

BT Group / EE merger inquiry provisional findings

Response from E-ze Talk Limited – received 11 November 2015

Sirs

BT and EE combined will threaten all other UK telco's and seriously harm customers by removing the necessary competition in this market place.

Given their already dominance (BT) within the UK market place just how could this be allowed to happen.

What benefits to UK customers? Absolutely non.

Please do not allow this to happen.

Regards
