

BT Group / EE merger inquiry provisional findings

Response from Consumer B – received 26 November 2015

Hi, i am a customer of EE who has no interest of moving to BT, my concern is, if the takeover is allowed to happen this would mean with BT also owning Plusnet they would contoller over 50% of the market (counting major providers only)

BT

EE

Plusnet

Talk Talk

Sky

Virgin (not available in most areas, so shouldn't be counted)

i have looked at changing my fibre deal and taking the EE-BT takeover in to consideration i can only choose from Talk Talk or Sky,or gamble on a tiny company

i'm pretty supriised and disappointed this deal is been considered to be ok when it would allow BT to control such a large potion of the market

Thanks
