

# Freedom of Information request 2013-5277

Date received 6<sup>th</sup> November 2013

Date of response 7<sup>th</sup> November 2013

## Information request

As mentioned, I've been updating a Work Programme briefing for elected members across the Liverpool City Region and have found your quarterly standard analysis note extremely helpful to shape my work. In addition to this, I have found the Tabulation tool and the Google Visualisation tool a fantastic added benefit in analysing local data.

Further to our discussion, I was hoping to request the Local Authority-level figures for the Transparency Data measure by Payment Group for the currently available period (Jun 2011 – Jun 2012). This would greatly help develop my analysis of how successful the Work Programme is for different resident groups across the Liverpool City Region.

## DWP response

In response to your query we have created Work Programme data files containing information on **Transparency Data measure by Payment Group and Local Authority** and also **Transparency Data measure by Payment Group and Parliamentary Constituency**.

Due to the size of these files we have not attached them to this response but have added them to the standard zip file at

<https://www.gov.uk/government/publications/work-programme-data-used-in-dwp-visualisation>

The updated visualisation is available here:
