result in the award of a single contract, applicants may wish to bid individually, as part of a consortium or a partnership (in line with ERDF Eligibility Rules Guidance). Bids which deviate from this will be received, but should provide an explanation for this approach. See below for further details.

This call builds on the supporting business section of the Greater Manchester Strategy (GMS) which seeks to increase productivity and competitiveness in
existing businesses and to encourage and support new business start-ups with growth potential and social enterprise start-ups in deprived communities.

Details of the Greater Manchester European Structural and Investment Funds Strategy can be found at: http://www.agma.gov.uk/gmca/european-funding-2014-2020/index.html

Micro enterprises and sole traders are a significant part of the Greater Manchester (GM) economy. Just over 80% (75,100) of firms in GM are micro businesses (employing 0-9 people), slightly below the UK average of 82.7%, of these around 25% are sole traders. However, the business start-up rate of 64% against the national rate of 69% shows the importance of continued investment in business start-up support. We also need to improve the survival rate of companies; the 5 year survival rate for companies in GM is 42.4% which is below the UK average of 44.6%.

In order to address the issues facing Greater Manchester businesses, the programme is looking to invest in activities that will:

- Enhance the productivity and competitiveness of existing Small and Medium Sized Enterprises;
- Encourage new enterprise;
- Support businesses to grow through innovation; and
- Improve businesses access to finance.

1.3 Scope of Activity

In responding to this call, applicants should note the following.

The Business Growth Service provides specialist advice to businesses with the right level of ambition, capability and capacity to improve and grow. The service brings together the help available through Growth Accelerator, Manufacturing Advisory Service, Designing Demand and IP Audits. The Service forms part of an integrated package of support that seamlessly connects businesses to Export advice which is provided by UK Trade & Investment through contracts for International Trade Services and UK Export Finance.

Government is working with partners across England to establish a series of business-led Growth Hubs which will include access to trade, investment and business growth services. The Hubs will provide good links and referral arrangements for national growth programmes, especially those in the Business Growth Service.

Applicants under this call will need to:
• demonstrate that the proposed project does not duplicate the Business Growth Service, demonstrating in particular how operations will complement and align with the Business Growth Service to deliver additional outcomes. This will be particularly important in cases where projects seek to provide related services e.g. business advice, consultancy, mentoring and peer-to-peer support and leadership and management coaching/advice to growth potential Small and Medium sized Enterprises or supply chain development;
• demonstrate how activity and delivery will be integrated with the business-led, single point of access Growth Hub in the area covered by this call and work locally with all business support provision provided by local public and private sector partners. Where relevant, further detail on Growth Hubs is set out below and in the Annex at the end of this document.

This call invites applications for business support proposals that improve the competitiveness of Small and Medium Sized Enterprises by increasing their capacity and capability and promoting entrepreneurship. This call will invest in four specific investment areas:

• Growth Services
• Start-up support
• Sector Programmes
• Access to Finance

Projects must demonstrate how they will add value to, and work in conjunction with, the already established Growth Hub in Greater Manchester (GM), and its role outlined within GMS (as referenced earlier) which:

• Promotes growth by encouraging companies to develop growth propositions;
• Has effective mechanisms for identifying, recruiting and targeting companies that have the potential to grow;
• Is able to diagnose companies’ barriers to growth;
• Provides tailored advice on helping companies tackle their barriers to growth;
• Includes effective growth programmes that enable companies to tackle barriers to growth; and
• Provides start up support to mid-growth companies.

Projects must also demonstrate how they will refer businesses to both private and public provision.

In addition all proposals must show how they will be able to work across all sectors and link into other programmes that support the key sectors identified in GMS. Bidders must also clearly demonstrate how they will work with existing and future
growth nodes e.g. science parks, clusters of growth businesses and major developing locations such as The Corridor, MediaCity and Manchester Airport City (enterprise zone).

To achieve the greatest impact the level and intensity of support to companies should be dependent on both their ability to grow/implement a growth programme and the complexity of barriers to growth the firms faces. Bids should show how this will be achieved.

1.3.1 Investment Priority 3a -Promoting entrepreneurship, in particular by facilitating the economic exploitation of new ideas and fostering the creation of new firms, including through business incubators. Specific objective: Increase entrepreneurship, particularly in areas with low levels of enterprise activity and amongst under-represented groups.

Scope of activity:

Indicative actions to be supported by the European Regional Development Fund may include:

- Targeted engagement, outreach and mentoring to strengthen entrepreneurial and enterprise culture;
- Provision of advice and support for entrepreneurship and self-employment in particular amongst under-represented groups by developing entrepreneurial skills and attitudes with a focus on increasing the number of business start-ups;
- Provision of advice and support for new business start-ups to survive and grow;
- Support to address market failures in the provision of start-up finance, e.g. seed finance, start-up loans;
- Outreach, coaching, mentoring, networking and consultancy support to promote business start-up, survival and growth;
- Grants to support productive investment; and
- Provision of land and premises for employment sites including incubator space, managed workspace, or grow-on space.

Projects will support individuals with ambitions to start up a business, and Small and Medium Sized Enterprises in the early stage of operation. This includes social enterprises and those wishing to set up social enterprises.

Local Context:
Specific Investment Area: Growth Services – Growth Hub (also relevant to Investment Priority 3c and 3d)

Greater Manchester is seeking projects which provide a GM Business Growth Hub function which fits with the Government’s policy for local Growth Hubs and works seamlessly with the national Business Growth Service (BGS) and other public and private provision.

Up to £4.55 million European Regional Development Fund is available to deliver a Growth Hub for an initial period of three years. Specifically the Growth Hub function should:

- Promote growth by encouraging companies to develop growth propositions;
- Have effective mechanisms for identifying, recruiting and targeting companies that have the potential to grow;
- Are able to diagnose companies’ barriers to growth;
- Provide tailored advice on helping companies tackle their barriers to growth;
- Include effective growth programmes that enable companies to tackle barriers to growth;
- Manage referral activity to suitable providers and co-ordinate local and national responses to companies’ needs and growth opportunities;
- Engage with local and national providers to ensure alignment of activity and provision of services which meet the needs of GM’s economy and its Small and Medium Sized Enterprises.

Proposals should include the direct delivery of growth programmes where a market gap has been identified in GM, which are not covered by other European Structural and Investment Funds project calls and cannot be provided through the national Business Growth Service due to limitations in terms of its remit and / or scale of provision in GM. The programmes which should be covered are as follows:

- **Growth Services** - Direct provision of growth support to the client, either in one-to-one format or one-to-many sessions or as part of a workshop. This will included delivery of business support elements specific to the growth objectives of the business e.g. Intellectual Property, Design, Legal, Financial, Technology etc.

- **Medium/High Growth Start Up** - Direct provision of growth start-up support for economic start ups with growth potential who would benefit from one-to-one format or one-to-many sessions or as part of workshops.

- **Mentoring** – Support to access mentoring support offered by other business leaders; both one to one mentoring and via group mentoring (including proactive matching and relationship monitoring/development).
• **Establishing workforce development needs** (some of which potentially could be funded under European Social Fund support) – Support client growth and improved productivity through identifying skills and workforce development opportunities, providing intensive support; this may be delivered in either in one-to-one format or one-to-many as part of a workshop session/action learning sets.

These services should complement, and provide cross referrals, to other business support initiatives supported the European Regional Development Fund in the GM area, including advice on access to finance, innovation, resource efficiency and exploiting digital technologies.

The services should also complement national Government schemes already providing support, which include the Growth Accelerator programme for Small and Medium Sized Enterprises with high growth potential, innovation support through the Technology Strategy Board, international trade support through UK Trade & Investment and help for manufacturers provided by the Manufacturing Advisory Service.

Whilst the national schemes cater for specific target groups, businesses with growth potential which do not meet the criteria for these schemes, are not yet ready to take up the services or have specific needs which are not met by these services, may be unable to find support which leaves a gap in provision.

This gap is exacerbated by Small and Medium Sized Enterprises being unaware of where to access support, who to approach, or in many cases not being aware that support is available for their business at all. In addition there is an information market failure as businesses are reluctant to pay for advice due to doubts about the value and benefits of support, which means the market is unable to provide the support required. This is illustrated in the Department for Business Innovation and Skills’ report ‘Research to understand the barriers to take up and use of business support’ 2011\(^3\).

Call preference will be for a single project covering all four of the Growth Service themes outlined above across the whole of GM and applications from consortia are encouraged. Where appropriate, synergies with the other North West Local Enterprise Partnership areas, looking to undertake similar activities, should be exploited.

To achieve maximum impact it is likely that the services outlined in this call would be best focused on Small and Medium Sized Enterprise’s with the following characteristics and all proposals must demonstrate how this focus will be achieved:

\(^3\) CEEDR (2011) "Research to understand the barriers to the take up and use of business support"
• Small and Medium Sized Enterprise’s with 10 or more employees with the potential to increase turnover or employment by an annual average rate between 5% and up to 20% over a 3 year period

• Small and Medium Sized Enterprises with fewer than 10 employees that over three years have the potential to increase employment by at least 3 employees or annual turnover by £0.25m.

• Start-ups with potential to achieve turnover of £0.25m within three years of starting trading, or to have at least 5 employees within three years.

and specifically excludes:

• Businesses without a clear orientation and capacity for growth.

Specific Investment Area: Start-up support

Up to £3 million European Regional Development Fund is available to deliver a programme of intensive business start-up support across Greater Manchester for an initial period of 3 years. The service should be tailored to the needs of each potential business and should consist of the following tranches of activity:

• Awareness raising and marketing of the service across Greater Manchester, particularly to disadvantaged wards and groups
• Pre-start support – both workshops and one-to-one support setting out the key aspects of running a business, assessing individuals’ business ideas, and assessing their capability to manage a successful business
• Tailored business start-up support – supporting the development of a strong business plan and providing advice and guidance on the key aspects of running a business such as understanding their personal survival budget, cashflow, tax and record keeping, promotion and marketing, and regulatory requirements
• Post-start support – tailored activity to improve business survival rates and a warm handover to the GM Business Growth Hub, other business support services operating in GM and other complementary services that will support the business to grow.
• Demonstrates clear links to European Social Fund funded provision of skills and employment support to those establishing businesses.

Activity is likely to be delivered through

• Outreach
• The delivery of workshops and seminars
• One-to-one support
• Referral and warm handover through to complementary training, networking, mentoring or business finance support.

The programme must not duplicate existing activity and all proposals will need to show how they are additional and complementary to existing provision available at local, sub-regional and national levels, for example the Department for Work and

This programme will be open to all Greater Manchester residents, but activity should particularly focus on, and be tailored to the needs of, underrepresented groups including women, BME communities, people with disabilities, older workers, lone parents and ex-offenders and those living in disadvantaged wards.

This programme should also fit closely with the Social Innovation Driver (SID) that will be tendered at a later date. While this call focuses on the start-up and pre-start-up phase, SID will focus on those organisations already established which have the capacity and appetite for growth but are in need of support to be able to do so. It is expected that together these two calls will create a pipeline which organisations can follow to find support at different stages in their development.

Call preference will be for a single project covering all of the themes outlined above across the whole of GM and applications from consortia are encouraged. Where appropriate, synergies with the other North West Local Enterprise Partnership areas, looking to undertake similar activities, should be exploited.

1.3.2 Investment Priority 3c - Supporting the creation and the extension of advanced capacities for products, services and development. Specific objective: Increase the growth capacity of Small and Medium Sized Enterprises.

Scope of activity:

Under this Investment Priority indicative actions to be supported by European Regional Development Fund may include:

- Provision of advice to develop new business models or higher quality products, processes or services;
- Advice and support for businesses to implement productivity improvements including through the provision of resource efficiency advice;
- Advice to improve business processes and workforce development;
- Advice and support for supply chain interventions to strengthen and grow the domestic supplier base;
- Attracting new foreign direct investment into England;
- Provision of advice, consultancy support, mentoring, peer to peer support, and support for collaborative;
- Grant finance for business to invest for product, process and service improvements;
- Provision of independent access to finance advice; and

4 With reference to IMD2010 or 2015(if available)
• Provision of land and premises for employment sites, including business incubation, managed workspace, or grow-on space.

Activities will target domestic and foreign-owned Small and Medium Sized Enterprises, including social enterprises.

Local Context:

Specific Investment Area: Sector Programmes (also relevant to Investment Priority 3d)

Up to £4.495 million European Regional Development Fund is available, for an initial period of three years, to deliver a service to provide tailored and highly targeted support to businesses and supply chains in the following Greater Manchester priority sectors:

• Business, Financial and Professional Services;
• Digital & Creative;
• Life Sciences;
• Advanced Materials and Manufacturing; and
• Low Carbon and Environmental Goods and Services.

And Inward Investment support to Small and Medium Sized Enterprises across all sectors:

• Global supply chain and sector research and analysis;
• Promotion of Greater Manchester as a business location and sector specific marketing in high value sectors; Development of propositions and opportunities to generate investment and re-investment within Greater Manchester, working with companies elsewhere in the European Union and the rest of the World; Delivery of inward investment services;

We expect about 20% of the support being focused on Inward Investment activity.

Projects must demonstrate how they will provide holistic support to Small and Medium Sized Enterprises within these sectors and activities, which will strengthen the value of the sectors to the Greater Manchester economy and how they will complement, and not duplicate, other business support and investment programmes. Specifically projects must demonstrate close links and the provision of added value to:

• Greater Manchester’s Business Growth Hub
• Other business support and investment services provided by the Manchester Growth Company on behalf of the Local Enterprise Partnership
• Other European Structural and Investment Funds programmes – both business support European Regional Development Fund activity and European Social Fund-funded skills interventions – in the Greater Manchester area
• National programmes including Growth Accelerator and the Manufacturing Advisory Service.

Project activities may include:

• Focused business advice: enquiry handling, awareness raising and promotional events, diagnostic, advice, guidance, specialist mentoring, consultancy support, grant support and referrals to complementary provision.
• Supply-chain development: assisting groups of businesses to understand future market trends, exploit emerging opportunities and implement sector standards.
• Support for Small and Medium Sized Enterprises within the targeted sectors through flexible ‘bite sized’ opportunities in areas such as impact of globalisation, strategic planning, business management, organisational change including workforce development, CSR and impact of climate change.
• Promotion of international links including trade opportunities, direct assistance to help more companies export and inward investment.

Preference will be for a single project covering all of the themes outlined above across the whole of Greater Manchester and applications from consortia are encouraged. Where appropriate, synergies with the other North West Local Enterprise Partnership areas, looking to undertake similar activities, should be exploited.

**Specific Investment Area: Access to Finance**

Up to £1 million European Regional Development Fund is available, for an initial period of three years, to deliver a service which will provide impartial support and advice to Small and Medium Sized Enterprises to enable them to understand and access business finance from a range of public and private sources. Support should include:

• Delivery of a series of investment readiness workshops or seminars;
• Diagnosing a business’s need for finance and supporting them to develop detailed business and financial plans;
• Providing tailored advice on the range of financial products available, both private and publically-backed, and the processes involved in raising finance;
• Delivery of pitch and presentation workshops; and
• Introductions to relevant business finance providers.

The service:
- Cannot fund activity that displaces or duplicates existing provision in the private or public sector. Applications will need to show they meet a market failure and are additional to existing provision in the private and public sector.
- will provide support to Small and Medium Sized Enterprises across the whole of Greater Manchester.
- will form part of a suite of support for Greater Manchester Small and Medium Sized Enterprises. As such, applicants will need to demonstrate how they will integrate with existing services such as Greater Manchester’s Business Growth Hub.

Applicants should also note that in the North West of England, publicly funded access to finance support is currently delivered by Greater Manchester Business Support through the Business Growth Hub; this activity will come to an end in September 2015. As far as possible we want to ensure continuity of support, and the timing of the start of support will be critical to this.

Preference will be for a single project covering all of the areas outlined above across the whole of GM and applications from consortia are encouraged. Where appropriate, synergies with the other North West Local Enterprise Partnership areas, looking to undertake similar activities, should be exploited.

1.3.3. Investment Priority 3d - Supporting the capacity of small and medium sized enterprises to grow in regional, national and international markets and to engage in innovation processes Specific objective: Increase growth capability of Small and Medium Sized Enterprises.

Scope of activity

Under this Investment Priority indicative actions to be supported by European Regional Development Fund may include but are not limited to:

- Provision of efficient local referral routes to ensure that SMEs are able to identify and access the most appropriate and tailored support for their specific growth needs;
- Support SMEs to develop focused growth strategies and update or introduce new business models which will drive business performance;
- Attracting new business investments to England;
- Advice and support for SMEs to enter, establish and expand in new domestic and international markets;
- Advice and support for businesses to become investment ready;
• Provision of advice, consultancy, mentoring and peer-to-peer support to indigenous businesses and inward investors (SMEs from outside the EU who will move to England);
• Leadership and management coaching where connected to the development and implementation of a business growth plan;
• Support events, trade fairs and missions to enable SMEs to enter, establish and expand in new domestic and international markets;
• Targeted grant schemes to support productive investment; and
• Provision of advice and consultancy on access to finance.

Activities will target domestic and foreign-owned Small and Medium Sized Enterprises, including Social Enterprises.

Local Context:

Growth Hub – as above (also relevant to Investment Priority 3a and 3c)

Sector Programmes – as above (also relevant to Investment Priority 3c)

2. Call Requirements
All Applications are competitive.

• An indicative budget of £13.045 million (refer to the four specific investment areas for the budget split) has been allocated to this call. This is intended as a guide and may be reviewed;

• Proposals should only contain activities which are eligible for European Regional Development Fund;

• Proposals should be for a minimum of £500,000 European Regional Development Fund;

• Applicants will need to have eligible match funding for the balance of costs which must be from a source other than the European Union;

• All procurement must demonstrate compliance with European Union regulations;

• Applicants must demonstrate compliance with State Aid law; and

• All expenditure and activities will be subject to rigorous audit and non-compliance may lead to financial penalty.
The European Regional Development Fund cannot be used to duplicate existing activities or activities that do not address market failure. The European Regional Development Fund can only be used to achieve additional activity or bring forward activity more quickly. Applicants must be able to demonstrate that proposals are additional to activity that would have occurred anyway or enables activity to be brought forward and delivered more quickly than otherwise would be the case in response to opportunity or demand.

**The proposed project must not duplicate or undermine existing business support services operating nationally or locally.**

For projects including premises, applicants will be required to demonstrate that there is demand that is not met by existing supply. There are further additional requirements for business incubators set out in the Operational Programme ‘Guiding Principles’ section for Priority Axis 3.

### 3. Required Deliverables

Operations will be expected to achieve the following Programme Deliverables. The definitions of which can be accessed at the [European Regional Development Fund Operational Programme](#). The targets are indicative and subject to final confirmation.

<table>
<thead>
<tr>
<th>ID</th>
<th>Indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>C1</td>
<td>Number of enterprises receiving support</td>

<tr>
<td>P2</td>
<td>Public or commercial buildings built or renovated</td>
</tr>
</tbody>
</table>
Applicants will need to be able to demonstrate how they will achieve the deliverables committed to within their proposal along with any methodology used to record it. Applicants will also need to ensure robust systems are in place, and be able to describe them, to capture and record the targets and to report qualitative and quantitative performance across the relevant Local Enterprise Partnership areas. All operations will be required to collect data and report progress against the deliverables with each claim. Where an operation underperforms against their deliverables they may be subject to a performance penalty.

There must be a fully evidenced audit trail for all contracted deliverables.

4. General Information

Essential information to support the drafting of an application and delivery of a successful European Regional Development Fund funded project is available at the European Growth Funding website pages.

4.1. Compliance and Eligibility

When developing an application, Applicants should refer to guidance on eligible Applicants, activities and costs. These are for guidance only and Applicants should take their own specialist advice if in doubt. It is the responsibility of the Applicant to ensure that the rules and guidance are adhered to both at application stage and following approval.

European Structural and Investment Funds are governed by European regulations and national rules. Applicants are advised to familiarise themselves with the relevant documentation listed in the ‘key documents’ section prior to submitting an Outline application. If successful, Applicants will enter into the standard Funding Agreement and must abide by the standard terms and conditions contained therein. Applicants are therefore strongly advised to read these terms and conditions to ensure that they would be able to enter into such an agreement prior to responding to the call. Once a Funding Agreement has been issued it should be signed and returned within a short timescale.

4.2. Intervention Rate & Match Funding

The European Regional Development Fund is the funding which is used where no other funding can be obtained (the funder of last resort). The maximum European Regional Development Fund contribution rate for the operation is 50%. This means European Regional Development Fund can contribute up to 50% of the total eligible project costs subject to State Aid regulations. The level of European Regional Development Fund awarded will be the minimum in order for the project to proceed. The remaining 50% or more must come from other eligible sources.
European Regional Development Fund is not paid in advance and expenditure must be defrayed prior to the submission of any claims. Applicants may be asked to demonstrate how they are able to cash flow the operation.

4.3. Applicants

Applicants must be legally constituted at the point of signing a Funding Agreement, and be able to enter into a legally binding Funding Agreement. The Applicant will be the organisation that, if the application is successful, enters into a contract for European Regional Development Fund and therefore carries the liability for ensuring that the terms of the European Regional Development Fund Funding Agreement are met by them and to all delivery partners. If there is more than one organisation applying for the funds, a lead organisation must be selected to become the Applicant. It is this organisation that carries the responsibility and liability for carrying out a compliant project.

The Managing Authority will consider the Applicant’s track record, both positive and negative. If the Applicant has been involved in the delivery of previous European grants and any irregularities with this (these) grant(s) have been identified, the Managing Authority will look into these and expect to see how and what steps have been taken to ensure that these have been addressed to mitigate the risk of further irregularities in the future. It is acknowledged that some organisations will be new to European Structural and Investment Funds funding and will not have a track record.

4.4. Cross Cutting Themes/Horizontal Principles

All applications received under this call should demonstrate how the Cross Cutting Themes have been addressed in the project design and development. Cross cutting themes for European Regional Development Fund are ‘equality and anti-discrimination’ and ‘sustainable development’. Further information is available in the European Regional Development Fund Operational Programme.

4.5. State Aid & Revenue Generation

Applicants are required, in the Outline Application, to provide a view on how their proposal complies with State Aid law. Applicants must ensure that projects comply with the law on State Aid. Grant funding to any economic undertaking which is state aid can only be awarded if it is compatible aid, in that it complies with the terms of a notified scheme or is covered by the De Minimis Regulation. Guidance for grant recipients, explaining more about State Aid, is available; it is important

5 Article 107(1) of the Treaty on the Functioning of the European Union provides that: “Save as otherwise provided in the Treaties, any aid granted by a Member State or through state resources in any form whatsoever which distorts or threatens to distort competition by favouring certain undertakings or the production of certain goods shall, in so far as it affects trade between Member States, be incompatible with the internal market.”
that Applicants take responsibility for understanding the importance of the State Aid rules and securing their full compliance with them throughout the project, if it is selected into the Programme.

The Managing Authority is not able to give legal advice on State Aid. It is the responsibility of the Applicant to ensure that the operation is State Aid compliant. Where the Applicant does not perceive that there is any State Aid, it should state whether or not it considers Articles 61 and 65(8) of regulation 1303/2013 to apply. This revenue should be taken into account in calculating eligible expenditure. Article 61 refers to monitoring revenues generated after completion of the project, and Article 65(8) how to deal with differences in the forecast and actual revenues at the end of the operation. The details of this will be tested at the full application stage.

4.6. Funding Agreement

The Funding Agreement is a standard, non-negotiable and legally binding document. Any successful Applicant will be subject to the terms and conditions contained within this agreement. Applicants are strongly advised to seek their own advice to ensure that they would be able to enter into and abide by the terms of the Funding Agreement.

Failure to meet any of the conditions of the agreement or the commitments within the application will result in claw back of funding.

Applicants should be aware that additional provisions and securities may be included within the Funding Agreement to protect the investment. These will be further discussed if relevant following the Full Application stage.

4.7. Procurement

All costs delivered by the Grant Recipient (the Applicant) and/or delivery partners must be delivered on an actual cost basis. Other costs must be procured in line with EU regulations. The most common error identified during audit has been failure to comply with relevant procurement regulations and crucially to maintain a full audit trail to prove that they have complied with the relevant regulation. Robust and transparent procurement is required to ensure that Grant Recipients:

- Consider value for money;
- Maximise efficient use of public money; and
- Maintain competitiveness and fairness across the European Union.

It is recommended that Applicants seek their own legal advice pertaining to their procurement and requirements to publicise any tendering opportunities.

The Managing Authority is not able to give legal advice on procurement. It is the responsibility of the Applicant to ensure the project is compliant in this respect.
5. Application Process & Prioritisation Methodology

There are two stages to the European Regional Development Fund application process; Outline Application and if successful, Full Application. Applicants must fully complete the Outline Application via LOGASnet (section 9 refers). Guidance is available on the European Growth Funding website pages. Applications will be subject to a Gateway Assessment undertaken by the Managing Authority under the following criteria:

- Applicant eligibility;
- Activity and expenditure eligibility; and
- The fit with the European Regional Development Fund Operational Programme and the call.

Proposals that pass the Gateway Assessment will move into the Core Assessment which consists of the following:

- Strategic fit;
- Value for money;
- Management & control;
- Deliverability;
- Procurement / tendering; and
- State Aid compliance.

The Managing Authority will seek advice from partners when considering applications to ensure its assessment is informed by local economic growth conditions and opportunities within the context of Operational Programmes and the local European Structural and Investment Funds Strategy. This will include the relevant Local Enterprise Partnership Area European Structural and Investment Funds Committee and other partners deemed relevant to the application.

The assessment and any prioritisation will be undertaken using only the information supplied as part of the application process. The Managing Authority cannot accept further detail outside this process.

Non-public sector Applicants who are successful at the Outline Application stage may be subject to due financial diligence checks by the Managing Authority, prior to submission of a Full Application. Applicants will be required to submit accounts, and to clarify financial or other organisational information. New Applicant organisations may be required to provide details of a guarantor.
6. Support

Please note that this is a competitive call and to preserve impartiality we are unable to enter into correspondence with applicants over their Outline application. Details of where guidance can be found are contained throughout this calls document. In exceptional circumstances, if there are issues with accessing this guidance, please contact: NW.ERD芬quiries@communities.gsi.gov.uk

7. Key Documents

- Outline Application Form;
- Outline Application Form Guidance;
- Local Enterprise Partnership area’s European Structural and Investment Funds Strategy;
- Eligibility Guidance; and
- Target Definitions.

8. Document Checklist

Failure to provide the following documentation will result in the application being rejected

Outline Stage:

- Fully completed Outline Application;
- Financial Tables;
- Outputs, Results and Indicators Tables; and
- Three years financial accounts (if private or voluntary and community sector).

9. Document Submission

Completed Outline Applications must be submitted via the LOGASnet system. Please note that Applicants will require a user ID and password in order to access the LOGASnet system. Details on how to register on the system can be found on the GOV.UK website European Growth Funding website pages. Please allow up to 10 days to receive your login details.
10. Timescales

<table>
<thead>
<tr>
<th>Event</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Launch of Call advertised on gov.uk.</td>
<td>27th March 2015</td>
</tr>
<tr>
<td>Deadline for submission of Outline Application</td>
<td>29th May 2015</td>
</tr>
</tbody>
</table>

Outline Application forms not received by the deadline will not be assessed. Outline Applications which are not fully completed will be excluded.

For this call applications will normally be required to **commence delivery/activity within three months** of the award of contract.

Any changes related to the deadline for the submission of the Outline Application form will be notified on the [European Growth Funding](https://europeangrowthfunding.eu) website pages.

11. Formal Agreement of the European Regional Development Fund Operational Programme

The information and references in the call are based on the latest version of the [European Regional Development Fund Operational Programme](https://europeangrowthfunding.eu) and are correct at the time of publishing. The Operational Programme may be subject to further amendment during its final negotiations with the European Commission, and subsequent calls will reflect any changes, to the extent that they may affect the terms of calls, that are made. In relation to the present call, the Managing Authority will take the possibility of relevant changes to the Programme into account when assessing outline and full applications, and where such changes occur will notify Applicants of any issues that arise, and propose a method of dealing with them.
ANNEX

2014-20 ERDF FUNDING FOR GROWTH HUB ACTIVITIES

Growth hubs will ensure that support for business is simpler, more joined up and easier to access. Some will also provide targeted support to businesses tailored to local needs e.g. priority sectors, groups. In the new 2014-20 ERDF Programme period, some growth hubs will have a physical presence in the local area for businesses to seek advice, support and to network whilst others will offer a virtual service.

Although growth hubs are open to all businesses, regardless of size or sector, they will be able to offer ERDF-funded support only to eligible SMEs under ERDF Priority Axis 3. LEPs and other partners in some localities have therefore sought clarification as to whether the 2014-20 ERDF Programme for England can be used to fund the following activities:

- Signposting and diagnostic activity (e.g. salary costs associated with to face-to-face business advisers, telephone support services)
- Facilitation of peer to peer networking events
- Growth hub marketing activity
- Website development/ maintenance and/or enhancements/development of new on-line tools
- Back office, administration
- Management of the growth hub

DCLG has therefore worked with BIS to produce this Annex on growth hub activities and how they may be supported by ERDF.

ERDF objectives

Where growth hub activity is eligible for ERDF support, it will be supported under Priority Axis 3 of the ERDF Operational Programme which is designed to improve the competitiveness of SMEs by increasing the capacity and capability of SMEs and promoting entrepreneurship. Its investment priorities and specific objectives are:

Investment Priority 3a - Promoting entrepreneurship, in particular by facilitating the economic exploitation of new ideas and fostering the creation of new firms, including through business incubators. Specific objective: Increase entrepreneurship, particularly in areas with low levels of enterprise activity and amongst under-represented groups.

Investment Priority 3c - Supporting the creation and the extension of advanced capacities for products, services and development. Specific objective: Increase the growth capacity of small and medium sized enterprises.
Investment Priority 3d - Supporting the capacity of small and medium sized enterprises to grow in regional, national and international markets and to engage in innovation processes. Specific objective: Increase growth capability of small and medium sized enterprises.

Eligibility of growth hub activities for ERDF support

LEPs and other partners are asked to note:

1. ERDF requires minimum match funding of between 20% and 50%, depending on where in England the growth hub is located. As a result, a robust match funding package needs to be in place for a project to proceed.

2. ERDF, the match funding and associated outputs must be accounted for and auditable, so transparent reporting systems for both funding and impacts will need to be in place.

3. As a general principle, ERDF can support core functions (and revenue costs) of growth hubs, where they directly contribute to Operational Programme activity and outputs.

4. Any ERDF support under Priority Axis 3 is limited to ERDF-eligible sectors, SMEs (not large companies) and potential entrepreneurs. This means that a universal offer for all businesses cannot be funded by ERDF – we can only fund those parts that provide support to eligible potential entrepreneurs or enterprises.

5. Delivery of information, diagnosis, brokerage (IDB) is permitted, however, integrated delivery with further support, advice or grant is preferred (for reasons of practicality, deliverability and VFM), rather than standalone IDB.

6. Growth hub staff directly associated with the delivery of ERDF project activity are eligible for ERDF support, e.g. staff costs for posts directly related to the ERDF project in terms of project delivery, management, coordination and monitoring; and posts directly related to referrals, signposting and diagnosis of needs of SMEs and potential entrepreneurs eligible for support from ERDF.

7. Growth hub marketing collateral, website content and tools where developed specifically for the purpose of helping to deliver ERDF Operational Programme activity and outputs may be supported.

8. Partnership development between Growth Hubs and organisations/institutions involved in providing business support that involves agreeing appropriate referral mechanisms that are clearly linked to signposting and IDB for eligible SMEs and outputs under ERDF Priority Axis 3 may be supported.

9. 15% flat rate overheads are available (based on 15% of direct staff costs) and cover eligible overheads and back office costs – for example, indirect staff costs such as receptionists, HR, legal, procurement support,
governance and partnership development time (also see 7 and 8 above), IT, shared premises costs and other associated costs.

ERDF will **not** be able to support generalised local growth hub activity that does not deliver support to eligible individuals or enterprises, such as:

a. Support for strategy development (including sector strategies).

b. Support to simplify the business support landscape (e.g. mapping), except where this relates to the development of referrals and protocols linked to ERDF project delivery and eligible ERDF SMEs e.g. integration of Business Growth Service (BGS).

c. Support for research or other development activity for the growth hub and/or LEP, including annual review of growth hub performance.

d. General growth hub website maintenance and tools development unrelated to the delivery of the ERDF Operational Programme.

e. Support for general growth hub partnership activity and governance.

Inevitably, this will result in some functions (or parts thereof) of each growth hub that must be funded from other sources, such as private contributions or other public funds, in line with the sustainability principle set out in the BIS grant offer letters for 2015-16 funding. Your BIS Local Manager will engage with and support each LEP and broader partnership in this process.
