

Attention, engagement or impact? Using altmetrics to track conversations about your research

Natalia Madjarevic

Training and Implementation Manager, Altmetric

During this webinar, we'll discuss:

- What altmetrics can tell us about attention to research
- The emergence of altmetrics and interpreting the data
- Attention sources, tools and how it works at Altmetric
- Examples of HIV research with attention, and looking closer at the qualitative data

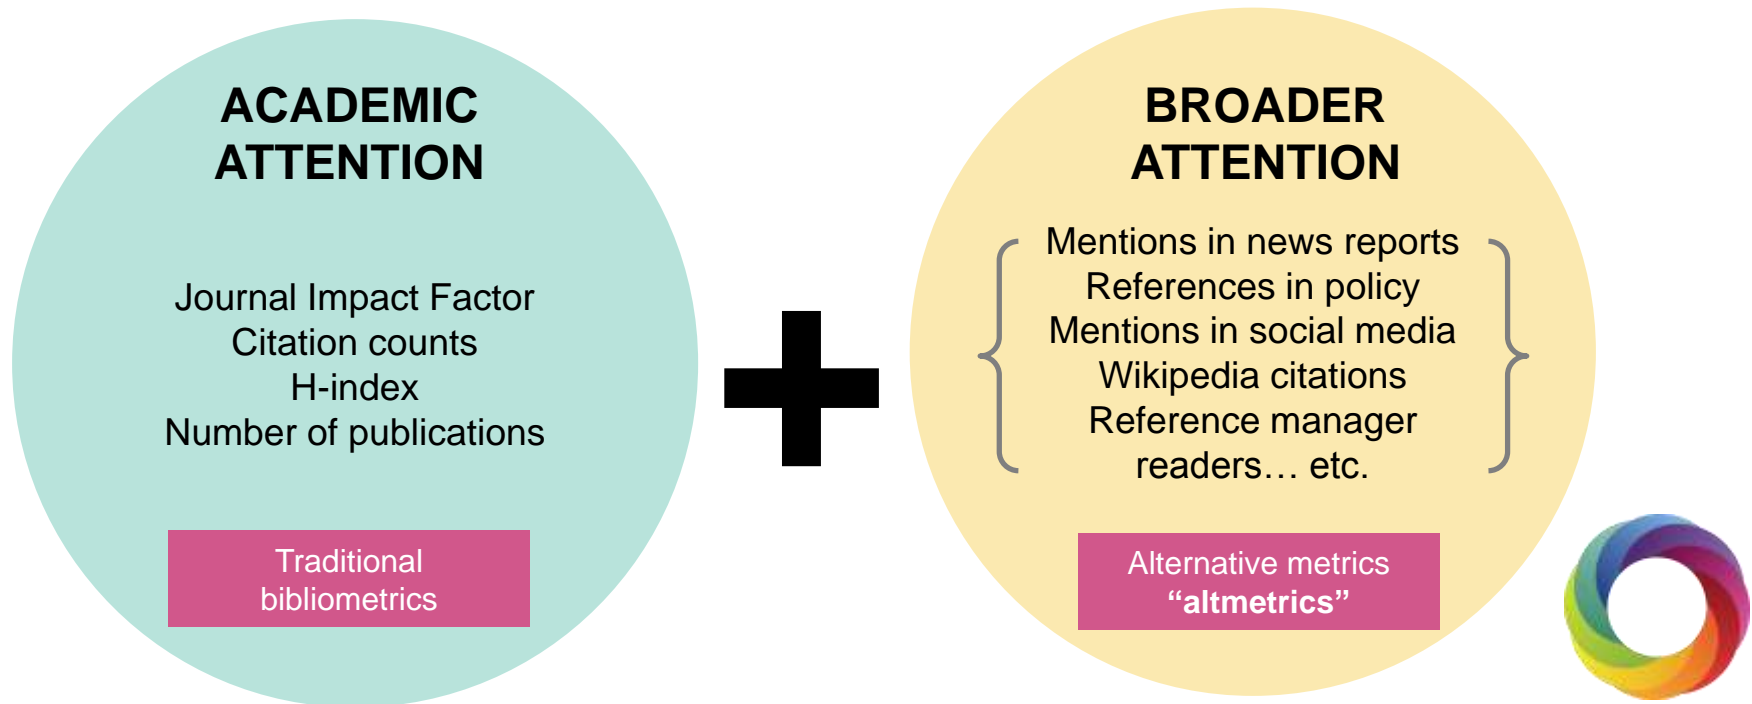

Part 1:

Emergence of altmetrics

What are altmetrics?

- Attention to research outputs in non-traditional sources, e.g. policy documents, news, blogs and social media
- *Indicators* of research impact
- Help understand how research is being received and used
- Complementary to traditional citation-based analysis

Why altmetrics?

- 1 Moving beyond crediting only journal article contributions: e.g. tracking data sets, posters, slides
- 2 Early career researchers whose work may not have accrued citations to demonstrate engagement
- 3 Real-time, immediate feedback on attention and dissemination of scholarly content

All impact means is that we are engaged with the world, trying to make it a better place to live in.

(Professor Michael Stewart, UCL)

How does research contribute to changes in everyday decisions or working practices?

- ★ Did it help improve working practices, services or business?
- ★ Provoke debate?
- ★ Shape policy?

And how do you demonstrate this to funders?

Interpreting altmetrics data

Attention: e.g. RTs, shares

Engagement: Analysis, discussion, reviews

Impact: e.g. shapes policy, influences working practices

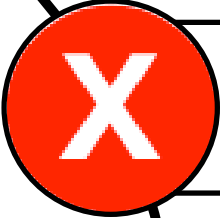

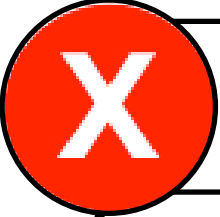

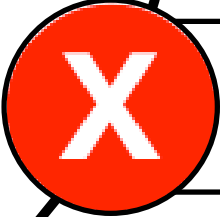

What can the data tell you?

- ✓ What type of attention is this research receiving?
- ✓ Where has this article received the most traction?
- ✓ Which countries are engaging most with the content?
- ✓ Has this article influenced policy, spurred new research, or engaged a new audience?
- ✓ Are reactions to this article positive or negative?

Remember that the numbers alone don't tell you...

-  Quality of the paper
-  Quality of the researchers
-  Whole story

How are institutions using Altmetric?

Researchers

- Track attention to your research immediately
- Uncover (unknown) conversations about your research
- Use in grant applications & funder reporting

Librarians

- Support researchers in all of the above
- Enhance department liaison activities
- Encourage staff to deposit in your research information system

Research Administrators

- Integrate data into your existing performance reports
- Identify key impacts across institution (i.e. policy docs)
- Benchmarking (thoughtfully!)

Marketing Comms.

- Identify research to promote
- Evaluate success of promotion activities
- Identify key researchers

Part 2: Altmetrics and HIV research

NATURE | LETTER

日本語要約

Viraemia suppressed in HIV-1-infected humans by broadly neutralizing antibody 3BNC117

THE CONVERSATION
Academic rigour, journalistic flair
Arts - Culture - Business - Economy - Education - Environment

Author
Ian Jones
Professor of Virology at University of Reading

Disclosure statement
This article does not reflect the views of the Medical Research Council

What was it about?

Nature article published in June 2015 discussed possible HIV vaccine.

Where and how was it discussed?

- Coverage across 39 news sources, e.g. The Guardian, El Pais, Forbes, The Conversation
- Blogged 10 times
- 251 tweets from 227 users, with an upper bound of 688,090 followers
- 8 Facebook posts
- Recommended in F1000 Prime
- YouTube and Google+

Predictors of Linkage to Care Following Community-Based HIV Counseling and Testing in Rural Kenya

Abigail M. Hatcher, Janet M. Turan, Hannah H. Leslie, Lucy W. Kanya, Zachary Kwena, Malory O. Johnson, Starley B. Shade, Elizabeth A. Bukusi, Alexandre Doyen, Craig R. Cohen

What was it about?

Aids & Behaviour 2011 article followed a cohort analysed enrollment in HIV counseling and testing in rural Kenya.

Where and how was it discussed?

- World Health Organization guidelines for policy makers and managers
- Mendeley readership and Twitter mentions in Kenya

Research used in recommendations for practical application and local attention

High academic engagement

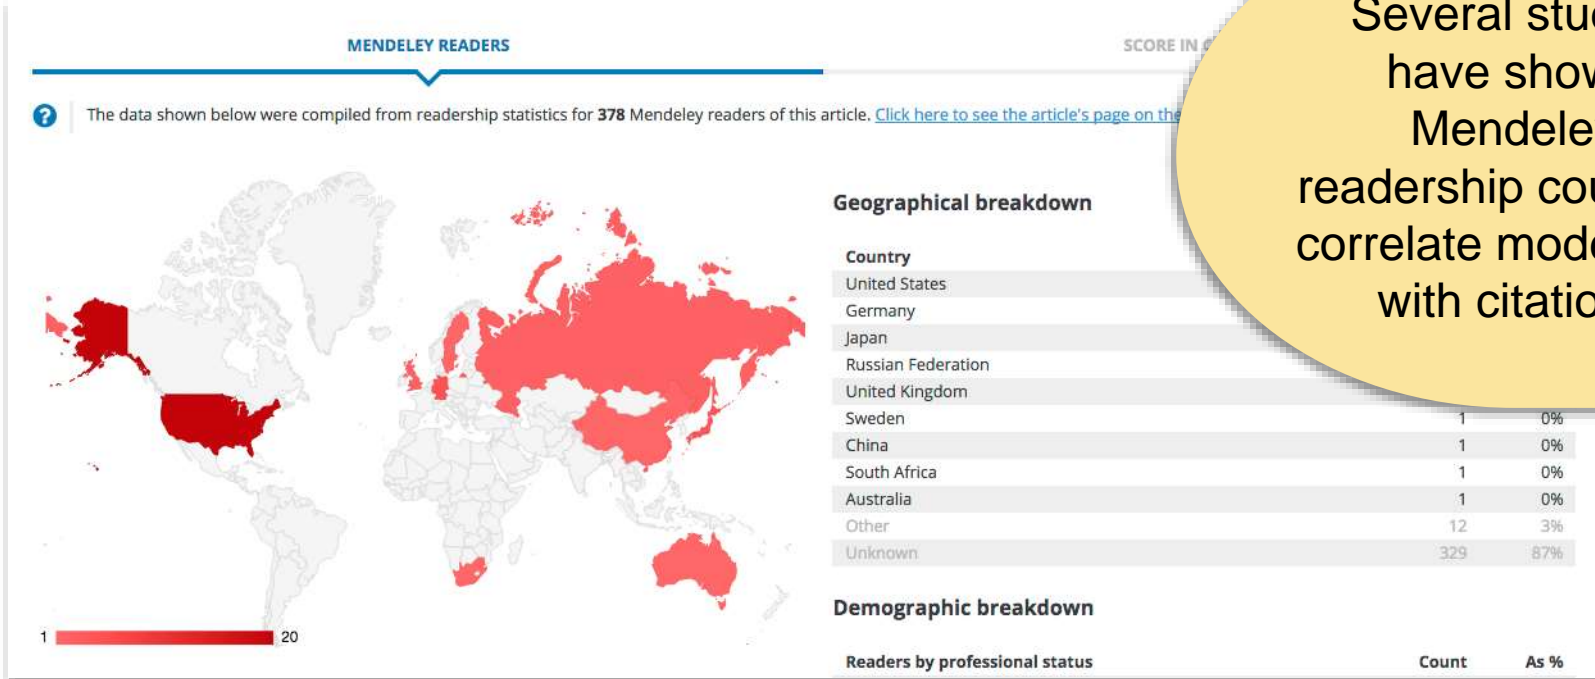

What was it about?

Science article: *Rational Design of Envelope Identifies Broadly Neutralizing Human Monoclonal Antibodies to HIV-1*

Where and how was it discussed?

- 378 readers on Mendeley
- Reviewed on F1000 Prime (research highlights)
- 2 news outlets
- 4 blog reviews
- 1 Wikipedia page

Several studies have shown Mendeley readership counts to correlate moderately with citations

Part 3:

Altmetric Tools

Altmetric in numbers: mentions and shares

Each day, we track
~44,000 new
mentions of research
across sources incl.
social media, news,
and policy docs.

That's **1** mention
every 2 seconds!

Each week,
~50k
unique items
are shared.

Mentions range in
complexity, from
quick shares to
comprehensive
reviews.

18m
mentions of
~4m scholarly
outputs.

What sources does Altmetric track?

News outlets

- Over 1,300 sites
- Manually curated list
- Text mining
- Global coverage

Social media and blogs

- Twitter, Facebook, Google+
- Public posts only
- Manually curated list

Post-publication peer review

- Publons
- PubPeer

Reference managers

- Mendeley, CiteULike
- Reader counts
- *Don't count towards the Altmetric score*

Other sources

- Wikipedia
- YouTube
- Reddit
- F1000
- Pinterest
- Q&A

Policy documents

- NICE Evidence
- Intergovernmental Panel on Climate Change
- Many more...

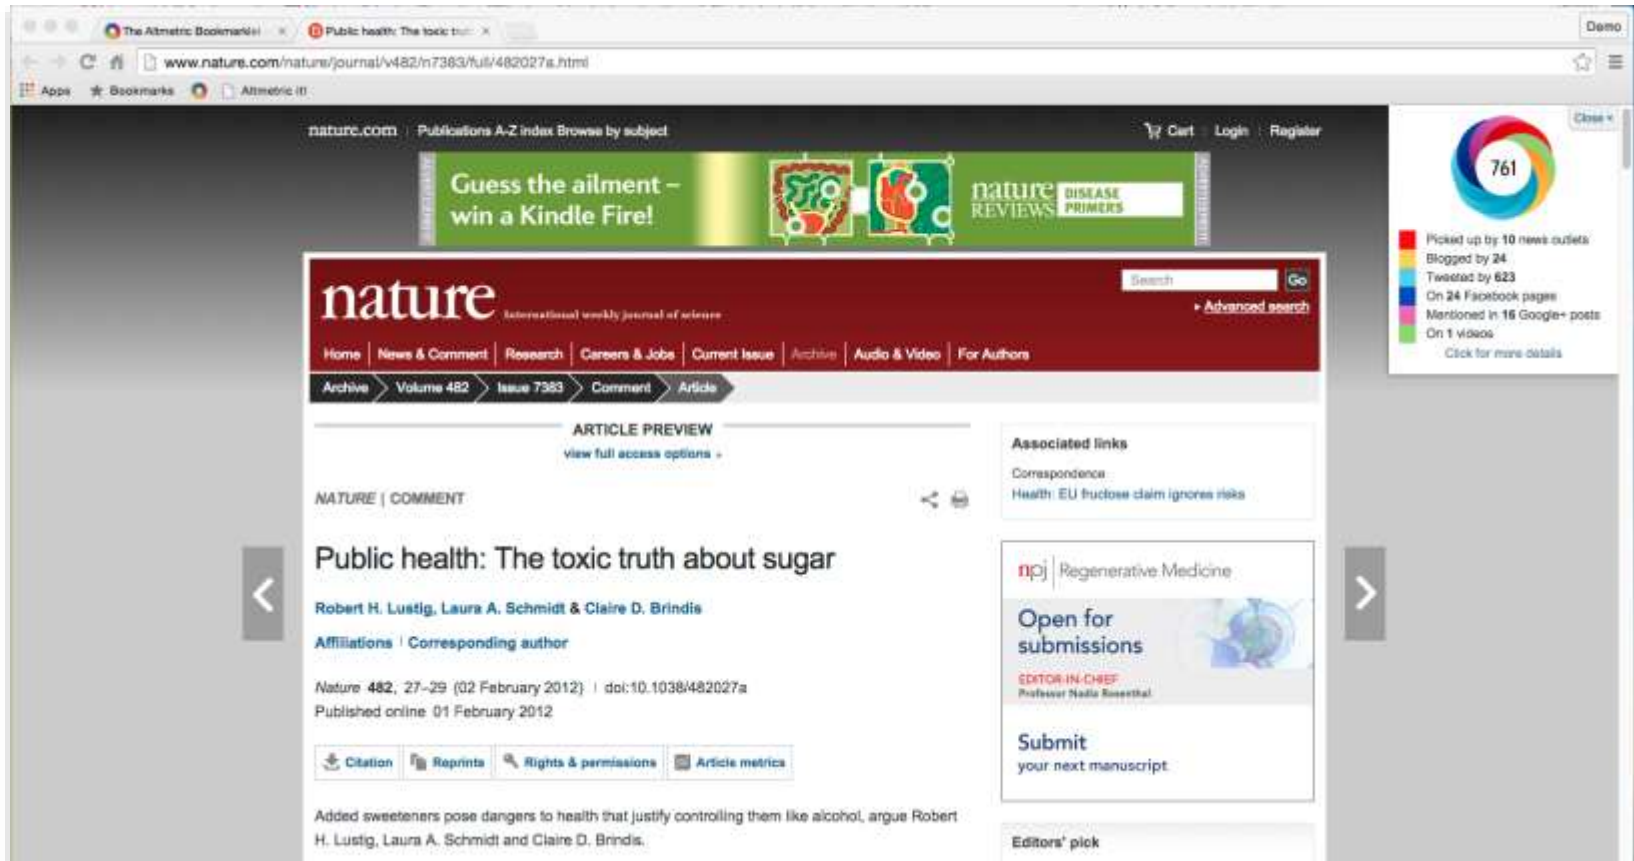

The Altmetric Bookmarklet

The free Bookmarklet lets you instantly retrieve altmetrics data for any article.

To install, go to: <http://altmetric.it>

The Altmetric Bookmarklet

The screenshot shows a web browser window displaying a Nature journal article. The article title is "Public health: The toxic truth about sugar" by Robert H. Lustig, Laura A. Schmidt & Claire D. Brindis. An Altmetric bookmarklet is overlaid on the right side of the page, showing a circular chart with the number 761 in the center. Below the chart, the following statistics are listed:

- Picked up by 10 news outlets
- Blogged by 24
- Tweeted by 623
- On 24 Facebook pages
- Mentioned in 16 Google+ posts
- On 1 Videos

A link "Click for more details" is provided below the statistics. The background page shows the Nature journal interface, including a search bar, navigation links, and a sidebar with "Associated links" and "Open for submissions" sections.

Altmetric donut and score of attention

The Altmetric donut visualizes which are sources discussing an item.

In the Altmetric Explorer, hover the cursor over the donut visualization to see the appropriate legend for an item.

Each source is colour coded:

The Colours of the Donut
