

2014 to 2020 European Structural and Investment
Funds Growth Programme

Call for Proposals
European Regional Development Fund

Priority Axis 4: Supporting the Shift
Towards a Low Carbon Economy in All
Sectors

Managing Authority:	Department for Communities and Local Government
Fund:	European Regional Development Fund
Priority Axis:	Priority Axis 4: Supporting the Shift Towards a Low Carbon Economy in All Sectors
Call Reference:	OC05R16P 0285
Local Enterprise Partnership Area:	Cornwall and Isles of Scilly
LEP Area Indicative Fund Allocation:	£10,600,000
Call Open:	10 February 2016
Call Closes:	23:59 on 10 June 2016

1. Introduction

The 2014 to 2020 European Structural and Investment Funds bring the European Regional Development Fund, European Social Fund and part of the European Agricultural Fund for Rural Development together into a single European Union Structural and Investment Funds Growth Programme for England supporting the key growth priorities of innovation, research and development, support for Small and Medium sized Enterprises, low carbon, skills, employment, and social inclusion.

The Funds are managed by the Department for Communities and Local Government for European Regional Development Fund, Department for Work and Pensions for European Social Fund and the Department for Environment Food and Rural Affairs for European Agricultural Fund for Rural Development. These Departments are the Managing Authorities for each Fund. In London, the Greater London Authority acts as an Intermediate Body for the European Regional Development Fund and European Social Fund programmes. Unless stated otherwise, the term “Managing Authority” will apply to all these organisations. The Managing Authorities work closely with local partners who provide:

1. Practical advice and information to the Managing Authorities to assist in the preparation of local plans that contribute towards Operational Programme priorities and targets;
2. Local intelligence to the Managing Authorities in the development of project calls (decided by the Managing Authorities) that reflect Operational Programme and local development needs as well as match funding opportunities; and
3. Advice on local economic growth conditions and opportunities within the context of the Operational Programme and the local European Structural Investment Fund Strategy to aid the Managing Authority’s assessments at outline and full application stage.

This call is issued by the Department for Communities and Local Government and invites Outline Applications in respect of the European Regional Development Fund for England 2014 to 2020.

2. Call Context

On behalf of the national Growth Programme Board, the Department for Communities and Local Government (the Managing Authority) invites applications seeking European Regional Development Fund support under:

Priority Axis 4 Supporting the Shift to Low Carbon Economy in All Sectors

Investment Priorities:

- 4a** Promoting the production and distribution of energy derived from renewable resources.

- 4f** Promoting research and innovation in, and adoption of, low-carbon technologies.

The European Regional Development Fund Operational Programme for England 2014 to 2020 sets out how the European Regional Development Fund will focus on investment to support economic growth and job creation. **Priority Axis 4** of the Operational Programme aims to move England's economy towards a low carbon model by reducing Greenhouse Gas emissions, increasing the share of renewable energy and enhancing the energy efficiency of homes businesses and transport.

Any application for funding will be required to clearly demonstrate that it meets the requirement of, and makes a meaningful contribution to, the delivery of the relevant Priority Axis of the [European Regional Development Fund Operational Programme](#).

In addition, applications will be expected to meet identified local development need, as expressed in the scope of this call and as set out in the [Cornwall and Isles of Scilly](#) European Structural and Investment Funds Strategy.

Applicants are advised to familiarise themselves with the detail of the Operational Programme, local European Structural and Investment Funds Strategy and the relevant documentation listed in sections 5 through to 8 **prior to** submitting an Outline Application.

3. Scope of the Call

1. Scope

This call invites Outline Applications which support the delivery of **Priority Axis 4** of the European Regional Development Fund Operational Programme and responds to the local development need set out in the [Cornwall and Isles of Scilly Local Enterprise Partnership Area European Structural and Investment Funds Strategy](#).

Indicative Fund Allocation:	<p>Indicatively, through this call the Managing Authority expects to allocate up to £10,600,000.</p> <p>The Managing Authority reserves the right to increase or decrease the indicative allocation, or support more or fewer projects subject to the volume and quality of proposals received.</p> <p>There is no indicative allocation of European Regional Development Fund funding between capital and revenue activity, both capital and revenue is eligible dependent on the nature of activities/Investment Priorities set out in the call.</p>
Minimum application level	<p>European Regional Development Fund investment is intended to make a significant impact on local growth. Applications are expected to demonstrate appropriate scale and impact. The Managing Authority does not intend to allocate less than £500,000 European Regional Development Fund to any single project. Consequently projects with a total value of less than £625,000 will not be supported under this call.</p>
Duration of project approvals	<p>Projects should be for a maximum of three years, however the Managing Authority reserves the right to vary the maximum duration in exceptional circumstances.</p>
Geographical Scope	<p>All interventions are confined to activity and beneficiaries within England.</p> <p>Projects should predominantly support businesses based within Cornwall and Isles of Scilly Local Enterprise Partnership area.</p>
Specific call requirements	<p>This call is open only to proposals that include the drilling of enhanced geothermal system demonstration well(s). These should be consistent with 'first' well/s that would be required for an enhanced geothermal system (electricity generation from an enhanced or engineering geothermal resource, created by increasing the permeability of the hot rocks at depth).</p>

	Investment Priorities 4a and 4f are open under this call. Applications may be submitted against one or both Investment Priorities taking into account the activity and output targets to be delivered. The split of activity against each Investment Priority should be articulated if applying against both. Applicants must ensure fit with the Operational Programme and Priority Axis 4 Guidance .
Call Deadlines	For this specific call, applications will be assessed after the close of the single deadline. Applications received after the published call close date will not be considered.

2. Local Development Need

Projects must deliver activity which directly contributes to the objectives of Priority Axis 4 of the Operational Programme, one or more of the relevant Investment Priorities and meet the **local development need** expressed in the table below.

LOCAL DEVELOPMENT NEED
<p>Local Economic Context :</p> <p>The Cornwall and Isles of Scilly European Structural and Investment Funds strategy includes an objective to “invest in activities with growth potential that develop Cornwall and the Isles of Scilly as a ‘green and marine’ region”. There is a focus on driving forward innovation in the low carbon sector, building knowledge capital and capitalising on the area’s significant natural resources to achieve low carbon economic growth.</p> <p>This call is seeking to make an investment into enhanced geothermal system demonstration well(s) to build on existing research and knowledge of the deep geothermal resource in Cornwall and Isles of Scilly. This will also provide a greater understanding of the geology at depth in the area in relation to geothermal power generation to enable resources to become characterised as reserves.</p> <p>Exploiting deep geothermal resource is a priority in the Sustainable Energy Action Plan for a Green Cornwall. A number of stakeholder workshops and consultations informed the Cornwall and Isles of Scilly European Structural and Investment Funds strategy. Contextual information, including baseline local data, can be found in the Cornwall and the Isles of Scilly Thematic Objective 4 evidence base.</p> <p>The geothermal resource represents a potentially significant opportunity for renewable heat and power generation. Previous projects such as the ‘Hot dry rocks</p>

project' funded by the Department of Energy evidenced the temperature gradient in Cornwall's granite at depth. More recent studies¹ suggest the development potential could be in the region of 100MWe based on Combined Heat and Power and the existing heat demand or as much as 4GWe² of electricity production. The same studies suggest the United Kingdom resource could provide 4-20% of the United Kingdom's electricity demand.

If accessed and exploited, this estimated level of resource could provide Cornwall and Isles of Scilly with significant economic and social benefits in a high value, knowledge based sector. Geothermal electricity provides baseload (24/7) generation in an increasingly intermittent renewable energy mix, as well as being able to react quickly to changes in demand, contributing longer term to a smarter energy system. In addition to power generation, secondary heat can be utilised. This could potentially form part of a longer term strategy to tackle fuel poverty, to support and attract businesses with significant heat demand, and to safeguard jobs.

Cornwall and Isles of Scilly Local Enterprise Partnership, together with Cornwall Council, have where possible sought to mitigate industry barriers such as licensing, access, seismicity concerns and ongoing support mechanisms through close partnership working with the Department of Energy and Climate Change and through the development of geothermal supplementary planning guidance. Uncertainties about the geological and geothermal conditions (the 'ground risk') alongside high capital costs have to date deterred private sector investment. This call provides funding to assess the geothermal resource, with the aim of increasing private sector appetite and unlocking the investment required to develop the industry in Cornwall and Isles of Scilly. The context of the longer term potential benefits is set out in the [Cornwall and Isles of Scilly Local Enterprise Partnership's deep geothermal vision for 2040](#).

This call focuses on one area – enhanced geothermal systems (electricity generation from an enhanced or engineered geothermal resource, created by increasing the permeability of the hot rocks at depth) – for which an indicative allocation of up to £10.6m European Regional Development Fund will be made available. Cornwall Council is making available an indicative allocation of public funding of up to £2.4m which may potentially be awarded to applicant/s under this call. For information about this funding and the conditions on which it is offered, see www.cornwall.gov.uk/Geothermal. It is the responsibility of applicants to ensure that their proposed funding package is compliant with State Aid rules (including any potential requirement to notify) and with European Structural and Investment Fund requirements.

Local Priorities:

Proposals should demonstrate alignment with local development need and priorities including:

¹ Atkins 2013, Deep Geothermal Review Study, Final Report, Department of Energy & Climate Change (DECC) and Sinclair Knight Merz (SKM) 2012, Geothermal Energy Potential, Great Britain and Northern Ireland respectively

- Applications may be submitted by single entities (company, site owner, research organisation) or through a consortia approach that could include some or all of the above. Project partners may form part of more than one application;
- Proposals must include the drilling and testing of one or more demonstration well/s;
- The design and completion of the demonstration well/s should be consistent with 'first' well/s that would be required for an enhanced geothermal system (electricity generation from an enhanced or engineered geothermal resource, created by increasing the permeability of the hot rocks at depth);
- Given the level of ground risk, proposals must evidence the research that has been undertaken or is proposed to determine site selection in respect of the desirable geological conditions;
- Proposals must clearly set out the expertise and relevant experience within the proposed project team or how it will be procured;
- All project risks should be identified with clear mitigation measures including a breakdown of any contingency funding;
- Applications are invited which will provide the industry with a better understanding of the resource, including the geology and associated temperature, stress regimes (which affects the stimulation / fracturing process), existing frequency, location, size and properties of joints and faults in the vicinity of the wells; and which will de-risk enhanced geothermal system projects, with an aim of securing private sector investment for subsequent renewable energy generating projects once the resource has been proven at the site. Applicants should describe how such learning will be disseminated;
- As the ultimate aim is to progress to an operating enhanced geothermal system, proposals should set out how the project will either deliver or facilitate a transition to this system in compliance with State Aid and European Structural and Investment Fund requirements, including but not limited to how applicants intend to deal with ownership rights (taking into account Article 71 Regulation (EU) No 1303/2013) and revenue generation;
- Proposals should set out the success criteria for developing an operating enhanced geothermal system (e.g. indicative hydraulic properties, flow rate, temperature etc) and the testing programme for the well/s following completion;
- Proposals should also set out a contingency plan in case test results show the well cannot be exploited as envisaged. This plan must demonstrate compliance with State Aid and European Structural and Investment Fund requirements.

In addition to setting out Operational Programme outputs that will be achieved by the proposal, there is an expectation that proposals clearly set out the value added and any longer term strategic benefits that will be realised or enabled, should the resource be proven and demonstration wells exploited further.

3. Operational Programme Investment Priorities

Applications must specify the activities to be delivered and are expected to directly contribute to **one or more** of the following Investment Priorities:

Investment Priority	4a – Promoting the production and distribution of energy derived from renewable sources.
Specific Objectives	Increase the number of small scale renewable energy schemes in England.
Indicative Actions	<p>Projects will support micro-energy installations, off-grid energy productions, renewable heat networks and ground and air source heat pumps:</p> <p>the type of measures that might be implemented with support from European Regional Development Fund.</p> <p>Under this investment priority, indicative actions to be supported by European Regional Development Fund may include:</p> <ul style="list-style-type: none"> • Measures to support increased production of renewable fuels and energy, in particular wind energy, solar and biomass • Support to build capability and capacity for supply chains in renewable energy • Demonstration and deployment of renewable energy technologies • Measures to support the wider deployment of renewable heat, including micro-generation, geothermal, renewable heat networks or district heating, ground source and air source heat pumps, and biomass systems with associated heat off-take and heat distribution networks along with recycling processing reprocessing and remanufacturing facilities, and • Anaerobic digestion plants and other biomass or landfill gas schemes.

Investment Priority	4f – Promoting research and innovation in, and adoption of, low-carbon technologies.
Specific Objectives	Increase innovation in, and adoption of, low carbon technologies.
Indicative Actions	<p>Under this investment priority indicative actions to be supported by European Regional Development Fund may include:</p> <ul style="list-style-type: none"> • Research and Development, innovation and supply chain work for low carbon technologies and materials, including, wave and wind energy, smart grids, distributed generation, solar and photovoltaics, heat networks, heat pumps and low carbon heat for energy intensive industries • Research underpinning carbon capture and storage, taking account of the restrictions laid down in Article 3.3.b of the European Regional Development Fund • Technology centres of excellence and test facilities, including relevant Catapult centres • Renewable technologies in the United Kingdom renewable energy roadmap • Research, development, demonstration and adoption of technologies and systems that support low-energy transport and accelerate the establishment of new technologies such as low emissions vehicles (electric, hybrid and hydrogen) • Knowledge transfer with Higher Education/Further Education institutions and Businesses • Supporting low carbon tech start-ups and greater commercialisation of low carbon products and processes • Developing financing methods that encourage the adoption of proven low carbon technologies and generate long-term financial savings • Demonstration and deployment of decentralised renewable energy technologies • Research, development and innovation and supply chain development for low carbon and resource efficient technologies and materials (including small

	scale pilot programmes that test the market with new low carbon solutions and the use of secondary materials).
--	--

4. Required Outputs under this Call

Projects must deliver against the Priority Axis 4 outputs and results of the European Regional Development Fund 2014 to 2020 Operational Programme. For projects coming forward under this call the expected outputs and results are:

ID	Output Indicator
C1	Number of enterprises receiving support
C5	Number of new enterprises supported
C26	Number of enterprises cooperating with research institutions.
C29	Number of enterprises supported to introduce new to the firm products
C30	Additional capacity of renewable energy production
C34	Estimated greenhouse gas reductions

Applicants will need to demonstrate how the eligible activity, funded by the European Regional Development Fund, will achieve the deliverables committed to within the proposal. The application should clearly state the methodology used to determine the levels of outputs proposed.

All operations will be required to report regularly on progress toward achievement of targets. This will need to include both quantitative and qualitative data relevant to the appropriate geographical areas. Applicants will need to explain how they will collect and record this information to maintain a fully evidenced audit trail. It should be noted that if an operation fails to deliver contracted deliverables, a performance penalty may apply.

5. Application Process & Prioritisation Methodology

There are two stages to the European Regional Development Fund application process;

1. Outline Application and, if successful
2. Full Application.

Acceptance of an Outline Application to progress to full application stage does not in any way indicate or constitute an offer of European Regional Development Fund grant.

Applicants must fully complete the [Outline Application](#) which will be assessed by the Managing Authority against the national [Selection Criteria](#).

Outline Applications will be assessed in two stages, Gateway assessment and Core assessment.

Gateway assessment considers:

- applicant eligibility;
- activity and expenditure eligibility; and
- fit with the National Operational Programme and the local development need set out in section 2.

Proposals that fail the Gateway assessment will be rejected. Proposals which pass the Gateway assessment will then be assessed against the Core assessment criteria:

- Strategic Fit
- Value for money
- Management and control
- Deliverability
- Compliance
 - Procurement
 - State Aid
 - Publicity requirements
- Cross cutting themes
 - Environmental sustainability
 - Equal Opportunities

Having assessed projects against these criteria the relevant Local Economic Partnership Area European Structural and Investment Fund Sub-Committee will advise the Managing Authority on the alignment to local economic growth conditions and opportunities within the context of the Operational Programme and local

European Structural and Investment Fund Strategy to aid the Managing Authority's assessments (at outline and full application stage).

Please note that the Managing Authority's decision is final and there are no appeals. If you wish to complain about the calls and application process, please follow the procedure set out at <https://www.gov.uk/government/organisations/department-for-communities-and-local-government/about/complaints-procedure>

6. General Information

1. National Eligibility Rules

When developing an application, Applicants must refer to the [National Eligibility Rules](#) setting out the requirements of the 2014-2020 European Regional Development Fund Programme. It is the responsibility of the Applicant to ensure that the Rules are adhered to both at application stage and following approval. Failure to do so can lead to financial penalties leading to recovery of up to 100% of grant. Applicants are strongly advised to seek specialist advice if in doubt on any requirement.

European Regional Development Fund eligibility rules apply to **all** project spend within the eligible costs, including match funding.

The European Regional Development Fund is governed by European regulations and national rules. Applicants are advised to familiarise themselves with the relevant documentation, (Section 8 Key Document refers) prior to submitting an Outline Application. If successful, Applicants will enter into a Funding Agreement and must abide by the standard terms and conditions contained therein. Applicants are therefore strongly advised to read these terms and conditions to ensure that they are able to enter into such an agreement prior to responding to the call. Once a Funding Agreement has been issued it should be signed and returned within 30 days, unless otherwise agreed with the Managing Authority.

2. Eligible Applicants

Section 4 of the [National Eligibility Rules](#) sets out who is eligible to apply.

Applicants must be legally constituted at the point of signing a Funding Agreement. If the application is approved the Applicant organisation will enter into a legally binding Funding Agreement and therefore will carry the liability for ensuring that the terms and conditions of the Funding Agreement are met.

If there is more than one organisation applying for the funds, a lead organisation must be selected to become the Applicant with the remaining organisation(s) acting

as Delivery Partner(s). In this situation the Applicant would be responsible and liable for the Delivery Partner(s) and ensuring the project is operating compliantly.

During the application process the Managing Authority will consider the Applicant's track record, both positive and negative. If the Applicant has been involved in the delivery of previous European grants and any irregularities have been identified, the Managing Authority will expect to see how and what steps have been taken to ensure that the risk of further irregularities in the future is mitigated. It is acknowledged that some organisations will be new to European Structural and Investment Funds funding and will not have a track record.

3. Contribution Rate & Match Funding

European Regional Development Fund is normally expected to intervene where no other funding can be obtained (i.e. the funder of last resort). The level of European Regional Development Fund awarded will be the minimum in order for the project to proceed.

The maximum Contribution Rate is 80% of the total eligible project costs subject to State Aid regulations.

The remaining 20% or more must come from other eligible sources as specified under section 6 of the National Eligibility Rules. Applicants will need to demonstrate that they have eligible match funding in place for the balance of costs. Other European Union funds cannot be used as a source of match funding.

European Regional Development Fund investment is limited by State Aid regulations and where the award of European Regional Development Fund would constitute State Aid the European Regional Development Fund grant rate may fall below the 80% maximum.

European Regional Development Fund is paid quarterly in arrears and expenditure must be defrayed prior to the submission of any Grant claims. Applicants may be asked to demonstrate how they are able to cash flow the operation.

4. Project Timescales

European Regional Development Fund funding will normally be approved for three years, however the Managing Authority reserves the right to extend the contract term in exceptional circumstances.

Projects approved through this call are expected to:

- Submit a detailed and complete full application within three months of formal selection at outline stage. Projects which fail to meet this deadline may be deselected,

- Commence delivery (defraying European Regional Development Fund eligible costs) within three months of formal approval. Projects which fail to meet this deadline may be deselected, and
- Be completed by June 2023.

5. Capital Projects

Applicants seeking European Regional Development Fund to support a capital project (i.e. land and/or property) will need to meet Building Research Establishment Environmental Assessment Method or Civil Engineering Environmental Quality Assessment 'Excellent' for new builds and 'Very Good' for refurbishments.

Applicants will need to provide evidence of how they will achieve the rating required (unless otherwise agreed with the Managing Authority).

Applicants will need to demonstrate that they have the rights and permissions to undertake the project and must provide:

1. Proof of current interest in the land and/or property, which includes evidence of the freehold ownership or any lease arrangements that may be in place; and
2. Evidence of the approval of any planning permission, or in certain circumstances a clear statement on the process for securing such consents and any risks to the project.

Royal Institute of British Architects Stage D costs must be supplied with the Full Application and be certified by an independent Quantity Surveyor and Land/Property contributions certified by a Real Estate Valuation expert who are current and chartered members of the Royal Institute of Chartered Surveyors/ Chartered Institute of Builders or equivalent body.

Successful Applicants will be required to provide security to the Managing Authority in the form of a Legal Charge and/or Deed of Covenant over the land and/or property. Applicants will be responsible for registering the charge at their own cost.

6. Cross Cutting Themes/Horizontal Principles

All applications received under this call should demonstrate how the Cross Cutting Themes have been addressed in the project design and development. Cross Cutting Themes for European Regional Development Fund are 'equality and anti-discrimination' and 'sustainable development'. Further information is available in the [European Regional Development Fund Operational Programme](#).

7. Additionality, Duplication and Displacement

Additionality is a core principle of European Regional Development Funding. Applicants must be able to demonstrate that the activity paid for out of European Regional Development Funding adds value to new or existing activity. Projects need to demonstrate that without the support of European Regional Development Funding the activity would not have taken place.

European Regional Development Funding cannot support activities that duplicate existing provision/services within the region.

Applications need to identify and evidence the beneficiaries will use the service and demonstrate that the project does not displace other activity available in the market place.

8. State Aid & Revenue Generation

Applicants are required, in the Outline Application, to provide a view on how their proposal complies with State Aid law. Applicants must ensure that projects comply with the law on State Aid.³ Grant funding to any economic undertaking which is State Aid can only be awarded if it is compatible aid, in that it complies with the terms of a notified scheme or is covered by the De Minimis Regulation. Guidance for Grant Recipients, explaining more about [State Aid](#), is available; it is important that Applicants take responsibility for understanding the importance of the State Aid rules and securing their full compliance with them throughout the project, if it is selected into the Programme.

The Managing Authority is not able to give legal advice on State Aid. It is the responsibility of the Applicant to ensure that the operation is State Aid compliant.

Where the Applicant does not perceive that there is any State Aid, it should state whether or not it considers Articles 61 and 65(8) of regulation 1303/2013 to apply. Article 61 refers to monitoring revenues generated after completion of the project, and Article 65(8) how to deal with differences in the forecast and actual revenues at the end of the operation. This revenue should be taken into account in calculating eligible expenditure. The details of this will be tested at the full application stage.

³ Article 107(1) of the Treaty on the Functioning of the European Union provides that: "Save as otherwise provided in the Treaties, any aid granted by a Member State or through state resources in any form whatsoever which distorts or threatens to distort competition by favouring certain undertakings or the production of certain goods shall, in so far as it affects trade between Member States, be incompatible with the internal market."

9. Funding Agreement

The Funding Agreement is a standard, non-negotiable and legally binding document. Any successful Applicant will be subject to the terms and conditions contained within this agreement. Applicants are strongly advised to seek relevant advice to ensure that they would be able to enter into and abide by the terms of the Funding Agreement.

Applicants are advised that additional provisions and securities may be included within the Funding Agreement to protect the investment. Detailed advice will be given if appropriate at the Full Application stage.

Failure to meet any of the conditions of the Funding Agreement or the commitments within the application will result in claw back of the Grant (which may include interest).

10. Procurement

All costs claimed by the Applicant (Grant Recipient and/or Delivery Partner(s)) must be recovered on an actual cost basis. Other costs must be procured in line with National (including [Public Procurement Regulation 2015](#)) and European Union regulations. Procurement will be subject to audit and verification and any irregularity will result in financial penalty of up to 100% of the grant paid. Robust and transparent procurement is required to ensure that Grant Recipients:

- Consider value for money;
- Maximise efficient use of public money; and
- Maintain competitiveness and fairness across the European Union.

It is **strongly recommended** that Applicants seek and follow legal advice in respect of procurement requirements. Procurement irregularities remain the most substantive cause of error and clawback of grant.

7. Support

Please note that this is a competitive call and to preserve impartiality we are unable to enter into correspondence with applicants over their Outline Application. Details of where guidance can be found are contained throughout this calls document. In exceptional circumstances, if there are issues with accessing this guidance, please contact: SW.ERDFenquiries@communities.gsi.gov.uk.

8. Key Documents

- (i) European Regional Development Fund Operational Programme;
- (ii) Outline Application Form;
- (iii) Outline Application Form Guidance;
- (iv) Local Enterprise Partnership area's European Structural and Investment Funds Strategy;
- (v) Eligibility Guidance;
- (vi) Target Definitions; and
- (vii) Funding Agreement (Revenue and/or Capital).

9. Document Checklist

Incomplete applications will be rejected. Please ensure the following information (documents) are submitted.

Outline Stage:

- Fully completed Outline Application;
- Financial Tables; and
- Outputs, Results and Indicators Tables.

10. Document Submission

Completed Outline Applications must be submitted via **email** to the address in Section 7.

Outline Application forms not received by the deadline will not be assessed. Outline Applications which are not fully completed will be excluded.

For this call applications will normally be required to **commence delivery/activity within three months** of the award of Funding Agreement.

Any changes related to the deadline for the submission of the Outline Application form will be notified on the [European Growth Funding](#) website pages.
