

### DIABETES/HYPERTENSION/CVD REGISTER

Name of Health Centre :

District:

Ward:

Entry Type (N/T/F)	Unique Number	Name	DOB	Sex	Address	Diagnosis		Date registered
					Telephone number	Primary	Other	
N	XXXXX	PETER MBARUKU	01/09/58	M				

Note for Entry: N = New Patient; T = Transfer from another facility; F = Re-entry when a previous row is full (after 12 attendances)  
 Primary diagnosis – initial diagnosis i.e. hypertension, diabetes or pre-diabetes  
 Other diagnosis – hypertension, diabetes, CVD (include specific condition i.e. heart failure)

**Note:** These two pages will be printed side by side, one patient should have one row as indicated by solid lines.  
The number of attendances in one row (12) is sufficient for three years, assuming one visit every three months.  
When the row is full, a follow up entry should be added at the next available row in the register, with an entry type of "F".  
The number of rows per page will depend on the length of the book chosen. **Ensure rows are properly aligned.**
