

Anticipated merger between Central Manchester University Hospitals NHS Foundation Trust and University Hospital of South Manchester NHS Foundation Trust

Provisional findings correction

Paragraph 10.140 of the provisional findings report published on 15 June 2017 stated that the 18 NHS elective and maternity services account for around 16% of CMFT's NHS elective and maternity services only income. Similarly, paragraph 201 of Appendix C and Table 50 stated that the 18 specialties accounted for at least 16.5% of CMFT's total elective income in 2015/16. This is incorrect and the correct figure is that the 18 specialties accounted for around 37% of CMFT's total elective income in 2015/16.

These changes have been incorporated into the text of the provisional findings and appendices that is now available on the [CMA webpages](#).
