

Second day summary

Risk question: Risk of transmission of HPAI between/within small scale (independent/contracted) broiler farms and backyards.

TBD village vs .household level (backyards)

Study location RA, VCA, CBA: West Java, Bogor

- preferred by CMU, in accordance with current control priorities/programmes
- poultry density, previous studies (VCS Jakarta, commercial farms, Dutch study ect.)
- logistics, RAF team located here, CBA expert, VCA (hopefully recruited form Bogor, previously involved in Jakarta VCS)
