Subject: RE: Diebold Wincor merger inquiry: publication of the summary of provisional findings, press notice, notice of possible remedies and notice of provisional findings

[REDACTED],

Thank you for the time on the phone this morning and confirmation that there was still time for [REDACTED] and [REDACTED] to submit our feedback on behalf of Cardtronics.

We have read the CMA provisional findings on the Diebold – Wincor merger and also the possible remedies to address the identified concern over the significant lessening of competition as a result of the merger.

Cardtronics believe that the list of items below should be put in place and this will help to ensure that there is not a significant lessening of competition as a result of the merger:

- Continued access to existing Wincor and Diebold ATM products, parts and software for a minimum of five years.
- Access to any software upgrades which are made available during that period such that the ATMs owned by Cardtronics remain competitive.
- Ability for Cardtronics and other vendors to be able to maintain Wincor and Diebold ATMs (both Cardtronics owned and those owned by third parties) in the UK and to have access to the software, training and tools required to provide these services.
- Ability for Cardtronics and other vendors to be able to maintain and repair Wincor and Diebold spare parts.

Best regards
